Vol. XVII.

JANUARY 4, 1913

No. 1

ARISTOLOCHIA GIGAS HOOKERII
Grown by William Kleinheins, Ogontz, Pa.

DEVOTED TO THE
FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY AT 11 HAMILTON PLACE, BOSTON, MASS.

SUBSCRIPTION, \$1.00 PER YEAR

START THE NEW YEAR RIGHT

SUCCESS is bound to follow if—you give "**THE HOUSE OF RICE**" your consideration when you buy Florists' Supplies or Ribbons.

MANY Progressive Florists did this the past year and in return they enjoyed the most prosperous year in their history.

YOUR case will be no exception—right **NOW** is the time to start.

WE have planned **BIG** in the past, but the year of 1913 **WILL** surpass anything that we have ever attempted.

COME along with us—we assure you that our dealings **WILL** prove mutually profitable.

M. RICE & COMPANY

For Buyers' Directory and Ready Reference Guide
See Pages 24, 25, 26, 27

THE item of freight on bulbs is well worth considering. In a year's time, you will find upon investigation, that the total is more than you may realize. Besides this, there are sometimes "advance charges" on freight bills, which you know nothing about, but pay, nevertheless. Did you ever investigate this "advance charge"? Florists who "import direct," as they term it, suffer most in this respect, though they may not know it. Count up the actual cost of the bulbs delivered at your city duty paid and freight paid—that's the way to figure right in comparing prices. In Japan Lily bulbs, by reason of the fact that we make deliveries at the cities named below, a saving to our customers is effected amounting to from \$2.00 to \$10.00 per 1000 bulbs. Isn't this worth your consideration? Besides this, isn't it better to get deliveries nearer home, where you can store your Cold Storage bulbs, and have easy access to them at all times of the year? Prices are practically the same. The *Horseshoe Brand Bulbs* cost no more per thousand than others, and usually much less per flower than any brand known. Prices sent upon application.

*The New Bulbology Book will be ready about March 1st--
Get your name on the list now.*

Not How Cheap
But How Good

RALPH M. WARD & CO.

THE LILY HOUSE

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Coelogyne cristata

As the days begin to get longer it will be well to let the temperature rise to 55 to 58 degrees which will be quite high enough for this orchid. Take advantage of every suitable occasion to give ventilation so as to keep the atmosphere fresh and sweet. From this out they will require very careful attention in watering and firing. When there is a spell of damp and mild weather always keep on some air and enough of fire heat to insure the right temperature which should be about 60 degrees. The changeable and trying weather will demand constant watchfulness with airing and firing. These orchids do not like to be forced into flower and should never be kept any higher than 58 degrees at night. When over forced they are very apt to hang fire in opening and the flowers are never so good as when grown cooler. Do not keep them too wet while in flower.

Bedding Plant Cuttings

Bedding stock propagation should start now and continue up to March. Keep on putting in, as time will permit, all such plants as roses, lantanas, fuchsias, begonias, antirrhinums, petunias, heliotrope, geraniums, coleus, etc. These will give good-sized plants that will bear quite a few cuttings later on. All these cuttings will need attention and care such as shade, careful watering and airing until they are well-rooted. Do not make the mistake of leaving them too long in the propagating bed. Just as soon as they have a nice bunch of roots they should be potted up. When potting use a rather light compost for a general run of cuttings—say fibrous loam four parts, well-rotted manure one part, and enough of sand to make it porous. See that this young stock is given a bench well up to the glass, so they will not draw. Do not stick them around in any old place and expect them to do well. Whether they will eventually pay you in the end depends much on how they are handled and taken care of now.

Cyclamen

As soon as young stock of cyclamen becomes large enough to handle nicely they should be moved into small pots. Use fibrous loam four parts, cow manure that has been well rotted one part, leaf mold one part and enough of sand to make it slightly gritty. This should be run through a coarse sieve. When potting do not place the little bulb too deep but just even with the surface of the soil. To keep them in vigor they will require a temperature of about 55 degrees at night with from 10 to 15 degrees higher on all bright days. Take great care in watering, for while they like an even amount of moisture

at the roots they will not tolerate a saturated condition and either too dry or too wet will give them a severe check. Where it is possible give these young plants a place well up to the glass. Keep the house well ventilated whenever possible and the atmosphere of the house in a moist state.

Ferns from Spores

Now is a good time to sow spores for small ferns for table use. Where possible the soil should be sterilized, to kill all foreign vegetation and fungus. Mix up a compost of new loam two parts, peat or leaf mold two parts, and one part of sharp clean sand. See that the pans are well drained with plenty of crocks. Upon the crocks spread some sphagnum moss and then fill the pans to within half an inch of the top, with the compost, but the last half-inch should be finely screened. Press the whole surface firm, absolutely level, water thoroughly and leave them three or four hours before sowing the spores. After they have drained out scatter the spores all over the surface and cover each pan with a pane of glass. These pans should be placed immediately in a frame that is covered with sashes. The temperature of the frame should be kept at 70 degrees with a reasonable amount of humidity. When the spores show signs of germination they should be given a little air every day and gradually increase it so that when the first fronds are seen they will be sufficiently hardened off to stand the full air of the house. When large enough to be handled they should be transferred in clumps to other well-drained pans and grown on.

Poinsettias for Stock Plants

Do not forget to save a good batch of poinsettias as stock plants. Select the best and when lifting leave all the soil that will remain and set closely together in boxes or flats, covering the intervening bare spaces with soil from the bench. These can be placed under a bench in a house that stands anywhere from 55 to 60 degrees at night. They can stay here until March or even later. During all that time they should be kept on the dry side, as it is their season of rest, but, of course, you should not let the wood shrivel for the want of a little water. This will give good stock to increase from when the time comes. It is better not to cut them back too hard, as the top canes which are well ripened can be cut into small pieces and propagated from.

Spiraeas

It is time now to bring in the astilbes, as Easter is early this year. Give them a cool house until there is a slight root action when they can be placed in a house where the temperature is about 50 degrees at night. Keep them as near the glass as possible and never let these plants suffer for want of water, as they need plenty of it all the time. When root action becomes very active they can be given a temperature of 60 to 65 degrees at night so as to be in on time.

Mr. Farrell's next notes will be on the following: *Asparagus*; Bedding *Geraniums*; *Bougainvilleas*; *Smilax*; *Marguerites*; *Salvias*.

Perennial Helianthus

To intimate observers of the early spring florescence of hardy herbaceous gardens the predominance of soft colors, especially in white, blue and pink shades is plainly evident. During summer we enjoy being regaled with a lavish abundance of strong tints, fully exhausting the entire floral color scale. As a distinct feature of the passing summer and early fall aspect we notice a great volume of yellow passing before our eyes—the golden waves of the rudbeckia, solidago, helenium, and helianthus varieties, gently swaying in a light breeze; hues vying with the coloring golden fruit of field and orchard, their intensity lending a certain element of visionary warmth to the cooler atmosphere of the season. It is the rich golden tone of nature, intensified in radiance in our garden. To absorb those beautiful pictures of billows of floral gold and to study the plant species producing them with a horticultural eye has been one of the delights of your writer during his busy years along the northern part of the New England coast. Characteristics of the best types of hardy helianthus are flower forms of a beautiful regularity in build. Especially the single varieties such as *Helianthus multiflorus maximus*, *mollis*, *orgyalis* and the popular *H. rigidus* Miss Mellish, leave a lasting impression. In stateliness of growth and in the production of that abundance of color indispensable for floral mass-effects, hardy helianthus prove highly satisfactory.

This is perhaps an assertion arousing the scepticism of some of my readers. Granted, hardy sunflowers as natives of this northern hemisphere certainly do not need a great amount of care. Nevertheless, if we interpret this in such a way as to plant them anywhere and in any kind of soil, to simply leave them to their fate, then we cannot expect more than under the primitive conditions provided by Nature for their wild growth. To bring about effects as shown in our illustration means to cultivate hardy helianthus; that is, to provide improved soil conditions and give the adequate care to plantations. The first result is likely to be a rapid spreading and the danger of smothering out nearby plants of a less rambling rootgrowth. For this reason I advise leaving helianthus out of the mixed herbaceous border. I always place them in a separate space, where they are easily kept in desired limits. Being of tall growth they require less tying up when given protection from violent winds and heavy rain storms. High woods or buildings, back, in the direction where the most storms come from are safeguards. In agreeable contrast with a solid background the effect is infinitely superior to a plain outline against the sky. In such positions the golden wave of color gains in volume and

brilliancy in the clear sunlight of the early fall days. We watch the interesting spectacle of myriads of singular flowers following with their faces the moving sun, until, at night, their heads bend in an angle that the petals may protect the center.

Perennial sunflowers can be most freely propagated by divisions of the rambling roots and, as a rule, need little or no winter protection, except along the northern boundaries.

Riverton, N. J. *Richard Rothe*

Red Spider

Red spider (*Tetranychus telarius*) is one of the most insidious foes that the gardener or florist has to contend with, for, be he ever so wary or careful it has frequently gotten a foothold and done some damage before the grower is aware of its presence. I think it a very safe generalization to say that a man's ability as a grower may be measured by his success or non-success in keeping his plants free of spider.

Red spider will attack the plants in stove-house temperature and right down the line of temperatures to the violets growing at 45-50 degrees, thick leaves or thin, grapes or peaches, roses or carnations; in fact anything and everything is acceptable to this pestilential creature. Nor does it confine its attacks to greenhouse plants, for the writer has seen large elm trees (whose foliage has turned yellow and dropped off early in August) and coniferous hedges nearly ruined by its attacks.

The above may be, and is, probably well known to all readers of HORTICULTURE, but "Error, sir! damnable error" is the burden of my story, and this error in common with its kind is most long-lived—yes! even to being something more than a centenarian—and has been (also in common with its kind) productive of lots of evil consequences. Who has not heard in the years whilst learning their trade "damp the floors well," "keep a moist atmosphere, 'twill keep down spider"? Well! *it won't*; not a bit of it! Not any more than if you played them a tune on a tin-whistle (the said tune to be for the benefit of either the plants or the spider). This was proven beyond any shadow of a doubt to me by the following instance. In an aquatic house where nearly all the floor space was taken up by a tank devoted to the growing of *Victoria Regia* and various other aquatics and where the atmosphere was at all times kept near the saturation point owing to the heating pipes under water, spider flourished, and particularly on some *Cyperus alternifolius* which stood around the edge of the tank with their pots partly immersed in the water, and some of the leaves whose stems were bent were half in and half out of the water, too. Owing to its being an aquatic house very little syringing was done and the cyperus above referred to were literally swarming with spider after being some two or three months over this steaming tank. Now, is it not as plain as a pikestaff, that if moisture has any virtue in checking or keeping down spider it should have done so in the case cited where there was "Water, water everywhere." The writer knows very well that what is revelation to one man is not such to another, nor does he wish any of the readers to take the above instance as a final test, but rather would suggest to all and sundry that they make a fair test for themselves, as the proof or disproof of any statement which is demonstrated to us by actual experiment is worth a ton of theory, and generally will be remembered for life.

Granted then, that the time-worn moisture theory is forever untenable, to what shall we turn? And the

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Dark Weather

With us so far the weather has been clear and bright, so that there is little cause for complaint. We only hope that it shall continue to be so although there are times when a little colder would be appreciated. This I suppose is a strange thing to say, the price of coal being where it is. The Christmas storm tied things up a bit but all is running along nicely once more.

Do not make the mistake so commonly made and keep the houses too warm during the dark cloudy weather when such happens to come. This will lead to weak wood, weak plants and finally to disease. About 66 degrees F is right for the highest day temperature for most varieties of roses. This can be varied according to conditions, varieties grown, and also according to the way the plants are growing. Plants right after a heavy crop can be run much cooler and benefit by it, than plants just about to throw a bumper crop.

Sometimes trouble will be experienced in opening some of the more double varieties. We have never been troubled this way although we have heard from growers who have. We find that the variation of temperature during the night will help somewhat, but we would not advise any one to do so unless they first experiment with it on a small scale. Should you experience trouble of this sort do not water your plants heavily, thinking that may help. We find that keeping the plants on the dry side helps far more than all water will.

The Cuttings

These will take water every day the first few days that they are in sand, providing of course that the drainage is good, and this should be if it is not, for poor drainage does more harm than many other causes put together. Instead of poking moss into all the holes, put some broken pots or something similar into the bottom of the benches and then cover these with moss or anything that will hold the sand in place and yet allow the surplus water to pass away unhindered. Keep an eye on the thermometer, and see to it that the temperature in sand is not allowed to drop too low as is often the case. Then the cuttings after a few such chills will not root for another week or more and we all know what that last week means to the foliage of the cuttings in sand.

The Pots

Are you sure you have enough pots on hand to meet all

requirements? If not do not delay in getting quotations from some of the leading manufacturers advertising in this paper and place your order at once. I wonder how many readers took our advice last summer and had all their pots washed during the hot summer days. Those who did not will no doubt find themselves somewhat hindered in their work having a lot of pots to wash every time they want to do some potting; it is no pleasant job during the cold weather either. Be sure to have your pots clean no matter how much it will set you back. You will find it all pays in the long run. Always bear in mind that you are building for the next season, so be careful and begin with a good foundation.

The New Roses Again

Although we recommend that all give the new ones a little bench space it would hardly be wise to jump in and plant the largest part of the place with some new variety, just because Mr. So-and-So has had wonderful results with it. Take things a little slow and make sure you can handle the variety before you attempt to grow it on any large scale. There are several good ones being put on the market this season and they appear to be real promising, so give them a trial.

A Good Investment

This is not going to be what you may have supposed but it is good just the same. It applies especially to the growers of moderate means "who are so busy they just simply cannot get away not even for a day." To these this is to apply: Arrange to have at least a day off and go and take a look around and visit some of the men you do business with. It will do you good and them, too, beyond all doubt. And not only your customers—visit your competitors as well. Do away with that hard feeling and look upon business as a game. Surely you would not be sore if your friend beat you at a game of checkers or something similar. We make it a point to send congratulations to any one scoring a few points more in any competition and believe in taking our hat off to any one who has beaten us in any way.

Therefore go over and see the other growers. They are much different than you imagined and first thing you know you will go in with one or two to buy a carload of bone and save a few hard-earned dollars by doing so. You can arrange to go out if you try and then see with what ambition you will tackle the work when you return. Try it!

answer is VIOLENCE. Yes, violence is the only persuasion that has any effect on red spider; violence applied through the hose by water under about fifty to seventy pounds pressure, and with this in the hands of the careful and thorough cultivator (coupled with eternal vigilance) the terrors of red spider disappear like mist before the morning sun.

Insecticides and fumigating material have been tried by all of us, but never has it been the good-fortune of

the writer to find any of these effective against this pest, except where used in sufficient strength to injure or kill the host plant.

bottom of the ladder. Each represents trade interests of no small magnitude, built up by assiduous application and business ability of a high order. As representatives of the cut flower and florists' plant industry respectively, both gentlemen are recognized leaders and personally they stand high in the respect and esteem of the craft. The national society is to be congratulated on being able to draw upon the services of men like Adolph Poehlmann and Thomas Roland.

In presenting our compliments to
Congratulations President Farquhar on his accession to the highest honor which the national society can bestow we must couple with it our sincere congratulations to retiring President Vincent on the material prosperity which has come to the organization during his administration and on his earnest work and fidelity to the trust given into his keeping by his fellow-members. Mr. Farquhar, we know, assumes the duties of his office with an equally deep and earnest spirit of loyalty and a sincere purpose to promote in every way possible the welfare of the society and, through it, the best interests of its members, individually and collectively, to the end that every branch of American horticulture may be advanced and spurred on to new activity.

After the test of another year the system of
Credit credit control devised and put into operation
control by the wholesale flower dealers in New York city has still further proven its utility and, we are informed, a somewhat similar arrangement, since adopted in Chicago, is also accomplishing its object. It is worthy of notice that retail dealers in New York who were at first disposed to be antagonistic to the regulations imposed have now assumed an attitude of cordiality and approving acquiescence. We do not think that any honestly disposed dealer, either wholesale or retail, would care to see the old slipshod conditions of reckless credit-giving ever again resumed in New York. Other cities and other departments of the trade might advantageously fall in line.

It is a good omen and most encouraging
Getting sign for the advocates of modern publicity
there methods in Society work when a conservative body like the Massachusetts Horticultural Society gives practical evidence of its faith in the movement by employing a trained publicity agent to care for its outside interests during the coming year and arouse a greater public appreciation and support for its exhibitions and lectures. Let us hope that the day of flower shows composed of superb examples of cultural skill and empty aisles has gone never to return. The appointment of Mr. Edgar to the position of publicity agent is not an untried experiment in Boston. His success in a similar capacity in connection with the National Flower Show of 1911, the Japanese and Italian gardens, and the last chrysanthemum show in Boston, indicates what we may look for now that he has a permanent official responsibility.

Excellent
 appointments
 It will be universally conceded that President Farquhar's two appointees on the Executive Board of the S. A. F. are eminently well qualified to fill the position. Both are self-made men who started from the

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Bottling Grapes

To the great majority of American people this term of bottling grapes would convey the idea of partly cooking or preserving them. Some might take it to mean "canning" in some way as other fruits are done, so I take it this must be an entirely British phrase where canning is substituted by the making of jam. "Bottling," as the word is here used, means to remove the bunches from the vines so that the latter can rest and keep the grapes in good condition until they are needed for use. At no other time of the year is the advantage of a properly constructed fruit room so brought to our notice, as the atmospheric conditions play such an important part in the keeping of grapes. While in the house the temperature can be regulated, but not so evenly as in a fruit room because the sun does not have the same effect on the two houses. Again there is no need for any water to be around in a fruit room. The temperature must be kept even night and day; 40 to 45 should be the extremes. This will be best regulated by a coil of hot water pipes in the room, hot water being given a preference to steam as it is less erratic.

Ordinary three half-pint bottles are suitable so long as they have a long neck to them. There is a bottle on the market made for this work but it would not pay to install them unless a good quantity was needed. Whatever kind of bottles are used they must be thoroughly cleaned or sterilized before coming into use. After this fill them to the bottom of the neck with clean water and push a couple of pieces of charcoal in also, which will help keep it sweet. When filled they should be made to take an oblique position either by having racks made for them or by a temporary arrangement. When building a fruit-room have the racks made at the time.

Cut the bunches and retain all the lateral with them. The base end is usually long enough to push into the neck of the bottle and reach the water. If this should be too short use the other end, which will answer the same purpose, and see that the berries hang clear of the bottle. If the space between the lateral and neck of the bottle is sealed up it will stop evaporation, otherwise if left any length of time a little water must be added as that in the bottle recedes below the end of the lateral. When doing so take care not to wet the berries. With a right atmosphere very few berries should go wrong, yet it will be wise to look over them occasionally. Grapes handled so will keep for a long time; a little flavor is unavoidably lost yet they will always be found palatable.

Top-Dress Strawberries

Soon after coming into growth the early batch of strawberries will be seeking nourishment. Turn out a plant to make sure the roots are working, and if so, give them a top dressing of good soil and add some lasting manure to it. Remove any dead leaves and as much of the surface soil as you can without injuring the roots before adding the new soil; make this moderately firm about the roots. This top dressing plays an important part with all strawberries, as no more feeding is advis-

able until after the fruit is set, so it needs to be made of good material. To feed from now on with strong manures would grow a quantity of soft foliage; some of the plants would go blind and when they should feel the effects of good feeding and do the fruit some good they are already immune to it and you fail to get what you should. It is like giving the best right from the start and having no persuasives left for the final. Raise the temperature of the house to 50 to 55F at night. Get under the foliage well with the hose or red spider will be there. Any negligence in airing will soon give strawberries a dose of mildew. Other batches can be brought in at intervals of ten days or two weeks, following the same routine as these have done. Where the plants have been covered over in any way to prevent freezing they ought to be looked over periodically, as the crowns are liable to go rotten. It is not a good practise to cover them this way yet some still do it. Mice and rats are also liable to take a liking to them.

Cucumbers

A sowing of cucumbers to substitute those that have been cropping since fall will be beneficial. If the house is filled at the present time, half can be discarded to make room for the younger generation when they need it. Sow the seeds singly in "threes" the same as with melons. Improved Telegraph is the best averaged-sized fruit. Smaller ones and more of them suit some places better; "Every Day" will fill the bill here. Where a cucumber with some size is appreciated grow "Satisfactory."

Onions and Leeks

Exhibition onions and leeks should be sown now to give them a long growing season. This is especially applicable to the cooler States. Have a flat well-drained before filling with fine light soil. Level this off and press it down only firm enough so that, when watering, the soil will not move. It will be found easier to water the soil before sowing the seeds and let it settle down; then all that is needed is a light covering for the seeds. Cover the flat with a piece of glass to prevent evaporation until the seedlings show through. A temperature of 60 degrees will suit them until the seeds germinate when a little cooler place will have to be found for them. Onions and leeks are deep-rooting things, therefore must be potted off early or some roots will be broken. Ailsa Craig has yet to be beaten as an exhibition onion and Prizetaker leek still holds its name.

Aristolochia gigas Hookerii

Our cover page illustration this week shows an exceptionally well-grown specimen of this singular and always interesting greenhouse climbing subject. It was grown by William Kleinheins of Ogontz, Pa. The plant had sixteen buds and every one came out in perfection. The flowers are 12 inches wide and 24 inches long and the "tails" or caudal appendages from 28 to 30 inches in length. These large blooming aristolochias are often called the "pelican flower."

CLUBS AND SOCIETIES

LANCASTER (PA.) FLORIST CLUB.

On Dec. 19th this club met and had a very good paper read by Harry Weaver of Bird-in-Hand, on the subject "Should We Grow More of a Variety for Christmas?" in which he emphasized the fact that the grower who is supplying the wholesale market through a commission house is better off if he sticks to one or two things and grows them well. He also deplored the fact that in buying seeds for special crops results were not nearly so good from bought seeds as could be procured later on from seeds of one's own growing and selection. In the discussion that followed it was generally conceded that, situated as we are, considerable distance from our market, it is best to stick to the standard varieties where growing for cut flowers.

A committee was appointed to arrange for a banquet after our next meeting, which will be a sort of banner affair starting with a visiting trip to Strasburg at 1 P. M., Thursday, Jan. 16th, and returning to Lancaster for the meeting and, after the meeting the banquet in the form of a social session. Any out-of-town florist who happens to be in the city on this date should meet the crowd at the Traction waiting room and join us.

JOHN K. M. L. FARQUHAR

President Society of American Florists and Ornamental Horticulturists.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

New Directors Appointed.

President J. K. M. L. Farquhar has appointed August F. Poehlmann, Morton Grove, Ill., and Thomas Roland, Nahant, Mass., as members of the Board of Directors to serve three years from January 1, 1913.

JOHN YOUNG, Secretary.

CLUB AND SOCIETY NOTES.

The 27th annual meeting of the Oregon State Horticultural Society was held December 18th to the 20th. It was a very successful meeting.

The meeting of the Oregon-Washington Association of Nurserymen will be held on the 13th and 14th of January at Kennewick, Wash., and immediately following on the 15th, 16th and 17th will be the meeting of the Washington State Horticultural Society at North Yakima, Wash.

The Tarrytown Horticultural Society will hold their Fourteenth Annual Dinner at the Florence Inn, Broadway, Tarrytown, N. Y., on Wednesday evening, January 8, at 7.30 P. M. Long experience and a set of enthusiastic officials give assurance that this event will be one of the gala occasions of the season, well-filled with wisdom, wit and well-ordered festivity.

HORTICULTURAL CLUB OF BOSTON.

Fred Dawson of Olmsted Bros., and W. P. Edgar were guests of the Horticultural Club of Boston at its monthly meeting, January 1. A rich centrepiece of azaleas and ferns by E. Allan Peirce graced the dining table. William Sim contributed two large vases of Zvolanek's new winter-flowering Spencer sweet peas, this being the first time they have been shown. No word description can do justice to these lovely things, the names of which were published for registration by the S. A. F., last week. These names, given by Mr. Zvolanek, were freely criticised as being inappropriate. R. & J. Farquhar & Co. presented an arrangement of poinsettias with the graceful sprays of Buddleia asiatica, producing a brilliant and really sensational effect. The delightful perfume of the Buddleia filled the room.

An invitation to the S. A. F. to hold its convention in Boston in connection with an outdoor summer show in 1914, was advocated and unanimously favored by the gentlemen present.

Get them at Dreer's

The Dreer Strain of Double Petunias

For nearly half a century the majority of the growers in the United States have been depending on the Dreer Strain of Double Petunias which this season compares favorably with stock we have supplied heretofore.

We offer for immediate delivery, good three inch pots, which will quickly furnish a good supply of cuttings, in fifteen varieties, 75 cts. per dozen; \$6.00 per 100; or the set of fifteen varieties, one of each for \$1.00.

Seed of our **SUPERB STRAIN OF FRINGED PETUNIAS**. Double, 75c. per 500 seeds; \$1.50 per 1000 seeds. Single, 50c. per trade pkt.; \$1.00 per 1-16 oz.; \$1.50 per 1/4 oz.

Our Quarterly Wholesale Price List, issued January 1st, offers a full line of seasonable Plants, Seeds and Bulbs.

The above prices are for the Trade only.

W. & T. SMITH COMPANY, Geneva, N. Y.

Horticultural Society was the appointment of W. P. Edgar as publicity agent. This is a new office and contemplates a lively and continuous campaign through the newspapers and other approved methods of attracting public attention to this society's activities.

W. P. EDGAR

ities. Mr. Edgar is already well-known to many members of the florist and associated trades through his work as advertising man with Manager Campbell at the National Flower Show in Boston in 1911.

CLUB AND SOCIETY NOTES.

The regular monthly meeting of the Florists' Club of Washington will be held on January 6, when numerous matters of importance will be discussed.

The thirty-first annual meeting of the American Forestry Association will be held at the Hotel Willard, Washington, D. C., on Wednesday, January 8, 1913, starting at 12 o'clock noon. Experts are to make addresses and lead discussions on important phases of forestry.

Meetings of the different St. Louis clubs and societies this month are: The St. Louis Florist Club on Thursday, Jan. 9. Feature—"Review of the Christmas Business." The Retail Florists' Association on Monday, Jan. 19th. Feature—a paper by Theo. Miller. The Engelmann Botanical Club, Monday, Jan. 12.

The inaugural meeting of the Massachusetts Horticultural Society for the year 1913 will be held at eleven o'clock A. M., on Saturday, January 11, 1913, at Horticultural Hall, Boston. The business of the meeting will be an inaugural address by the president, the report of the board of trustees, the report of officers, and the reports of the chairmen of the various committees.

A MUNIFICENT GIFT.

As a Christmas gift to the city of Newport, R. I., George Gordon King has offered his entire estate with the request that the grounds be used as a public park and the dwelling house as a library. This estate, which contains about eight acres situated near the centre of the city, has long been kept in excellent condition and is well furnished with shrubs and large handsome trees, which should make it an ideal park.

NIAGARA

One of the wonders of the GLADIOLUS world

In type the variety resembles "America," but the flowers appear to be somewhat larger, measuring $4\frac{1}{2}$ inches across. In color the flowers are a delightful cream shade with the two lower inside petals or segments blending to canary yellow. The flower spike is very erect and stout and is wrapped with broad, dark green foliage. The variety is evidently destined to lead in the cream colored varieties.

Awards. 1911—Certificates of Merit from Mass. Hort. Society, Boston, and Dutch Bulb Society at Haarlem, Holland. 1912—American Gladiolus Society, open class award for finest yellow.

Fine Bulbs. \$3.50 per dozen, \$25.00 per 100.

BRITISH HORTICULTURE.

The Christmas Flower Market.

The increased attention now being given to floral adornment in the Christmas decoration schemes each year puts a greater strain on the Covent Garden market machinery in London. At this period the many market florists on the outskirts of the metropolis contribute their best. These home supplies are augmented by the French consignments, which usually reach the market bright and fragrant despite their cross-channel journey. Chrysanthemums, of course, play a prominent part in the Christmas stock-in-trade, and generally there are lavish supplies available from the florists who specialize in this particular line. This time, however, these popular flowers were not so plentiful, and prices were unusually high. The shortage was due to the early frosts in October. White blooms were particularly scarce and dear. White Thompson was to be seen on several of the stands; Madame Therese Panckoucke and Niveus are two useful late whites. Nagoya is the principal yellow; other late sorts in favor are: Framfield Pink, Winter Cheer (deep pink), and Tuxedo (bronze). The larger selection of perpetual-flowering carnations in cultivation has caused these attractive blooms to be more extensively utilized for Christmas embellishment. The supplies were not equal to the increased demand. The chief market varieties include: Britannia, Enchantress, Mrs. H. Burnett, Mrs. T. W. Lawson, White Perfection, Winsor, Beacon, Mayday and British Queen. The French flowers also showed a shortage, the blooms on sale comprising violets, mimosa, narcissi, ranunculus and anemones.

Awards for Novelties.

At a recent show of the Royal Horticultural Society in London awards of merit were made to a number of floral and fruit exhibits as follows:

Three chrysanthemums, by Wells & Co., Mrs. A. Brooker, decorative Japanese, chestnut crimson; Eric Wild, single-flowered pink; Mrs. Wingfield Miller, single-flowered rose pink. The same firm showed carnation Bonfire, the American variety. A. F. Dutton, staged his new carnation, Mrs. A. F. Dutton. This is stated to be a sport from White Perfection, and is of a pleasing shade of pink. J. J. Parker & Co., exhibited Asplenium divaricatum elegans, a very useful fern for the market grower. W. H. ADSETT.

HORTICULTURAL EXPOSITION AT ST. PETERSBURG.

(From Consul General John H. Snodgrass, Moscow.)

This office has been advised by the Russian Department of Agriculture at St. Petersburg that an International Horticultural Exposition will be held in that city in April, 1913.

The exposition will consist of the following sections: Flower culture; decorative horticulture; greenhouse plants and outdoor plants; pomology; fresh and preserved fruits; vegetables; preservation and use of fruit and vegetables; grains; bee culture; silkworm culture; house plants; scientific section; scholastic section; tools, instruments, and material for horticulture; floral art; and a commercial section.

There is to be a series of awards for each exhibit, the most important of which are to be presented by His Majesty the Emperor. This exposition is being arranged to commemorate the 300th anniversary of the reign of the Romanoff dynasty.

OBITUARY.

Mrs. George Harbison.

Mrs. George Harbison, wife of George Harbison, superintendent at W. H. Elliott's establishment at Brighton, Mass., died on December 23 after quite a long illness. Mr. Harbison has the sympathy of the trade in this section.

ARTHUR T. BODDINGTON

SEEDSMAN

342 West 14th St., NEW YORK CITY

Seed Trade

A Seed Trade Bomb.

A time honored custom of the American people has been to pay five cents a package for their seeds, flower or vegetable. Of course, we would once in a while see the "fire sale" wagon on the street—ten for a penny! But five cents has been the standard. Now then—five cents is too low but what we want to discuss now is an entirely new phase of the matter—injected into the arena by Burpee. We have felt for many years that twenty-five cents ought to be the standard for packets, instead of five cents, but here comes Burpee with a school-children's proposition at half of five cents—in hundred lots.

The idea is so revolutionary that we hesitate to talk about it—outside of seed trade circles, where matters of that kind would be understood. Nevertheless there are some potentialities about this that appeal to the idealist and the prophet—things that suggest future possibilities and HORTICULTURE is so broad and its readers so catholic that this seems a proper place to analyze it.

For one thing: There is nothing more fundamental than the kid. Get the young idea a-budding and throw your manna around. Long after you and I and Burpee are gathered to our fathers, these notions about interesting the kids will be bearing fruit and to this new altruistic inspiration to give the school children seeds at one-fourth their value, I as a business man, object. It will demoralize values. Values are far too low now without making them worse. Abroad, they get a shilling (twenty-five cents) for what our seedsmen sell for one-fifth (five cents) which is ridiculous considering the relative cost of other commodities here and abroad. Our American tourists expect to purchase goods at just about one-half American prices, and that's pretty near about what they do pay. But if our American tourist starts in to buy seeds on the other side he pays—not half of the American price but five times the American price, and this because the people in Europe have a keener idea of the value of the seedsmen's business in selecting and reselecting and cleaning and polishing and charging according to the labor and brains put on it! We American seedsmen are doing the same—if not better and brainier—work and are not getting a quarter of what we are entitled to. Our every five cent package is twenty-five cents on the other side ergo if "a dollar equals a shilling," for every packet we now sell for five cents we ought to get a dollar. Now go ahead and thresh it out. There's my case!

G. C. WATSON.

Send for our Flower Seed Order Sheet. It's very handy to order your Flower Seeds from this order sheet.

HENRY F. MICHELL COMPANY

518 Market Street - - - Philadelphia, Pa.

porary quarters expects to put up a building next spring for his own use.

Department of Agriculture wants to know how to produce an odorless skunk, sort of a pure food polecat. Move to leave it to a committee composed of "Wizard" Burbank, Dr. Wiley, the man who invented attar of roses and any citizens whose olfactories are not working. New York Telegram.

Edwin Lonsdale, in a letter just received, states that while some parts of California, both north and south of Floradale, have had rains, that section has had less than one-half inch of rainfall since last March. They now have an irrigating plant in operation, however, which, although not so good as rain, is yet a most excellent substitute.

In the most disastrous fire that Newport, R. I., has ever known, and in which two lives were lost, on the morning of December 29, the building and stock of the George A. Weaver Co., seed and agricultural supply dealers, were totally destroyed. The fire is believed to have been caused by an explosion of gasoline. The heat also broke the plate glass window of Stewart Ritchie's florist store.

The Vermont legislature is trying its hand at so-called "pure seed" legislation. In October such a bill was filed, which, if it passed, would have made it impossible to sell or move a pound of seed in Vermont, so utterly impossible were the regulations. Upon report of this bill to Vermont seedsmen by counsel of the American Seed Trade Association, this bill was quickly killed in the committee. Now the committee has filed another bill which is a copy of the Maine law—decidedly more fair, but yet requiring amendments to make the bill, if enacted, really workable.

CATALOGUES RECEIVED.

Sluis & Groot, Enkhuizen, Holland.—Advance Price List of Vegetable Flower and Agricultural Seeds. A very extensive list, wholesale prices quoted up to cwt. on many items.

Firma H. H. Pein, Halstenbek, Germany.—Wholesale Price List of Evergreens, Deciduous Trees and Fruit Tree Stock. August Rolker & Sons, New York, are American agents for this firm.

Samuel McGredy & Son, Portadown, Ireland.—Rose Catalogue. A very handsome publication with plates showing beautiful portraits of ten new introductions in H. T. roses. Cover in rich purple and gold embossed on white. Blue ink used throughout the contents.

M. Herb, Naples, Italy.—General Catalogue of Seeds. Vegetable, flower, grass, aquatic, conifer, palm and so forth are all included in this extensive list, which is given in three languages. From the same establishment comes a handsomely illustrated list of novelties for 1913.

Watkins & Simpson, Covent Garden, London, Eng.—We have received three publications from this firm—"Special Offer of Flower Seeds," season 1913, "Novelties in Vegetable and Flower Seeds" and "A Souvenir of Our Gold Medal Exhibit." The latter contains eight plates photographed in natural colors showing exhibits at International Exhibition and views in the nurseries at Feltham.

Sutton & Sons, Reading, England.—The annual catalogue of this well-known seed firm has just reached us. It is a big volume of over two hundred pages, bound in mauve and with silver lettering and profusely illustrated with half-tone cuts of remarkable beauty which show up at their best on the heavier paper used as compared with our American catalogues. Judging from the evidences in the higher class British horticultural catalogues the art of plant and flower portraiture has reached a development rarely attained by our American photographers. Special equipment and plenty of experience are required to secure the best results in this distinct class of work.

LILIES

Lilium Myriophyllum
Lilium Sargentiae

The bulbs of these magnificent new Lilies are now ready for delivery. For the best results next year, they should be planted at once.

Of Interest to Retail Florists

Portland, Me.—Dyer, florist, 515 Congress street, will soon move to a new location nearly opposite his present store.

Baltimore, Md.—Christmas brought to the florists of this city a larger business than they had expected and gave a satisfactory finish to the year. Every line has been well patronized and the large stocks laid in by various retailers were well cleaned up at good prices. American Beauty roses brought from \$12.00 to \$20.00 per doz., best White and Pink Killarney, \$9.00 per doz. Long Killarney ran short. Rich-

mond sold for \$9.00 per doz. but was scarce. Other grades in roses brought \$3.00 to \$6.00, carnations \$2.00 to \$3.00, narcissi, daffodils, lily of the valley, etc., \$1.00 per doz. Violets, double, \$4.00 and single \$3.00 per 100 and cleaned up well. Orchids sold for \$1.50 and \$2.00 each.

Detroit, Mich.—Again we have passed through one of those nerve-wrecking experiences called Christmas with a financial result far in excess of that of last year. Everything cleaned up well with a slight overplus of violets and poinsettias. Carnations were somewhat scarce and at price of \$3.00 per dozen, many would-be purchasers turned toward plants; still none were left over. Demand for palms and ferns was not as great as in former years. Heavy stocks of flowering plants, though, and plant baskets cleaned up very well at usual prices. Many social gaieties scattered around Christmas and New Year keeps us going at a very rapid pace with hardly a chance to recoupe from the holiday effects. Club and hotel orders for New Year are considerably more liberal than a year ago and all local florists have a right to look back upon 1912 as the most prosperous one so far.

HORTICULTURE

STARTING THE NEW YEAR

The first thing you must do is to replenish your stocks. The florists' business is different today from what it was five or ten years ago when once or twice a year was the rule for stocking up. Nowadays there is business all the time, and the wide-awake florist must keep constantly abreast and keep his stocks up to the minute.

DON'T WAIT BEGIN NOW. FOR INSTANCE, BE SURE YOU HAVE PLENTY OF

OUR STANDARD PREPARED CYCAS; known all over for their superior quality and finish; wide and perfect leaves; unsurpassed by anything on the market.

OUR MAGNOLIA LEAVES are the very best, and you ought to have a full supply for working up in spare moments. Brown, green and other shades.

OUR WHEAT SHEAVES; known everywhere as the standard in quality and value.

THE BAYERSDORFER LINE OF BASKETS; a magnificent assortment; all shapes and for all kinds of flowers; for plants; fern dishes; table decorations, etc., etc.

Our Silent Salesman is ready to tell you all about the above, and other florists' requisites. Send a postal.

H. BAYERSDORFER & CO.

THE FLORISTS' SUPPLY HOUSE OF AMERICA

1129 ARCH STREET, - - - - - PHILADELPHIA, PA.

WASHINGTON NOTES.

I. Rosnosky, of Philadelphia, spent New Year's Eve celebrating in this city.

O. A. C. Oehmler, secretary of the Florists' Club of Washington, has been admitted to membership in the Washington Chamber of Commerce.

G. C. Shaffer expects to take possession of his new store, which is located diagonally across the street from his present location at 14th and Eye streets, N. W., early next week.

E. C. Mayberry, ex-president of the Florists' Club and a member of the firm of Mayberry & Hoover, has so far recovered from his recent accident as to be able to go about his home with the aid of crutches. Mr. Mayberry shot himself in the foot while hunting recently when the ground on which he was walking gave way beneath him causing the gun to discharge.

Gude Bros Co. did the decorative work on the occasion of the fancy dress ball given by Mrs. W. F. Draper, which was considered to have excelled any social event given during the year. American Beauty roses, holly and mistletoe were used in profusion. Over each of the thirty tables set in the banquet hall was a sunshade three feet in diameter in white and green, from which hung ten old-fashioned bouquets, later used as floral favors.

Washington is peculiarly situated due to the fact that merchants have to depend largely on the employees of the Government for patronage. The change in administration has caused considerable talk to the effect that many discharges would be made and that for this reason money would be very tight for some months. An interview with several of the large dealers would show that they have little fear of any large number of discharges being made among the flower buying employees and that politics would have little effect on the business. They further claim that regardless of the fact that 1912 was a presidential year, they slightly exceeded 1911 in the amount of business done and fully expected to achieve even better results in 1913.

A TEXAS FLOWER STORE.

The illustration shows a view in the flower store of the Lone Star Floral Company, Dallas, Texas. Charles Chollar, manager, tells us that the plant, flower and holiday greens trade

boomed for Christmas and considering the exuberant display and attractive setting so well set forth in the picture, we can't see how the Dallas people could well help it.

PHILADELPHIA NOTES.

Big preparations are being made by the Michell Co. for their annual poultry show, which opens on the 16th inst.

Bayersdorfer is out this week with the latest in auto delivery wagons—big, handsome, efficient. The first of its kind among the supply houses.

B. Eschner, head of the firm of M. Rice & Co., gave a dinner to the employees of the house at the New Bingham Hotel on the evening of Dec. 30th. This was followed by a theatre party at Keith's.

Samuel S. Pennock has the sympathy of the trade during this festive

season. His oldest boy and the two girls are down with pneumonia. Samuel, junior, was stricken on the 24th. Dr. Stauffer says the crisis will occur on the eleventh day—January 4th. The other two cases are not considered as so serious.

Stephen Mortensen is sending some of the finest Richmonds we have ever seen to this market. This grower is especially commendable not only for his fine culture but for careful grading, counting and packing. Many of our big growers are very lax in the latter respects.

Visitors: T. Malbranc, Johnstown, Pa.; T. A. Higgason, Richmond, Va.

HART MAKES HANDLES FOR POTS

With Paper or Porto Rican Mats They Make Baskets. These are the Well-Known HART'S HANDY HANDLES.

Shipments are being made daily eastward to Boston, westward to San Francisco—and everywhere else. Once used, always used, because they are SO HANDY.

Prices per dozen—No. 1, \$2.50; No. 2, \$3.50; No. 3, \$4.00;
No. 4, \$5.00; No. 5, \$6.00.

GEORGE B. HART, 24 Stone St., Rochester, N.Y.

CHICAGO NOTES.

Installation of officers at the Chicago Florists' Club took place Jan. 2nd.

The Chicago Carnation Co. is mailing out attractive calendars this week.

Ten thousand visitors were counted in Garfield Park conservatories Sunday, Dec. 29.

E. Wienhoeber Co. has Joseph Paquette formerly with Smith & Feters of Cleveland, O., among the store force.

Mr. and Mrs. Peter Olsem have the sympathy of the trade in the loss of their four-year-old son, Robert, by diphtheria, Dec. 30th.

Mrs. Michael Fink is quite ill as the result of making a mistake and taking oxalic acid for what she thought was a dose of simple medicine.

A timely article on the wearing of artificial flowers by Sarah Bernhardt appeared in the local papers this week. She regards them when well done, as being as worthy productions as pictures.

The retail flower store of Leopold Koropp, Evanston, Ore., is now in the hands of an assignee and an effort is being made to force the business into the bankruptcy court. A decision is expected soon.

P. Duris and P. Papus are preparing to open a first-class retail store at 35 Broadway, Detroit, Mich., early in January. Mr. Duris has been with the Alpha Floral Co. for some time and will now act as buyer for the new store while his brother, Louis, will assist Mr. Papus in the Detroit store.

The Foley Manufacturing Co. has received a very gratifying letter from Joseph Thomas, Greensburg, Pa., who has just added a Foley range to his extensive plant. The letter says: "The frame is certainly the easiest and most simple to erect of any house we have built. The use of drive tools, rat 'all files and other devices are eliminated entirely in the course of erection. Many florists who have been through the house pronounce it the most modern, up-to-date house they have ever seen."

Chicago retailers found the sales of baskets, filled with anything except

cut flowers, to be more in demand than ever before.

In one of the large retail stores in the down-town district was seen a row of beautiful baskets filled with plants, each bearing a number. The customers' selections were delivered direct from the greenhouses, saving much time and confusion in the store.

The shortage in azalea plants, owing to the September frost in Belgium was not felt so much as was anticipated, such a good supply of all other plants being available. Then there were really many fine azaleas in the market grown by those fortunate enough to receive their stock early.

The holiday exhibit of blooming plants at the Garfield Park conservatories is being viewed by a large number of people each day and evening. The largest attendance naturally is on Sunday, but the count on Christmas day proved remarkably large. A special feature of this year's exhibit is the begonia plants—900 Gloire de Lorraines, each plant an almost perfect specimen, were massed in three divisions and the effect was fine. In one instance there was a bed of Glory of Cincinnati just opposite and a splendid opportunity was afforded to contrast the French and the American varieties. The color of both flower and foliage of the Glory of Cincinnati is deeper and more pleasing and August Koch, head gardener, says its lasting qualities are much superior. The beds of poinsettias were all single-stemmed plants and a sloping side bench was cleverly broken up by paper-white narcissi and stevia. Mr. Koch came to Chicago last April from the Shaw Botanical Gardens, St. Louis, and says he sees a difference in the climatic conditions here not altogether favorable. It is his first winter here, he having come in April to succeed John Sell, gardener for many years, who passed away in February.

Visitors—J. J. Karins of H. A. Dreer, Philadelphia, Pa.; C. C. Young, St. Louis, Mo.; B. H. Flynn, Columbus, O.; M. Rochlin, Sioux City, Ia.; F. Gorley, St. Louis, Mo.; Mr. Langhins of Van Zannevelt & Phillipps, Sassenheim, Holland; E. J. Fancourt of S. S. Pen-

nock-Meehan Co., Philadelphia; Robt. Karlstrom, South Orange, N. J.

NEWS NOTES.

Modesto, Cal.—Charles Fellows has opened a nursery yard at Eleventh and J streets.

Scotch Grove, Ia. — The Scotch Grove nursery has been leased by F. W. Royden of Lynnvile.

Santa Cruz, Cal.—T. B. Butterworth, nurseryman of Watsonville, is about to open a nursery sales yard on Lincoln street.

North Manchester, Ind.—W. D. and C. G. Bruner are now owners of the Riverside greenhouses formerly owned by J. J. Martin.

Brooklyn, Mich.—E. E. Stewart has secured 220 acres of land near here and will use it for his gladiolus business. A large storage building will be erected.

Salt Lake City, Utah—On the protest of local florists that it injured their business, the sale of Christmas greens, festooning and flowers on the streets was prohibited by the city commission on and after December 19.

EVER READY POT COVER

The modern way of artistically decorating unsightly clay flower pots. Makes plants sell better as they are artistic and attractive. Inexpensive, durable and instantly applied.

Made in four colors and many sizes. Sample will be sent on receipt of 10c.

Ever Ready Flower Pot Cover Co.
146 HUGHES AVE., BUFFALO, N. Y.

Florists' Refrigerators

Write us for catalogue and prices, showing how to require, and for what kind of refrigerator you want to use the refrigerator. Also state whether you want it for display or only for storage.

McCray Refrigerator Co.,

Flower Market Reports

(Continued from page 21)

the orange and yellow polyanthus narcissi in this market than in former years. The early tulip with all its unattractive features is seen here and there already, some being sent in attached to the bulb. Rubrum lilies are now in good supply and for the time being bring a higher price than the longiflorum. Of cattleyas there are plenty for all present needs but many of them are under-sized, fragile blooms which cannot be sold at standard quotations. American Beauty shows weakness as do all other roses and the price has taken a tumble on all grades with further decline anticipated. Carnations are back again to old values, excepting the red varieties, on which there is still a lively demand.

PHILADELPHIA

The day after Christmas is generally looked on as a "blue Friday" in the wholesale cut flower market. This year was an exception. Trading opened up with gratifying briskness, and stocks in most lines were eagerly called for. The weather was clear and crisp; there was snow on the ground, and people seemed to catch the Christmas spirit. With this impetus the three days before Sunday were really beyond the average in previous years. As we write (Dec. 30)—of course—the scene is changed. It is now the new year everybody is figuring on. Prices have dropped very nearly to normal and there is enough of everything for everybody. White roses are selling well and American Beauties "fairly" well. Richmonds go "pretty" good. At least that's what C. E. Meehan says. What C. E. M. needs is some poetry in his soul—he is too matter of fact. They tell us also that pink roses were in "fair" demand. There you are again. "Fair" demand—Arthur Niessen will be telling us that the word "fair" is misleading and that we ought to consult somebody who knows. Meaning—with all our courage we are afraid to state whom he means, although we have a shrewd guess. Too many white carnations. Other colors kept cleaned up in good shape. There was a drop in orchids except on extra well colored cattleyas. The small flowers were hoping for recognition and they were numerous. Gardenias sold well up to Christmas but have been dragging since.

From what we can learn from the florists in all parts of the city Christmas was very trying on them. The one good thing was the weather

which was delightful in all respects—more like a June day. This helped out greatly when delivery time came and plants needed no wrapping. The leading retailers say that plants sold much better than cut flowers, as the latter were too high in price and that they really pushed the sale of plants. The great call was for poinsettias, both plants and cut, azaleas and cyclamen following in plants. The show houses of the West End florists were cleared out of anything that was good in plants on Tuesday. The wholesalers who placed great value on cut stock got left and consignments came in heavier than they expected and the retailers bought lightly at first and the drop came Wednesday morning when the demand was light. Among the stock that sold well were Beauties, Richmonds, orchids, red carnations and poinsettias. Killarneys were far too many, also white carnations, paper whites and Roman hyacinths. Violets had a big call, also lily of the valley, of which there was a big supply. From the retailers' viewpoint you can say that this Christmas was the best in years, taking everything into consideration.

WASHINGTON

Business as a whole during the Christmas holidays was very satisfactory. There was a good demand for all varieties of cut flowers and prices were good. Many of the stores soon found themselves entirely

sold out of azaleas and there was quite a heavy run on cyclamen, lilacs, etc. Carnations are still somewhat scarce. Those coming into the market are very good and are bringing from \$6 to \$10 per hundred. Roses are bringing about the same price, although exceptionally fine stock runs considerably higher.

NEWS NOTES.

Wenham, Mass.—B. Hammond Tracy has purchased another farm near "Cedar Acres" for the extension of his gladiolus culture facilities.

Brockton, Mass.—Jahn & Robinson, florists, have failed. The failure was announced on the afternoon of Dec. 24, and dealers who sold the firm Christmas material are incensed.

Framingham, Mass.—The florists of the town have found the Boston & Worcester Electric Express a very handy mode of shipping flowers to Boston and a special car leaves here for them at 4.30 every morning. Each morning the early car is piled full of flowers for the Boston market.

CYCLAMENS

Thomas Roland, Nahant, Mass.
For page see List of Advertisers.

200,000 Giant Flowering Cyclamen, August seedlings. We received first prize on our blooming cyclamen at the show in Cleveland, O., and hold other first prizes. Our aim is strong growers, a well built five petal flower, with good color and fragrance, many of them at one time, well marked foliage and general good habits. Strong August Seedlings, \$2.50 per 100; \$20.00 per 1000.

What others say about our blooming plants: Mr. E. A. Corson, Rochester, N. H., Nov. 15, 1912: "Cyclamens received and am more than pleased. They are certainly fine plants and such a range of color. Arrived in good condition too."

Plants in bloom for Christmas, 75c., \$1.00, \$1.50 to \$2.00 each. Cultural directions with all orders. Christ. Winterlich, Cyclamen specialist, Defiance, O.

DAHLIAS

PUBLICATIONS RECEIVED.

The latest publication of the Cornell Reading Courses, under the supervision of Dr. L. E. Bailey, is a 16-page illustrated pamphlet by A. E. Wilkinson on "Hotbed Construction and Management." A very serviceable document.

Recent publications by the horticultural department of the University of Illinois are the following: Papers presented at the annual meeting of the Illinois State Florists' Association, revised to date, on the "Work at the Experiment Station," by H. B. Dorner, and "Carnation Stem Rot," by H. N. Anderson; an illustrated pamphlet giving a list of the courses of instruction and other useful information relative to the work of the college.

Chrysanthemums; by Thomas Stevenson, with chapters by C. Harman Payne and Charles E. Shea. Edited by R. Hooper Pearson, Managing Editor of the Gardeners' Chronicle. —It seems almost needless to say more regarding this book than is conveyed in the mere announcement of the names of the gentlemen who have made it. Accuracy in data, thoroughness and reliability on cultural topics and, above all, enthusiasm and love for their subject that permeates every line, is what the authors have given us in this attractive and useful little volume. The ten chapters include Chrysanthemum History, Raising Seedlings, Hints on Decorations, Exhibitions, Packing, Pests, and a chapter each on Border Japanese, Incurved, Decorative and Anemone and Pompon Classes, together with some very useful lists. There are eight full-page portraits of chrysanthemums in natural colors by T. Ernest Waltham. This book is one of the series of "Garden Flowers in Color."

Irises—This is another beautiful book in the same series as the foregoing and illustrated in colors, by the same artist. The illustrations include *I. bucharica*, *I. longipetala*, *I. Susiana*, *I. Jacquiniiana*, New Giant *Xiphium*, *I. xiphioides*, *I. ochroleuca* and *I. Kaempferi*. There are 110 pages filled with concise facts and accurate information that will fascinate and instruct the lovers of this noble race of garden plants. The author is W. Rickatson Dykes and preface by Prof. Isaac Bayley Balfour of Royal Botanic Garden, Edinburgh. Both of the above books are published in New York by Frederick A. Stokes Co. We can supply them by mail for 85 cents each, prepaid.

CINCINNATI NOTES.

C. E. Critchell was the first on Third street to offer jonquils and freesia this season.

The Hill-Heller store put a number of taxis into service to help deliver their Christmas orders.

Louis H. Kyrk and Miss Edith Kyrk have the sympathy of the trade in their bereavement over the death of their sister, Stella.

The Christmas rush came on Julius Baer so fast that on Christmas Eve his entire stock was cleaned up and he was compelled to put up a sign to that effect.

NEW YORK NOTES.

Mr. and Mrs. C. W. Scott sailed December 28 on the Oruba for a visit to Bermuda.

The three Dailedouze Bros. have recently returned from a cruise to the Panama Canal.

President W. H. Siebrecht of the New York Florists' Club comes to town frequently now on club business and is busy forming his committees for the coming year.

At Carl A. Woerner's, on Clarkson street, Brooklyn, there is always a display of well-grown plants. Early astilbes are already coming into bloom and a continuous cut of lilies from now until Easter is in sight.

Eugene Dailedouze claims for his Enchantress Supreme, which is a sport from Enchantress that it holds its color better through January and February and does not carry so heavy a bud as the original variety which prevents calyx bursting.

Among the strikingly handsome things noted in the wholesale market are superbly grown freesias, the genuine old-fashioned pure white. They were at P. F. Kessler's, who was selling them at \$6.00 per 100, and were grown by P. J. Schroeder of Pine Brook, N. J. Mr. Schroeder produces his own bulbs holding the stock carefully up to type.

Louis Schmutz has an excellent lot of decorative plants at the old Zeller place on Clarkson street. Also at his original establishment, which is well depleted by the Christmas demand are promising Easter stocks of cinerarias, lilies, etc. Young cyclamen for next Christmas are progressing finely already. Louis' stock of philosophy and wit is still exhaustless.

Another fact worth making note of is that Killarney Queen is by far the finest of the Killarney roses thus far, especially if they can be grown by others as well as those we saw at W. S. Allen's. One other fine thing which caught our eye in passing was Sauter's mignonette, which was finding ready sale at \$1.25 per dozen sprays. The price is as good an index to the quality as anything we might say.

Visitor: Wm. Jurgens, Newport, R. I.

PERSONAL.

Luther Armstrong and Fred Oster-tag, both of St. Louis, recently reported sick, are reported much improved.

H. B. Dahlberg, formerly of Minneapolis, is now manager of the Jamestown Floral Co., Jamestown, N. D.

G. A. Sellenthin, formerly of La Crosse, Wis., has accepted a position as gardener for Mrs. Marcus Daly, Hamilton, Montana.

Jas. F. M. Farquhar of Boston, starts on January 4 on a cruise to Italy and France. Mr. Farquhar expects to be away for two months.

Julius Schnapp, formerly with the Hollywood Gardens, Seattle, Wash., is now with the Tonseth Floral Co., 133 Sixth street, Portland, O.

Ray C. Brown, of Ashland, Mass., a graduate of Cornell school of horticulture, has accepted a position on a large estate in Pomfret, Conn.

Mrs. Rubie Leslie, formerly with the Miami Floral Co., has taken a position with W. G. Mathews as manager of his Main street store in Dayton, O.

Donald McNaughton, formerly employed at the Oakley Country Club, Watertown, Mass., has accepted the position of superintendent of the estate of E. S. Moore, Lake Forest, Ill.

Many friends will be pleased to know that N. F. McCarthy, Boston, left the hospital on January 1 after recovering from his second operation and is now at home recuperating rapidly.

George Hamer, the popular assistant manager at the Boston Flower Exchange, was presented with \$50 in gold by the stall holders and salesmen on Christmas morning. President Stickel made the presentation.

Boston visitors—G. X. Amrhyn, New Haven, Conn.; A. E. Thatcher, Bar Harbor, Me.

St. Louis visitors—Robt. Newcomb, Guy Reyburn, of Henderson's and F. Lempke of Barnard's, all of Chicago.

TO EXTERMINATE GROUND MOLES.

One of our subscribers—a large nursery firm—states that they are troubled with ground moles in their open seed frames and would appreciate some hint through HORTICULTURE regarding the best way to exterminate them.

There are a number of mole-traps on the market with special claims to superiority and we find that these traps are the usual means of mole extermination used by nurserymen. One of our correspondents recommends the Olmsted mole-trap as very efficacious. Another from whom we have asked information advises the scattering of tobacco dust in the "runs," in addition to the use of the mole-traps.

It may be interesting to publish the following extract on this subject which appeared in the *Flores des Serres* 60 years ago and perhaps some of our readers may like to try the prescription there given:

"Take one pound of bean meal, three ounces of slaked lime in powder, half an ounce of powdered verdigris and four ounces of essential oil of lavender. After mixing thoroughly the powdery part of this composition, incorporate the oil. With a little water work the mixture into a dough. With this form balls the size of hazel nuts; they will harden after having been exposed to the air for twenty-four hours. Introduce them twenty or thirty feet apart in the mole's runs, or one ball may be dropped into the hole of each mole-hill, taking care to cover it up immediately. The smell of these ingredients is so offensive to the mole that he immediately deserts his ground. The mixture is, at the same time, a violent poison for moles, rats, and all such vermin."

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide. Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

THE PULVERIZED MANURE CO. Union Stock Yards, Chicago

100 pounds of an ordinary Fertilizer (testing 2-8-2)

Both of these are called "complete" fertilizers, but they are very different.

If you prefer ready-mixed fertilizers, insist on having enough Potash in them to raise the crop as well as to raise the price. Crops

contain more than three times as much Potash as phosphoric acid.

It was found years ago that the composition of the crop is not a sure guide to the most profitable fertilizer, but it does not take a very smart man to figure out that a well-balanced fertilizer should contain at least as much Potash as Phosphoric Acid. Insist on having it so. If you do not find the brand you want, make

one by adding enough Potash to make it right.

To increase the Potash $4\frac{1}{2}$ per cent. (for cotton and grain), add one bag Muriate of Potash per ton of fertilizer; to increase it 9 per cent. (truck, potatoes, tobacco, corn, etc.), add two bags Sulphate or Muriate per ton.

Talk to your dealer and ask him to carry Potash in stock or order it for you. It will pay you both, for **Potash Pays**

Hesseltine, secretary and manager of the fruit growing and marketing department. This company is formed of the Peru Nursery and the Duncan, Hesseltine & Ogg fruit growing company.

Fall River, Mass.—One of the employees of C. Warburton, the New Boston road florist, had nothing to do yesterday afternoon and took unto himself the idea that a fine bracing ride over the country roads would refresh him considerably. He did not take the trouble of asking his employer for the use of the automobile truck which is used in the daily routine of business but took it for granted that they wanted him to retain his health and vigor regardless of the expense. He accordingly set out to puncture holes through the atmosphere and at the same time burn up the roads in the vicinity when he lost control of the truck and ran it up against a fence and escaped very luckily with his own neck. The machine is damaged considerably around the body and tonneau although the engine is in good running condition and Mr. Warburton stated that a few hundred dollars would cover all damages and it is thought that the matter will be adjudged outside of court.—*Fall River Globe.*

GREENHOUSES BUILDING OR CONTEMPLATED.

Greenhouse Materials FURNISHED AND ERECTED

IRON or WOOD SASH BARS

In all lengths up to 32 feet.

Milled to any detail furnished or will furnish details and cut materials ready for erection.

Frank Van Assche, Fulton Ave., Rose Ave.
and Dwight Street
JERSEY CITY, N. J.

NO, we are not "married" to any particular method of supporting and bracing the main members of our iron frame work, aside from the fact that we do insist on using compression trussing as the main trussing, when trussing is necessary. The truth of the matter is, we first figure the stress and strain on a house and then build it accordingly. Let us send you particulars of our new construction, making it possible to build a house 40 feet wide with only one column.

**Hitchings & Company, 1170 Broadway, New York
Factory—Elizabeth, N. J.**

ERECTED AT RUMSON, N. J.

SEEING how attractive and practical this arrangement is, do you wonder why **THE LUTTON PATENT CURVED EAVE** method has changed Greenhouse Construction during the past few years? The result has been the most successful house that can be produced; the other concerns who had been producing the same antiquated buildings for years had to simply destroy their patterns as well as their catalogues and start anew. Just ask some of our imitators to show you some of their curved eave houses built before **THE LUTTON PATENT** was granted, you will then be convinced that you had better consult with me.

See Pages 56, 57, 58, 59

WHAT Sherman said about war applies to bad lily bulbs as well. Ten years ago when you wanted a thousand good lily plants for Easter it was customary to buy from 1500 to 2000 bulbs, because the percentage of loss due to bad bulbs was so large. When Horseshoe Brand Giganteum entered the business arena buyers of this brand experienced a pleasant surprise in finding that they could get results averaging about 90% good plants. True, the price was high, but they were worth the money. Word was passed around that Horseshoe Brand Giganteum were par excellent, and the business increased to an extent that enabled the producers to lower the price, and today the bulbs cost no more than other brands—and they are still par excellent. Now you can buy this brand from Ralph M. Ward & Company only. If anyone not connected with this firm offers you Horseshoe Brand Lily Bulbs do not buy from them as they are misrepresenting their goods to you, and fraudulently imposing upon us. Furthermore, beware of lily bulbs “just as good” as a certain brand. When a salesman sells you anything “just as good” as a certain brand, it's an open acknowledgment that that certain brand is the best to buy. In lily bulbs for commercial use there are none produced today that will surpass Horseshoe Brand Giganteum as profit makers. Prices are the same to all—no favorites—send for the price-list. Cold storage bulbs for delivery any time. Write us.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Asparagus

In order to have fine stock of *Asparagus plumosus*, *A. Sprengeri*, etc., the seed should be sown now in pans that have been filled with a mixture of sifted loam and leaf mold in equal parts, with enough of sand added to keep the compost open. Fill the pans within an inch of the top and then press the material moderately firm and on this sow the seed, covering them about three times the diameter of the seeds and again press the whole of the surface over. Place them in a temperature of about 70 degrees at night and keep them shaded until they come up when they can have all the light going. Give a moderate amount of water so as to keep the surface in a nice moist state and keep the house in which they are grown in a moist condition, also. When they have attained a size large enough to handle they should be moved singly into small pots, using a compost of fibrous loam, leaf mold, and well rotted cow manure in equal parts, and placed well up to the light. It will pay any florist to sow quite a batch of asparagus as they make very valuable plants for a good many uses.

Bedding Geraniums

Do not neglect this stock now in any way if you intend to have good plants when the spring trade starts. Give crowded plants more room so that the air and light can circulate around them. All early fall rooted cuttings that are now in 3-inch pots can be topped and these tops put in a propagating bed with a bottom heat of from 60 to 65 degrees. With one good soaking of water they should soon make enough of roots so they can be potted off; in fact they are better to be potted off before they are too strongly rooted. A suitable compost is fibrous loam four parts and well rotted manure one part, and always pot these plants firm. All geraniums do better if given a little bottom heat and it is especially helpful to those that are newly potted. When the plants are well rooted run them a little on the dry side before giving them water. Stock that was potted early can be given a cool temperature; 45 to 48 will do, but those that are newly potted should have 50 to 55 degrees at night.

Bougainvilleas

It is time now to give these plants a good brisk heat so as to flower them by Easter; place them on the lightest bench you have and give them a temperature of from 60 to 65 degrees at night. To make bougainvilleas break away freely they should be syringed two or three

times a day. When these plants have made advanced growth they can be given a temperature 70 degrees at night and up to 80 or 85 degrees with sun heat. Give a little air often on all bright days so as to keep the atmosphere sweet, but be careful not to give them too much as it might seriously affect the young tender growth. Close down sufficiently early in the afternoon so as not to allow the temperature to fall too low. As these plants advance in growth and root action they will require a copious supply of water and the free use of the syringe overhead and under the leaves so as to keep down thrips and red spider. To assist them to finish up well give manure water twice a week when good root action is noticed.

Smilax

When a bed of smilax has been cut away quite clean very careful attention will be necessary in the way of watering. The soil should be allowed to dry out some by withholding moisture at the roots, but of course they never should be allowed to become so dry as to injure them. Just keep rather on the dry side for two or three weeks or until new growth starts up. Keep the beds well worked over, which will allow the surface to dry out and become sweet. When signs of active growth appear they should be given a good rich mulch for hungry roots to feed upon. A good mulch can be prepared of equal parts of cow manure and soil with a good sprinkling of bone meal. This can be spread on about half an inch deep and in about three weeks another mulch of half an inch can be given. Before they make too much growth furnish them with strings. Ventilate and avoid extremes in temperature, which should be 60 degrees at night.

Marguerites

Marguerites will need a bench in a very light house so that they will make the proper growth and headway to be in time for Easter. Give a night temperature of from 50 to 55 degrees and on all sunny days they can have as high as 65 to 70 degrees. To keep them in a fine sturdy growth that will produce a fine crop of flowers they should have ventilation on all good days. As they become well matted with roots they will want careful attention in the way of watering. Plants that are making good growth with plenty of root action can be fed liberally with liquid manure. Now is a good time to put in a batch of cuttings and as soon as they are rooted, potted up and grown on these will make fine stock for next Christmas. They like a good rich compost to grow in; say three of soil to one of manure.

Salvias

Give salvia stock plants a light bench where they can have all the sun possible. Keep them well syringed and they will soon produce a lot of fine cuttings. Seed can be sown now also. Place in a good strong heat and they will soon come up when they can be transferred to flats or pots and grown on.

Mr. Farrell's next notes will be on the following: Carnations; Tuberous Rooted Begonias; Bedding Plants; Easter Flowering Shrubs; Orchids; Vines.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Tying Peach and Nectarine Trees

With all the cleaning and renovating done in a peach and nectarine house the tying of the trees comes as a climax to the winter work. It is usually a happy job and I guess there is not one amongst us who has had companions at the job who cannot recall many a yarn spun as the ties went in. Lots of the previous work has to be governed by the weather but when it comes to tying, it is there for any hail, rain or sunshine-day. To one accustomed to the work, a clean, symmetrical and good finished tree, bristling with flower buds, is as pretty as later on when the flowers open in all their glory.

The tree being entirely cut away from the wires it allows any of the stronger growths to be moved if desired. Use some string of fair strength to keep these in the required position. The effect of a whole tree can be spoilt and much time and labor lost by carelessly laying in this big wood, which is the nucleus of the whole system and once tied in with the small pieces around cannot be removed without taking it all down again. See that the strong wood is laid in right and the rest is easy. Always see that the bottom of the tree is well furnished with wood, drawing it down from the center, which should always be open. It will be found that the center will fill up itself very quickly. Leave enough room in the ties to allow the wood to swell and wherever stronger growths come into contact with the angle-iron or any metal which the frames of the trellis may be made of, see that either a piece of wood or disused hosepipe is put between the metal and the tree to act as a non-conductor of the heat. In the summer time these frames get very hot and fairly eat their way into the branches that come into contact with them. All raffia used should be at full strength and twisted to make it look neater, which also increases the strength. Cut the strings close up to the knot; there is no need of leaving over an inch on both sides. Aim to keep all wood straight, never forgetting how the trees get their name—*Fan Trained*.

Planting Trees and Vines

The whole of our subjects can be dealt with under this head as the same method is applicable to all. After the preparatory work of making the borders the planting occupies little time, yet it is a very essential point to ultimate success. Peach trees that have been grown and trained in the open will have no ball to them and the roots will all have been cut with the spade or shovel as they were got up. These should all be gone over and the broken or jagged ends cut off clean, which will make them heal quicker and break better. Any roots having a desire to be always "going down" can be removed. Trees being transferred from pots should have the soil washed out of the roots; this is a more practical way than shaking them out. Done with care the roots are less liable to get broken and there is no damage to be feared from dryness. When planting always have the holes made plenty wide enough so that all the roots can be spread out to their full length evenly. Surface roots are to be encouraged as the tree commences to fruit so do not plant deep now; the roots should only be nicely covered. Some gardeners like to prune the top growth hard back soon after planting; "to make a foundation to

the tree," is their theory. With our sun we get sufficiently heavy wood without cutting back the trees.

Vines grown in pots for planting out should also be washed out, and the long roots disentangled so that they can be spread out also. Give them all the space they require at a depth of two inches. All other trees can be similarly dealt with. Soon after planting a watering will settle the soil around the roots.

Tomatoes

A sowing of tomatoes made now will furnish fruit until the first crop outside is ripe. Sow seeds in a well-drained pot or pan, using some fine light soil. Level it off and water it before putting the seeds on. This will hold it moist for a considerable time. Spread the seeds evenly over the surface and cover them with fine soil about the same thickness as a seed. Keep a piece of glass over the pot to retain the moisture and keep out vermin. As the seedlings appear gradually remove the glass and prick them off into small pots as soon as they are large enough to handle. Keep them going in a night temperature of 58 F. to 60 F., advancing by day. Move on into 4s when ready and from these transfer to the benches. *Lister's Prolific*, *Sunrise*, and *Best of All* are good reliable varieties.

Seakale

Seakale forces easily and makes a very good winter vegetable. Like rhubarb it is not at all particular where it grows, so long as it has warmth and moisture. The only difference is that seakale insists on a dark chamber to do it right. To force it extensively it will pay to give it bottom heat. Where only a small quantity is grown, however, large pots can be used and placed underneath a bench in a house having a temperature of 55 to 60. From the time of planting until cutting keep the plants regularly syringed and watered. Avoid any sodden state of the soil if grown underneath the benches.

VERONICA LONGIFOLIA SUBSESSILIS

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Use of Lime in Winter

Many of the plants will no doubt show the effect of the recent dark rainy weather and will need a little lime to brace them up a little bit and keep them going until the longer days of the late winter will help them along. Teas are more apt to show this than Beauties and so it is sometimes necessary to lime one and let the other go, should the two be grown in the same house. In applying lime use only air slaked lime, spreading it over the surface of the benches very carefully so as to be sure to have it even. Sometimes it is better to apply it in the form of liquid, where there are facilities for doing so. This will greatly help to exterminate worms in the soil which at times become a nuisance.

After applying the lime it is well to "rub it in," i. e., just run over it slightly to incorporate the surface of the soil with it a little should the plants require a larger dose at the one time. If not we prefer to apply it to the benches and allow it to lie a day or two before watering it. This will make it harden somewhat and the plants can then take it up as they need it.

Bonemeal

Of all the so-called manures and top dressings we find bonemeal is the best. For an all-around plant food it can hardly be surpassed. There is a wide difference between a plant food and fertilizer. We generally look upon the fertilizer as more or less of a stimulant, and upon manure, etc., as plant food. Although any plant food can be used as a stimulant, no stimulant should be used as plant food.

By all means see that the bonemeal is merely rubbed in and not dug into the soil as is customary on most places. The less you scratch around the plants the better, for then there will be no broken rootlets whose business it is to see that all the plant is supplied with nourishment. These little roots often form a sort of a mat in the old decayed mulch that lies on the surface of the bench. You can see for yourself what it would mean to rake this mat off roots over and tear them all up, so that the plant is forced to push out new roots again. Rub in your bonemeal and do not hinder the plants' growth.

Veronica

The present representation of the genus *Veronica* in the catalogues of leading hardy-plant firms indicates close study and good judgment of ornamental merits and demerits. Gardeners and landscape architects responding to the invitation to buy will soon become aware of the various effective uses of the speedwell species. Nowhere does judicious selection of plant material mean more than in herbaceous gardens. The skilful arrangement of successive floral arrays and the artistic combination of colors offer a wonderfully rich field for the demonstration of professional mastership. Success means satisfied customers and subsequent increase in business to the commercial side, while, in the career of the private gardener, practical accomplishments in the given direction soon attract the attention of the army of small garden

Plants that are just starting out into new growth will be greatly helped if they receive a light dose of bonemeal. A little liquid manure would also be very good. We would hardly recommend mulch at this time of the year, although if used in the right way there will be no harm done. The right way is to be careful not to apply too much of the manure at one time, otherwise the roses will never dry out the way they should with proper amount.

Red Spider

Mr. Jenkins has it about right. We have always recommended a fine stream of water properly applied as the best cure, and all the damping down in the world would not do one-fifth as much as a good syringing. Many throw a lot of water all over the houses every so often and then claim that spider cannot be gotten rid of. This is not what we would call syringing. By saying "syringe" we mean throwing fine spray of water with great force under the leaves so as to wash off any inhabitants that may have thought of planting their cozy little homes there. We prefer one hundred pounds pressure; "the more the merrier" for the spiders dance all the more. The thing is to syringe as quickly as possible, syringing thoroughly at the same time. The higher the pressure the less water will fall on the bench and that is just what you want. At any rate, no one should wait until spider makes an appearance, but should syringe to prevent it during the summer months when a house can be fairly drowned one day and be dry the next. To go further we have had an experience very similar to that which Mr. Jenkins writes about in the issue for January 4th. This was in a connecting cross-house where smilax had always been grown. It had always been the opinion of one of the members of the management that that space planted to Richmonds would yield far greater returns. Finally this was taken up, and this certain member had the same argument, i. e., the cross-house being very damp and warm, spider would not appear. But wrong was he, for the place proved to be a regular spiders' nest and it was hard to syringe, for the plants would not dry off and a dose of spot followed. Today the place is in smilax again.

owners who are ever alert and willing to follow the leadership and example of the profession. Looking at the general advancement of horticulture as a whole, the present keen demand for veronicas is, of course, only a minor incident, but as detail-feature of the times, it is gratifying withal. Of the 160 known species of the genus *Veronica* hardly more than one dozen remain of real interest to us. The low-growing or creeping alpine speedwells, enhancing the beauty of the spring florescence of rock gardens and prominent by their characteristic sheets of blue blossoms, I am inclined to recommend for a more general consideration than they have hitherto been given. In this class we find, as one of our most charming floral mountain darlings, *Veronica rupestris*. Arrayed in clouds of bright little amethyst blue flower spikes literally covering the foliage, it speaks

(Continued on page 41.)

of the American continent and many thousands of visitors from far and near. The magnitude of the undertaking and the vast influence which it cannot fail to exert on the horticulture of the immediate future make it imperative that everyone connected with the horticultural profession and dependent industries should now take serious thought as to what he or she can do to help make this event all that has been planned and much more. The greater the success it attains the greater will be the immediate and prospective gain to all whose livelihood is derived from the cultivation or distribution of the products of horticulture.

As representing the classes whose
 Everybody's duty prosperity is most directly dependent upon the interest taken by the

public in the things which this great exhibition is designed to popularize, every florists' club and every local horticultural society should now and in the few remaining weeks, do its utmost to cooperate and champion the enterprise, and help to push forward the work which remains to be done. Impress it upon every member, no matter how remote, that this is not a local matter but one that concerns us all. Why should not every meeting of the craft in the month of February, in every section of the country, be devoted to a consideration of the National Flower Show as a special topic? Let us have a big awakening all along the line and see whether we can't start a mighty wave of enthusiasm all together.

As our readers have noted in
 Uplift; its recent issues, HORTICULTURE
 individual application has added a new and illustrious name to its staff of

writers that of Edwin Jenkins of Bellefontaine Gardens, Lenox, Mass., noted as one of the most skillful growers and a peerless producer and exhibitor of vegetables. As the season advances Mr. Jenkins' weekly contributions will be devoted to the science and practice of fruit and vegetable growing in the open. The indoor culture of these products will continue to be handled by Mr. Penson. Mr. Jenkins' article this week on "Neglected Opportunities," while written from the standpoint of and addressed to the "private" gardener, applies with equal force to the man who gets his livelihood in a similar capacity on a commercial place. It has always been a principle with HORTICULTURE to urge upon the young men connected with the practical departments of horticultural industry the essentiality of education in the fundamentals of horticultural practice. Mr. Jenkins goes even farther and insists on education, also, in all the gentlemanly attributes. He is right and he gives reasons that should at once appeal to every young man entering a career in any horticultural field. When urging the uplift of our business we might well keep in mind the sentiment of the favorite grange motto: "The farmer is of more consequence than the farm and should be first improved." This is the truth which inspired Mr. Jenkins' advice. It is a very-much-alive topic which should be kept continually in the forefront of all florists' club work and there are no exceptions to its application.

But three months now remain
 The National Show until the third National Flower Show, the most ambitious and colossal horticultural event ever planned in this country, will open its doors to the public of the metropolis

Neglected Opportunities

The immortal Shakespeare says "There is a tide in the affairs of men which taken at the flood, leads on to fortune; omitted, all the voyage of their life is bound in shallows and in miseries." Here is a truth of universal application and nowhere is it more applicable than in our chosen profession of horticulture and agriculture, for do we not daily see gardeners whose life is "Bound in shallows and in miseries"? The tide of opportunity for most of us is in those fifteen golden years between the age of fifteen and thirty; somewhere and sometime during this period we all have a glorious opportunity of improving our knowledge which, sad to relate, is ingloriously wasted. The general avenue through which the position of head-gardener or superintendent is reached is through the greenhouse, it being the ambition of all young gardeners who start outside to get "in the houses" as it is said, and having got there he generally goes through the grades of improver, journeyman, foreman, superintendent. As this has been the general practice for the last century or two it is a time-honored practice and no one can deny that the results have been, on the whole, very satisfactory, alike to employer and employee. But to get back to the neglected opportunities; it is during those fifteen golden years referred to above that we are mostly guilty of failure to take advantage of the chances offered everywhere of improving our knowledge. At that period we are generally moving from place to place, and here there is a great opportunity to study some fine example of landscape gardening, at another there is a fine collection of evergreens, or herbaceous plants or hardy fruits. Then come the chances of getting an insight into modern methods of poultry handling, or up-to-date dairying, or intensive cultivation of the land, or construction work such as road building, land drainage, or any of the thousand and one things that an estate superintendent is expected to know. There is, on nearly every place, something that is specialized in, something that is done a little better than the average, which the aspirant to a superintendent's position may very profitably study and make himself familiar with. Then whenever it is our good fortune to be situated where we can attend a night school, by all means take advantage of it, because there we can frequently get a little knowledge of chemistry, geology, physics or natural science, all of which will be useful in our work as well as making us fuller men.

Unfortunately there is a disposition on the part of the greenhouse man to despise the out-door work as beneath his attention, feeling himself to be a step higher than the other employees, but surely he would be wise to acquire every scrap of useful information obtainable.

That men have neglected their opportunities in the past and still got on fairly well I admit, but then they had the field to themselves and even then it was the man who least neglected them that got on the best. Now, however a new aspirant for the plums of our profession has entered the field, and he has entered it very effectively, too, for he is gobbling up some of the most desirable jobs in the country. This is the graduate of the Horticultural and Agricultural Colleges. Some few of these there are, who have had a good practical training in addition to their college course and I can conceive of no better equipped men for their positions, but unfortunately these are very, very, few. And the vast majority with nothing but their college training are usurping the positions of the men who have (many of them) followed the profession from boyhood, simply because the latter refuse stubbornly to take advantage of the chances they have, of fitting themselves for the positions which they

are seeking to occupy. Our employers are almost invariably men with a college education and with a vast fund of general information, and it must lower their opinion of their superintendent if the latter is unable to talk with an intelligent use of scientific nomenclature in regard to the soil, forestry, stock-breeding and kindred subjects and still more so if there is a lack of that address and general good manners which do so much to lubricate the wheels of all branches of business but in none more so than in the one under discussion, and there is no need to go to college to acquire it, for it comes to all who do not neglect opportunities to practice it.

To sum up. Let the young man beware, so as to take advantage of every avenue of learning that might come within his reach; remembering always, that a strong competitor is in the field and that unless he bestirs himself to meet the competition, he will find the position he is seeking, occupied by one less able, perhaps, but better prepared.

Edwin Jenkins

Veronica

(Continued from page 39.)

to us in enchanting sentences of glorious spring days on distant sunny Alpine slopes. Similar thoughts arise, when we behold the bright blue of the blossoms of *Veronica saxatilis*, the speedwell of Scotland, or the similar color tints of *Veronica prostrata* of Germany's mountain regions. As a desirable addition to the aforesaid I mention the genuine *Veronica orientalis* from Persia and southern Russia, with small grayish green leafage and deep blue flowers appearing during May and June. The best white species in this class is the creeping *Veronica repens* from the Island of Corsica, and in pink we have in *Veronica saxatilis rosea* a species which promises to meet the requirements.

The ornamental merit of the taller growing garden species is so well known that at present it does not need special emphasis. Our native speedwell *Veronica virginica*, characterized by its whorled foliage, is more adapted for the wild-flower garden. Preferable for effect is its white form *virginica alba*, depicted on our frontispiece. The speedwell which I treasure most for late summer garden effects is *Veronica longifolia subsessilis* (syn. *V. Hendersoni*), a native of Japan, producing long deep-blue flower spikes during August and September. As agreeable associates for it I mention *Cimicifuga*, white *Phlox paniculata*, *Platycodon grandiflorum* and japonicum and Japanese anemones. The species *V. longifolia* appears in white, lavender and soft pink varieties. *V. amethystina*, amethyst-blue, 2 feet high, flowers in August, while the characteristics of *V. incana* consist of silvery white foliage while *V. gentianoides* fol. var. has attractively variegated leaves.

Veronicas are raised from seed and propagated by divisions. As a rule they prefer a rather light and well-drained soil. Some, I have found, do best in open sunny exposures, while for others the half-shady situations prove of better advantage. The Alpine class requires winter protection of leaves and evergreen boughs as a substitute for the heavy snow cover of their native position, while the majority of the taller-growing garden varieties on nature-sheltered grounds, survive the winter without special protection.

Riverton, N. J.

Richard Roth

CLUBS AND SOCIETIES

FLORISTS' CLUB OF PHILADELPHIA.

The first regular meeting of the new year was held on the 7th inst. and was well attended by the growers and their agents, the commission men, and also by the retailers, the attraction being an address by a retailer, Charles Henry Fox, entitled "The Spirit of the Times." We hope to be able to give this in full to our readers as soon as space will permit. It will prove very interesting reading. Mr. Fox made a strong plea for co-operation between production and distribution by all those concerned. He was followed by Wallace R. Pierson, of Cromwell, Conn., who gave a spirited talk on what was being done along these lines by the New York Florists' Club and the S. A. F. Among other speakers were Edward Reid, C. H. Grakelow, Walker P. Stokes, Mark P. Mills, Charles E. Meehan, Leo Nielsen and Eugene Bernheimer. The hammers were out all right and everybody seemed to have a right good time getting their accumulated grouches off their chests. President Thilow had hard work bringing the meeting to a close an hour beyond the usual time and had to suggest having an adjourned session to further discuss the matter before he was finally allowed to let the gavel fall. Adolph Farenwald gave one of the best talks we have ever heard him make and punctured a lot of foolish notions advanced by the other side. Charles E. Meehan was also wise cogent and to the point as usual. But the wittiest of all was Leo Nielsen, who in his closing sentence said, "It seems to me that all this get-together business refers only to the times when flowers are scarce." The essayist did your correspondent the honor of singling him out by saying that on the publicity matter he had his pencil too close to his nose and could not see the point. This is terrible! First they wanted to muzzle us and now they want to indicate we are blind with pencillitis. More work for the undertaker; another good job for the tombstone maker. Might as well be dead as both dumb and blind!

G. C. W.

ELBERON HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held in Firemen's Hall, Elberon, N. J., on Monday, Jan. 6. The regular routine of business was transacted, after which Joseph Manda of West Orange, presented the Boddington medals for horticulture, which were won by the following: Gold medal, Geo. Masson; silver medal, W. R. Seymour; bronze medal, C. O. Duncan. Mr. Boddington has very kindly consented to offer three more medals for point competition during the coming year. Awards on the evening's exhibits were as follows: W. R. Seymour, for white seedling carnation, 87 points; George Masson, for antirrhinums, 75; Chas. O. Duncan, for mushrooms, 65; Chas. DeWilde, for carnation White Enchantress, 65. A certificate of culture was awarded to Mr. Seymour for a fine vase of carnation Mrs. C. W. Ward. The meeting was continued with

a very interesting paper read by Thos. Hambleton on the "Comparison of Methods of Growing Exhibition Chrysanthemums Here and Abroad," a lively and interesting discussion following. It was decided to hold the annual euchre and dance on Jan. 31.

W. R. SEYMOUR, Asst. Sec.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Officers—President, J. K. M. L. Farquhar, Boston, Mass.; vice-president, Theodore Wirth, Minneapolis, Minn.; secretary, John Young, 54 W. 28th St., New York; treasurer, W. F. Kasting, Buffalo, N. Y. Next convention, Minneapolis, Minn., Aug. 19-22, 1913.

For Full Information, Schedules, Space for Trade Exhibition, etc., Write to John Young, Secretary and Manager for Trade Exhibition, 54 West 28th Street, New York City.

President Farquhar has appointed George Asmus, Chicago, a member of the National Flower Show Committee for a full term of six years to succeed J. A. Valentine whose term expired Dec. 31, 1912. JOHN YOUNG, Sec.

AMERICAN CARNATION SOCIETY.

Cottage Gardens Co., Queens, L. I., register new carnation Vivid. Parentage, Fisher Seedling X Mrs. C. W. Ward; color, vivid cerise; size, 3½ inches; good habit, wiry stem; comes into full crop very early. The color is of remarkable brilliancy under artificial light.

Baur & Steinkamp, Indianapolis, Ind., register Radiance. Parentage, Beacon X Scarlet seedling; color, deep brilliant scarlet; size, 3½ inches; flower perfectly circular in outline, with deeply serrated petals; just full enough, and built high in center; plant strong and healthy; comes very quickly after benching; extremely free in producing blooms; never comes sleepy or off color. A. F. J. BAUR, Sec.

CLUB AND SOCIETY NOTES.

The Cook County (Ill.) Florists' Association will nominate officers Thursday, January 16.

The Alabama State Horticultural Society will hold its next meeting in Bay Minette on January 23-25, 1913. A good program is being prepared. The secretary is J. C. C. Price.

The Lenox (Mass.) Horticultural Society will hold its annual ball and dinner in February. There will be two flower shows this year, one on August 20-21 and the other on October 22-23.

The president of the American Rose Society has called a meeting of the executive committee on Thursday, Jan. 17th, 1913, at 2 p. m., to consider various matters pertaining to the society

and to arrange for the coming annual exhibition. The meeting is to be at the office of Vice-President Traendly, 131 W. 28th street, New York city.

A three-days meeting of the fruit growers and nurserymen of Tennessee will be held in Nashville on January 29, 30 and 31, 1913. Reduced railroad rates will be available for all in attendance. Headquarters will be at the Maxwell House. Copies of the program may be obtained on application to the secretary, G. M. Bentley, Knoxville, Tenn.

The Pasadena Horticultural Society has elected officers for the coming year as follows: President, James MacGillivray; vice-president, William Hutchinson; secretary, George H. Kennedy, whose address is 497 Bradford street, Pasadena, Cal.; treasurer, George F. Nilsson, Jr.; financial secretary, Victor M. Clements; sergeant-at-arms, George Marshall; trustee, Richard Thomas.

TWO KINDS OF PUBLICITY.

"Holiday flowers will be costly," was the headline displayed in the New York Herald for Sunday, Dec. 22d, 1912, with a half-column article, stating that prices would be raised 50 per cent. over those of preceding Christmas prices; that the entire stock with a few minor exceptions of all growers within easy reach of the metropolitan wholesale dealers had been exhausted, and that there was no possibility of another cutting reaching the market in time for Christmas. A prominent wholesaler was given as authority for this and a lot more, all of which was detrimental to the flower trade of New York City.

When "Publicity" was brought up in Chicago, I with a number of others expected a real publicity campaign, headed by the S. A. F. with all the local clubs and associations as allies; a vigorous handling of the press of the United States from a positive point of view and a strict censorship over all negative matter such as the above and other stupid articles.

Our trade is developing in spite of our lethargy but other business has developed, one-hundred, two-hundred, yes, some of them five-thousandfold through the aid of the press. There is no other one business in the world that can adapt itself to press manipulation as well as ours, and an up-to-date newspaper man, assisted and advised by the good live wires we have on our various publicity committees would earn his salary ten times over.

If the S. A. F. is not able to finance such a proposition presuming that such a man could be employed for, say, \$3000 per annum and allowing an additional \$2000 for sundry expenses, I will be one of 500 to give ten dollars a year toward maintaining such a campaign for at least five years and I am sure there are 499 others in the S. A. F. who will do the same. This is not decrying the present publicity methods; it is the one thing we can not have too much of and the right kind of a newspaper man could be a great help toward making these local attempts successful.

Local clubs could no doubt be induced to contribute toward such a campaign and I am sure our Lancaster County Florists' Club would be right in line with its contribution.

ALBERT M. HERR.

"MRS. GEO. SHAWYER"

We want you to get familiar with this name because you will be familiar enough with it after another year or so when this Rose is more generally distributed, so why not start now?

Come and see it growing in mid-winter and you will find it opening just as freely as it did in the summer.

FOREIGN NOTES.

Paris Chrysanthemum Show.

Those of our readers interested in foreign ways and means can readily obtain an idea of the great Paris Autumn Show by referring to our French contemporary, "La Vie à la Campagne" for December 1st last. A full-page illustration gives an excellent idea of the general appearance of the show. In another part of the same issue is a picture of the Vilmorin exhibit, a typical one in which is plainly shown some examples of French culture imitating the Japanese method of pyramid plants. We do not think the style in question has yet appealed to American growers. It would be something in the way of a contrast to the trained specimens as shown at the Boston show. Both demand an infinitude of painstaking care and attention, yet both are in the end entirely different from each other—and the charm of a chrysanthemum show has always been in the practical application of the old adage that "variety is charming."

Jardinage.

This very artistic monthly journal, started about a year ago by our old friend, Georges Truffaut, still maintains its high reputation for excellence of style and get up generally. It has a circulation of 50,000 copies and the last number at hand deals very freely with the Queen of Flowers. The text and the numerous photographic illustrations are almost wholly concerned with the rose and the rose garden. The colored cover illustrations of Jardinage are in themselves quite unique.

Commercial Chrysanthemum Culture in France.

We think we gave, some five or six years ago, an article in HORTICULTURE on the above subject. One of the places we visited for the purpose of securing details was the establishment of M. Louis Lemaire. We have long known this gentleman, in whose family chrysanthemum growing has been traditional—if we mistake not, Mme. Lemaire is a lineal descendant of M. Pelé, a well-known grower several generations ago. M. Pelé was eminent for the improvement and progress made in the pompon section immediately following the introduction of the type from the island of Chusan by Robert Fortune about 1846. In the last issue of the Journal of the National Horticultural Society of France is a report of a visit to M. Lemaire's nursery with several illustrations. We learn that his collection comprises about 500 varieties, selected from the best for cut blooms. He grows 100,000 plants, one flower on a plant, in 7-inch and 8-inch pots.

French Chrysanthemum Society.

It has always been the custom for this society to hold its annual gathering in a different town in France each year. The society has never yet gone beyond the limits of the frontier of France, but at the Nantes conference, held last November, a request was received from the Belgian members asking that Ghent might be selected for the 1913 meeting. In view of the International Universal Exposition that is being organized there the society acceded to the request. The Ghent Quin-

quennial takes place in April and with the Chrysanthemum Conference there in the autumn, a busy time may be expected for the Ghent people, who are past masters in the art of hospitality. Everyone who has been to Ghent knows what that means.

Ghent Quinquennial.

With the National Flower Show that is being organized on the American side of the Atlantic one can hardly expect that there will be many American visitors to the Ghent Quinquennial, which is announced for the 26th of April to the 4th of May, 1913. The schedule has been prepared and circulated and contains 841 classes. It may be obtained of the Secretary, Royal Agricultural and Botanical Society, Ghent, Belgium. At the same time an International Horticultural Congress will be held at Ghent. A pamphlet containing a list of the committees and the questions to be dealt with has already been circulated. Particulars can be obtained of the Secretary, 79 Avenue Chazal, Brussels.

C. HARMAN PAYNE.

NOMENCLATURE TANGLES.

Mr. W. Watson, the eminent curator of the Royal Gardens at Kew, England, has a communication in the Gardeners' Chronicle on the nomenclature question which we here reproduce as having pertinent interest for many of our readers.

Formerly the practice was that botanists gave names to genera and species, and gardeners gave names to varieties and "sorts." When hybrids were raised artificially, the gardeners gave them names also. Botanists looked on unconcernedly. A hybrid Rose, *Rhododendron*, *Erica*, *Pelargonium*, *Calceolaria* or *Hippeastrum* was to them of no more importance than a new apple or cabbage. They did not object to the use of Latin names such as *bicolor*, *Broughtonii* and *hybrida*. When they altered the names of *Kentias*, *Latantias*, *Seafortias* and *Geraniums*, gardeners paid no heed. Orchids came into horticulture very gradually, and when they were new a botanist, generally Dr. Lindley, named them. He was succeeded by the autocrat, Reichenbach, who had a keen eye for differences, which led him to make too many genera and to see species where he should have seen varieties. This pleased the growers and dealers, of course. When the breeders got to work on orchids, they obtained results which proved that a considerable number of these genera were so nearly related as to interbreed, a proof of blood relationship too close to admit of their standing as separate genera. The trouble began when botanists failed to recognize this. They preferred to look upon such hybrids as bigeneric, and gave them names to indicate this, such as *Brasso-Cattleya*, *Epi-Cattleya*, *Sopbro-Cattleya*. The practical commonsense plan would have been to give the hybrid the same generic name as the parent it most resembled, seeing that names need not be pedigrees nor yet histories. Now we have such absurd names as *Brasso-Cattleya-Laelia*, *Sopbro-Cattleya-Laelia*, and we may soon have *Epi-Sopbro-Brasso-Cattleya-Laelia*! The same kind of nonsense occurs in the specific names of hybrids, as, for example, *Cypripedium Leeano-Chamberlainianum*, *Laelio-Cattleya crispum-Schilleriana*, and *Brasso-Cattleya Digbyano-Mossiae*. Many years ago, a Daffodil conference was held for the purpose of settling the names of the plants in order. It was then decided to name all the hybrid and seedling daffodils in the florist's, not the botanist's way. The late Professor Michael Foster, a gardener-botanist, held that such names should be easy to write, read and speak. This should be the one golden rule for all garden plant names. There is the very practical objection to these fearful orchid names that they are the exact opposite to what the worthy Professor recommended. Gardeners are themselves largely to blame for this, because, instead of naming their home-bred orchids, as breeders of other kinds of plants do, they asked the botanists to do it for them. I agree with much

of what Mr. O'Brien says, and can also sympathize with Mr. Rolfe's defence of the plan adopted in the "Orchid Stud Book," notwithstanding his effort to make us swallow *Paphiopedilum* and *Phragmopedilum*. I am heretic enough to say, blow the conferences and confound the botanists who have helped to make orchid names what so many of them are. Mr. O'Brien says we need a simple plan of naming over which there can be no dispute. I would go further by saying we require something more drastic to make the names of garden orchids easy to read, write and speak. This is a matter that concerns the gardener and fancier, not the botanist. The leading breeders and growers should therefore confer and put the names in order, "mopping off" the long and ugly ones and substituting better, as was done in the case of daffodils. Until this is done we shall continue to get more of the same objectionable names. Only last week two new orchids were shown and certified with the following names: *Sopbro-Laelio-Cattleya Carna* and *Laelio-Cattleya Golden Oriole* var. *Ruby*. I should have called them *Cattleya Carna* and *Cattleya Ruby*.

NEWS NOTES.

Oklahoma City, Okla.—The Texas Nursery Co., of Sherman, Texas, has opened a branch salesroom in this city.

Asheville, N. C.—Grover Mires, formerly with the Woolsey Greenhouses, has leased the West Asheville Greenhouses.

Pasadena, Cal.—M. Horne has bought the greenhouse establishment of the late John Ross, and will remove the houses and contents to Whittier, Cal.

Dubuque, Iowa.—The Ullman Greenhouses, formerly located at Strawberry Point and recently purchased by G. A. Heyne, will be used by the Park department this season for propagation of bedding plants.

ARTHUR T. BODDINGTON

SEEDSMAN

342 West 14th St., NEW YORK CITY

Seed Trade

AMERICAN SEED TRADE ASSOCIATION.

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O.

Next convention June, 1913.

Why the Trade Packet?

An esteemed correspondent, in reply to an inquiry as to why our seedsmen still continue to use the trade-packet custom in flower seeds, makes some pertinent and pointed remarks, which we pass along for the entertainment and instruction of our readers.

"If you ever have the misfortune of being a flower-seed man in a big firm, you will soon note the difference in costly labor of putting up the so-called trade packet, as against the weighing system in fractions of ounces. Like all elastic terms, the quantity in a trade packet can be moved up or down as necessity dictates without having to change the price. For instance, if you sell aster seed at twenty-five cents per trade packet, one dollar per ounce, you could not afford to give a quarter-ounce for twenty-five cents, for the reason that it takes four times as much labor and four times as much printed matter to put up four quarter-ounces as it does one ounce—and besides no white man can get four quarter-ounces out of an ounce of anything."

How about the onion seed that weighs sixteen ounces to the pound in California but when weighed in New York astonishes you by weighing eighteen ounces to the pound? And how about Tom Martindale's pound of butter, that weighed 16 ounces in the morning and eighteen ounces in the evening—or vice versa sometimes. And Tom is not a colored man either. Continuing about the dollar an ounce proposition, our correspondent says:

"If you were to charge thirty-five cents for a quarter-ounce you would be called a robber."

We demur a little to that last. Why should you pay more proportionately for a quarter-bushel of lawn grass than you do for a bushel? Nobody protests on that! The principle is the same.

We quote further:

"The trade packet does away with all trouble and brings the desired results. An ounce of practice is worth a couple of tons of theory, and I would advise the novice not to meddle with the fine art of running a fancy flower seed business, but to stick to grass seed and things that are not dealt in less than quart lots."

It's a good argument, and we bow to superior judgment and thank our friends for turning a shining light on an abstruse subject.

G. C. WATSON.

Notes.

Gainesville, Fla.—Geo. E. Evans has disposed of his seed business here to H. J. Babers.

The Covington Seed Co. of Covington, Ky., have opened a retail store on Madison Ave., Covington. They are right in the midst of the retail business and should do nicely.

CATALOGUES RECEIVED.

Miss Mary C. Cone, West Hartford, Conn.—Folder price-list of Tulip and Narcissus Bulbs.

HENRY F. MICHELL COMPANY
518 Market Street - - - Philadelphia, Pa.

Frederick Roemer, Quedlinburg, Germany.—Wholesale Catalogue of Choice German Flower Seeds.

W. W. Barnard Co., Chicago, Ill.—Preliminary List of Fresh Flower Seeds for Early Sowing. Wholesale florists' specialties and novelties.

D. Landreth Seed Co., Bristol, Pa.—Seed Catalogue for 1913; 129th Annual Edition. Comprehensive, especially in the vegetable department. 112 pages.

Oscar H. Will & Co., Bismarck, N. D.—30th Annual Seed Catalogue. Vegetable and flower seeds, small fruits, etc. Cover prettily decorated in colors.

Watkins & Simpson, Ltd., London, Eng.—Foreign and Colonial Wholesale Catalogue of Garden and Flower Seeds, 118 pages, beautifully illustrated, heavy cover, extensive novelty list.

L. Daehnfeldt, Odense, Denmark.—American Catalogue, Wholesale Only. Vegetables and flower seeds but largely devoted to root crops, cabbage and cauliflower. Excellent typographical work.

Elmer D. Smith & Co. Adrian, Mich.—Chrysanthemums for 1913. The usual interesting annual price list of novelties and standard varieties issued by this well-known house. Well gotten up and illustrated.

Scranton Florist Supply Company, Scranton, Pa.—Wholesale Florists' Supply Catalogue. A large and profusely illustrated catalogue, giving extended lists of desirable florists' goods; instructive and useful.

Wm. Elliott & Sons, New York, N. Y.—General Seed Catalogue for 1913. In their usual businesslike style, but better than ever. Cuts well-done. Novelty and specialty list very useful. Covers illustrated in natural colors, showing handsome lawn flower beds.

Wm. Henry Maule, Philadelphia, Pa.—The Maule Seed Book for 1913. A big general catalogue (176 pages) of

flower and vegetable seeds, nursery stock, roots, etc.; vegetable section on pale green paper, flower section on yellow. Covers adorned with pansies, asters and vegetable specialties in natural colors.

Chris Reuter, New Orleans, La.—Annual Illustrated Catalogue of "Peerless Vegetable Seeds" for 1913. This is an exclusively vegetable and grass seed catalogue. Mr. Reuter claims that more than 75 per cent of the New Orleans market gardeners grow their crops from his seed. The excellent lists of varieties as given would seem to justify his claim.

Conard & Jones Co., West Grove, Pa.—New Floral Guide for 1913. There is a fine illustration in natural colors of the beautiful rose Jonkheer J. L. Mock on the front cover. In addition to the rather complete general list of seeds, bulbs, shrubs, garden perennials and house plants this firm are devoting more and more attention to roses and cannas, both of which are given much space and many illustrations in this new catalogue.

Henry A. Dreer, Philadelphia, Pa.—Dreer's Garden Book for 1913. 75th Annual Edition. A book of nearly 300 pages bound in pale blue with gold lettering in deep blue medalion. Pleases by its dignified simplicity of design. The contents well illustrate the broad scope of this well-known house. If it's anything appertaining to horticulture that is sought it is sure to be found in the pages of this comprehensive catalogue. Illustrations are numerous and effective. Roses, phloxes, cornflowers, coreopsis and selected vegetables are given full color plates.

Of Interest to Retail Florists

Syracuse, N. Y.—There were some unusual features in the Christmas trade here this year; for there has never been so much holly and greens used before; wreaths, too, were entirely sold out and on Christmas morning one could not buy a pound of holly. A large number of wreaths made of box-wood, princess, pine, laurel, etc., in which ruscus and immortelles had been freely used, sold remarkably well and at good prices. Baskets filled with statice and ruscus were quite a feature with good sales reported. Ruscus is destined to become very useful for decorative purposes at this time of year.

The market was overdone with Lorraine and Cincinnati begonias and a

great many were left over. Poinsettias, azaleas, ericas and cyclamen were by all odds the best sellers and were all sold. Very little bulb stuff was seen. Paper whites and Soliel d'Or as pot plants hung fire.

With regard to cut flowers the demand was not as large as expected, doubtless owing to the sharp advance in price florists were compelled to ask. Violets were in very short supply—thousands more could have been sold had they been procurable. The demand for Beauty, Liberty and Killarney roses was fairly good. Red carnations sold well—stock very limited.

A very remarkable incident regarding the mild weather was that farmers were ploughing their fields New Year's day, a thing the oldest inhabitant cannot remember ever having been done before. So some are deluding themselves with the idea that we shall not have any hard winter weather. The chances are it will come when we least desire it—about Easter time!

HORTICULTURE

STARTING THE NEW YEAR

The first thing you must do is to replenish your stocks. The florists' business is different today from what it was five or ten years ago when once or twice a year was the rule for stocking up. Nowadays there is business all the time, and the wide-awake florist must keep constantly abreast and keep his stocks up to the minute.

DON'T WAIT BEGIN NOW. FOR INSTANCE, BE SURE YOU HAVE PLENTY OF

OUR STANDARD PREPARED CYCAS; known all over for their superior quality and finish; wide and perfect leaves; unsurpassed by anything on the market.

OUR MAGNOLIA LEAVES are the very best, and you ought to have a full supply for working up in spare moments. Brown, green and other shades.

OUR WHEAT SHEAVES; known everywhere as the standard in quality and value.

THE BAYERSDORFER LINE OF BASKETS; a magnificent assortment; all shapes and for all kinds of flowers; for plants; fern dishes; table decorations, etc., etc.

Our Silent Salesman is ready to tell you all about the above, and other florists' requisites. Send a postal.

H. BAYERSDORFER & CO.

THE FLORISTS' SUPPLY HOUSE OF AMERICA

1129 ARCH STREET, - - - - - PHILADELPHIA, PA.

CHICAGO NOTES.

J. C. Vaughan is quite ill.

A number of the Holland bulb salesmen are in the city taking orders.

Carnations are nearer to a normal supply now than at any previous time this season.

J. Vlk is building a new store at 5118 S. Halsted street, Chicago, which will be ready for occupancy in two weeks.

Otto F. Larson, 1604 W. 63rd street, has been in the West Side Hospital for a month. Mr. Larson has been ill for six months but is now gaining.

Albert Cole, American Beauty salesman for E. C. Amling, has been ill with scarlet fever since the week before Christmas. His condition is said to be improving.

Shipping trade has fallen off till the market presents the greatest possible contrast to its appearance just two weeks ago. After two such strenuous weeks a breathing spell does not come amiss.

One of the leading wholesalers put a shipment of Richmond roses into a holiday order by mistake and thinks it worthy of mention that the florist receiving them wrote at once asking to "please send bill."

The regular meetings of the Chicago Florists' Club are held on the first Thursday after the first Monday of each month and the secretary made a mistake in dating the announcements, hence our error in last issue.

Chas. L. Washburn commented on the recent article in a leading Chicago paper in which some very broad statements were made regarding the flower business here, by saying that he believed the leading statement true. In preparing for a speech which he made before the State Florists' Association a short time ago, he went into the study of statistics pretty thoroughly and Chicago appeared to be having twice the wholesale flower business that New York has, making it, no doubt, the leading wholesale flower market of the world. Mr. Washburn thinks that, owing to its larger popu-

CHICAGO PLANT BASKET STYLES.

A GROUP OF HOLIDAY ORDERS AT W. J. SMYTH'S

NEWS NOTES.

North Leominster, Mass.—The hurricane of January 3, wrecked the greenhouse of Mrs. S. J. Proctor, causing a damage of more than a thousand dollars.

Tacoma, Wash.—Frank E. Beal, who sued the city for damages caused by the construction of an alleyway through his place, has secured a verdict in his favor for an award of \$1,015.

lation, New York has far the larger retail trade, however. Chicago's supremacy in the size and number of its large plants has long been accepted as a fact by florists. Peter Reinberg has two million feet of glass and the Poehlmann Bros.' place lacks but 200 feet of having nine miles of greenhouses if placed in line.

Visitors: C. H. Perkins, representing Jackson & Perkins, Newark, N. Y.; Frank Smith, of Smith & Feters, Cleveland, O.

THE FLORISTS' TELEGRAPH DELIVERY.

The following letter, which is being spread broadcast by that live wire, Albert Pochelon, speaks for itself.

Why can we not add your name on our membership list? Just give the Florist Telegraph Delivery one moment of your time. It certainly must appeal to every live Retail Florist as the best thing of its kind ever offered. Every one of the members will tell you that the Telegraph business of their firm has increased since they joined the F. T. D.

I know it from my own experience and can assure you that the more we retailers combine ourselves the more results we will get. I can safely say to you now, that we florists are not getting as yet 10 per cent of the telegraph cable or mail order business which we will have in a few years, but no one is to blame but ourselves. Do we try to educate the public to this to any great extent or not?

There you have the greatest chance with the Florists' Telegraph Delivery to connect yourself link by link with every live florist's establishment of the country and be assured of getting good service and sure pay because there is every member's guarantee in back of him and his doings. Look at the publicity and advertisement you will get for the small annual dues we are charging. Of course we know some people will criticise the guarantee fund question, some the annual dues; some say, "What do we want to belong to the Society of American Florists for? They don't do anything for the retailers." Have the retailers tried to have the S. A. F. do anything for them or not? The field for outgoing and incoming business is so large that even the smallest town will get its share of it.

The amount you pay into the guarantee fund is returned to you if you wish to withdraw from the F. T. D. The only expense you really have is your annual dues, which is only \$2 or \$5, according to the population of your town. If you can get as much good clean advertising as this is for the same amount of money as you pay annually I would like to know. You have your name on our list in all the trades papers aside from all our membership lists which are constantly sent out by all of our members, almost with every order they send out to retailers who are not yet members. The man in a small town has got as good a show as the man in a larger town, in proportion. We want a representative in every town, no matter how small because the day will come when we might be very glad to know that all we have to do is to look up our list and tell our customer that we can deliver this or that order inside of a few hours. Our customer will not only appreciate this but he will respect us for our up-to-date ways and means of doing business. The argument that the fellows in New York get it all, is ridiculous. What is the matter with your town? Is there no one that has friends in other towns who wish to send flowers on some occasion or other? I tell you right now it is up to us florists to let our customers know what we can do and keep it in front of their eyes so they may see for them-

selves that the florist business today is run on just such mercantile lines as every other business is. The more retail florists take up this proposition the more we all gain by it even if there are several in one and the same city. Remember the time will come when you say to yourself, "Why didn't I join long ago? It would have helped me a great deal and also helped perhaps a whole lot of others, besides having done a lot of good for our florist trade in general."

Enclosed you will find a card, and if you will fill it out and mail with check to me I will attend to the rest and see that your name is added to our list at once and each one of our members notified of your membership. If you are not a member of the S. A. F. it will be necessary for you to mail a separate check of \$5.00, which I will send to the secretary of the S. A. F. at once, who will notify you of your membership. I hope you will find enough time to give this the due consideration and let me hear from you.

Very truly yours,

ALBERT POCHOLON,
Sec'y F. T. D.

MONTREAL'S CHRISTMAS EXPERIENCE.

All through the early part of December and right up to Christmas cut flowers, and especially carnations, were very difficult to procure in Montreal. Shippers and growers, in answer to our urgent inquiries for carnations, said that it was impossible to supply them as crops were off. On the question being put regarding cut for Christmas we were informed conditions would be the same until late in January. As storemen there was nothing for us to do but recommend low plant arrangements for the Christmas dinner table, which we did with great success. Of course, we told our shippers to send us all carnations possible under above conditions. In Montreal we were charged 15 cents for red split and mended carnations—Boston prices were 10 cents for pink and white and 12½ cents for red. Now, at the last minute, carnations were shipped in quantity, a great part of which should have been sold two weeks before. The packages kept coming in during the rush and when it was all over we had quantities of carnations unsold. We note that in Boston prices were "good" until the shipping orders were filled. That's true; the man out of town was soaked good. Next year we will specialize on small basket arrangements for table decoration and leave cut flowers alone as much as possible.

W. C. HALL.

WASHINGTON NOTES.

George C. Shaffer, on Monday last, took formal possession of his new store at 900 14th street, N. W. The new establishment is bright and prosperous looking. The walls are tinted cream color, the ceiling is covered with white art metal and the flooring is of mosaic. The 14th and I street sides are entirely of glass which give both light and air. At the rear of the store is a mirror stretching clear across. Above this is a mezzanine floor for storage purposes and back of the mirrored space is a small workroom. The basement will also be occupied by Mr. Shaffer as a storeroom.

George Cooke was the recipient of a wireless order from the officers of the English warship "Natal" last week which requested that he prepare and ship to New York a suitable floral offering in their behalf to be placed on the casket of the late Whitelaw Reid. The order came to Mr. Cooke through the Ambassador from Great Britain. The floral piece was in the shape of an anchor of white carnations on a bed of white roses with black streamers and the British flag further decorating the piece. A. F. Faulkner, of New York, a former Washingtonian, made the delivery on board the "Natal."

Visitor.—A. F. Faulkner, New York.

Flower Market Reports

The flower market has **BOSTON** experienced a considerable reaction this week, demand falling off very noticeably and prices receding since Monday. The colder weather which has now set in may, however, have the effect of staying any further depression. The drop in values has been felt most strongly by the rose and carnation and, of course, bulbous flowers are coming in quite freely now, with a downward tendency in prices. Yellow narcissi of excellent quality are being received. Gardenias and cattleyas are selling well. Violets hold their own somewhat better than was feared after the Christmas breakdown. Mrs. Charles Russell rose is still the leading item in the choice cut flower field.

The last week in the **BUFFALO** year 1912 ended satisfactorily to the merchants—in fact, no better ending could be had. It was a long struggle and as things have quieted down at present it has given the trade somewhat of a vacation, as since the first of the new year there has been no special rush. A number of charity balls and social affairs called for a little extra material though the supply has been normal and enough to fill orders. Lily of the valley, Bonsilene roses, peas, orchids, gardenias and other corsage flowers have had a demand but violets have not sold as well as in past years. Roses have shortened in supply and especially the short grades, there being a good supply of specials and fancies in Killarney, Maryland and Richmond. Lilies sold well, also mignonette, etc. Paper whites are plentiful. Beauties and Richmonds had a fair demand for New Year's; the supply was good in all grades. Carnations were not over plentiful and prices held firm. There were plenty of greens of all kinds.

Business kept up well **CHICAGO** till after New Year's Day, when orders dropped off fast and local trade became quiet also. Tired out with the days of incessant work, wholesalers and retailers alike were glad of a rest. Saturday did not bring the usual rush of business and Monday was very quiet. Cloudy weather has held stock back, so there has been no great accumulation of flowers. The one really scarce article is the sweet pea, which holds up well in price and is bought up early. Few, if any, are seen after 10 o'clock. Carnations took a decided drop after the first of the year and it is not expected that they will be so scarce again this season. There is a fine crop of Beauties and every length of stem can be had. Richmonds, Killarneys and all other roses are in, in quantities sufficient to fill any-sized order, and color is good considering the dark weather. There are a few gardenias each day—just about enough for local demand. Violets are moving fairly well, the singles finding special favor for their rich color and long stems. Paper whites are not moving very fast. Lily of the valley has met with exceptionally good sale so far and quality has been first class. There is plenty of all kinds of green.

WHY P-M RIBBONS ARE THE BEST

It is a well known fact that houses all over the country attempt to copy the P-M Ribbon styles and particularly P-M color combinations.

Competitors have long recognized the fact that the P-M Co. are leaders in the onward march to furnish the newest and best at all times and are always first to offer the latest in up-to-date color shades.

Customers desiring Ribbons to match perfectly any flower or foliage or combinations of the same are sure to get the right article by sending to the

Weather conditions **CINCINNATI** the first part of this week and the general market situation are rather gloomy to say the least. Stock has been coming in stronger each day and the call for the same does not keep pace with it. Sweet peas are the only item cleaning up regularly. On other flowers sacrifices must be made in order to unload. The market, in short, seems to be approaching a condition of where the buyers alone dictate the price. The only thing, at present, that will stop this is a protracted spell of

severe cold weather. The weather man has predicted an extremely cold wave, but it seems to be very slow in coming. In the meantime we will have to worry along with an oversupply of carnations and a rose market that is full of offerings of the highest quality but that does not realize what it should. All other lines, too, are well supplied, from callas and lilies, which are selling pretty well, to violets, lily of the valley and orchids, and including seasonable bulbous stock and poinsettias.

Flower Market Reports

(Continued from page 53)

NEW YORK Things are quiet enough in the wholesale markets, ever since the new year came in. Conditions have favored the "bargain counter" element all along and any one who looked for big returns from New Year's sales was slated for the usual disappointment on such occasions. Carnations have fallen from their pinnacle and can be had at low figures. Roses are also going down in value and the demand from other cities which helped out for a brief period soon petered out and consequently the local market must do its own consuming as well as its own producing. Quality runs excellent on about everything and it can be safely asserted that never before at this season of the year has there been so great a variety of miscellaneous material for the flower buyer to choose from. After the inevitable reaction of early January we may expect the usual lively society season but in this case it will be a very brief one as Easter and Lent come in at so early a date. Tulips and other bulbous stock are seen in much better quality than at last report. Single violets lead the double in demand and selling price.

PHILADELPHIA January seven—the period under review in this report—turned out just about as expected. Trading was in no way brisk, neither was it any worse than in former years, for the same date. The usual after-the-holiday lull was inevitable. And it happened; but no worse than usual. Stocks of all kinds were plentiful and good. Of course, prices ruled much lower, but there was no glut. The final cleanup all along the line, at reasonable figures, proved the healthy tone of the market. An exception may be noted to this general statement in the sluggishness of the long-stem roses, carnations, etc. These highest grade items suffered more by the fall from quoted rates than did the good to medium at moderate prices. Carnations are much more plentiful and the prices receded until they are now very moderate indeed for mid-winter. The same may be said of gardenias. The demand keeps good for sweet peas and lily of the valley and both have improved in quantity and quality. Nothing new to report in orchids. The local violets are especially good at present. Snapdragon not enough of the better grades and colors. Daffodils and pussy-willows are cheerful hints of the coming spring. White

camellias are a novelty in the wholesale markets at present, with good stems and foliage.

ST. LOUIS New Year's trade was by far better than expected. It was more

like a spring day and this brought up the flower buyers, which brought up this New Year's to what it was some years ago. There was plenty of stock for all at very reasonable prices, which goes to show that they will buy flowers when reasonable. Prices were entirely too high for Christmas and this made the sale of plants so large that all of the West End show houses were cleaned out of plants. Today, Monday, Jan. 6, we are having our first real winter day, with everything covered with ice. Roses are coming in in large quantities in all varieties. Carnations did not bring much last week; the supply was greatly in excess of the demand. Lily of the valley and sweet peas sell well. Violets are down. Lilies are quite abundant and paper whites a glut. Roman hyacinths, too, are many.

Washington, D. C.—Business during the past week was very good although prices have been cut nearly in half since the close of the holidays. Carnations, which were quite scarce during that period, are being offered extreme-

ly low. American Beauty roses, too, have dropped in value. The outlook for big business during the present month is good.

PERSONAL.

J. D. Robinson of Bloomington, Ill., and Miss Louise Read were married on Dec. 23d at Savannah, Ga.

J. McHutchison of New York sails next week on the "Bermudian" for a two weeks' stay in Bermuda.

Mr. and Mrs. P. J. Olinger, of Cincinnati, have been spending the week since New Year's in Chicago, Evanston and Aurora, Ill., with their relatives.

The Massachusetts State Board of Horticulture, meeting in Boston this week, has selected Wilfrid Wheeler, of Concord Junction, for the position of Secretary of Agriculture for the state, and there is no doubt of Mr. Wheeler's confirmation. The position carries with it a salary of \$4,000 a year.

Boston visitors.—C. B. Knickman, representing McHutchison & Co., New York; M. B. Faxon, New York; A. H. Wingott, Lenox, Mass.; Frank H. Traendly, New York City; Robert Simpson, Clifton, N. J.

DURING RECESS.**The Rice Dinner.**

"The best ever," was the consensus of opinion among the staff of the M. Rice Co., when asked how they enjoyed the dinner and theatre party given them in reward for their faithful services rendered during the year of 1912. The dinner was served at the Bingham House in the private banquet room and was splendidly arranged; floral decorations by R. Q. Shoch. A vote of thanks was extended by E. G. Bowers, advertising manager, on behalf of the employees to Mr. B. Eschner, who made the enjoyable evening possible. Mr. Eschner responded and in part said that the next affair would be even better. A. Zirkman, R. Q. Shoch, R. Brunswick, F. J. Farney and John Willard, superintendent of the Rice factory, all had a word to say, after which the staff wended their way to Keith's to hear Cissie Loftus explain why it is and isn't.

Among those present were Joseph Lane, Frank Feinstein, August Stadler, Wendel Gillich, Frederick Carbiner, Anthony Angelo, Harry Bloom, Philip Bastine, Timothy Callahan, Thomas Coya, John Henry, Casper Wild, James Lane, John E. Willard, Jackson Neil, Robert Glass, David Boyle, Harry Meis, Raymond Barker, Frank Smith, Israel Radbill, Samuel Edelman, B. Eschner, A. Zirkman, R. Brunswick, R. Shoch, F. J. Farney, E. G. Bowers.

PHILADELPHIA NOTES.

We are glad to report that the crisis has been passed in the case of the eldest son of Samuel S. Pennock (Charles) and that there are hopes for his recovery. The illness of the rest of the children was not so serious, and they are all on the mend.

John Sculley has severed his connection with M. Rice Co. and has associated himself with F. G. Hastings, florist, of Germantown. His place with M. Rice Co. as city salesman has been taken by S. Ettleman, who has been floor salesman for same concern for several years.

They are saying nice things about the "gray-haired laird"—Edward Reid—on the way he has started in, together with his associates on the committee, running the essay proposition of the Florists' Club. This position really means everything. He is the premier in the cabinet.

David Adam, late of Aberdeen, late of New York, late of Philadelphia, has gone back to New York to hold down an important position with Peter Henderson & Co. During the years he has been with us here in the Dreer store he has made many friends and we are all sorry to see him go, although we rejoice to see him keeping on ascending the ladder.

Fred Michell, Jr., is making the Baltimore and southern trip for his firm, the Henry F. Michell Co. Usually his father, Fred Michell, Sr., has made this trip. We bespeak a cordial welcome from the readers of Horticulture for young Fred—who is no whit behind his daddy in geniality and good sense. He has been raised from boyhood in his uncle's business and knows it from A to Z, so you can talk business with a man who knows what he is talking about in every detail, and that's saying a lot.

HART MAKES HANDLES FOR POTS

With Paper or Porto Rican Mats They Make Baskets. These are the Well-Known HART'S HANDY HANDLES.

Shipments are being made daily eastward to Boston, westward to San Francisco—and everywhere else. Once used always used, because they are SO HANDY.

Prices per dozen—No. 1, \$2.50; No. 2, \$3.50; No. 3, \$4.00; No. 4, \$5.00; No. 5, \$6.00.

GEORGE B. HART, 24 Stone St., Rochester, N. Y.

Visitors: Louis J. Reuter, Westerly, R. I.; Ernest Matthews, Buena, N. J.; James Brown, Coatesville, Pa.; Herman Hunkel, of Holton & Hunkel Co., Milwaukee, Wis.; George Cruickshank, rep. R. & J. Farquhar & Co., Boston, Mass.; C. P. Kimberlin, "1915" Calif.; W. H. Vance, Wilmington Del.; Wallace R. Pierson, Cromwell, Conn.; John R. Andre, Doylestown, Pa.

CATALOGUES RECEIVED.

The Advance Company, Richmond, Ind.—Illustrated Descriptive Price List of Advance Ventilating Apparatus and Greenhouse Fittings. A very useful book for everyone having one greenhouse or fifty.

Arthur Cowee, Berlin, N. Y.—Everybody's Flower, The Modern Gladiolus. This is a very interesting publication, giving in addition to the lists and prices of Mr. Cowee's selected varie-

ties, suggestions regarding the cultivation of the gladiolus and other pertinent reading matter. There are a number of 3-color process plates showing special varieties in natural tints.

IN BANKRUPTCY.

Schedules in bankruptcy of Butler, Florist, Inc., 18 East 46th street, New York City, show liabilities \$19,139 and assets \$1,468, consisting of cash, \$47; fixtures, \$262; delivery wagon, \$212; accounts, \$939, and fire insurance, \$8. Eugene G. MacCan, president of the company, is a creditor for \$14,650.

FIRES.

Savanna, Ill.—A damage of about \$500 was done to the greenhouses of E. Gabourie on Dec. 23d.

Brookline, Mass.—James F. Quinn's flower store was damaged by fire and explosion on December 5.

AN INTERESTING MARYLAND FAMILY GROUP.

Ex-President Richard Vincent, Jr., and wife, three sons and daughter, and sixteen grandchildren.

PUBLICATIONS RECEIVED.

The eighth annual report of the Tennessee State Entomologist and Plant Pathologist Prof. G. M. Bentley, has been issued. From it we learn that the annual loss in Tennessee from insects destroying crops is as follows:

Corn	\$5,558,300
Wheat	794,900
Barley	7,600
Rye	22,400
Buckwheat	3,800
Oats	307,100
Hay and forage crops	1,261,800
Tobacco	530,145
Nursery stock, flowers and plants	104,200
Strawberries	83,579
Orchards	345,900
Grapes	1,404
Forest and timber products.....	851,100

\$9,872,228

Fifteen nurseries were condemned in 1912 and 351 have received state certificates permitting them to sell nursery stock until August 1, 1913. Stock from these nurseries is sold chiefly without the state, less than one-eighth being retained in Tennessee. Trees and ornamental shrubs and vines from Tennessee's nurseries are shipped to all parts of the United States and Canada, as well as to England, France, Germany, Spain and Portugal. One hundred and eight nurseries, mostly strawberry plant growers, will have no stock for sale during the season of 1912-'13. The continued cold weather in the spring caused strawberries to ripen late in Tennessee. By the time the heavy picking came the prices were very low. Consequently some growers became discouraged and did not continue cultivation. In West Tennessee many plant beds were drowned out by the memorable high water conditions prevailing there in the early spring. There is little doubt that this reduction in numbers of the plant growers will be permanent.

Copies of this report may be had on application to Prof. G. M. Bentley, Knoxville, Tenn.

Horticultural Directory for 1913.—This annual publication by the Journal of Horticulture, London, England, has just been received. It is bigger and better than ever. The section devoted to Societies has been recast and arranged in strictly alphabetical order; the section devoted to Park Superintendents is entirely new; and the names and addresses of American Seedsmen and Nurserymen largely increased. Other new features are lists of Fruit, Flower and Vegetable Trades Societies and of the National Federated Association of Fruiterers and Florists. The contents include County Staff Instructors in Horticulture; Victoria Medal of Honor in Horticulture; Garden and Post Town Directory; Garden and Railway Station Directory; Horticultural Builders, etc.; Fruit, Flower and Vegetable Trades Societies; National Federated Association of Fruiterers and Florists; Parks, Gardens and Open Spaces in London; Principal Public Parks in Great Brit-

Wizard Brand Manure is especially useful to the florist in winter when the crude rough manure supply is wet, frozen and hard to get.

Sheep or Cattle Manure Pulverized or Shredded

A kind for every use and in most convenient, effective form. Saves labor, is ready for instant use when most needed and can be depended upon.

One hundred pounds in a bag equals a whole wagon load of stable manure.

Don't fail to specify **Wizard Brand** when you order and you'll get the best. Your supply house can furnish it if you insist, or we ship direct promptly.

THE PULVERIZED MANURE COMPANY
31 Union Stock Yards, - - - CHICAGO.

SLUG-SHOT

USED FROM OCEAN TO OCEAN FOR 29 YEARS!

Sold by Seed Dealers of America.

Saves Currants, Potatoes, Cabbage, Melons, Flowers, Trees and Shrubs from Insects. Put up in popular packages at popular prices. Write for free pamphlet on Bugs and Blights, etc., to B. HAMMOND, - Fishkill-on-Hudson, New York.

The Recognized Standard Insecticide.
Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

FOR SALE BY SEEDSMEN.

Aphine Manufacturing Co., Madison, N. J.
Manufacturers of Agricultural Chemicals
M. C. EBEL, General Manager.

Cocoanut Fibre Soil

Trees mulched with this article will grow larger fruit, better color, and ripen more uniformly than by any other means. We have proved it.

20th CENTURY PLANT FOOD CO.
27 & 29 OCEAN ST., BEVERLY, MASS.

In ordering goods please add "I saw it in 'HORTICULTURE'."

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

CAMBRIDGE, MASS.

ain and Ireland; Educational Colleges; Nurserymen, Seedsmen and Florists in Great Britain and Ireland; Gardeners in Great Britain and Ireland; Principal Fruit and Flower Salesmen and Commission Agents in London; Landscape Gardeners; Alphabetical List of Horticultural Societies, etc., in Great Britain and Ireland; Florists on the Continent and in the British Colonies and United States of America.

The Fourteenth Report of the State Entomologist of Minnesota, which has just been issued is a most valuable document. No effort or expense has been spared to make it reliable and useful to the agricultural and horticultural interests which are so potent a factor in Minnesota's prosperity. Grasshoppers and other injurious insects of 1911 and 1912 are the general topic and all the minute details of insect life, with approved methods for the extermination or control of these pests are carefully recorded. The book is very fully illustrated. There are three full-page plates of various grasshoppers, crickets, locusts, etc., in natural colors.

OBITUARY.

Mrs. B. Merkel.

Mrs. B. Merkle, who has been engaged in the florist business in East Rutherford, N. J., with her sons Carl and Frank for some years, died at her home in that town on Dec. 21st, aged 63 years.

William S. Fisher.

The floral trade of Washington, D. C., regrets the death of William S. Fisher, who has been among them for many years. Mr. Fisher was born in Virginia 54 years ago. Coming to this city at about 15 years of age, he entered the employ of the late John R. Freeman as an apprentice. At about the time he reached his majority he opened up for himself on Pennsylvania avenue, near 14th street, N. W. He later removed to 717 15th street, N. W., where he remained for two years, selling out to Mr. Bolgiano. He was employed by J. H. Small & Sons for about 12 years following that time, going then to the Washington Florists' Company and managing their uptown branch on 14th street. He later gave up active work, accepting employment only during a few months each winter, spending his summers traveling about the seaside resorts. Funeral services were held on Tuesday morning last from his late residence, 1135 9th street, N. W. Mr. Fisher is survived by two sisters, Misses Hattie V. and Mattie Fisher.

Wichita, Kans.—The Wichita Nursery Company has increased its holdings and will develop its departments by the addition of many new employees.

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Ea.	Doz.	100
10	20 in.	\$1.45	\$16.00	\$130.00

Greenhouse Materials FURNISHED IRON or WOOD SASH BARS

In all lengths up to 32 feet. Milled to any detail furnished or will furnish details and cut materials ready for erection.

Frank Van Assche, Fulton Ave., Rose Ave.
and Dwight Street
JERSEY CITY, N. J.

CURVED IRON EAVE STYLE "S."

This Eave is intended for use on detached houses with either fixed glass or side wash.

It is practically all exposed to the inside heat of the greenhouse and so is ice clearing.

KING GREENHOUSE EAVES

THEY SOLVE THE EAVE PROBLEM
THEY MAKE THE LEAST POSSIBLE SHADE

and as you can see

present no surface for icicles to form on. They have great strength with lightness. They are designed and made for the purpose and not adapted from stock structural shapes.

WE WANT TO FIGURE WITH YOU.

CURVED IRON EAVE STYLE "L."

This Eave although lighter than Style "S" is amply strong for all Eave purposes.

It obstructs little light and is ice clearing in the most severe weather. It is intended for use with fixed glass only.

The Importance of This Reason Book

This being so, then naturally enough you will buy a greenhouse much the same way.

Suppose, for instance, you want to know thoroughly about the U-Bar Greenhouse, and have been wondering if there are any houses in your vicinity you could see; wouldn't a booklet giving you the names of all U-Bar owners and the character and extent of the greenhouse they own, be of interest and assistance to you?

Let us suppose still further, that you want to confirm your decision to buy a U-Bar house by seeing who some of the others are who arrived at the same decision and built; wouldn't a booklet grouping such names in a readily get-at-able way be just the thing you want?

That's why we made just such a booklet.

It's called "Reasons."

The Reasons themselves are told in 93 words, right at the start—the rest is given over to a unique and interesting arrangement of the locations and owners of U-Bar houses built in the last few years. Send for this Booklet. With it we will mail you our catalogue and a section of the **U-Bar itself**—so you can see exactly what the U-Bar is.

BEFORE talking about the Reason Booklet itself, let us first ask you a question or two:

When you buy anything of importance involving the expenditure of several hundred or thousands of dollars, do you rely entirely on your own individual information, and go right out and buy it? Of course you don't.

In making your final decision, are you not strongly influenced by the opinion of some one who has already bought—and is satisfied? Doesn't the fact that this or that person, company or institution of prominence has put their stamp of approval on it, by putting their money into it, carry a good deal of weight with you?

U-BAR GREENHOUSES

PIERSON U-BAR CO

ONE MADISON AVE., NEW YORK

CANADIAN OFFICE, 10 PHILLIPS PLACE MONTREAL

ERECTED AT RUMSON, N. J.

SEEING how attractive and practical this arrangement is, do you wonder why **THE LUTTON PATENT CURVED EAVE** method has changed Greenhouse Construction during the past few years? The result has been the most successful house that can be produced; the other concerns who had been producing the same antiquated buildings for years had to simply destroy their patterns as well as their catalogues and start anew. Just ask some of our imitators to show you some of their curved eave houses built before **THE LUTTON PATENT** was granted, you will then be convinced that you had better consult with me.

WILLIAM H. LUTTON, DESIGNER AND BUILDER West Side Ave. Station, Jersey City, N. J.

A NEW AZALEA VARIETY

"Petrick's Superba" has been originated by our Ghent connection, Mr. C. Petrick, the well known Azalea expert. Mr. Petrick says it is a great improvement of Madame Petrick, and is superior on account of its beautiful color—similar to Vervaeana. It forces as early and as easily as Madame Petrick and is the most desirable of all for Xmas flowering. Of course, like all new varieties, the quantity is scarce, and only a few are available this year and then when accompanied with a reasonable order for other varieties. Buyers who use 250 Azaleas upward, and are in good financial standing, may buy direct from Mr. Petrick, at the Ghent wholesale prices. Those using less than the above quantity we shall be glad to supply with Mr. Petrick's stock, at prices duty paid, f. o. b. New York. The name of Petrick needs no introduction to growers who are acquainted with Ghent, but for those who are not familiar with the source of supply we may say it is the best in Belgium. The prices are standard—the same to all. Orders are filled in strict rotation—so early orders are advised. Write for a catalogue.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Carnations

From now on as the season advances carnations will need ventilation on all favorable occasions. It pays to look after the airing very closely. If neglected for any length of time, they will soon show it. To support and encourage a vigorous growth with fine flowers, they should from now on get some extra stimulant in the way of liquid feeding and light mulches. First give the beds a good cleaning to remove all foreign matter, and then apply a nice coat of bone dust, say at the rate of one peck for every 250 square feet of bench surface. This can be followed by a light mulch of loam and cow manure in equal parts put on about half an inch deep which will be plenty. These light mulches every month with liquid manure about once a week will help to give a fine crop of flowers of the best quality. Examine the benches every day for the dry places which can be watered. Where red spider is present give some vigorous syringing early in the morning. Fumigate every week to keep down green fly.

Tuberous Rooted Begonias

It is time now to make a sowing of tuberous-rooted begonias. Few plants are better adapted for summer and fall decoration of the window garden, veranda, or conservatory. They can be sown in pans that have been well drained. For a compost use new loam and leaf mold in equal parts, with a fair dash of sand to make it porous. Fill the pans to within half an inch of the top and on this place a little of finely sifted compost and press moderately firm and water. When they have drained sow the seed evenly over the surface; they do not need to be covered. Place a pane of glass over each pan. Place these pans in a house where they can have a high temperature; anywhere around 65 to 70 degrees will help them to germinate better. When the young seedlings begin to appear they should be placed up near the glass and as the sun becomes stronger they will need to be shaded from the noon-day sun. They can be pricked out when they are large enough to handle and given good care they will soon grow into a nice size to pot into 2 or 2½ inch pots.

Bedding Plants

The florist who has to grow a large number of bedding plants should have this department now well under way. Give your stock plants all attention to keep them growing well. The proper temperature for most bedding plants is from 55 to 60 degrees at night with about 15 degrees higher during bright weather. Stock plants that are pot bound should be given a shift using a good rich soil. The atmosphere should be kept moist by wetting down walks and under the benches twice a day with a good syringing overhead on good days. When taking cuttings off always leave a couple of eyes at the base of the new wood to produce a new batch of cuttings later on. Keep all such stock as abutilons, fuchsias, achy-

ranthes, alternantheras, heliotrope, petunias, verbenas, vincas, salvias, ageratum, coleus, geraniums, etc., growing along by potting as they may need it, giving them more room between the plants and never let them lack for moisture at the roots. Fumigate at least once a week.

Easter Flowering Shrubs

Bring in all flowering shrubs intended for Easter and give them a house where the temperature stands about 50 degrees at night. In order to have them break away freely they should be sprayed well overhead at least three times a day. This syringing can continue daily until they show the opening of their heads. The temperature can be raised five degrees every ten days until you have them at about 65 degrees night temperature. All shrubs will be better every way if they have all their hard forcing a week before they open flower buds. When they start to open their flower buds a temperature of about 60 degrees at night will be high enough. Keep them in a house where they can have full sunshine and give ventilation whenever the outside conditions of the weather are favorable. When root action becomes more active they will take a copious supply of water at the roots. When your shrubs are fairly well in flower they should be given a house that stands about 50 degrees at night which will add to their keeping qualities as well as give substance to their flowers. Good subjects to force are virburnum, weigela, spiraea, magnolia, forsythia, judas, almond, peach, cherry, pyrus, rhododendron and kalmia.

Orchids

Now that we are bound to have our coldest weather keep all orchids at their minimum temperature in their several departments, as many plants will now be resting and should not be excited by too high a temperature. Particular care should be given in watering. In order to counteract the drying influence of the strong fire heat required at this time of the year damp down the floor between the plants and below the benches thoroughly two or three times a day. Utilize any spare time in cleaning or sponging the plants so as to keep them rid of scale or thrips. Always try to keep a constant supply of fresh air by careful ventilation. Make it a point to frequently freshen the atmosphere by allowing some ventilation for at least an hour at a time.

Vincas

Large vincas in 5 or 6-inch pots can now be divided up and potted into 3 and 4-inch pots using a rich compost. These can be grown on and will make fine plants by the time they are needed. Where you want to work a good batch for a year hence put in cuttings now. These can be potted up and kept until they can be planted out in the open ground where they will make fine stock by next fall.

Mr. Farrell's next notes will be on the following: Aspidistra; Candytuft and Stocks; Forcing New Crop Lily of the Valley; Gloxinia Bulbs; Jerusalem Cherries; Order Seeds Now.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Moving Vines

Vines can be transferred from the house they are growing in to a neighboring one or shipped a distance if the work is done properly and at the right time. The only time to do this and be sure of success is when the leaves commence to fall, so it depends on what house they are growing in to determine the date. None, however, should be left later than the present date as the leaves will be falling in the latest houses now. When moving young vines having only the first width of soil to them, it will be advisable to knock away the temporary wall keeping the soil in place on the inside. In this way no risk is taken of cutting off young roots. Older vines having more soil can have a trench dug down to the drainage and the remainder of the soil forked away from between the roots. This is a tedious job and one that requires a great amount of care. Get all the roots free and then tie them up in bunches to avoid injury in transit. It is impossible to get a ball of soil with the roots of a vine, so all the roots must be carefully got out and kept moist. To move one from between others means to loosen some roots of both, as they grow into each other's territory down in the soil. A division at the half-way line is all that can be done and the roots "cut" away, not chopped off. Often it will be found necessary to plant deeper than when planting young vines. Give them a watering to settle the soil about the roots and spray the vines over in good weather.

Pot Trees in Flower

Peach and nectarine trees growing in pots started December 1st, or sooner, will now be in flower and attention must be paid to setting them. With good clear weather this is easy as they usually readily comply with our wishes. Syringing must be discontinued for a time; there is no harm, however, in giving the floors or walks a damp round first thing in the morning. Keep the heating pipes warm and get a little air on early, increasing this as fast as the weather permits. About noon the pollen will be dry and ready to take its course. Both peach and nectarine have a complete flower and are formed well to make setting easy—stamens and pistil being in close proximity. There is a vast difference in the size of the flowers of different varieties. Take Peregrine peach and Stanwick Elruge nectarine, the former an elegant flower with broad petals, the latter quite diminutive and of little beauty; both are equal in productiveness. It will be best to go over the flowers with a soft brush or piece of fur to distribute the pollen. About the best and easiest-made article for this purpose is a rabbit's tail mounted on a piece of cane or wire for a handle. Gently stroke the flowers and if in a right condition the pollen will be easily seen moving around. In clear weather a damping of the walks immediately after will be beneficial. Keep a night temperature of 50 to 55 F.

Making a Melon Bed

The old idea and one that is practised today in some places, of making a melon bed, is to first make a large

hot-bed of stable manure and leaves on which to place the soil. Today in the up-to-date establishments with houses built especially for growing melons in, all this is eliminated. There is no need of it with the benches having perforated plates on the bottom, which allows the heat to penetrate the soil from the heating pipes below. Another advantage of this arrangement is, there is no danger of plants "hanging" as the hot-bed settles down beneath them. It was usually necessary to cut away a quantity of the ties to let the plant go down with the bed or take a big chance of having something go wrong. This all went to make an unsightly appearance and now we have nothing to fear in this line.

Opinions differ greatly as to what texture of soil melons thrive best in; some prefer sandy soil while others go to the other extreme. I have seen both used in different localities to good effect. If good thick pasture loam, inclined to be heavy, could be procured I should certainly grow melons in it. On the other hand, in some places this is out of the question, in which case I would use what is going. Experience has taught us melon plants most decidedly relish moderately fresh loam—stacked about three weeks so that the grass has had time to decay. If good sod is to be had make your bed the thickness of two which will be from four to five inches, scattering a little lime rubble in between. In using anything short of sod which can be so handled it will be best to chop up roughly enough soil from the heap and mix in plenty of lime rubble or plaster and also a little charcoal.

Melon beds require to be made quite firm at all times. Loose beds only produce rank growths liable to contract every disease that is going and as a general rule swell away only one fruit. The mounds for planting into can be of the same soil as the lower portion of the bed, a heaped up six inch pot being quite large enough.

Making a Cucumber Bed

A cucumber bed differs in many respects from a melon bed. In the first place the soil differs and is not made so firm; secondly, a much less quantity is used; lastly, a system of top-dressing at regular intervals must be adopted. There is a difference in the planting too. To avoid canker trouble in a melon, plants should not be buried any deeper than when growing in the seed pot. A cucumber can be planted right up to the seed leaf without any fear of trouble.

To commence cover over the bench about 21 inches wide with a single sod face downwards. Place the mounds on this at intervals of two feet. Enough soil only to cover over the balls nicely should be given them, at first and as the roots show through this top-dress them with another inch of soil all over the bed. Plants growing well will need a top dressing once a week. By this method are the best results obtained. A mixture of three parts loam, two leaf soil, one fresh horse manure, with a little sand if the loam is heavy, should grow good cucumbers. No ramming is needed; press the soil firm with the hands.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Blackspot

This disease will no doubt prove more or less troublesome during the dark, damp, rainy weather which we have been having for the past week or two. Those who followed our advice and kept after it early in the fall when it was easy to pick it off and burn it, will be very glad indeed. If your plants have had spot before and it is breaking out anew you will have to be more than careful if you expect to pull your plants through without checking them much. Keep the plants on the dry side a little bit, picking off and burning whatever spot you can find. This, of course, must not be done where all the leaves on the plant are affected, as this would leave the plant leafless. The only thing to do in cases like this is to spray the plants well with ammoniacal copper carbonate or some other good fungicide, and then try to grow the plants out of it. This is no simple task, to say the least, and growers must use their own judgment as to the best course to pursue. A light dose of lime will usually do wonders in helping to dry the plants out. Avoid all syringing unless the condition of the plants demands it. Should spider prove a menace, syringe very quickly on all clear mornings, shaking the plants well to insure their being perfectly dry by night. Then do not forget to blow plenty of air-slaked lime underneath the plants to dry out the air still more. If cold weather prevails, always leave on a crack of air at night and never mind the extra coal it takes to keep up the temperature. Of course if the thermometer drops below 26 it is just as well to close the ventilators, as enough heat will have to be used to keep the air in proper condition. After the plants show signs of improvement, a little liquid manure can safely be applied. This will give the plants more vigor and they will soon be on the safe side.

Temperature in Dark Weather

Trying to regulate the temperature in the houses this changeable weather is not a job for the inexperienced. Many growers will make the great mistake and stick almost anybody on the night firing duty. We are sure such growers live to regret it for it is a very poor policy. The weather man must certainly be very unsettled if he gives us weather according to the mood he happens to be in. With the high winds the problem becomes even more complicated as glass is liable to be blown out. We have been very lucky in this respect, losing only a few panes of glass out of some hot-bed sash which the wind seemed to take great pleasure in scattering about. And they were piled up nicely too with heavy pipes on top, but that made but little difference to the hurricane.

Keep your eyes on the thermometer outside. That is the only way you can keep your temperature even in the

houses. An experienced man knows just how many pipes it will take to hold up the houses when the mercury stands at so much outside.

Do not run your houses too warm; 66 degrees F. is plenty for these dark, cloudy days. With 60 at night the roses will not grow as much as they would if the day temperature was raised a little more, but the growth will be far healthier, and the plants much less subject to disease. This is important, as we all know what a bad dose of mildew at this time of the year would mean. And as soon as the plants become what may be termed "soft" they will get it as sure as the world.

As advised in these columns before, do not run the houses too warm the first clear day after several cloudy ones. This will help the plants get used to the sunlight once more and they will not wilt; 70 to 72 is plenty for these days, as it can be gradually increased until the regular day temperature is reached again.

The Cuttings

With the propagator full of cuttings it will hardly pay to neglect it in any way. Keep right after the temperature and try to keep it as steady as possible, both in the sand and in the house itself. See that there are no draughts anywhere. It is a good idea to cheesecloth all the ventilators, thus making sure that no wind can possibly blow in. In watering be very careful to water as early in the morning as is safe so that the plants have plenty of chance to dry off before night. It is not good to water too early in the morning, as the cuttings are liable to get a chill, and this would not be doing them any good at all. Where it can be done we would advise watering the plants with lukewarm water. But it must not be too warm—just warm enough to take the icy chill off of it. This especially applies to places where the water comes from a tank on the premises. As can be expected, this tank will likely have some ice in it and we are sure the cuttings do not delight in an icy bath. Spider should not give any trouble in the propagator, providing the cuttings were taken from clean healthy plants, and no cuttings should be taken from diseased plants. Should spider appear very bad the only thing to do is to rip all the cuttings out and put new ones in, making sure they are clean. All cuttings can be dipped into some good insecticide and be greatly helped by it. They must not, however, be allowed to soak in the mixture for any length of time, as this would be likely to take a large number of the leaves off. Just dip them and make sure that the material reaches all the leaves. Then rinse them good with clear water and you will have them pretty nearly clean. Be careful, however, not to bruise the leaves any, as this would damage the vitality of the cuttings considerable.

Horticulture

Publicity among the kind of readers reached by this paper is THE SORT OF PUBLICITY THAT PAYS.

Spring Flowering Hardy Phloxes

I am well aware of the climatic advantages of the north in regard to midsummer effects of flowering hardy perennials. For spring and fall, however, conditions are more favorable in middle Atlantic and central states. Close observation as time passes shows a keener realization of the splendid opportunities for the future. The steadily increasing demand for spring-flowering phloxes is one evidence thereof. Leading landscape gardeners, during recent years, have begun using them in many instances quite extensively and illustrations of various plantations, no doubt, have been instrumental in creating a general interest. The most convincing demonstration of the ornamental value of this hardy type of phloxes are sheets of color in snowy white, light and dark pink, various shades of lavender, carmine and magenta red, produced by the blossoms of *Phlox subulata* and *Phlox amoena*, when we see them in reality. American visitors at the International Exhibition in England, last spring, appeared deeply impressed by the artistic beauty of rock-garden work abroad. In the various illustrated descriptions I have read, it did not appear to what extent phloxes were employed. Indications at home show that in the floral spring arrays of present and future rockeries they are to be a prominent feature. *Phlox subulata*, the "moss" or "mountain pink," on account of the creeping habit of growth, the dense carpet of blossoms and nearly evergreen, fine foliage, is indeed an excellent planting material. Thriving by nature in high locations they quickly commence to ramble over rocks, fill crevices and establish themselves on steep and arid slopes. Reliable to endure the hot midsummer month without harm, they very rarely suffer if under light cover in winter. This covering is most essential during March, when the soil under the thick mass of creeping growth remaining in a frozen state prevents root action, while the warm sun-rays disastrously urge vegetation. Of the garden varieties of *Phlox subulata* recommendable, I mention *alba* and *Nelsoni*, as the best pure white; *lilacina* flowers light lilac; the blossoms of *Bridesmaid* are white, purplish tinted; those of *atropurpurea* purplish rose, while *subulata rosea* is covered in May by a mantle of bright pink hue.

Very closely related to *Phlox subulata* are the slightly higher and freer growing varieties of *Phlox setacea*, syn. *P. frondosa*, distinguished by clear, strong shades in colors desirable for brilliancy in floral effects. The *Bride* is a handsome white with pink eye; *G. F. Wilson* flowers slate blue, while *Goos & Koenemann's* new *Bluetentepich* appears in clear pink and their latest introduction, *Sternentepich*, produces charming sheets of star-shaped blossoms of a beautiful clear lavender blue. *Phlox amoena*, one of the older species, 7 to 8 inches tall, can be used for spring bedding or for edging purposes. Our frontispiece shows its effect in the writer's rock-garden built last year. The planting was done April 6th, and the picture taken May 25th, following. The color of the flowers is a bright carmine pink of remarkable strength.

PHLOX SUBULATA ALBA

Equally well known is *Phlox divaricata canadensis*, 1 foot high, flowering in loose panicles of a pure pale blue. Distinguished by a more robust growth and longer period of flowering is the very striking novelty *Phlox divaricata Laphami*. A great acquisition for rockeries, it will be found extremely useful as a bedding plant and for the herbaceous border, its beautiful large pale blue flowers being a choice material for cutting. Closing my notes, I wish to call attention to *Phlox pilosa*, one of the best spring-flowering species for grouping. In bright sunlight the effect of its masses of clear rosy lavender flowers on stems from 12 to 16 inches long, is simply grand.

All the taller growing varieties mentioned should be cut back after flowering, to insure a strong bushy growth near the root-stock and a green appearance through the later part of the season. The species *subulata* and *setacea*, being creepers, as a rule are not cut at all. Spring flowering phloxes prefer a light sandy soil of sufficient moisture-retaining humus to prevent them from being burned out. Propagating is done by division or cuttings. As a rule seeding is not very abundant, and for this reason seeds are seldom obtainable.

Richard Rothe

Riverton, N. J.

Reading notices are the worst possible kind of advertising, for they are on their own face deception. The reader is bunched. Naturally he resents it and then the boomerang swats the fellow who hoped to gain by it.—Schultz.

Fallacies and Axioms

Then gently scan your brother man,
And gentler sister woman;
Though they may gang a kennin wrang,
To step aside is human.

Burns.

Burns here beautifully expresses the same thought as Pope when he said, "To err is human, to forgive divine." The writer must confess that it affords him a certain amount of pleasure to prick bubbles and to see them burst when filled only by the wind of error. Arnold Bennet in that splendid little book of his, "How to Live on Twenty-four Hours a Day," deploras the modern lack of the contemplative mind, and it is deplorable indeed. For how much better we should be in our work, did we but contemplate a little more, look a trifle deeper, beyond the surface, and oftener question ourselves of the reason for doing this and that, or the why and the wherefore of things. Were this the general habit of us all there would be less fallacies to write about and perhaps less mistakes in our work.

It would be easy to write many pages about the fallacies connected with the practical side of horticulture and agriculture, but it will suffice for our present purpose if we go over some of the most common.

Atmospheric Moisture, or—in Greenhouse Parlance— "Damping Down"

In my article of two weeks ago this matter was treated in regard to its utter inadequacy in keeping red spider in check, and now we attack it from another angle. Damping down is a mistake (fallacy) in any houses other than stove or orchid houses, except occasionally, as when a grapery is starting into growth, or on an extremely hot parching day in the summer when the roots of the roses, chrysanthemums, or carnations are unable to send up water fast enough to take the place of that evaporated from the foliage, when the damping of walls, floors or any part of the house is necessary to prevent wilting.

That this attack on the damping-down idea will be a terrible heresy in the eyes of some of my good friends, I fear, and so I hasten to give the reasons for the faith that is within me. It is generally conceded that, given the right crop to suit the soil and temperature there is nothing better under the sun in the way of quality and quantity than the crops grown in those hot arid regions where nothing grows without irrigation and, providing there is a plentiful supply of water at the root, atmospheric moisture (as affected by our damping down) is not a factor in the matter. A damp atmosphere certainly appears to favor black spot on Beauties and all the rust diseases on carnations and chrysanthemums. It has ever been a matter of personal observation with me that a relatively dry atmosphere is at all times productive of fruitfulness and floriferousness. And how many thousands of cuttings are lost annually by cutting bed fungus, the growth of which is favored, if not caused, by too damp an atmosphere?

Plants get all their mineral food in a watery solution from the soil. Now, if the atmosphere is heavily charged with moisture less water is transpired by the leaves and less food of a mineral nature is brought up; therefore, it is axiomatic that the best condition of atmospheric moisture is that which causes the most rapid transpiration of water by the foliage without producing wilt.

A Fallacy in Regard to Watering

Under glass there is no one operation of greater importance than watering, and yet we have often heard

this fallacious statement, "Always let the plants get dry before watering them" (of course the writer uses the words wet and dry in the relative sense as always understood by gardeners and florists). I would change this to—never let a growing plant get dry, and it seems to me that less harm would be done by inexperienced men than by the same men with the advice given above, for I have seen men who considered themselves experienced growers, who thought that it was nothing to see a plant wilt from getting dry, because, after watering it appeared to pick up and be as good as ever; but this is a grave error—in fact another fallacy, as it is very doubtful if a plant ever does just as well after having wilted once.

Axiom:—A healthy growing plant should never be allowed to get dry at the root.

Next week I shall deal with fallacies of greenhouse heating or temperatures, land drainage, and of book-knowledge, supplying in each case the appropriate axiom.

Edwin Jenkins

Lenox, Mass.

Red Spider

It gave me great pleasure to read Mr. Jenkins' commonsense article on *Tetranychus telarius* in your issue of January 4. As he states, there has been much nonsensical talk about damping the floors and keeping a moist atmosphere to keep down this unconquered foe of the florist. In my experience I have observed that a humid hot atmosphere is an ideal breeding place for them. I remember reading somewhere recently that wetting the plants overnight will be a sure cure. I was rather skeptical of the remedy when I read it; because I once made an experiment on a badly affected plant by dipping it overhead in a tank of water and allowing it to remain all night. I found in the morning Mr. Spider seemed as thick on the plant as ever, being observed moving around, and after being placed in the sun until the leaves dried he was as lively as ever. As Mr. Jenkins states, the nozzle with a good pressure of water behind it is the only safe remedy so far. We have had very good success keeping crotons clean by using a pint of kerosene and a half-cake of Ivory soap to a barrel containing thirty gallons of water, keeping the mixture well stirred with an agitator attached to the barrel while applying to the plants. This remedy we use once every two weeks, selecting a dull day for the operation, and next morning before the sun gets at the plants we spray them over with clean water. We have used this remedy for many years on crotons, eucharis, ixoras, and other shiny leaved plants, and very seldom see the plants affected by insect pests unless the wind be blowing hard from some elm trees that are near the greenhouse, and then we are sure to find our enemy the spider on the plants under the ventilator.

I think our friends at the experiment stations have something to work upon to give us a quick sure remedy, such as a fumigant that will not injure plant life, and will rid us of this annoying little insect.

A growing evil

It is not pleasing to see the plant registration department of a society taken advantage of by introducers of new varieties, for free advertising purposes as is frequently done. Any and all distinct characteristics which would serve in the identification of a variety should be carefully recorded: nothing more. "Non-burster," "strong constitution," "rapid grower," "will supersede everything in its class," "profuse bloomer," etc., etc., mean nothing for the legitimate purpose of a registration rec-

ord, as every grower knows. All such boastful claims, although they may be honestly believed by the owners who put them forward, should be struck out, without fear or favor, by the registration official whose duty it is to make the record and should he feel timorous or doubtful of his authority to do so, his society should lose no time in giving him stringent instructions to that effect.

The Massachusetts apple growers have "Boosters" just had a rousing convention in Horticultural Hall, Boston, in conjunction with an interesting exhibition. Many addresses were made, replete with practical hints and sound business advice. A lecture by Samuel Fraser of Geneseo, N. Y., on "Planting Fruit Trees Propagated from Strains of Known Worth," under the auspices of the Massachusetts Horticultural Society, attracted an audience of over six hundred and the discussion was so animated and long-drawn out that it was with difficulty that the chairman finally got the session to adjourn. It is gratifying to see our eastern fruit growers waking up to this extent. They will have to move pretty lively, though, to keep up to the pace set for them by their brethren of the far west. Think of the leading men of the city acting as waiters and serving apple pie free to all comers, as we are informed they did at a recent apple show in Spokane, Wash.? "That's going some!" We wonder whether we shall ever see local public enthusiasm such as that on behalf of the rose, carnation, sweet pea, gladiolus, or any other floral product. There would be nothing very unreasonable about such a proposition. Why should not a community where flower-growing is an important commercial industry feel jubilant over it and take a public-spirited interest and pride in its growth? A "publicity" campaign ably conducted and supported with unselfish unanimity by all the local horticultural interests would be a practical means to such an end. Fall in!

Those of our readers who are interested in the cut flower business will find in this issue some pertinent views from several writers on the everlasting controversy between the grower and the retail dealer as to which of the two is most responsible for the peculiar vicissitudes and trying uncertainties from which the flower business continually suffers. HORTICULTURE has no prejudices either way and our columns are open for the expression of opinions as to causes and the suggestion of remedies by any and all who are disposed to debate seriously and fairly on the problem. That there is room for very great improvement at both ends of the business we are fully satisfied and we should like to see and to help along as much as possible any promising effort to solve for the benefit of all, this burning question of the distribution and sale of the flower growers' product. We find today in the ranks of the growers, wholesalers and retail dealers, a much higher average of business ability and liberal education than was the case a few years back and the advancement is steadily going on. These men should be able to give us something better than the old stock arguments which were nothing more nor less than "the pot calling the kettle black." Conditions and theory are very often at variance and we firmly believe that if a clear-headed, impartial survey of the situation in all its bearings could be undertaken by some body in which all interests would be represented by their best informed and most influential men a good start would then be made which would soon result in a better mutual understanding and great ultimate good to all concerned.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The January meeting, the first under the new administration of the New York Florists' Club, was a well attended and notably enthusiastic one. Nineteen new members were added and an equal number proposed and there were other indisputable evidences that the animation of the approaching great event, the International Flower Show, is taking a firm hold of the craft, which this influential organization so effectively represents. The secretary's report showed a total membership of 367 and the treasurer's report a balance of \$5,000 to the good at the end of 1912.

The retiring president, Joseph Manda, made a few appropriate remarks at the opening and then the new incumbent, W. H. Siebrecht, was escorted to the platform by his two friendly rivals at the recent election, H. A. Bunyard and W. H. Duckham. He made an address outlining a busy year ahead, pledging his best endeavors and asking for the hearty sympathy and assistance of the members, especially the younger ones. John Donaldson, who is the incoming vice-president, made a nice talk as did the other newly-elected officers and several new members. F. R. Pierson was elected to replace Mr. Donaldson on the board of trustees for the unexpired term of one year.

Mr. Hendrickson reported for the publicity committee that the fund for posters had been about used up and a small advertisement in the papers for McKinley Day was the only expenditure proposed. Mr. Donaldson made a report of progress for the Smith memorial committee. Mr. Weathered reported for the entertainment committee and his plea for a worthy entertainment of the visitors at the National Flower Show was endorsed by a number of speakers. The awards committee reported on their visits to inspect the carnations "Northport" and "Matchless," recommending the club's certificate in each case. Favorable action was taken on the annual dinner and the summer outing proposition.

Mr. Totty made a report on the progress being made on the National Flower Show, stating that on the trade exhibition section and souvenir program the results already accomplished are far greater than in any similar enterprise in the club's history and predicted that the occasion would be an unprecedented business boom for all who should take advantage of it.

On the exhibition table were the following exhibits, all of which received a vote of thanks: Carnations British Triumph, crimson, Wm. Eccles, scarlet, and Lady Northcliffe, pink, from Scott Bros.; Northport from J. D. Cockcroft; Enchantress Supreme from Dailledouze Bros.; Salmon Beauty from Traendly & Schenck; Improved Enchantress from Frank Niquet; Matchless from Cottage Gardens.

President Siebrecht appointed the following committees:

Essay—J. Austin Shaw, Leonard Barron, M. C. Ebel.

Legislative—Frank R. Pierson, Patrick O'Mara, Walter F. Sheridan.
Exhibition—John Miesem, Charles Schenck, Patrick J. Smith, A. Kakuda, Charles Weber.

House and Entertainment—Frank M. Duggan, Alex. J. Guttman, Alfred E. Wheeler.

Award—Joseph A. Manda, John Donaldson, Wallace R. Pierson, A. L. Miller, Frank H. Traendly, Robert Simpson, I. S. Hendrickson.

Dinner—J. B. Nugent, Jr., Alex. McConnell, W. F. Sheridan, Thomas B. DeForest, Robert Koehne, Joseph Fenrick.

Outing—Philip F. Kessler, Victor Dorval, Thomas Weston, A. Buckholtz, Louis Schmutz, Jr., W. Phillips, Bert Chadwick, Roman J. Irwin, Anton Schultheis, Jr., A. Deemsey, Jr., H. C. Reidel, Paul Meconi.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

Although Jan. 7 was a bad evening for our meeting a good many members came out. Officers were put in nomination as follows: President, Neil McCallum; vice-president, E. C. Reineman; treasurer, T. P. Langhans; secretary, H. P. Joslin; assistant secretary, W. A. Clark; executive committee, P. S. Randolph, C. H. Sample and A. Frishkorn.

The matter of a club smoker or club entertainment of some kind was brought up, but it was decided to do nothing until after the election of the new president.

One of the members is John Costoff, a native Bulgarian, who, responding to requests gave a description of Bulgaria and Montenegro, and a history of their relations with Turkey and the present war. First he spoke of the great rose fields in Bulgaria, miles in extent, where the roses are grown simply for the famous attar of roses, 35 lbs. of rose petals going to the making of a single ounce of the attar.

Mr. Costoff was acting as school teacher in Macedonia when his connection with the revolutionary society compelled him to flee the country, and he came to the United States. By the time he had finished his account of Turkish atrocities we were all Bulgarians in heart and gave him enthusiastic applause for his interesting remarks.

Fine specimens of White and Pink Killarney and Richmond roses were shown by the Pittsburgh Cut Flower Co.
H. P. JOSLIN, Sec'y.

ST. LOUIS FLORIST CLUB.

The St. Louis Florists' Club held a very interesting meeting last Thursday afternoon. This being the first meeting in the new year the members came out in good numbers, including all the officers, with President Fred H. Weber presiding. Mr. Bergestermann of the publicity committee made a report of their work since the last meeting, and announced that the fund had reached \$200. A lengthy discussion followed as to how this money should be spent to reach the best possible publicity. It was decided that a call be made on the Retail Florists' Association to send a committee to the next meeting and discuss with our members as to the best possible way to gain publicity through these committees. The question box brought out some interesting discussions. The next meeting takes place Feb. 13th.

NATIONAL ASSOCIATION OF GARDENERS.

The executive board of the National Association of Gardeners held its first meeting for the year on Wednesday afternoon, January 8th, at the Murray Hill Hotel, New York City. President William H. Waite was in the chair.

After disposing of the routine business before the meeting the subject of the association maintaining a department, along the lines of horticultural societies abroad, to which members of the profession may look for opportunity for advancement, was brought up for discussion, and resulted in the secretary being empowered to take the necessary steps to bring about the establishment of such a department.

On motion made by ex-President Logan it was also decided that the association award a medal for any new meritorious varieties of flowers, plants, vegetables or fruits originated by a gardener being a member of the association and that the president annually appoint a committee of judges for that purpose. Mr. Waite appointed Messrs. William Kleinheinz, of Pennsylvania; Peter Duff, of New Jersey; and James Stuart, of New York, to serve as a committee for 1913.

An appropriation was voted for the purpose of holding a National Gardeners' and Florists' Bowling Tournament in New York City during the week of the International Show, to which members of the Society of American Florists are to be invited. The event will occur at Thumm's Alleys, on Broadway, famous for many big bowling events, and the association will offer two cups—one for the team and one for the individual making the highest score at the tournament. The tournament will be open to teams of three men, members of any local florists' or gardeners' club which they represent, and members either of the N. A. G. or S. A. F. The individual tournament will be open to members of the N. A. G. and S. A. F. The following committee was appointed to complete all arrangements:—John Dodds, John W. Everitt, A. Bauer, James Stuart, and William Robertson of Jenkintown, Pa. Many valuable prizes have already been contributed.

Lester E. Ortiz, superintendent of the Pratt estate at Glen Cove, N. Y., and vice-president of the Farmers' Congress, of New York, addressed the meeting stating that in his opinion the men who serve as superintendents on the private estates of the future will have to be informed on every branch that goes to make up a complete private establishment. He urged that the gardeners co-operate with the farmers to influence a more liberal appropriation of the millions expended annually, by the nation and states, to the purpose of educational work in agriculture and horticulture. He said that some sixteen or seventeen millions will be appropriated this year and that the gardeners of the nation should have some voice in the recommendations for distributing this vast sum. A meeting of the Farmers' Congress

will shortly be held in New York City to which Mr. Ortiz invited his fellow members and all gardeners.

The directors decided to hold its next meeting in New York during the National Show, to which meeting an invitation will be extended to all members of the association to attend.

Reports of the various committees show that the association is in excellent condition financially and otherwise, with prospects that its growth during 1913 will even exceed the phenomenal strides it made during the past year.

FLORISTS' CLUB OF WASHINGTON.

The Florists' Club of Washington, at their January meeting, had a considerable discussion on the tariff, hearings on which are now being held by the Ways and Means Committee of the House of Representatives. Several of the members claimed that the rate on pipe and glass was entirely too high and that a substantial reduction should be made. It was suggested that the secretary get in touch with the secretary of the S. A. F. and inquire as to the advisability of looking into the matter and get the ideas of the S. A. F. regarding the tariff on these lines. As a number of those present signified their intention of attending the show to be held in New York City, the hiring of a special car for the local florists, their families and friends, was considered and a committee was appointed to look into the matter. This committee will be comprised of Fred H. Kramer, chairman, Edward Schmid, N. L. Hammer, George Cooke and Otto Bauer. Preparations were also made for the holding of the annual election and the installation of officers. Following the latter event it was decided that a banquet be held at one of the downtown hotels and the details for this were ordered left in the hands of the following committee: William F. Gude, chairman, George Cooke and Otto Bauer. The balance of the evening was given over to discussions regarding the growing of stock, methods of retailing and retail advertising, following which an adjournment was taken. It was announced that the next meeting of the club will be held on February 3, when nominations for officers to serve during the ensuing year will be received.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next regular monthly meeting of the club will be held at Horticultural Hall, Boston, on Tuesday evening, January 21st, at 7.30 o'clock. The newly elected officers will be installed and will make short addresses. The business session will be shortened considerably in order to allow members and ladies, who are specially invited on this occasion, to enjoy a fine entertainment which has been prepared. Refreshments will be served by a well known firm of caterers and Hutchins' orchestra will furnish music for dancing. A cordial invitation is extended to all interested friends in addition to regular members to attend on this occasion. On February 18th a lecture on "Carnations" will be given by a well-known expert and another on "Sweet Peas" on March 18th, by one of our most noted growers.

W. N. CRAIG, Secretary.

A VALUABLE DENDROBIUM.

The beautiful white orchid—*Dendrobium Phalaenopsis* var. *Schroederianum alba*, is the subject of the accompanying illustration. It is in the collection of Julius Roehrs, Rutherford, N. J., and is the largest plant of the variety in the world. A three-foot rule standing behind the plant may be seen in the picture. The plant is now in its third year of flowering at the Roehrs' establishment and it has increased in size and vigor each year.

ford, N. J., and is the largest plant of the variety in the world. A three-foot rule standing behind the plant may be seen in the picture. The plant is now in its third year of flowering at the Roehrs' establishment and it has increased in size and vigor each year.

NATIONAL FLOWER SHOW, NEW YORK.

There have been so many inquiries regarding the privilege of selling cut flowers and plants at the National Flower Show, at the New Grand Central Palace, April 5-12, 1913, that I have been authorized to receive bids for this important privilege, the space to be provided free. The committee reserves the right to reject any or all bids. Proposed space to be allotted is 150 sq. feet, and the lessee to furnish booth and necessary furnishings. Additional space may be secured at the regular rates. Bids will be opened February 15, 1913.

JOHN YOUNG,

Sec'y Nat'l Flower Show Committee.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held in Doran's Hall, Greenwich, Conn., Jan. 10. Judging by the number of members present and the excellent financial standing of the society, we are looking forward to a very prosperous year. A noticeable feature of the meeting was the large number of splendid exhibits staged, which received the verdict of judges as follows:

Geo. E. Baldwin Co., Mamaroneck, N. Y., special mention for a well-grown plant of white *Cattleya Trianae*, and cultural certificate for a collection of well-grown plants of *Cattleya Trianae* of excellent types. Robt. Williamson, cultural certificate for *Plumbago coccinea*, an old favorite fast dropping out; honorable mention for *Begonia Gloire de Lorraine*; vote of thanks for *Primula malacoides*. James Aitchison, honorable mention for *Primula malacoides*. James Stuart, honorable mention for *Calanthe Veitchii* and *Euphorbia jacquinaeflora*. P. W. Popp, highly commended for *Carnation*, yellow sport of Mrs. C. W. Ward, a very promising novelty. Thos. Ryan, highly commended for carnations; vote of thanks for well-grown *Lilium Harrisii* in 4 in. pots. Wm. Sealey, honorable mention for *mignonette*. Vote of thanks to Robt. Allen for carnations; Wm. Smith, for *Primula malacoides*; A. E. Townsend, for carnations and gardenias; E. Johnson, for carnations; A. L. Marshall, for carnations; Scott Bros., for new carnations, *Lady Northcliffe* and *British Triumph*.

We are promised a treat at our next meeting in an illustrated lecture on the International Exhibition, held in London, 1912, to be delivered by Harry A. Bunyard of New York. It is requested that every member make a special effort to be present. Other important business to be taken up is the location of the summer and fall shows. Among the visitors present were Maurice Fuld of the Henry F. Michell Co., Philadelphia, Pa., who addressed the meeting with a few well chosen remarks, Joseph Manda, Orange, N. J., and Wm. Scott of Elmsford, N. Y.

OWEN A. HUNWICK, Cor. Sec.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The Nassau County Horticultural Society held its regular monthly meeting at Pembroke Hall, Glen Cove, N. Y., on Wednesday, Jan. 8th. It was decided to accept Elmer D. Smith's offer of a prize (\$10.00) for 6 blooms of chrysanthemum Yonkers, at the fall show. The dinner committee reported having made satisfactory arrangements with the Oriental Hotel, Glen Cove, for Jan. 23rd. The special prizes offered by John Canning for 18 carnations were awarded to Oscar Bjorkreen, 1st, and Alex. Mackenzie, 2nd. The prizes for tomatoes, violets and freesias were awarded to J. McCarthy, R. Marshall and J. MacDonald. Other awards were honorable mention to John Johnston for a *Calycanthus praecox* and R. Marshall for carnations. John Canning, Ardsley, N. Y., and W. D. Robertson, Roslyn, L. I., were elected to membership. Prizes will be offered at the next meeting, February 12th, for 3 heads cauliflower, 6 gardenias, and 25 sprays sweet peas.

JAMES MACDONALD, Cor. Sec.

NEW JERSEY FLORICULTURAL SOCIETY.

The regular January meeting of this Society was held in Orange, N. J. In reviewing the development of the gardening profession President Drews

New Hybrid Tea George Dickson (Dickson's Gold Medal Crimson)

suggested that the Society go on record as advocating the appointment of one professional gardener on every park and shade tree commission in the various municipalities and counties in the state. The Society adopted a resolution to that effect. The officers and members adopted the word "optimism" as their slogan for the ensuing year.

In the monthly competition for points awards were made as follows:

Emil Panuska—Cineraria, 75 points; Cyripedium Dautbierii, 70. William Reid—Roses, 80; carnations, 85. Frank Drews—Sweet peas, 45; cyclamen, 90; stocks, 75. George B. Wilson—Roses, 83. John Dervan—Roses, 85. Max Schneider—Carnations, 90; sweet peas, 55; hyacinths, 60. Fritz Berglaud—Carnations, 75.

The judges were Charles W. Ashmead, Henry Halbig and George W. Strange.

JOHN DERVAN, Secretary.

MASSACHUSETTS FRUIT GROWERS' ASSOCIATION.

The Massachusetts Fruit Growers' Association closed their convention in Boston with a banquet at the Hotel Commonwealth on Friday evening, January 10. Many prominent fruit men from various sections of New England were at the dinner, and all talked in a distinctly hopeful spirit regarding the future of New England as a fruit producing section. Among the speakers were J. M. Barnes, president of the Connecticut Pomological Society, J. K. M. L. Farquhar, president

of the Massachusetts Horticultural Society, Geo. H. Ellis, chairman of the agricultural committee of the Boston Chamber of Commerce, Vice-president W. H. Conant of the Maine Pomological Society, E. W. Breed, president of the Worcester County Horticultural Society, C. W. Barker, president of the New Hampshire Horticultural Society, ex-Secretary Ellsworth and Secretary Wheeler of the Massachusetts State Board of Agriculture and E. M. Bowen of the Rhode Island Horticultural Society. President H. L. Frost of the Fruit Growers' Association presided.

ROCHESTER FLORISTS' ASSOCIATION.

A large and enthusiastic meeting of the Rochester Florists' Association was held Monday, Jan. 13th. Officers for the ensuing year were elected as follows:

President—John Dunbar; vice-pres. George Arnold; secretary—H. B. Stringer; treasurer—W. L. Keller; trustees—W. H. Dildine, William Porie and A. H. Salter; delegates to the N. Y. State Federation of Florists' Clubs—John Dunbar, George Arnold, F. W. Vick, E. R. Fry; representatives to board of managers of the Rochester Industrial Exposition Association—John Dunbar, George B. Hart, Charles H. Vick, F. W. Vick, C. B. Ogston.

Three new members were elected. Harry C. Bates representing the Lord & Burnham Co.'s Rochester office, entertained the members to a buffet luncheon, which all enjoyed. President Dunbar made an admirable address, expressing his thanks for being hon-

ored with a re-election and very sanguine for the association's future.

Regret was expressed that Charles H. Vick was unable to attend on account of a severe cold.

AMERICAN GLADIOLUS SOCIETY.

The National Flower Show committee have set aside April 8th as Gladiolus Day at the National Flower Show in New York. Intending exhibitors will please take note, and endeavor to make a good show of blooms for that day. Send me a postal card so that you may receive the splendid schedule of prizes which will be distributed in due time.

South Natick, Mass.

NEW CALANTHES.

On Saturday, January 11, at Horticultural Hall, Boston, George McWilliam exhibited, and was awarded a silver medal for Calanthe Laselliana. This is the result of a cross between C. oculata gigantea and C. McWilliamii. The flowers are glistening white of very large size and form an enormous spike. Mr. McWilliam received a similar award on December 21st, for Calanthe Whitinae (C. Sandhurstiana X. C. Whitineana).

Alongside Mr. McWilliam's exhibit last Saturday was a group of veritable orchid gems from E. B. Dane which included the lovely Cyripedium Boltonianum, for which a first class certificate of merit was bestowed.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention June, 1913.

Good Resolutions.

We owe our readers ample apology for the dearth of general information regarding trade conditions under this heading. However, as it is the season of the year for good resolutions we will promise, and to the best of our ability will "make good" in the matter of more regular news affecting the interests of the trade.

Despite the scarcity of news, the trade has often been entertained in this column by our genial friend, G. C. W. who as usual jumps into the fray regardless of consequences. He is always more or less instructive, and always interesting, and he has the happy faculty of arguing as well on one side of a proposition as another, and cheerfully takes the side the other fellow doesn't want, all of which is respectfully, and affectionately submitted to the aforesaid G. C. W.

Beans Enough.

It seems a little late to be giving information about crops, yet it is only within a few weeks that the growers have definitely found their bearings as to the bean crop, and we are glad to say that from all information we have received, conditions have not proved nearly so bad as was feared during October, and even as late as November last. A few varieties have proved failures, others have produced very light crops, necessitating short deliveries, but with the help of the carry-over from last year, there will be beans enough to meet all ordinary demands of the trade.

An Unfounded Assertion.

Some time since a circular letter was sent out to the canners of the country, among other remarkable statements which it contained being one that peas canned from seed grown in the far northwest would turn dark in the can and had very tough skins. Careful inquiry among the canners does not sustain these statements, and it seems rather surprising that any responsible concern would make statements of this kind which they were unable to prove. So far as the weight of evidence goes in the matter, it is to the effect that not only do the peas not turn dark in the can, and that they do not develop a tougher skin than peas grown in any other part of the country, but that the seed does in fact show a marked strength and vigor over seed grown in any part of the east, and we believe it is a question of only one or two years more experiment when not only the canners, but the seedsmen of the country will insist on having northwestern grown seed. We believe the fact is beyond question that the seed peas grown in Michigan and Wisconsin as well as Canada during the past five years have deteriorated in vigor and

What More Should You Expect?

The following is from a communication received from Messrs. Valentine Burgevin's Sons, Kingston, N. Y., January 8, 1913:

"We wish to say that we find the VERMINE an excellent thing. We used it on a bench planted with Smilax to kill root lice, or maggots, which ate the roots, and after two applications our Smilax is taking on new life and has started off to grow."

The following from Messrs. Newman & Legg, of Manasquan, N. J., January 4, 1913:

"This fall we had occasion to try your FUNGINE on a large house of sweet peas. They were so badly affected with mildew that we were going to throw them out—meaning a total loss of the crop. We had tried sulphur and all the usual mildew remedies without being able to control it. A caller asked us if we had tried FUNGINE, saying that he had heard it was good for mildew. We gave them one good syringing with FUNGINE, with the result that in forty-eight hours there was not a particle of live mildew in the house."

by actual test have shown enfeebled vitality.

A Warning.

While discussing the matter of growing pea seed, the great scarcity of the past few years with the abnormally high prices has had the usual effect of causing to spring up a brood of irresponsible farmers for the most part, who call themselves seed-growers without knowing more than the barest rudiments of the business and these none too well. They are offering to grow peas on contract at absurdly low figures, but anyone who may be tempted to place orders with them may find such seed dear as a gift. That they will find a few who are always tempted by low prices, goes without saying, as there is a small part of the people who can be fooled all of the time. Two or three good average crops of peas

Seed Trade

(Continued from page 78)

will put an end to the pretensions of these "growers" as has been the case in the past, for history will repeat itself with variations. This discussion of the multiplying of pea seed growers reminds us that the number of seed growers in California has greatly increased during the past two or three years, though we would not for a moment imply that these are in the class with the fellows who are trying to get into the game of growing peas and beans. Most of the new California concerns are off-shoots of older ones, and as a rule those in control have a more or less thorough knowledge of the business and familiarity with its details. In their case, it is simply whether they will use their knowledge conscientiously and for the improvement of their stocks or whether they will be indifferent as has happened in other cases within the memory of most of the present generation.

The Rate of Postage on Seeds.

The following official communication is self-explanatory:

United States Post Office,
Mailing Division,
Philadelphia, Pa., Jan. 7, 1913.
W. Atlee Burpee, Esq., 475 North Fifth St.,
Philadelphia, Pa.

Dear Sir:—Replying to your communication of December 21, 1912, in regard to the decision of the Chief Clerk of the Post Office Department as to the use of parcel post stamps, and the rate of postage on seeds, I have to advise you that from information we have received, the statement by the Chief Clerk of the Post Office Department is confirmed. It is claimed that Section 6, first paragraph of the parcel post law, approved August 24, 1912, covers this matter. This section reads as follows:

"Sec. 6. That this act shall not in any way affect the postage rate on seeds, cuttings, bulbs, roots, scions, and plants as fixed by section 482 of the Postal Laws and Regulations (edition of 1902)."

This section only covers the rate of postage on such matter.

The section of the Postal Laws and Regulations referred is 482, of P. L. and R. for 1902, and reads as follows:

"Sec. 482. The postage on seeds, cuttings, bulbs, roots, scions and plants shall be charged at the rate of one cent for each two ounces or fraction thereof, subject in all other respects to the existing law."

This section of the regulations does not take seeds, cuttings, bulbs, etc., out of the fourth-class of mail matter, but only changes the rate of postage thereon.

You mention books in your letter as going at the one cent for two ounces rate. This is correct, as books being printed on paper are third-class matter and, therefore, subject to that rate of postage.

In regard to the use of parcel post stamps on this matter, this is compulsory as they are included in the fourth-class, and the law states that parcel post stamps must be used on all fourth-class matter.

Please pardon me for the delay in replying to your letter, as I wished to get further information in regard to the matter before writing you.

Very respectfully,

(Signed) E. W. ALEXANDER,
Sup't of Mails.

It would appear from the foregoing that seeds, etc., which heretofore have gone with ordinary stamps must thenceforth have parcel post stamps instead. This appears to us as an arbitrary and unjust ruling.

In this connection we would advise our readers of the introduction in the House of Representatives of the United States, by Mr. Towner, of Bill H. R. 27487 to strike out books and pamphlets from the third-class of mail matter and to include them as entitled to parcel post rates and for other purposes. Also H. R. 27488 for the re-

classification of mail matter for the consolidation of the third and fourth classes, and for other purposes, both of which bills have been referred to the Committee on Post Offices and Post Roads.

This looks suspicious from the seedsman's standpoint and we would earnestly advise our readers to give it careful scrutiny and if, as it appears to us, it should appear to be detrimental to the seed trade, to use their influence with their Congressmen to defeat it.

About Half-Price Packets.

Editor HORTICULTURE:

I cannot see any good reason why we should sell seeds to children at half price. I fully agree with Mr. Watson about that. Does the candyman, the grocery man, dentist, doctor, clothier, butcher or lawyer make half-price to children? Hasn't the seed trade stood enough from Uncle Sam with his free seeds, customs authorities with rats in government stores, etc.? I say, let the children pay full prices. When you give them anything for nothing they don't appreciate it. When they pay its full value they take better care of it. But give them the quality—good seed, such as you give the florist and market gardeners and they will soon appreciate its value and won't grudge the price.

BEAULIEU.

Woodhaven, N. Y.

Alexander Forbes.

After many rumors and counter rumors during the past six months, authentic information reaches us this week in regard to the plans of Mr. Forbes, who is well-known in the seed trade both at home and abroad, he having been for about twenty-six years manager for Peter Henderson & Co., New York, going to that firm after a ripe European experience. He informs us that he has acquired a controlling interest in the corporation of J. F. Noll & Co., Newark, N. J., who have done an extensive seed business in that city for many years. Mr.

Forbes will be glad to see and hear from all his old friends and connections both socially and in a business way at that address. We extend our congratulations and best wishes.

Notes.

L. W. Wheeler of Palo Alto, Cal., is visiting New York this week.

The Portland Seed Co. of Portland, Ore., have nearly finished a new five-story building for their business at a cost of about \$40,000.

Mr. and Mrs. Geo. E. Evans have moved to Jacksonville, where Mr. Evans will establish a wholesale seed business. Gainesville regrets the departure of this estimable young couple but the best wishes of everyone accompany them. George was reared in Gainesville, is steady, reliable and ambitious, and will, no doubt, meet with success in his new venture.—*Gainesville (Fla.) Sun.*

THE "SPENCER" TYPE OF SWEET PEAS

"The Seal of Quality."

Burpee's Unequalled List for 1913—Arranged Alphabetically. Choicest Re-selected Stocks Grown on "Floradale Farm."

Spencer Sweet Peas are a great specialty with us! We were the first to grow the seed in America—the stock having been entrusted to us before introduction, even in England, of the original Countess Spencer. We have grown "the original Beauty" and its many "sportive" children with painstaking care each season since. There are but few other growers, either in England or America, who can supply an equal assortment of True Re-selected "Spencers" that are uniformly of such choice quality. Seedsmen and planters generally can see how superior our stocks now are by the trials at Fordhook Farms next June or July, while those who may be in California are invited also to inspect the growing crops at our Floradale Farm in the beautiful Lompoc Valley. Every planter's garden, however, is really a trial ground and we shall be quite content if any "Doubting Thomas" will send us only a portion of his order and note the difference in character of flowers produced!

BURPEE'S BLUE LIST FOR 1913

The most complete catalog published for MARKET GARDENERS, TRUCKERS and FLORISTS. For the planter who "knows" it contains complete lists of all that is best in vegetables and flowers, while the grower who is uncertain as to the best varieties suited for his purpose may be guided by the bull's-eye © placed after what is known to be best. In addition full descriptions are given many new and most valuable varieties.

BURPEE'S BLUE LIST FOR 1913 contains 148 pages with hundreds of half-tone and engraved illustrations. Within the pages of this catalog we have condensed an experience of thirty five years both in handling and the actual growing of seeds.

If you garden for profit (that is, sell your products in the market) you are entitled to a copy of this complete and easily understood catalog, but if you are a private planter please do not ask for a copy, as we must protect the Market Gardener, Trucker and Florist.

PUBLICITY IN MINNEAPOLIS.

Replying to an article by George C.
Watson on December 14th, I want to
say that here in Minneapolis we have
no trouble at all in having our best
daily paper publish articles furnished
by the Publicity Committee of the
Minneapolis Florist Club.

These articles are not written for
the trade, but for the public in gen-
eral. The points touched upon are history,
varieties, amount of labor and
time required to produce perfect flow-
ers or plants, their uses and how to
take care of them in residences. Up
to the present time the following
papers have appeared in the press:
Peonies, Orchids, Poinsettias, Azaleas
and Violets. The following are ready
for the press: Bouvardia, Narcissus
(including Tulips, Jonquils, Daffodils),
Lily of the Valley, Roses, Carnations
and Lilies. We are asked to supply
articles of the kind the year round.

For special days, like Mothers' Day,
St. Valentine's Day, etc., a brief ar-
ticle is written on the meaning of the
day with suggestions as to the kind

of flowers to be used. This, then, ap-
pears in a large advt., paid by sub-
scriptions from the trade. On Mothers'
Day about \$125.00 were thus collected
and the results were a large increase
in the sale of the carnation, the flower
recommended for the purpose.

C. N. RUEDLINGER.

COOPERATION; FROM A RETAILER'S VIEW POINT.

(Extracts from a Paper read before the Florists' Club of Philadelphia, by Charles Henry Fox.)

We are a fraternity—and a fraternity is strong only as they pull together. This is something the florists have never done. We want co-operation—sympathy with one another. We want to plan our business interests together. We want to study the needs of the grower, the needs of the commission man, the needs of the retailer; and altogether we want to study what interests the public. The pathway to success lies in serving the public—not in affronting it, and this can only be done when the grower, the commission man and the retailer work hand in hand.

Now, would it not be beneficial for the grower to visit the retailer, to come in direct contact with him, get better acquainted? Not look upon him as an outsider just because he does not deal directly with him. We could tell him and demonstrate *why* carnations were "tabooed." At the same time, could show him how carnations would be in demand if they were grown and packed as they should be. We could also give him a line on many little things that we could use at a profit to him, if he would grow them for us in the style that the public demands.

If we could adopt a plan whereby we could give an order for a certain number of stock; have it packed by the grower and shipped direct (without any delay or handling) to the retailer it would eliminate an immense amount of loss and waste.

Through this close association between the grower and retailer a more perfect understanding would naturally be the outcome and a great many irregularities might be corrected, for he would then realize how much better and how much more advantageous it would be for him to make his regular shipments daily right up to Christmas, selling them at a good price instead of holding them up and, in the end, not getting as much as he would before.

Every year I hear the commission men say "I told them," "I told them," "I told them to ship the goods at such and such a date, but will they do it? No. As a consequence the commission man is up in the air. He doesn't know what to promise the retailer. He hasn't the vaguest idea as to how much he will have or what prices to quote. The retailer is likewise "up in the air." He doesn't know what he will have to pay for the stuff nor how much he can expect to get.

Now, gentlemen, who suffers by this? To safeguard himself at Christmas the store man sidetracks cut flowers—stocks up his place with desirable and salable blooming plants, something he knows the exact price of. This is something he is really forced to do—very much against his will—for cut flowers are very much easier to handle than plants.

In my remarks I have spoken of direct shipment from the grower to the retailer. Do not misunderstand me. I do not recommend for one minute the elimination of the commission man, nor do I want to belittle his very necessary service. I simply want to make a plea for a change in

the shipment; that the order shall go through the hands of the commission man as of old but the shipment be direct, thus eliminating the second handling.

Now, while we are getting this excellent service it is necessary for us to keep up the proper balance. By this I mean to support and encourage the growers who sell their goods direct. This always has a wholesome effect on the commission man and makes him behave. We do not want any flower trust. We do want co-operation.

Another clause that might be inserted in this Grand Fraternity, and one which our friends the commission men might well consider, would be the living up to their advertisement to be wholesale men in every sense of the word and not to sell flowers to any person or corporation that is not a florist. I, of course am not alluding to the fakirs. They are one of the necessary evils, but I do insist that it is absolutely wrong to take orders for funerals, etc. and to deliver flowers to hotels, restaurants, clubs and colleges, when these orders might be turned into retail channels. Although every establishment has the sign conspicuously displayed "Wholesale Only," I am told by a wholesaler himself that every commission man in the city does the same thing.

There's no doubt in my mind that once the "Get Together Plan" gets in action—the true fraternal spirit—that it will only be a short time when all these abuses will be done away with. All we want to do is to understand each other better. We are all friends and we are each one of us dependent on the other.

THAT RETAILERS' INNING.

When the growers got through with them there was not much left of the bombs the retailers threw into the arena at the Philadelphia Club on the 7th inst. The consensus of opinion seemed to be that if anybody was lax in taking advantage of his opportunity it was the retailer. Thousands of avenues for exploiting our products—and but one in a thousand doing it. When all things are considered, it seems a sorry day when the retailer under these circumstances has the courage or nerve to throw bricks at the producer. And that's all that the much-heralded talk of Charles Henry Fox has done.

The producer is keeping his end up all right—quantity, quality, and va-

riety. As for our local market, if it was not for the splendid country-wide demand developed by the wholesalers' advertising it would not have a chance to advance at all. The retailers in this good old burg (with about a dozen conspicuous exceptions) haven't the faintest conception of what the growers have been doing for them; and they are most conspicuously lacking in appreciation of the splendid production which they have done nothing to encourage. If they would use the brains; the enterprise; the aggressiveness of the Wanamakers, the Lits, the Gimbels, the Snellenburgs, in pushing things, the producers might be willing to listen. But on the contrary, they simply block the way.

Now then, having realized where the trouble is, let us apply the broom. Let us supplant all these old foggy stores with new and up-to-date propositions. Leo Niessen had the right idea. A flower store should not look like a morgue.

Few retailers, as a rule, are taking advantage of their opportunities. They are lacking in initiative, in aggressiveness, in organization, in advertising, in everything; in other words, very few of them have any idea of business. And the worst of it is that when you call their attention to it they always want to blame the producer. The producer is their angel. Without him they could not exist one minute; and in Philadelphia especially the producer has given quantity and variety unexampled by any other center in these broad United States. Therefore it seems clearly a case of the shoe on the other foot instead of the way Charles Henry Fox tries to make out in his talk against the growers and their agents, the commission men.

1129 ARCH STREET, - - - - - PHILADELPHIA, PA.

PERSONAL.

P. Welch of Boston is in Montreal all this week.

George Wiegand of Indianapolis, Ind., is recuperating in Florida.

Philip Einsmann of Long Island City, N. Y., is in the hospital seriously ill.

Morris Stein, late of Pittsburgh, has left for St. Paul, Minn., where he will locate.

Fred Vetter has resigned his position as manager of the Flower Mart at Springfield, Mass.

Vivian Marie, daughter of F. E. Conine, and Frank Melville Goodwin were married at Stratford, Conn., on Dec. 31st.

Ed. MacMulkin of Boston, who has been seriously ill for some time, has now recovered sufficiently to be about business again.

William DeGraff of Leyden, Holland, has accepted the invitation to serve as one of the judges at the National Flower Show in New York next April.

Miss M. Smedley, the popular book-keeper for J. K. Allen, the New York wholesaler, has resigned her position and will be married on Feb. 10 to D. F. Krider of West Orange, N. J.

Detroit visitors—S. S. Skidelsky, Phila., Pa.; Mr. McGee, Toledo, O.; S. Seligman, New York City.

Boston visitors.—Paul Berkowitz of H. Bayersdorfer & Co., Phila., Pa.; A. E. Thatcher, Bar Harbor, Me.; Robert Miller, Farmington, Utah; Harry O. May, Summit, N. J.

St. Louis visitors—G. Gabel, representing the Chicago Carnation Co., of Chicago, J. F. Ammann, Edwardsville, Ill.; Ed. Denker, St. Charles, Mo.; W. E. Ogle, Belleville, Ill.; Frank Veinmann, W. J. Pilcher and W. E. Rowe, Kirkwood, and Mr. McPherson, Litchfield, Ill.

CINCINNATI NOTES.

R. Witterstaetter left on the 2nd for a trip to Panama.

Mr. and Mrs. J. T. Conger have returned from a recent trip to Chicago.

The Hill-Heller Company on Race street have had many very attractive show windows of late.

Al. C. Heckman, Jr., has been confined to his home for several days past with a severe attack of neuralgia.

Al. Forder of Hyde Park is reported to have bought Miss Shanahan's store in Avondale. The transaction was closed on Saturday.

CHICAGO NOTES.

Ernest Farley, Jr., several years employed in the various wholesale houses has left for the west. He is now in Seattle.

At A. Lange's the employees are taking turns having the gripe, at least two at a time being away ever since the holidays.

Peter Reinberg is now president of the Board of Education of the Chicago schools. Mr. Reinberg is a self-made man who has climbed very near the top of the ladder in the cut flower industry.

Already the apple blossoms have appeared in quantity—in the store windows. Each year has seen the artificial flowers more life-like and this year is no exception with the masses of blooms arranged with much grace and beauty.

P. J. Foley, president of the Foley Manufacturing Co., is very optimistic in his outlook for the coming season. Florists are sending in many inquiries for prices, etc., on building materials, indicating that many new ranges will be erected in the spring.

Fine views of the floral displays of the park conservatories are given conspicuous places in the street cars, no doubt to catch the carfares, but good advertisements for the florists' business nevertheless. A practical publicity campaign without cost to the one who offers flowers for sale and catching the eye of millions.

Chicago florists generally express themselves as believing the early coming of Easter will be an advantage to the trade as prices are apt to be steadier on account of less danger of surplus stock. Those having a large shipping trade think the early date of decided advantage in making long distance shipments. It is not likely to be welcomed by the growers of plants, being rather early to have blooming spring stock at its best.

Visitors.—F. S. Miller and son, Thomas R., of the Columbus Floral Co., Columbus, O.; Peter Farnof, Columbus, O.

A SENSATIONAL CARNATION DEAL.

The sensation of the past week in Detroit was the sale of Thos. Browne's beautiful pink novelty carnation to S. S. Skidelsky & Co., Breitmeyer Fl. Co., and Robt. M. Rahaley. That these three well informed men should settle down to this variety is not to be wondered at when we recall the great furore this variety caused when a few blooms were shown a year ago during the Rose and Carnation Convention. Some very prominent carnation growers visited Mr. Browne's greenhouses and becoming convinced that this variety is a sturdy grower and free bloomer but not a cropper, some very flattering offers were made at that time.

While the investment is said to run close to five figures it is nevertheless a good one and when the blooms appear at shows and clubs next winter under the name of "Philadelphia" we expect to see the fine judgment of these three gentlemen fully justified.

Wholesale Growers of Cut Flowers and Plants

176 N. MICHIGAN AVE., BETWEEN RANDOLPH AND LAKE STREETS, CHICAGO

THREE NEW ROSES EVERY GROWER WILL WANT NEXT YEAR

IRISH FIRE FLAME : The dainty new Single Rose, trimmest and sweetest little bud ever seen, and well named as to its lovely color. A Dickson seedling of strong, vigorous growth, very free, particularly during the Winter; color fiery crimson, shading to a rich orange salmon at the base; foliage, a dark green, reverse side of leaf deep bronze; a new departure in Roses, a distinct novelty; beautiful and charming; a favorite wherever shown; nothing to compare with it.

MRS. CHARLES RUSSELL : A new American pedigree seedling. Of American Beauty size and fragrance; color, a lighter cerise that does not fade to blue, but to a lighter rose as the flowers age; a strong, vigorous grower; good heavy stems; flowers carried erect, no weak necks; no blind wood like Beauty; very prolific, remarkably so considering its size. As tested in the various shows over the country this Fall, it has proven a wonderful keeper and established itself at once as a rose of unusual merit, creating a sensation wherever shown and attracting not only the commercial man, but the public as well.

Good, strong healthy plants of these varieties, guaranteed stock
Delivery: Grafted, March; Own Root, April or later.
Doz. 25 50 100 250 1000
Own Root..... \$6.00 \$10.00 \$17.50 \$30.00 \$70.00 \$250.00
Grafted 7.50 12.50 20.00 35.00 82.50 300.00

MILADY : A strong, sturdy grower; excellent foliage; flowers large and double; open perfectly at all seasons; similar to Richmond in color, although richer in color in bud form; shape of flower resembles Gen. Jacqueminot; very prolific; good keeper; the coming Red Rose. Grafted or own root: \$30.00 per 100; \$250.00 per 1000.

MRS. GEORGE SHAWYER : A free flowering pink Rose; very highly recommended by some of our best rose growers; has been selling exceptionally well in the New York market this season. Grafted or own root: \$30.00 per 100; \$250.00 per 1000.
We guarantee not only the quality of our stock but its safe delivery by express.

RIBBONS AND SUPPLIES: Many new patterns in exclusive Ribbons. Write us for patterns on these and on Supplies.

Flower Market Reports

BOSTON This market has had little to remind it that the season of reaction usually experienced directly after New Years has been with us. Taken as a whole, nobody has any valid reason to complain of January business thus far. The production has not been excessive—in fact some lines show a decided falling off in supply, such as American Beauty, but the demand has not been insistent on any one thing or any particular grade, and so everything has found its level very nicely. One tendency is noted—that is, the demand for medium-priced grades of rose and other flowers that are marketed in a variety of “grades” and prices to correspond. The high-class blooms, from special American Beauty down the entire list are not in demand, even in the high-class stores. Medium prices and medium grades have the call and the market cleans up nicely on this line when at the same time the fancy selections go a-begging. Gardenias and cattleyas are plentiful and of excellent quality, with a rather moderate call. Violets hang fire, the singles having the preference, if any. Freesias, mignonette, sweet peas, etc., are all doing well as to quality and popularity. Carnations—last but not least—are showing signs of accumulation. The quality of the stock coming in never averaged better but there is a surplus.

The receipts are becoming heavier each day, especially carna-

tions which had been on the short side for some time past. Varieties such as ordinary Winsor and red carnations have sold very low at times. Short roses are not plentiful but there have been enough of the selected grades. The general call is for medium and shorts. Bonsilenes and yellow roses have taken well and other corsage flowers have sold satisfactorily. Lily of the valley in good supply. Sweet peas are coming in more plentifully and are preferred to violets, the latter having a great falling off in demand.

Tulips and single daffodils are had, also some fine freesia, mignonette, lilies, etc. The demand has been light on Beauties, especially the long grades, which have been sold much below quotations.

CHICAGO Sales have not been especially heavy during the second week in January but there has been a steady demand which has kept the wholesalers doing something all the time. The demand has been heaviest for short and

Flower Market Reports

(Continued from page 59)

medium roses and these have cleaned up every day with a good prospect of more selling if they could have been secured. American Beauties have not been so active but the cut is not especially heavy just now. Carnations are lagging a little and more are seen on the counters than at any previous time this season. Violets, too, are not selling as they should. There are more tulips seen each day, some of the red and yellow ones now coming. Paper whites are not meeting ready sale. Freesia is seen in limited quantities and sells readily.

The market at the CINCINNATI opening of this week was easy in all lines but nice clearances were effected in many of them. This condition is far different than the opening was a week previous. Then practically every line was crowded somewhat and considerable stock went into the discard. If this week continues as it started very little, if any, will fare so badly. The prices realized are really below what would be a normal price for the quality of the stock that is offered. Shipping business is very good. The rose supply has slackened up considerably and now easily meets the demand and that is all. It, however, meets this demand at only ordinary prices. The pink roses are enjoying the strongest call. All are of a very good quality. The carnation supply continues heavy and at times large sacrifices have had to be made to clean up the stock. The supply of white is larger in proportion than that of the other colors. Lily of the valley, double violets, orchids and bulbous stock have taken more or less of a slump since the holidays. The demand for narcissi and Roman hyacinths has shifted to the carnations and roses that are so easily available. Sweet peas, if choice, sell well; if not they find only an ordinary request.

This great flower centre is not the "barometer" of the flower markets of the country as it is of the money, stock and various other "markets" of the country, as our varying accounts of conditions elsewhere for the present week show. It ought to hold such a position and the only reason that it does not is the provincialism that prevails in all flower markets and in this one more than any other. A co-operative system of adjustment of values and distribution of product is the only remedy for the irregularities which are so expensive,

in one way or another, to the men who invest their capital, brains and time in flower production and this must eventually come by mere force of circumstances if not otherwise. In a general way the market is well-supplied—in some directions very much oversupplied—in no direction undersupplied, and values are about as unstable as can well be imagined. The general tendency to surplus and consequent temptation for price-breakers is seen in violets, carnations, bulbous stock and some varieties of roses. The latter, however, are not very badly congested; Beauty and other roses which run to varying grades and corresponding prices are selling most freely in the medium grades. This, however, may be and probably is a temporary condition only, as the society activities now due to begin in real earnest will, undoubtedly, tend to reverse this condition after they get agoing. They'll have no trouble to get all they want in any line.

One of the greatest fallacies ever offered: "Good stuff will sell itself." Iterated and reiterated along the byways of my short sojourn. I have always been a listener rather than an asserter. The proposition sounded good. I was like the rest of the crowd; I swallowed it.

There was a basis of truth back of it—else nobody would have swallowed it—not even counting yours truly. But after going through the ruck and the rough and tumble of the past thirty years, I have come to the conclusion that good stuff will not sell itself. Not only that, but that good material will sometimes go a-begging—while poor stuff is eagerly snapped up. Witness last week's market in Philadelphia. Nothing doing in the long-stem stock in carnations and roses. But in short stock for little money—everything went at beyond the average prices. We hear a whole lot from the retailers: "give us quality;" we can sell it! All right: the growers strain every nerve; buy novelties and burn coal; hire extra night firemen and put in plate glass instead of double thick; give them extra quality and all the novelties. What is the result? They (the retailers) don't want the novelties; they don't want the extra quality long-stem stock; they want "the cheaper grades at two cents—and yet these same retailers pretend when they come to a club meeting that the reason of their failure to do business is lack of quality, variety and novelty on the part of the producer. The retailer ought to get a move on. There was a good demand last week for early spring suggestions: low-priced stock such as daf-

Flower Market Reports

(Continued from page 91)

fodils, sweet peas and daisies. We hope the trade will be out of the doldrums by next week, and that a more cheerful report will result.

PROVIDENCE A good market, stiff prices and a good supply in most cases, has kept the trade fairly active the first part of the week brought dull business for the time, but the succeeding cold spell saw a prompt recovery. Carnations are up just at present. Best grades of roses are fairly plentiful with a wide range of prices. Acacia has just made its appearance in the market and is bringing a high figure. As usual, the supply is very limited.

ST. LOUIS The local flower market was in splendid condition all during the past week as far as the supply went but buyers were scarce and our commission men had their troubles. Carnations, roses, sweet peas, violets and bulb stock are coming in in great quantity; in fact, the wholesalers were up against it hard the last week. But the retailer is in his glory for he can buy cheap when a job comes in.

Detroit—Business was good but not what it might have been and we put the blame on the shoulders of the weather man. The general supply is of excellent quality and prices firm. While the big rose growers are off crop we expect an increasing supply of carnations and bulbous flowers by the end of the week.

Washington, D. C.—There has been enough work to keep everyone busy although on the whole things are not rushing. There has been little change in the way of prices and there is a plenitude of everything except colored roses. Richmonds are out of crop and this applies to nearly all others. Their place is being taken by carnations of which there are enough to meet all demands; in fact, they are in full crop and it is expected that the price will drop materially on these within the next week or ten days. Orchids are more plentiful than they have been.

PHILADELPHIA NOTES.

W. Atlee Burpee and Mrs. Burpee left on the 14th for Miami, Fla., on a vacation. They expect to return to Philadelphia about March 1st.

The ready facilities that the M. Rice Co. have for shipping goods was amply demonstrated on Thursday last when a well-known Philadelphia florist placed an order at 9 A. M. for fifteen cornucopias four feet long. They were made, finished and reached their destination the same day.

We regret to report a relapse on Samuel S. Pennock's oldest boy, Charles (see our issues of past two weeks.) He was taken to the Presbyterian Hospital, West Philadelphia, on the 12th inst., for another pleurisy operation. Very serious indeed. "While there's life there's hope," but our hearts go out and turn to water, while all we can do is look on. There is no surcease of sorrow to loving hearts—no matter though

the whole world sympathize with them in the grim struggle.

The promoters of the "Retail Florists' Club of Philadelphia" held a meeting in the library room of the Pennsylvania Horticultural Society on the 15th inst. We were not invited to attend; but we are informed that those present were John C. Gracey, C. H. Grakelow, James McLane, E. H. Heilmann and some others. It leaked out that one of the first snags struck by the promoters was as to whether they should admit fakirs into the club. From the amount of secrecy maintained we look for some remarkable developments; and like the rest of the outside world, we await with "bated breath."

The seed trade here, as elsewhere, were sorry to get the news about the sudden death of their old confrere James B. Kidd. Personally we have known him for nearly thirty-five years—and that intimately. He was a man among men. Wise, witty, big hearted to a fault, a keen observant seedsman, who reached eminence in every branch of that intricate business. He will be missed. Not the least of the services he did to the business during his latter years was his work in the appraisers' department of the New York customs, where he always had an eagle eye for frauds and undervalues. It took a smart scamp to fool "Jim" Kidd.

(Copy.)

Jan. 13, 1913.
S. S. Pennock-Meehan Co., Philadelphia.
Gentlemen:—I have just returned from our greenhouses and have talked with our foreman regarding the Fire Flame Rose. Instead of having one bench in one of the long houses, we have decided to plant one whole house, which will hold 1,275. This being the 13th day of the month and the 13th year, I told my foreman it would be a good idea for you to book us for 1300. We do not know as the Irish are superstitious of number 13, but we are not.

Yours respectfully,

Messrs. Pennock-Meehan replied to this that they were not superstitious either and that they were very glad to book the order. We understand that the advance bookings for this unique new single rose Irish Fire Flame are already quite heavy.

Our attention has been called to the fact that Burpee is not the first to offer seeds at 2½ cents a pkt.; that long ago there were concerns offering them for as low as one cent. Quite true. But no "first class" house has gone below the standard in a regular way. Burpee's idea of half-packets for the children is not really a lowering of the five-cent standard but a reduction in the quantity so as to realize his new idea of "Small Gardens for Small Folks"—that being the title of a neat little pamphlet of 32 pages which has just reached our desk from the Burpee establishment. The author is Edith Loring Fullerton, whose "How to Make a Vegetable Garden," and "The Lure of the Land," have made her famous. She says in her dedication:

"This little book was written at the request of Mr. W. Atlee Burpee, who has the courage and kindness to give to children good seeds in proper proportions for their gardens at a modest price."

We do not know how the idea will work out; but we do know that there are many in the trade who are wishing they had thought of it first.

Visitors: C. B. Coe, of D. M. Ferry & Co., Detroit, Mich.; Eugene and Paul Dailledouze, Flatbush, N. Y.; B. Elliott, Pittsburgh, Pa.; Antoine Leuthy, Roslindale, Mass.

During Recess.

Tarrytown (N. Y.) Horticultural Society.

This vigorous horticultural organization held its fourteenth annual banquet at the Florence Inn on the evening of January 8th. As usual, it was an altogether glorious and festive occasion, participated in by about 75 of the leading professional and amateur horticulturists of the neighborhood, together with a goodly number of representatives of the trade from New York city and elsewhere. The table and walls were superbly decorated, all the new claimants for distinction in the rose and carnation line being on dress parade to delight the eye and win the appreciation of the influential horticultural dignitaries that are accustomed to honor the Tarrytown banquets with their presence.

There were speeches full of wisdom, wit and scholarly learning, plenty of them, and interspersed with them music and singing of a high order. Chas. B. Millard served acceptably as toastmaster.

New York and New Jersey Association of Plant Growers.

The fifth annual dinner of the New York and New Jersey Association of Plant Growers will be held on Wednesday evening, January 29th, 1913, at Louis Martin's, Broadway, between 41st and 42nd streets, New York. In addition to the best dinner ever given by the association, there will be a first-class entertainment for which the best music and vaudeville acts have been engaged. Julius Roehrs, Jr., Herman Schoelzel and Alfred L. Zeller compose the dinner committee. Louis Dupuy president, Wm. H. Siebrecht, Jr., secretary.

Cook County (Ill.) Florists' Association Bowling Scores, Jan. 8, 1913.

HITCHINGS & CO. BRANCH OUT.

As a further indication of the unusual activities in the greenhouse field, our readers will be interested to learn that Hitchings & Company are opening a branch office in Philadelphia.

Their main sales offices, which, for the past two years, have been located at the factory in Elizabeth, N. J., are being brought back to greatly enlarged quarters in the Johnson Building, at 1170 Broadway, New York.

We understand that F. W. Armitage, secretary and sales-manager of the company, will have his headquarters at this office.

NEWS NOTES.

New York, N. Y.—The MacNiff Horticultural Company has moved into its new quarters at 56 Vesey street.

Reading, Pa.—F. Frank has acquired the Brookside Greenhouses and will conduct them as a plant growing establishment.

Obituary.

James B. Kidd.

James B. Kidd, U. S. Examiner in the 8th Division, died suddenly on Friday, January 10th, of heart failure. He left the U. S. Appraisers' Stores about noon, taking a south-bound elevated train, and as he stepped off the car at Franklin street station, dropped dead on the platform.

James B. Kidd was born in Scotland. He first affiliated himself with the late B. K. Bliss in the seed business and next went to J. M. Thorburn & Co., and later to the Sunset Seed Co., San Francisco. Returning to New York he was employed by Wm. Elliott & Sons and then, having passed an examination for Examiner in the Appraisers' Stores, he secured for himself the position which he has held for five or six years. He was a great improvement over the un-informed officials who previously had charge of the horticultural imports and was well liked by the importing trade with whom he had to deal, and his death is regarded as a great loss. He was in his 62nd year. A large number of sorrowing friends attended the funeral on Sunday, Jan. 12.

We gladly give place to the following eloquent tribute to his memory by his friend of many years, Winfried Roelker:

"Today, Sunday, we paid him the last honors, at 10.30 A. M., in the mortuary chapel of the Stephen Merritt Burial Co. at 8th avenue and 19th street. A true, sterling, upright character has departed from our midst; a man conscientiously devoted to his duties, which he fulfilled even at the risk of hurting a friend. For all that we sincerely admired him the more. We, in the trade, mourn his loss, and we, his friends, shall hold him dear in our memory. Requiescat in pace."

John T. Temple.

John T. Temple of Davenport, Ia., died suddenly on January 4, while attending the funeral of a friend, the cause being heart failure. Mr. Temple was born in New York City in the year 1844. His ancestors were Scotch and English, his father and both grandfathers having been gardeners and florists. His father started in the florist business in Davenport, Ia., in 1859 and the young man worked with him, developing the business in which he was actively engaged until his death.

Mr. Temple was an enthusiastic supporter of and worker in the Society of American Florists from the beginning of that organization and attended every convention except that at Baltimore, from which he was prevented by sickness. He served from 1889 to 1891 on the executive committee of that society and for a number of years as chairman of its canna committee. He served for two terms as a director of the Florists' Hall Association and, at the time of his death, was its vice-president as well as secretary of the Tri-City Florists' Association.

Mr. Temple was quiet and unpretentious in temperament but congenial and companionable withal and a model of sturdy honesty in every purpose and act, and his loss will be deeply

The Recognized Standard Insecticide.
Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.
\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.
All are spraying materials and are effective in the greenhouse and in the garden.

FOR SALE BY SEEDSMEN.

mourned by a large circle of loving friends.

Mr. Temple's wife died six years ago. Two sisters survive him.

Samuel Reisner.

Samuel Reisner, a retail florist with store at 1249 Lexington Ave., New York City, died suddenly at Hamilton, Bermuda, from the effects of having been struck by a cyclist when crossing a street. Mr. Reisner had only arrived in Hamilton four hours before, having taken the trip for rest after the fatigues of the holiday business. He was unmarried. His partner Philip Schaeffer sailed on the next steamer from New York to take charge of the body.

Mrs. Montague Chamberlain.

Anna, wife of Montague Chamberlain, of the firm of Chamberlain & Gage, gladiolus growers at South Natick, Mass., died on Tuesday night, January 7th, at the Homeopathic Hospital, Boston. Mrs. Chamberlain has been in precarious health ever since

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

CLUB AND SOCIETY NOTES.

At the meeting of the Horticultural Society of Chicago, January 14th, there was no election of officers as planned, not enough members being present to make a quorum.

The next lecture in the Massachusetts Horticultural Society course at Horticultural Hall, Boston, will be "Factors Influencing the Formation of Fruit Buds in Apple Trees," by Prof. B. S. Pickett, Urbana, Ill.

George W. Gardiner, Collector of the Port, Providence, was the speaker before the Rhode Island Horticultural Society, Wednesday evening. Mr. Gardiner spoke on "Foreign Importation Under the Plant Quarantine Act."

The St. Louis Ladies' Home Circle met at the house of Mrs. F. C. Weber, Sr., Jan. 8th, and all present spent an enjoyable afternoon. Next month's meeting will take place in the new home of Mrs. F. C. Weber, Jr., on Berlin avenue.

The Retail Florists' Association of St. Louis will meet on Monday night, Jan. 20, at the Washington Hotel. Theo. Miller will read a paper on "Ideal Locations for Retail Flower Stores." Other interesting features will come up during this meeting.

The Albany (N. Y.) Florists' Club installed new officers at its January meeting, as follows: President, Frederick Henkes; vice-president, Frank R. Bilson; treasurer, Patrick Hyde; secretary, Robert Davidson. After the meeting the members were guests of the Albany Florists' Exchange.

The Engelmann Botanical Club held quite an interesting meeting on Jan. 13 at the Missouri Botanical Garden, St. Louis. Mr. Moses Craig, a member of the Garden staff read a paper on "Plant Improvements By Selection." The election of officers followed and the result will be announced in the next issue.

After the installation of officers at the Chicago Florists' Club, January 9th, W. F. Kasting of Buffalo gave a very interesting talk on "Publicity," fully convincing his hearers of its value to the trade if rightly conducted. Local speakers followed. A committee will be appointed to further the work.

The Horticultural Society of New York will hold an exhibition in the American Museum of Natural History, Central Park (West) and 77th street, New York, on January 25th, 1913. The exhibition will be held in the West Assembly Hall and will be open from 1 to 5 P. M. Special premiums for orchids and carnations, nine classes each.

Petruro Heights, Cal.—C. S. Terbush is about to start a new nursery here on 16 acres of land recently acquired.

GREENHOUSES BUILDING OR CON-TEMPLATED.

Greenhouse Materials FURNISHED AND ERECTED
IRON or WOOD SASH BARS

In all lengths up to 32 feet. Milled to any detail furnished or will furnish details and cut materials ready for erection.

Frank Van Assche, Fulton Ave., Rose Ave. and Dwight Street
JERSEY CITY, N. J.

CURVED IRON EAVE STYLE "S."

This Eave is intended for use on detached houses with either fixed glass or side sash.

It is practically all exposed to the inside heat of the greenhouse and so is ice clearing.

KING GREENHOUSE EAVES

THEY SOLVE THE EAVE PROBLEM
THEY MAKE THE LEAST POSSIBLE SHADE

and as you can see

present no surface for icicles to form on. They have great strength with lightness. They are designed and made for the purpose and not adapted from stock structural shapes.

WE WANT TO FIGURE WITH YOU.

CURVED IRON EAVE STYLE "L."

This Eave although lighter than Style "S" is amply strong for all Eave purposes.

It obstructs little light and is ice clearing in the most severe weather. It is intended for use with fixed glass only.

One of Our Near Chicago Subjects

It is located at Oak Park, just outside "The Windy City."

It is our Ideal range No. 164.

It is a thoroughly practical plan—easy to work easy to heat, exceedingly attractive, and the price is just about right for the man who is willing to spend over \$5,000 to

secure a glass enclosed garden.

Send for Two G's Booklet.

It tells all about this plan No. 164, and the couple of dozen other Ideal Plans.

It is fully illustrated, and beautifully printed.

ERECTED AT RUMSON, N. J.

SEEING how attractive and practical this arrangement is, do you wonder why **THE LUTTON PATENT CURVED EAVE** method has changed Greenhouse Construction during the past few years? The result has been the most successful house that can be produced; the other concerns who had been producing the same antiquated buildings for years had to simply destroy their patterns as well as their catalogues and start anew. Just ask some of our imitators to show you some of their curved eave houses built before **THE LUTTON PATENT** was granted, you will then be convinced that you had better consult with me.

DO YOU KNOW

that there's one place where you can buy really good Azaleas, Palms, Araucarias, etc. without the least bit of doubt as to the delivery? Many florists have wanted just such a connection for many years—a firm who would fill your order exactly right—just as you want it filled. You expect to pay for such service, but perhaps you have never known just where to get such service performed. Well, you can get it from "Petrick's"—C. Petrick, of Ghent, Azalea Specialists, known all over the World. Of course in order to get this superior service your order must be given a reasonable time before the season opens. You can't expect anything extra if you wait too long, nor can you expect an early delivery. In the Petrick Establishment orders are filled in strict rotation, and everyone is treated alike—no favorites. Mr. Petrick solicits through us, orders from firms in first class credit standing only. We can send you a catalog by return mail if you want one, and if you prefer to buy at f. o. b. New York prices, we can quote you that way too. If you are a buyer of such stock, write us—it will pay you.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Aspidistra

It is well to think now about increasing your stock of this very useful decorative plant. To have a good batch on hand will never go amiss. You can break up any large plants and pot them up singly into small pots. Do not divide plants to the single crown as it takes them a long time to make a useful plant, but leave them large enough to insure their growing by next winter into nice specimens. Where you want them to make plants of good size 4-inch pots will be the best. Give each pot good drainage to insure the soil against becoming sour. They like a good rich compost of fibrous loam three parts and well rotten manure one part. When potting up these divided clumps work the material well in through the roots. They will start off better if given a temperature of about 60 degrees at night with a rise of 10 to 15 degrees, with sunshine. Be very careful in giving them water until they begin to make roots. They should not be kept too dry or too wet—just nice and moist and they will soon start off into growth.

Candytuft and Stocks

For Memorial Day use sow seed from now and up to the 10th of February. They can be sown in flats, using a mixture of loam, leaf mold and a good dash of sand. Keep shaded and moist until they begin to come up, when they should be given a place well up to the glass. Give attention to watering so they will not be allowed to dry out. It is always better to transplant them before they become too large as their fine roots soon make their way quite deep into the soil. Candytuft and stock are always considered a side-line but, just the same, such flowers are always in demand for quite a few customers so it is well to make several sowings for a succession. To grow these plants well they like a house where they can have plenty of ventilation and cool temperature at night. They should never be grown any higher than 48 degrees at night. Keep an outlook for green fly as these often become troublesome, so fumigate often so they will not get a foothold.

Forcing New Lily of the Valley

It is safe to start to force new imported pips now. Give them a house where the atmospheric temperature will run from 55 to 58 degrees at night but be sure to place them where they can have at least 80 degrees bottom heat and another 5 or 8 degrees would still be better. Plant the pips quite close together in deep flats. The best material to use is clean sand as it retains the moisture and heat as good as anything else. Keep the flats heavily shaded, which will draw the flower spikes up. After they are well up give them a little light

gradually which will help them to harden up and be of better substance. Give them plenty of water until the flowers begin to open when it should be given with great care or damping of the bells will ensue. When watering give water that is about 8 degrees warmer than the sand. Give ventilation with care so no cold air will strike the plants.

Gloxinia Bulbs

Now is a good time to start a batch of these bulbs for Decoration Day blooming. Get some flats and place some crocks or rough material in the bottom for drainage and fill with half sand and half leaf mold. Bury the bulbs just so the crowns show above the mixture. They can set about half an inch apart. Place these flats in a warm house as they will take anywhere from 65 to 70 degrees at night. Be very careful in giving water; the compost should be kept just moist but not overwet. When they have made a bunch of fine roots with a little top growth they can be potted into 3-inch pots, using a mixture of fibrous loam three parts, leaf mold and very old cow manure one part each, and a little sand. Place them well up to the glass and as the season advances they will require a light shade during mid-day.

Jerusalem Cherries

Where you intend to grow this stock from seed, lose no time in sowing it now and they will produce nice bushy plants for next Christmas. Fill well-drained pans with a light mixture of loam, leaf mold and sand and on this sow the seeds and cover. Press the surface firmly and place in a temperature of from 60 to 65 degrees. When they have attained sufficient size to handle pot into small pots and grow on, and shift as they may require it. Give them a bench where they can have plenty of light and a good syringing on all bright days. Continue this treatment until the end of May when they can go outside. After they are potted do not keep them too warm. A temperature of from 50 to 55 degrees at night will suffice. Where you have saved some stock plants you can start and propagate in a couple of weeks which will make fine plants also.

Order Seeds Now

This is the season of catalogues, so it is up to the florist to select from them what he thinks best. In order to get proper attention and give the busy seedsmen a chance, early orders will be appreciated before the volume of trade becomes almost overwhelming. When ordering seeds always get the best as they are the cheapest in the end. Include a few novelties that appear worthy so as to keep up to date by having something out of the ordinary run.

Mr. Farrell's next notes will be on the following: Care of Sweet Peas; Cinerarias; Pinks; Gardenias; Lobelia Kathleen Mallard; Pansies.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Oranges in Pots or Tubs

One of HORTICULTURE's subscribers asks what is the best way to handle oranges in pots and tubs; the soil, winter temperature and sweet varieties?

The oranges usually grown by florists for decorative purposes is known as "Otaheite" which can be purchased from any of the seed stores. These are grown cool throughout and set their fruit easily, but it must be remembered that they are grown for decoration more than their edible qualities. If it is desired to grow oranges for the table, such varieties as Tangierine, McCarty, Malta Oval, King and California Navels should be grown. These take a greater amount of care to handle them successfully. All will produce flowers in good quantity but fruit will sometimes be shy. Although these varieties can be grown successfully in pots and tubs, the better and surer way is to plant the trees out in a border similar to a peach or vine. The fruit sets much easier and the trees are better to handle. This means giving up a house or conservatory to them. Although this may seem a terrible waste to give up a house to growing oranges the whole year round, there certainly would be no profit to it; yet there is nothing prettier in all the houses from the first of November to the end of February than the golden yellow fruits contrasting so richly with the dark green foliage of the orange tree. The pictures figured in HORTICULTURE of December 16th, 1911, were photographs of such a house grown at Somerville, N. J. The variety is Cal. Navels—trees sent right from the orange state. This house is kept cool, 40 to 45 F. at night from the time the fruit is ripe until the middle of March, when the temperature is raised a few degrees and the trees allowed to flower, followed by the usual routine. The trees are given a shake at noon during the time they are in flower, which is all that is done to aid setting. Our soil is heavy, so to counteract this a quantity of sand, charcoal and lime rubble was mixed in with it before the trees were planted. This makes the soil very porous. The size of fruit is equal to any offered for sale in the stores, while the flavor surpasses anything to be bought. Some are grown in tubs 21 and 24 inches square but are not nearly as prolific as the planted-out trees. Citrus Bigaradia is grown for the flowers alone. I would suggest to try Otaheite and Tangierine for pot work, using a sandy loam or otherwise open soil and grow the trees cool throughout, 45 to 50 at night while they are in flower. The size of the pot must be determined by the ball of the tree but on no account over-pot them. Sixes ought to grow good salable stock. Eights and tens can be used when larger specimens are wanted.

Strawberries in Flower

As strawberries come into flower give them a night temperature of 55 F. without excessive fire heat. On any real cold night drop the temperature five degrees rather than roast them with fire heat. This is applicable to all fruit houses. Be sure the plants are free from all aphids or the flowers will be damaged. Mild fumigating will not injure the flowers should any fly be

found. It will pay to fertilize these early flowers similarly to peach and nectarine trees, only they should be done more thoroughly. It is not enough to just touch the flowers in one place; they should be done all around, to set the seeds on all sides. An individual fruit is not one seed but many and unless they are all fertilized the fruit will not swell evenly. The result is a curled or twisted fruit of no use. It is sometimes difficult to keep the flowers dry when watering, these early batches having very short stems. This can be remedied by staking the flowers before they open, which is equivalent to staking the fruits later. The best stakes to use are wires bent to a semi-circle a little smaller than the top of the pot, having a leg at each end to push in the soil, somewhat similar to a carnation wire. Discontinue syringing while the flowers are opening and admit all the air possible.

The Orchard House

The first of February is a good time to start up the orchard house. This house usually accommodates apples, pears, apricots, plums, cherries, peaches, nectarines, etc.; in fact, all that goes to make an orchard under glass. These will all come along together, but should not be mixed up. It will be to their advantage to have them near each other when they are in flower. Cherries are the most particular and should receive the first consideration. Place them in the coolest part of the house and near a side ventilator if possible, as they will not stand much forcing. If the soil has been loosened in any way since they were repotted ram them over again and give them a good watering. Syringe the trees twice daily and do not let the night temperature exceed 45 by fire heat. Two of the best varieties for this work are Early Rivers and Empress Eugenie.

Apricots are next on the list of importance, being uncertain at the best of times. Let these follow on after the cherries and receive the same treatment. Moor Park and Rivers' New Large Early are said to be the best.

Plums can be handled successfully in pots yielding crops equal to when they are grown in the open. Their place should be in the orchard house. Early Transparent, Early Favourite, and M'Laughlin have done well in pots in the past and can be relied upon.

Lady Sudely and Beauty of Bath apples will force easily and mature very quickly. Triomphe de Vienne, Souvenir du Congrès and Dr. Jules Guyot are pears of good quality and reliability for pot work. Pears are not so sure as apples and until the fruit is swelling away good they need careful attention.

Of peaches and nectarines there need be no doubt as any of the varieties mentioned previously in these columns will crop well if properly handled.

Lettuce

A sowing made now will be a paying proposition where a length of heated frames or pits can be spared for them, or room may be found in the vegetable house. An ordinary flat will contain about 1000 seedlings which will occupy little space until ready to be placed in their per-

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Cuttings

One cannot be too careful in the propagating houses this warm damp weather, and we all should realize what a little neglect at these times may be responsible for in the future. Keep right after the temperature and see to it that it does not change suddenly, maintaining it as evenly as you would in the houses.

Waterings

The first few days that the cuttings are in sand they will require water every day, if the weather is at all cool. Of course it may happen that a cloudy spell may come just then and but little fire heat can be used, then of course water will have to be kept away.

Right here drainage plays a very important part. Always make sure that the propagating bench is very perfectly drained before putting any cuttings into it. Improperly drained benches are responsible for large losses in cuttings. And not only that, but there are many diseases that seem to be lying in wait, and will spring up at the plants almost any time when favorable conditions will allow. Therefore prevent spot, damping off, black root rot, and many other diseases by always keeping ideal conditions in the propagating houses. Proper drainage, proper ventilation, careful watering, are great factors toward success. There is little luck; hard and careful work is the only "luck" we know of.

Always try to water in the morning, and as suggested before, try to have the water almost the same temperature as that in the sand. This will keep the cuttings from being chilled. It often takes hours to bring the heat in the sand up to where it should be, after all the sand has been soaked with ice water. By no means have the water warmer than the heat in the sand (62 F.), as this would be likely to turn the leaves yellow.

Blackspot Among Cuttings

It is not wise to take cuttings from plants that have had a dose of spot and still show some of it here and there. Take cuttings from plants that are free from it and you will be likely to have but little trouble. Should a spot appear here and there, pick them off and burn them before they have a chance to spread all over the bench. This can be done if you will watch the cuttings close enough. Then spray with the ammoniacal copper carbonate, being very careful to merely fog the leaves, not drench the whole bench, sand and all, which would do more harm than good and is very wasteful besides.

manent quarters. Use a mixture of three parts leaf soil, two of loam and one of sand to sow them on. Do not cover the seeds with soil; place a piece of glass over the flat with paper on the top to retain the moisture. This must be removed gradually as the seeds germinate, which will be about two days after sowing, if placed in a temperature of 50 to 55.

Onions and Leeks

As stated three weeks ago, onions and leeks do not want to be left long in the seed pans or flats. Being deep

Roses Outside

These can be gone over this mild weather and pruned and cut back as may be necessary. All weeds can also be pulled out and the plants given a good dose of bone. Burn all clippings, it being best to have something along to put them into so that they will not be lying all over the place. Do not for a minute think that they will decay, for they will be very slow about it and if you have to handle the soil around them much you will wish many times that you had burned all the twigs.

Liquid Manure

By the first of February all the plants will be used to the light dose of liquid manure and from then on it can be increased in strength, according to the requirements of the plants. Plants that are growing freely and show signs of a crop will take more than plants that are just coming into crop, where plants that have just cut a good crop will not take any until after they have started to grow again. Where it can be done, boil the liquid manure with steam, and apply while still warm;—not hot, mind you, but just warm enough to take the chill off the water. A little bonemeal can also be added, to make the mixture a little more spicy. Soot is also nice but should not be used in any large quantities.

Be very careful not to have the plants too dry when about to water with liquid manure. This would likely hurt the roots and you do not want to do that as it is trouble enough to make these grow, so do not kill any of them. It is best to water with liquid manure after going over the bench with clear water. Water thoroughly with clear water if the plants appear dry at all, and then apply enough liquid to go through the bench nicely.

The Pots

Are your pots all ready to receive the cuttings that are now in the sand? Be sure they are clean. We all want clean surroundings, so why stick a young healthy plant into an unclean flower pot? To say the least it is not a square deal for the plant, and chances are it will soon show it too. If you are short of any size order at once to have them on hand when the cuttings are ready to come out of the sand. There is nothing in keeping cuttings in the sand just because there are no pots. With the present low prices, there is no excuse why a sufficient number should not be on hand. Those that took our advice and washed all their pots during the hot days of the summer months will find it very nice now to go over to the pot storage and get what they want.

rooting things they grow right away and when left some roots cannot help being broken off, which can ill be spared at this young stage. Have the requisite number of 2½ size ready washed. There is more in having these pots clean than the casual observer might imagine. Besides looking better they admit more air to the roots and let the pots dry out quicker, which are good advantages at this time of year. Use rich soil, a little heavier than in which the seeds were sown. Water the seedlings in soon after potting and keep them sprayed over continually in good weather.

McKinley Day and other days

Among the various communications appearing this week in our department devoted to the special interests of the retail flower trade is one regarding McKinley Day. This special observance is only one of a very large number of opportunities always within reach by which the florist may bring himself and his productions closer to the notice and appreciation of the great mass of the people. But, don't begin your campaign by doubling up your prices on

goods ordered for such an occasion; and this advice applies all down the line from the grower to the last seller. That's the old way; the discredited way that has done more perhaps, to impede the natural growth of the flower business than any other one thing. It is time to "cut it out" now.

With one voice "Publicity" is the accepted slogan of the progressive florist element all over the country judging by the reports that come to us.

Nothing has ever taken a firmer hold on the trade in so short a period. In its many avenues and far-reaching possibilities it seems to disclose openings for the practical revivification of the industry on the lines of modern business methods. Let us take care that we do not approach the issues before us in any narrow-minded or provincial spirit. Even the great question of the methods of marketing and distribution of the product of the wholesale flower factories clustered about the big centers of population is but one side of a many-sided problem. Calm, impartial deliberation and, above all an avoidance of controversies, old or new, will tend gradually but surely towards well-matured policies, well-directed effort and that measure of concord and unanimity without which no great enterprise can ever reach its fullest success. For we are, in truth, in each and every line of horticultural art but parts of one great unit. "Deil tak' the hindmost" is a sentiment which is fast losing its reputation in the business world.

The public waiting to be shown

Commenting approvingly upon a recent editorial note in HORTICULTURE, a distinguished English gentleman and nursery authority states that it is his conviction that the extreme slowness of the dissemination of new and meritorious horticultural introductions in America is not to be blamed so much on the public as upon the nurserymen of this country. His criticism is, of course, directed more particularly to the dealers in ornamental garden material, not the orchard nurserymen. The American public, he observes, are not lacking in appreciation, but they haven't known and the nurserymen have not risen to the splendid opportunity open before them to educate and lead the public. The field is unlimited and it only requires that the trade shall wake up and display some of the confidence and enterprise of their European brethren and the public response will be prompt and hearty. It is a pleasure to record this felicitous estimate by a competent representative of a people who are disposed sometimes to measure up the American public somewhat disparagingly and we do not doubt that the general compliment and the specific criticism are well placed.

Fallacies and Axioms

"Eye Nature's walks, shoot folly as it flies."—Pope.

Greenhouse Heating

It took the greenhouse builders many years to see the merits of the two-inch wrought-iron pipe, as against the three-and-a-half-inch cast-iron of their own make; but the light having dawned upon them they are now using the smaller size to a much greater extent than formerly. So, as the writer is not over anxious to engage in the rather tame sport of killing dead men, we will leave the 3½ inch cast-iron pipe as an expiring fallacy and proceed to direct our fire at a living one, viz.—the fallacy of so distributing the heating pipes in a greenhouse that the temperature varies from five to fifteen degrees from end to end, so that we have a condition where, if the

temperature is correct in the middle of the house, it is too cold at the one end and too hot at the other. This condition is so well known to gardeners and florists that it has become habitual to speak of the warm end or the cool end of the house. We all realize that at times this condition of varying temperature is a convenience and enables us to grow several different kinds of plants in the same house, still there is no reason why the same object may not be attained at our wish, by the use of a few extra valves. The writer refuses to believe that it is beyond the ability of a competent heating engineer to so lay out the pipes as to produce a practically uniform temperature throughout any house.

Axiom:—Heating pipes should be so distributed as to give an uniform temperature throughout.

Having dealt with a builders' fallacy we come now to one we have frequently met among the growers, which is, the idea of pushing the fires in the evening sufficiently to raise the temperatures several degrees above the maximum so as to allow for the drop which usually comes through the night. This is decidedly fallacious reasoning as a little of that contemplative state of mind previously referred to would show, for night with its absence of light and lower temperatures is a period of rest or partial rest, and if there must be a variation of temperature from the maximum, a degree or two lower is far less harmful than the same amount higher; and while on this subject of temperatures I cannot refrain from trying to impress upon young men learning the business the importance of correct temperatures, and it is important, for, given the maximum temperature for any plant, deviation from this is harmful in some degree, more or less, as the deviation be greater or smaller.

Axiom:—Maximum temperatures should be maintained.

Land Drainage

As this is work which often comes within the province of the gardener, in making lawns and vegetable gardens, and still more so where he has charge of the farm, the writer proposes only to touch upon two of the most frequent fallacies here and to treat upon this subject in a special article at some future date, giving it some measure of that consideration which so important a subject merits.

The first drainage fallacy is this: Putting drains only two feet or thirty inches below the surface because the subsoil is clay and won't drain (?) or because the drainer thinks they will act quicker, or because he wants to do it inexpensively or for any other specious reason. At any such depths as those mentioned there is danger of disturbance from frost in any northerly climate, and also from tree roots finding their way into the tile and stopping them up, and as a drain two feet deep will only drain half the area of a drain four feet deep it is obvious that just double the amount of ditches must be dug and twice as many tiles bought, so that instead of a cheap job shallow drains are expensive, and the argument about the clay soil has been proven fallacious innumerable times. Further, it is the consensus of opinion of the best drainage engineers of the world that universal experience has shown four feet as an average depth to be the best under all circumstances.

Axiom:—Shallow draining is expensive and inefficient.

Coming now to our second drainage fallacy, viz.—That good drainage is promoted by putting porous material over the tile with the idea of conducting the water more quickly to the drain, I am not surprised that the average man falls into this error when only a few days ago I heard a professor from our agricultural college advocating this same mistaken idea; when asked what he would cover the upper joints of the pipe with, his reply

was to the effect that he preferred gravel to tar-paper. No more pernicious advice could come from a man whom we would expect to be an expert on drainage, for to follow it would endanger the whole system. Water which percolates downward through any coarse or porous material will carry silt with it; this silt will go into the tile if it can enter the top joints of the drain and will sooner or later block it; hence, every precaution should be taken to avoid this. The modern method is to put strips of tar-paper about two-thirds of the way around the tile, leaving only one-third at the bottom open.

Axiom:—Water should never enter a drain-tile from the top.

Edwin Jenkins

Lenox, Mass.

The Red Spider Question

Mr. Jenkins' article on Red Spider in issue of January 4th, was a pleasing relief to see. In these columns red spider has been warred against times without number and the writer has not "trod on his corns" unnecessarily. Now to find such a minute "reptile" given such a lashing signifies that there is just cause for continually jogging up readers' memories that such a ferocious enemy exists and may make an appearance at any moment. Few establishments have gone a whole season without making his acquaintance. It certainly is true that a man's ability can in some way be gauged on the pest question, because if the pests are there, first-class results are impossible.

I do not wish to detract from Mr. Jenkins' article, but when he says damping is of no use against spider I beg to differ. Yes sir; even after considering the instance quoted of red spider on the *Cyperus alternifolius* leaf half-submerged in water. I have seen similar instances but there was a cause. To quote one:—A show house I had charge of as an assistant had more than half of the floor area given up to water space,—tanks arranged for effect. It was customary to keep this house as bright as possible at all seasons of the year and batches of plants were grown expressly for this purpose. The one under notice was *Clerodendron fallax* and they came in there laden with spider. Long before these new comers had finished flowering we had spider, spider everywhere. Things that had been in that house for months, not knowing spider, were now being eaten up. Why? Because of the importation, and while the house had been clean previously, after the stock was once given a chance the moisture was not enough to kill them. Violence was needed. Water "pressure" we know is the best way of eradication. Take vines for instance, which cannot be syringed after a certain period; what would they be like without damping? Why is it spider always makes its first appearance on a peach tree right where the foliage touches the pipes or hangs over a main? Take a bench of beans, the driest end is sure to secure the lead in a "spider race."

Yes sir; while admitting that damping will not kill red spider once it has a foothold, it is the greatest preventive we have and prevention is better than cure.

George H. Pencon

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

This club had another of those gala nights so much enjoyed by members and their ladies, on Tuesday evening, January 21st. It was the occasion of the installation of the officers for 1913 and according to custom the ladies were invited to see the ceremonial, partake of salads and ices, listen to some good music, have a dance, and incidentally to encouragingly applaud the young officials who, on assuming office for the first time, were trotted out before the company to assay their maiden speech.

The lecture room in Horticultural Hall was filled from door to stage on this occasion. The officers considerably put through the regular routine business, reports, etc., and it was still early when the musical talent was announced.

The new incumbents were neatly inducted into office by Peter Miller and each made a little speech, promising to "whoop'er up" good in their respective duties for the coming year.

The secretary's report showed an average attendance for 1912 of 175 per meeting. The number of members is now 446. The treasury showed a balance of about \$2,300. President Kennedy announced his intention of having the ladies form an auxiliary society; there is plenty of excellent material for this laudable project. \$50 was appropriated for a prize in the Club's name at the National Flower Show in New York and a similar amount for the Sweet Pea Society's exhibition in Boston next summer.

The piano music and singing was very enjoyable and one of the singers whose name is Singer set his audience in such a furore that three encores hardly satisfied them.

The collation was served in the large exhibition hall and while this was being done the seats were removed from the lecture hall and two hours of "light fantastic" tripping followed.

Caterer, musicians and officials all covered themselves with glory. The affair was simply perfect from start to finish.

There was a little exhibition of flowers and the following awards were made:

Reports of merit to Duncan Finlayson for *Cymbidium Wigandianum* and primulas; report of superior merit to Patten & Co. for carnation Princess Dagmar; report of thanks to A. A. Thorndike for Purity freesia.

NEW YORK STATE FEDERATION OF FLORAL CLUBS.

There will be a meeting of the New York State Federation of Floral Clubs during Farmers' Week exercises at N. Y. State College of Agriculture, Cornell University, Ithaca, New York, on Wednesday, February 12, at 12 o'clock. As several matters of great importance will be presented it is earnestly requested that all Florists' Associations or Floral Clubs in the State be well represented.

JOHN YOUNG, Secretary.

NATIONAL ASSOCIATION OF GARDENERS.

The National Association of Gardeners has selected the Murray Hill Hotel, 41st street and Park avenue, New York City, as its headquarters during the International Flower Show week. The hotel is situated conveniently to the Grand Central Palace, being only five short blocks from the hall and the same distance from Broadway, so that it is also easy of access to the city's amusement centre.

The management has set a rate of \$2 per day for single persons, and \$3 for two persons in a room, including privilege of bath. The men's dining hall will be set aside as the rendezvous for members to congregate morning, noon and night. Breakfast, lunch and dinner will be served in this hall at a reasonable price. The hotel management promises to provide every facility to make the hotel a hospitable hostelry for the gardeners during their stay.

Members can communicate direct with the hotel for reservations for rooms. Those who intend to attend the International Show will do well to reserve their rooms at an early date, as a big crowd is looked for and, as the National Association's headquarters will be a popular place, those that apply late may find that they cannot be accommodated. The officers and executive members of the association as at present constituted are:

President, William H. Waite, Yonkers, N. Y.; Vice-president, A. J. Smith, Lake Geneva, N. Y.; Secretary, Martin C. Hoot, Madison, N. J.; Treasurer, James Stuart, Morristown, N. Y.; Trustees for 1913: Peter Duff, Orange, N. J.; William Kleinheinz, Ogontz, Pa.; William Duckham, Madison, N. J.; Alexander McKenzie, Glen Cove, N. Y.; John Dadds, Wyncoote, Pa. Directors to serve until 1914: Robert Angus, Tarrytown, N. Y.; Robert Bottomley, New Canaan, Conn.; Carl Schaeffer, Tuxedo Park, N. Y.; E. Wetterlow, West Manchester, Mass.; T. J. Kempton, Barchester, N. Y.; E. Trethewey, Tarrytown, N. Y.; Alexander Fraser, Newport, R. I. To serve until 1915: John Shore, Harrison, N. Y.; Thomas Proctor, Lenox, Mass.; William N. Craig, North Easton, Mass.; Frank E. Witney, Fishkill, N. Y.; Robert Williamson, Greenwich, Conn.; E. Kirk, Bar Harbor, Me.; James Bell, New York, N. Y. To serve until 1916: Thomas W. Logan, Jenkintown, Pa.; John F. Huss, Hartford, Conn.; John W. Everitt, Glen Cove, N. Y.; A. Bauer, Deal Beach, N. J.; John W. Jones, Pittsburgh, Pa.; Alexander McPherson, Washington, D. C.; James C. Shield, Monticello, Ill.

M. C. EBEL, Secretary.

WORCESTER COUNTY HORTICULTURAL SOCIETY.

The program of lectures at Worcester, Mass., for the season of 1913 is as follows:

Jan. 23.—Illustrated lecture, "Chinese Plants," E. H. Wilson, Arnold Arboretum.
Jan. 30.—Illustrated lecture, "The Yellowstone," Rev. William J. Taylor.
Feb. 6.—Ladies' Day. Illustrated lecture, "Dalmatia," Miss Margaret C. Bolles, Tufts College.
Feb. 13.—"Recreation as a Municipal Function," G. A. Parker, Supt. Parks, Hartford, Conn.
Feb. 20.—"Young Orchards," Fred A. Smith, Ipswich, Mass.
Feb. 27.—"Old Orchards," Everett E. Brown, Pomfret Centre, Conn.
March 6.—Spring exhibition.
March 12.—Annual reunion and dinner. Prof. Frank H. Hankins, Clark University

NEW JERSEY FLORICULTURAL SOCIETY.

The eighteenth annual dinner and dance of the New Jersey Floricultural Society was held at English's banquet hall, East Orange, N. J., January 10th.

"Something to be proud of," just about expresses the feelings of everyone present. There was a large turnout of members and their friends, including the women folk, an innovation that greatly pleased J. Austin Shaw, who acted as toastmaster, and was a big success.

A letter from M. C. Ebel, secretary of the National Association of Gardeners, advising that at least three of the park and shade tree commission be professional gardeners was received with approval. Mrs. James Neil responded to the toast, "The Gentlemen," and gave some excellent advice. President Dews and Vice-President Geo. B. Wilson with the aid of Charles McTaggart and P. H. Cox more than made good to the toast, "The Ladies." William Reid and Walter Gray, our past secretary and treasurer, respectively, will be proud of the watch chains which were presented in an able manner by Vice-President Geo. B. Wilson as a slight token from the society for their able and faithful services. H. J. Skern for the "Wild Flowers," W. B. Killingbeck for "The First Profession," Geo. Hillinger and Francis Dexter for "Sister Societies," were all eloquent and pleasing.

The tables were beautifully decorated with asparagus, carnations and potted plants and good music contributed to make this a most enjoyable and educational occasion.

Following are the prize winners in the monthly contest for points for the year 1912:

Orchids—1st, Emil Panuska, 696 points; 2nd, Lager & Hurrell, 600. Roses—1st, William Reid, 707; 2nd, Fritz Berglund, 677. Carnations—1st, William Reid, 746; 2nd, Max Schneider, 735; 3rd, Fritz Berglund, 660. Cut flowers—1st, Frank Dews, 797; 2nd, Max Schneider, 780. Foliage and flowering plants—1st, Emil Panuska, 660. Sweet peas and violets—1st, Max Schneider, 583; 2nd, Frank Dews, 380.

JOHN DERVAN, Secretary.

NEW LONDON COUNTY HORTICULTURAL SOCIETY.

This society held its first meeting for 1913 on the 9th inst., which was largely devoted to the welfare of the organization and consideration of its plans for the ensuing year. The semi-annual report of the treasurer showed an expenditure of \$149 in prizes at the dahlia and chrysanthemum shows besides special prizes which were given by A. T. Boddington and Stumpp & Walter of New York, and Fottler, Fiske, Rawson Co. of Boston. In addition a free show was given in Pequot section and several exhibits were held in the society rooms to which the public were invited. Special attention was called to the coming National Flower Show in New York. It is hoped to secure a large delegation of flower lovers to attend from New London. The next meeting is Feb. 13th when a paper will be given on Palms and Ferns by the president, John Maloney.

H. L.

ADVANCE NEWS OF THE GREAT FLOWER SHOW.

Secretary Young informs us that meetings are held regularly every Monday in New York by the flower show committee. Things are moving satisfactorily and everyone is right "on the job" and enthusiastic. It is believed that much of the causes for fault finding by exhibitors at previous trade exhibitions have been eliminated, as a rate of about eight cents per sq. ft. has been secured for benches. This and many other details of importance to exhibitors will be given publicity by Superintendent John Young well in advance of the show.

The enthusiasm which is so prevalent among the trade here and which was so manifest at the recent meeting of the Florists' Club is a mighty good omen. President W. H. Siebrecht is made of the right material to inspire optimistic loyalty not only among the active younger members of the club but among the older conservative element, as was well shown by the number of the latter in attendance at the aforesaid meeting, when the new president was installed. The interests of horticulture seem to be in good hands for the coming year.

William Tucker, of Ardsley, N. Y., who is sales agent for Sutton & Sons, grass seeds, in this country, is in England and incidentally will take up the matter of that firm's making an extensive exhibit at the National Flower Show. They have not fully decided, though having the refusal of a large block of space.

The Flower Show committee is fortunate in having Richard Hollaman, president of the Eden Musee, as a member of the board of directors of the International Exposition Co. (also treasurer of the company), who has had much experience with flower shows when they were held at the Eden Musee some years ago, and is an enthusiastic flower show man and a staunch believer in wide publicity.

FLORISTS' AND GARDENERS' CLUB OF RHODE ISLAND.

Plans for the coming year were given a good impetus at the regular meeting of the Florists' and Gardeners' Club of Rhode Island held in Providence, Jan. 20. An effort is being made to have the society well represented at the International Flower Show in New York. A committee including President Appleton, Secretary Chappell and Robert Johnston was chosen to interview the members with a view to secure every one possible to visit the show.

President Appleton named the following committees: Essays and Discussions, James Hickey, Cornelius Hartstra and Owen McManus. Entertainment, Henry C. Neubrand and Alexander Macrae; Investigation, J. F. Schillinger, John Marshall and Michael Sweeney. The question of attending the International show was taken up and discussed at some length.

The club was informed of the illness of its treasurer, James Hickey, who has been confined to his home for nearly a month. A letter of sympathy was ordered communicated to Mr. Hickey. The club decided to omit the annual banquet this year.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Officers—President, J. K. M. L. Farquhar, Boston, Mass.; vice-president, Theodore Wirth, Minneapolis, Minn.; secretary, John Young, 54 W. 28th St., New York; treasurer, W. F. Kasting, Buffalo, N. Y. Next convention, Minneapolis, Minn., Aug. 19-22, 1913.

For Full Information, Schedules, Space for Trade Exhibition, etc., write to John Young, Secretary and Manager for Trade Exhibition, 54 West 28th Street, New York City.

LADIES' SOCIETY OF AMERICAN FLORISTS.

Mrs. Frank H. Traendly, president Ladies' S. A. F., has appointed as directors to serve two years: Mrs. W. N. Rudd, Ill.; Mrs. C. C. Pollworth, Wis.; Mrs. Chas. H. Totty, N. J.

Also the following committees to serve at New York City and Minneapolis:

Reception Committee: Miss A. M. O'Mara, N. J., chairman; Miss Matilda Meinhardt, Mo.; Mrs. J. C. Vaughan, Ill.; Mrs. James W. Poole, Md.; Mrs. Chas. Critchell, Ohio.

Theatre Committee: Mrs. Chas. H. Maynard, Mich., chairman; Mrs. U. J. Virgin, La.; Mrs. B. Hammond Tracy, Mass.; Mrs. Walter Sheridan, N. Y.; Mrs. Julius Roehrs, Jr., N. J.

Working Committee: Mrs. J. Manda, N. J., chairman; Mrs. E. M. Bullock, Ind.; Mrs. J. S. Wilson, Iowa; Mrs. Geo. Cooke, D. C.; Mrs. John Donaldson, N. J.

NORTHAMPTON AND HOLYOKE GARDENERS' AND FLORISTS' CLUB.

A regular meeting of the Northampton and Holyoke Gardeners' and Florists' Club was held with the president, Prof. E. J. Canning of Smith's College Botanic Gardens. After the order of business a discussion was had upon the following subjects: Steam Heating vs. Hot Water, by Secretary Prof. James Whiting. The Growing of Asters and Their Protection from Blight and Beetle, by George Radcliffe. D. J. Galvin read a paper giving some good points on carnation culture.

An extremely well-grown plant of *Platycodon alcinorne* measuring over six feet across, said to be fifteen years old, also a beautiful specimen of *P. grande*, were awarded a certificate for cultural merit, also a specimen rubber plant—*Castilleja elastica*—considered the most profitable species and extensively grown in the south.

Our next meeting will be held in French Hall, Mass. Agri. College, Feb. 11. C. H. Totty and Wm. Duckham are expected to be present.

THOS. FOULDS.

The newly elected officers of the Botanical Club of St. Louis are: Geo. T. Moore, president; G. R. Hill, first vice-president; A. Janecke, second vice-president; Carl Haltenhof, secretary and treasurer.

LANCASTER COUNTY (PA.) FLORISTS' CLUB.

Thursday, Jan. 16th, twenty-seven of us left the city to visit Strasburg, the first stop being made at Amos Rohrer's place where we found very fine carnations, among them being Mrs. T. W. Lawson as highly colored flowers as the writer ever saw. From there to the greenhouses of Chas. B. Herr, the cleanest and best kept greenhouses in the state devoted to carnations. He had a few of Henry Rohrer's red seedling on trial and they certainly outclass anything in this line grown today in this section. Getting back to Lancaster a call was made on Enos Kohr. His Mrs. C. W. Ward was the best thing on the place which is saying a good deal for all of his stock is good, there being a slight difference in favor of the wooden benches over the cement benches, he having several houses of the latter.

A meeting of the club was held at 7.30 P. M., and the following officers were elected for the ensuing year: President, Albert M. Herr; vice-president, Elmer Weaver; secretary, Lemmon Landis; treasurer, Harry K. Rohrer. E. P. Hostetter made a display of very fine sweet peas with foot-long stems. After an informal discussion on Christmas trade the president appointed M. J. Brinton, H. K. Rohrer and Frank Kohr, a committee to arrange a programme for the balance of the winter meetings. This committee reported that Thursday, Feb. 20th, will be carnation night with a paper by Elmer Weaver on the novelties of last season's introduction.

As there are 55 growers in this section and 51 of them belong to this club and the average attendance is about 40, and 45 of the 51 are growing carnations in a wholesale way, it stands to reason that a bunch of flowers from the introducers of this season novelties will find an appreciative audience and as much likelihood of there being a good investment as it is possible to have anywhere, so kindly send along what you want to show, to reach here Thursday noon, Feb. 20, care of H. A. Schroyer, Lancaster, Pa.

After the meeting the first annual dinner of this club was held at the Hotel Weatland and as fine a spread and flow of wit was had as the most fastidious could ask for.

ALBERT M. HERR.

CONNECTICUT HORTICULTURAL SOCIETY.

Our first meeting of the new year was held on the 10th instant, at the County Building, Hartford. O. V. Zangen, of Hoboken, N. J., was present, and assisted by acting as one of the judges of the evening, and by imparting information on various horticultural topics.

The Department of Parks, Alex. Cumming, Jr., head gardener, and President John F. Huss, tabled a superb display of cyclamen and primroses. The judges awarded Mr. Cumming a first-class certificate for well-grown *Primula malacoides* hybrids, and honorable mention for *Primula Forbesii* magenta compacta; and Mr. Huss a first-class certificate for *Primula malacoides* hybrids, and also one for cyclamen. The judges reported that among Mr. Huss's *malacoides* they found a particular shape of flower that they recommended to be classi-

fied under an entirely new type, as *Primula malacoides stellata*.

Mr. Huss, who lately attended a national flower show committee meeting in New York, reported the progress already made, and also told of his pathetic interview with J. R. Trumpy, the veteran plant breeder who did so much in former years to propagate and introduce the maples. The secretary entertained the members by reading an article from *HORTICULTURE* of Nov. 23, 1912, by Richard Rothe, on "Individuality a Factor in the Advance of Horticulture."

The next meeting will be held on the 24th instant.

GEORGE W. SMITH, Sec'y.

Melrose, Conn.

COOK COUNTY (ILL.) FLORISTS' ASSOCIATION.

The Cook Co. Florists' Association held its regular meeting Jan. 16 and the chief business was the nomination of officers, with the following result:

President—A. C. Kohlbrand, N. Miller; vice-president—Geo. Wienhoeber, Allie Zech; secretary—A. T. Pyfer; treasurer—John Zech; sergeant—Michael Fink.

The same trustees were renominated.

The following were elected to membership:

A. E. Marine, 1134 Byrn Mawr, Ill.; Herbert Craig, 120 S. Wabash Ave.; James Novak, 2055 Devon Ave.; John Evert, 2039 Devon Ave.; Martin George, Schermer-ville, Ill.

Those proposed for membership: Otto Stroback, E. W. Siebrecht, John Swanson, Fred J. Rose.

The Chicago Carnation Co., showed their new scarlet carnation, the Herald. The large full flowers of a clear even red, borne on 36 inch stems were held straight as arrows and contrasted beautifully with the clean, beautiful green foliage. It was unanimously voted a club certificate and the members then took possession of the flowers as souvenirs.

CLUB AND SOCIETY NOTES.

Harry A. Bunyard of New York will deliver a lecture at the meeting of the Newport Horticultural Society, Newport, R. I., on January 28th. His topic will be the "Royal International Horticultural Exposition at London."

The Omaha Florists' Club held its annual meeting on January 9. Officers were elected as follows: President, Charles Faulkner; vice-president, M. Stanch; treasurer, George Swanson; secretary, Lewis Henderson; trustees, George Swoboda, A. Hooze and Paul Floth.

The next in the series of lectures in Horticultural Hall, Boston, will be on "Factors Influencing the Formation of Fruit Buds in Apple Trees," by Prof. B. S. Pickett, Urbana, Ill., on Saturday, Feb. 1, at 2 P. M.

On the following Saturday, Wm. W. Tracy of Washington, D. C., will talk on the "Adaptation of Local Grown Seed to Local Conditions."

The tenth annual meeting of the Alabama State Horticultural Society is being held at Bay Minette, Ala., this week. The program includes many valuable addresses on the fruit tree industry of the South, also on vegetable growing and marketing. Bulb growing is to be considered in a paper by L. H. Read of Deer Park, Ala. J. C. C.

NEW CARNATION THE HERALD.

The Herald carnation, as seen by the writer at Joliet, Ill., on Jan. 20th, would make a grower's heart rejoice. Five thousand clean, strong plants filled with buds and blooms, when with most growers, carnations have responded charily to all efforts to secure a reasonable crop this winter. The Herald houses were a blaze of bright red and the long stiff stems held the flowers high in the air. The bloom is large for so free a variety, full, compact and regular in form; not a burst-d calyx was to be seen. Peter Olsem, grower for the Chicago Carnation Co., said that he cut the first blooms in quantity from these plants about Sept. 15th, and has cut regularly each day since. At the holidays a very heavy cut was made, proving its claim to be a valuable new commercial red.

Benches of two-year-old Pink En-

chantress were seen carrying an almost unbelievable quantity of buds and blooms. These plants were cut back last year and left to summer in the bench, with a top dressing given in the fall. It was noticeable that they were producing much more freely than the one-year bench. White Wonder fully justified its name. Washington was producing plenty of blooms but has to have settled weather to keep a steady color. The Aviator at this time leads all the reds in freedom of bloom and we were told that it has done so all the season. A very bright color.

Among the seedlings were No. 77, light silvery pink; a large white penciled with carmine, and No. 246 which is of a color hard to describe—deep pink without a trace of purple. A Lawson placed beside it makes it appear almost red. It is a beautiful thing and will be heard from later.

Price is acting secretary of the society.

The schedule of prizes for the mid-winter and spring exhibition for 1913 has been issued by the Massachusetts Horticultural Society and those interested may obtain copies on application to the secretary, W. P. Rich, Horticultural Hall, Boston. The dates are Feb. 1 and 2, and March 14, 15, 16. Primulas, begonias, azaleas, orchids, bulbous plants, roses, carnations, fruits and vegetables are listed for the first one and the usual liberal prizes are offered at the second, for acacias, Rambler roses, cyclamen, azaleas, palms, ericas, cinerarias, orchids, etc., the full list of forced bulb stock, carnations, roses, sweet peas, antirrhinums and table decorations. For this latter show

the prizes include three silver and two bronze medals and \$1700 in cash.

The Tri-City Florist Club adopted the following resolutions on the death of John T. Temple:

"Whereas, God, in His infinite wisdom, has called from our midst our brother florists, John Temple; therefore, be it

Resolved, That our organization has suffered the loss of a loyal member, each of us a true friend, and the interest of floriculture and horticulture an energetic and tireless worker; also, be it

Resolved, That the members of the association attend the funeral of our departed member in a body and extend our sympathy to the bereaved family; also

Resolved, That a copy of these resolutions be sent to the family, the daily papers, the trade papers, and spread on the books of the association."

John Staack, Harry Bills, Henry Meyer, Committee.

OUT OF THE GINGER JAR.

Dr. Tom Daly leaves Philadelphia on the 21st for a brief lecture tour through Ohio, Illinois and New York. Any of our friends in the trade, who may have an opportunity of hearing the genial and witty Tom, in their neighborhood, will miss a treat if they fail to hear him.

I take my hat off to Richard Rothe not only for the splendid articles he writes for HORTICULTURE but for his good spelling. I also admire Edwin Jenkins but I do wish he would quote his Burns more respectfully.

To get the volume of business referred to in our flower trade report a good deal of hustling had to be done by the producers' salesmen (the wholesalers). When flowers are scarce they don't have to hustle; the hustle then comes from the retailers' end. But what a difference in the spirit in which these retailers view it. They get very peeved to think that they should have to pay the price when the market is short. And the names they call! "robbers! pirates! Let's have a meeting of the Florists' Club about it." On the other hand, the producers (and their salesmen, the wholesalers) take things philosophically and let it go at that! They never think of doing the kindergarten act!

Salaams to your seed trade editor. G. C. W. wishes to say that he never rushes into a controversy regardless of consequences. On the contrary G. C. W. always weighs most carefully the consequences of what he has to say—not only to himself but as to how same might affect others. G. C. W. has been writing for the press for thirty-five years and stands on his record of always standing up for what he thinks is right and true. He issues a defy right here and now for proof to the contrary!

As for his championing the weak at times: Granted. But there are always two sides to the simplest story, and if the story is complicated there may be four or forty sides to it. All G. C. W. wants to do is thrash it out from all sides and get at the truth. G. C. W. likes pats on the back and bouquets as well as the next one but has no use for such if they are prefaced with unwarranted assertions and inuendos.

In regard to the material G. C. W. has sent in to fill the gap left by the regular editor on the loaf list G. C. W. would like to be informed as to what part of same was not both instructive and entertaining and provocative of food for thought. Didn't they all sit up and take notice? G. C. W.

The Gardeners' & Florists' Club of Baltimore held their regular semi-monthly meeting at Florists' Exchange Hall on Monday, January 13, 1913. A seedling carnation was exhibited by Wm. Akehurst of Cowenton, Md., peach-pink in color; received 85 points and was awarded a certificate of merit. The stem and calyx were said to be perfect. The next club meeting will be on Monday, January 27th, at the same place.

NO merchant carries last year styles, and you would not care for old styles; therefore, your customers demand new varieties of Carnations of the "**Better Kind,**" and it is up to you to furnish them with up-to-date novelties such as our New Scarlet Carnation

THE HERALD

Besides, this is a money proposition: **The Herald** will produce at least one-third more blooms than any other scarlet; early, free and continuous bloomer; stem long and always stiff; flowers large, full and of a clear even shade of scarlet; calyx absolutely non-bursting, making it the highest type of a commercial carnation and one of greatest value to you. All cuttings strong and well rooted.

ORDER NOW.

EDUCATING A GARDENER.

Of course, Ed. Jenkins' article is O. K. in every way in regard to the young gardeners' opportunities, but the necessity of going to college and the recognition of the college graduate as being a serious opponent is becoming a fetich and almost an obsession with some. To my mind the only place to learn estate management is on an estate, and a moment's reflection will so obviously convince anyone that this not only applies to our profession, but also to railroading, engineering, or any of the higher callings. The present demand for college graduates evinced principally by those who have but recently entered into the possession of estates is merely a demonstration of that temporary delusion which so often afflicts a public who love a gilt-edged diploma, whether it is horticultural, dental or relating to a gold mine, either one so often co-kin to a gold brick. Young man, you are better persuaded to learn your profession under a good gardener who manages an estate than under a man who but recently graduated from a college. Rather a potting-shed lined with cultural certificates than an office with nicely framed diplomas and a man who gives the analysis of a soil, when you can tell by the feel and look of a soil that it is no good or otherwise.

VERNON T. SHERWOOD.

AN ORCHID EXHIBIT.

In our last issue we had occasion to mention an interesting little group of rare orchids, plants and cut blooms, exhibited at Horticultural Hall, Boston, on January 11, by E. B. Dane, gard. Donald McKenzie. Our orchid-loving readers may like to know the varieties comprising the group, so here is the list:

Lælia Gouldiana, dark pink, with three spikes, 12 flowers; *Lælia anceps alba* (Bull's variety), pure white; *Odontoglossum Harryano-crispum*, a beautiful pink variety with large brown blotches on the sepals and petals; *Oncidium Forbesii*; *Cypripedium Boltonianum*, pure white; *Cypripedium Gaston Bultel*, a very fine, dark variety with flat dorsal; *Cypripedium Leeannum* Gratrix, with three flowers—this *Leeannum* is considered to be the finest in cultivation; *Cypripedium Acteus Roughwoodiense*, a yellow flower with white dorsal—flowered at Mr. Dane's for the first time and named after the place; *Cypripedium Carmania*, a

CONSERVATORIES WITH A SETTING.

Our cover illustration shows the pleasing effect of careful exterior planting in connection with a range of greenhouses. Instead of being tucked away to one side as a sort of blemish on the landscape, a greenhouse might just as well be made an attraction if given the proper placing and surroundings. As showing what a suitable background and judicious planting will do, we present on this page a view of the exterior of this house taken a couple of years ago, before any planting was done. The transformation, we think all will

agree, thoroughly justifies the treatment. The greenhouse itself is simply a straightway house about 75 feet long, made architectural by simply the addition of a gable entrance, and a little vestibule leading into the centre compartment.

There is so strong a feeling among gardeners that ornamentalness on a greenhouse interferes with its growing adaptability that builders are usually reluctant to suggest architectural treatments. In this instance, which is almost an innovation, that objection will hardly be made.

beautiful yellow hybrid, dorsal sepal flat; eight spikes *Cattleya Trianae*, different types, most of them with a fine dar't lip; one spike of the rare *Chysis aurea*, very seldom seen at shows in this country.

A ————

Wm. Kleinheinz asks us to state that the plant figured on HORTICULTURE'S title page as *Aristolochia gigas Hookerii*, in issue of January 4 was incorrectly named, having been labeled wrong at the time he purchased it. The proper name is *Aristolochia gigas Sturtevantii*.

Prof. J. F. Cowell of Buffalo writes us on the same topic as follows:

"There has been some confusion in the nomenclature of the big-flowered forms of this genus, but so far as I can learn the varietal name *Hookerii* is applied only to the smooth form of *gigas* having a very short tail. The form which is commonly grown in this country, under the name of *A. gigas Sturtevantii*, has the long tails and so

far as I can see your figure is of this variety.

As usually catalogued, the large-flowered *aristolochia* bears the name of *grandiflora* var. *Sturtevantii*. Now *grandiflora* is the form common in the West Indian Islands, and while it resembles *gigas* in color and markings, it is very much smaller both in foliage and flower. *Gigas* is not found on the islands but seems to be a continental plant. I take it that the name *Sturtevantii* has no standing, and should be dropped. I believe that there are no known varieties of *grandiflora* in cultivation."

The United States Civil Service Commission announces that examinations to fill positions in the Department of Agriculture will be held on February 5 and 6. Among these is an opening for an assistant horticulturist at a salary of about \$1500 per annum, examination covering which will be held on the former date. Further information can be had upon application to the commission at Washington.

ARTHUR T. BODDINGTON

SPEDSMAN

342 West 14th St., NEW YORK CITY

Seed Trade

A Surplus of Peas.

What was bound to come sometime is an accomplished fact—a surplus of peas. Repeated short crops culminating in the practical crop failure of a year ago have almost unconsciously spurred seedsmen to order in excess of their requirements, and this has crept up little by little until many had unwittingly doubled their orders, therefore, when they received full deliveries on a large number of items, and anywhere from 60 to 75 per cent on most of the others, there was nearly as much woe and complaining as in short, very short delivery years. It is surprising how conditions can be reversed in one year in this always perplexing but more or less fascinating seed business, and this applies to other things than peas. It really would seem, if we may be permitted to venture the opinion, that the seed trade failed to rightly gauge the crop situation the past season. If latest crop figures of 1912 are correct, yields were generally underestimated, but this may have been due to a habit of looking for low yields, as we all acquire habits very readily and often unconsciously if nothing more than habits of thought. Following a long period of superabundant crops and low prices, buyers do not readily adjust themselves to an advance justified by unexpected shortages, and in reverse order, producers after a succession of bad crops and gradually advancing prices, find it hard to make practical concessions to meet improved conditions and fairly liberal stocks. However, it is an old saying that one swallow does not make a summer, and one good crop must not be allowed to obliterate too quickly the long succession of bad ones. This seems to be about the present situation, and if dealers who are overstocked will order according to actual requirements, adding their possible carry over, and growers will make reasonable concessions in prices from those justified by genuine conditions, they ought readily get together. "Lest we forget" is respectfully referred to both sides.

Notes.

Albert Dickinson and Mrs. Dickinson of Chicago are spending the winter in Florida.

S. F. Willard, Jr., recently in a Chicago house, has taken a position with Kendel's seed store, Cleveland, Ohio.

South Jacksonville, Fla.—G. E. Evans is preparing to open a wholesale and retail seed business at 201 E. Bay street.

Philadelphia, Pa.—Thomas J. Merry has taken charge of the poultry supply department of the Johnson Seed Company.

Prices of lancifolium album and magnificum lily bulbs have advanced abroad 30 to 45 per cent according to size of bulbs.

George E. Evans has opened a wholesale seed store in Jacksonville, Fla. The business which he formerly conducted in Gainesville has been sold to H. J. Baebbers.

It Is Free Upon Application.

HENRY F. MICHELL COMPANY

518 Market Street - - - Philadelphia, Pa.

O. H. Dickinson, of Springfield, Mass., has removed from Lyman to Worthington street, and in connection with his seed business has added a high-class stock of fruits and delicatessen requisites. Now if you should want peas and limburger, beans and fromage de brie, Dick can supply them. It's a strange combination, but if anyone is equipped to make it go it's Dick.

B. E. Brotherton, now in charge of the growing department of the Peninsular Seed Co., Port, Huron, Mich., reports a fairly satisfactory business the past year, and is very hopeful of the future. It may be remarked that Mr. Brotherton was for a number of years connected with Peter Henderson & Co., then he was for several years agriculturist for the Michigan Beet Sugar Companies, but this latter occupation was not congenial, and last year he found a connection with the Peninsular Seed Co., acquiring, we are informed, a substantial interest in the business. Already this almost moribund concern has developed an activity and vitality that has surprised many, and Mr. Brotherton says he has only just commenced. Give him a few years more, and he will show us something. Here's success to him.

Mr. Brotherton is a brother of Wilbur Brotherton, the expert, who has for the past fifteen years presided over the growing department of the Jerome B. Rice Seed Co., and to him is mainly due the credit for the very high quality of the peas and beans produced by this company, who, as is well known, are by far the largest growers of peas and beans for seed purposes in the world.

CATALOGUES RECEIVED.

Theodosia B. Shepherd Co., Ventura, Cal.—Wholesale Price List of Giant Petunia and other Flower Seed and Plant Specialties. Illustrated.

Samuel Fraser, Geneseo, N. Y.—List of High Grade Fruit Trees. This cat-

alogue contains some unique and useful features not usually found in such publications.

H. F. Michell Co., Phila., Pa.—Wholesale Price List of Seeds, etc., for Spring, 1913, for Florists and Market Gardeners. A very interesting, useful and complete catalogue of fine specialties. Also General Catalogue, 196 pages, unique and handsome. The first cover page is devoted to a picture of *Buddleia variabilis magnifica*, hitherto known as the Summer Lilac, but in this instance given the new name of Butterfly Flower. *Buddleia* by any other name would smell as sweet. By the way, this catalogue is "full of meat."

MCKINLEY DAY OR CARNATION DAY.

This holiday, January 29th, is appropriately celebrated by making a specialty of the carnation. It is a mistake to lay stress on any one color, as all colors are appropriate. Usually there are plenty of carnations to draw from at this date and store windows should be decorated a week or so ahead with appropriate flowers and show cards. Also, if in line with the policy of a store, the occasion should be featured in newspaper, street car, and other outside advertising.

Like other holidays McKinley day is a peg to hang a story on and boost for business. Boutonnières and corsage bouquets are the principal things that appeal to the many; but a keen eye ought to be out also for any dinner lecture or other public function, and suggestions should be put forcibly before the managers of such to appropriately blend patriotic sentiment on account of the martyred president's day. Baskets, vases and ribbons are in order for the latter occasions, and a full supply ought to be on hand for suggestive purposes. A good idea is to have a display of ready-made boutonnières and corsage bouquets, etc., in the windows at popular prices so as to catch the passing throng. Small cards could also be printed and attached to special items; such as "the McKinley bunch;" "the McKinley basket;" and so forth. This would focus attention on the special day, in advance and set people thinking, thus leading up to business when the day arrived.

Detroit, Mich.—The warm weather is cutting great havoc in counter sales and flower supplies both. Considering that Easter is coming so early it will soon be a question as to how the great quantity of bulbous stock can be disposed of profitably. We are in that regard a good deal like the dry goods merchant who must have cold weather to dispose of his woollens and every warm day is just so much lost, still he has one advantage over us and that is he can pack it away for another season, which we cannot do.

All Orders Given Prompt and Careful Attention

Baltimore, Md.—The mild weather we are having here is forcing the season with a vengeance, and florists are dreading the effect. At the writing of this report the temperature registered 86 degrees, and Jasminum nudiflorum is blooming near the Washington Monument.

George S. Kalb has had an exhibition at his home on Newberg avenue a number of dandelion blossoms picked from his lawn.

The decorations for the Gould wedding at New York this week were the work of Alex. McConnell and used up an enormous quantity of flowers but under the conditions existing in this wholesale market now this extra call creates hardly a "ripple." The work could not fall into better hands so far as its carrying out is concerned and, further, nobody can ever envy any good luck which comes to that popular and always courteous gentleman.

Be Ready for St. Valentine

The lovers' festival is only a few weeks away. Bayersdorfer, "The Florists' Supply House of America," is as usual leading the procession.

BAYERSDORFER HAS MORE BASKETS suitable for this occasion than all the rest of them put together.

Dainty Two-Tone Colors:—Delicate pink, blue, lavender, green, white, etc., and in all sizes from the small ones at little prices up to elaborate designs.

Dainty Ribbons, in great variety of shades and from one inch in width up to the largest sizes.

We recommend especially:—

BOSTON STRAW—This splendid and popular ribbon at greatly reduced prices. Write us for special quotations.

Prepared Ferns, immense assortment; all the popular varieties in their various sizes. Very useful for decorating.

Sea Moss or Japanese Air Plant. Fine for small baskets, airy and graceful. One of the best sellers.

SEND FOR OUR SILENT SALESMAN

H. BAYERSDORFER & CO.

THE FLORISTS' SUPPLY HOUSE OF AMERICA

1129 ARCH STREET, - - - - - PHILADELPHIA, PA.

PHILADELPHIA NOTES.

The officers of the newly organized Retail Florists' Club are reported to be: President, John C. Gracey; vice-president, Charles H. Fox; treasurer, E. H. Baisler; secretary, C. H. Grakelow.

Charles Pennock was reported on the 20th inst to be progressing towards recovery very satisfactorily. He is still at the Presbyterian Hospital and will remain there for probably a week or ten days.

R. M. Glass, identified with the trade for the past twenty years, has been appointed outside salesman for local territory for the M. Rice Co. Mr. Glass is well-known and popular and we bespeak a kindly reception for him in his new field.

A charming little valentine novelty is offered this week by Rice, consisting of golden arrows 8 to 12 inches long. These cost about five cents and when tied with ribbon, three in a bunch, make a fetching accessory to box or basket for this holiday.

Paul Berkowitz of Bayersdorfer & Co. has returned from a brief New England trip and reports healthy conditions and good prospects for a brisk spring business in the flower trade, judging from advance orders and the general optimistic spirit prevailing.

Wallace R. Pierson, Cromwell, Conn., will be the attraction at the next monthly meeting of the Florists' Club, Tuesday, Feb. 4. Subject not yet announced but we trust it will have to do with the National Flower Show in which the trade interest here seems to be at a low ebb.

Quite a ripple of interest was caused in local circles by the announcement in last week's HORTICULTURE that Skidelsky had purchased the entire stock of Mr. Browne's sensational new pink carnation No. 23. Philadelphians are naturally gratified that the sponsors should have done their fair city the honor of naming this remarkable flower "Philadelphia," and are looking forward to next fall's shows when the new baby is to be exhibited.

Visitors: Timothy O'Connor, Providence, R. I.; Messrs. Saltford, Poughkeepsie, N. Y.; W. C. Langbridge, Albany, N. Y.; Geo. Smith, Cleveland

Floral Exchange, Cleveland, O.; B. E. Brotherton, Port Huron, Mich.

ST. LOUIS PERSONAL NOTES.

Mrs. C. C. Sanders is visiting her son Walter, who now lives at Amerillo, Tex. She will return this week.

Oliver K. Sanders surprised his friends by getting married on Wednesday, January 15th, to Miss Ethel Chadsey. He was congratulated on all sides.

Mrs. F. J. Fillmore, Sr. had a bad accident last week when she fell and broke her arm on the slippery sidewalk. Her place will be hard to fill in the floral store.

J. J. Beneke, secretary of the St. Louis Florists' Club, says it looks good for a flower show for next fall when the committees of the club and retail florists assistant get together to discuss the matter. "Publicity" is now the topic at all the florists' club meetings throughout the country and it will be thoroughly thrashed out at the February meeting of the St. Louis Florist Club.

CHICAGO NOTES.

August Jurgens, Jr., is unable to be at his work, laid up with a cold and complications.

Peter Protopapas of the Chicago Flower Market is suffering from blood poisoning in his arm.

The new building being completed at Wabash and Monroe streets bears the sign, "A first-class flower store will be opened here." No name is given, but it is generally understood that Mrs. Williams of the Atlas will be the proprietor.

The matter of erecting a greenhouse plant for the growing of cut flowers was taken up again at a recent meeting of the Chicago Flower Growers' Association. While nothing decisive was accomplished the prospect is brighter than heretofore.

Visitors: J. J. La Bocious, Duluth, Minn.; C. B. Knickman, of McHutchison & Co., New York; Martin Reukauf, of Bayersdorfer & Co., Philadelphia, Pa.

PERSONAL.

Emil Niednagel of Evansville, Ind., and Miss Olga Schmidt were married on January 9th.

Fred E. Palmer and daughter of Brookline, Mass., have gone on a vacation to Panama and the West Indies.

Mr. McHugh of Detroit, Mich., who, about ten weeks ago buried his only son after a sickness of less than a week, now mourns the loss of his wife whose illness was primarily caused through the shock of their son's death.

Boston visitors: W. C. Langbridge, representing Jerome B. Rice Co., Cambridge, N. Y.; J. Halsey Reock, representing R. M. Ward & Co., New York.

New York visitors: N. B. Keeney, Le Roy, N. Y.; W. H. Grennell, Pierpont Manor, N. Y.

Rooted Carnation Cuttings

New and Standard Varieties. All Stock Guaranteed

NORTHPORT: Cerise pink, similar to Mrs. Ward, but larger flower; wonderfully free and continuous bloomer; practically non-bursting calyx. \$7.50 per 50; \$12.00 per 100; \$100 per 1000.

ENCHANTRESS SUPREME: Considered by one of the largest and most successful New England growers as the best introduction in recent years. The very best sport of Enchantress, much better than Enchantress; light salmon pink; a non-burster; does not fade out like Enchantress. \$5.00 per 25; \$7.00 per 50; \$12.00 per 100; \$100.00 per 1000.

SALMON BEAUTY: Similar in all respects to Enchantress Supreme, but a trifle darker in color. \$7.00 per 50; \$12.00 per 100; \$100.00 per 1000.

COMMODORE: Very fine scarlet, exceptionally good keeper, as free as Beacon; stiff stem, strong calyx, fine grower, easy rooter. \$7.00 per 50; \$12.00 per 100; \$100.00 per 1000.

WILLIAM ECCLES: Probably one of the finest among the red Carnations today—a magnificent all-round Carnation. \$7.00 per 50; \$12.00 per 100; \$100.00 per 1000.

EUREKA: Deep scarlet; stiff, wiry stems; very prolific bloomer; good size flowers. \$6.00 per 50; \$10.00 per 100; \$75.00 per 1000.

Other varieties we are offering this season:

	Per 50	Per 100	Per 1000

Flower Market Reports

BOSTON The special features of this market now are, the decided fall in value of all carnations, the unpopularity of double violets, the increase in receipts of tulips and other late-forcing bulb material and the scarcity of decent quality American Beauty roses. The last mentioned item is a common condition at this time of the year and, perhaps, the coming years will not bother about it if the Mrs. Charles Russell fulfils its bright promise. Carnations have taken a great fall. They are all right as to quality but they are in excess of the demand and the inevitable result follows. For the usual run of roses the supply is ample and demand normal. Tulips are beginning to make an impression and will soon be seen in fine quality. Mann Bros. are running Fred Moore as a specialty tulip and it is making a good record among the artistic people who abhor glaring color. Violets are too numerous and the double ones are almost without a friend. Gardenias abound and locally are slow, with no market for the discolored ones from distant sources. Orchids ditto.

BUFFALO You may enter the wholesaler's at almost any time of the day and pick up a good lot of narcissus, which is about the only thing that anyone would call overplentiful. You may also get what carnations you want but only of the ordinary quality,

especially red Winsor and white and which must be used up quickly as the spring-like weather has had a tendency to take the keeping quality from them. There are good roses to be had but not too many, possibly just enough to help you out from day to day. The short grades on all varieties are scarce. Japan lilies, callas, and sweet peas are coming in fine. Violets continue to be plentiful. There are tulips in white and yellow and a fine lot of all other seasonable stock.

The market is in a normal condition for the season with the exception of the shortage on roses which is quite general. Where for so many weeks carnations could not be had in sufficient quantity, now the same difficulty is experienced in the rose supply. One effect of this condition is the moving of a good supply of tulips which otherwise might go slowly, as was the case last year, but the scant supply of

Flower Market Reports

(Continued from page 125)

roses has turned the trade to tulips which are now had in all the leading colors. Jonquils also are selling readily. American Beauties are off crop with most growers and good stock is scarce. Carnations are now coming in freely and orders can be readily filled for any amount. Some of the retail flower stores have windows so attractive with lilacs, jonquils, pansies and other spring flowers, that one can hardly believe it is mid-winter. Even pussy willows have appeared the past week. There is a good supply of all other flowers as lily of the valley, violets, freesia, lilies, etc., and all kinds of green.

With the exception of American Beauty roses the flower supply is more than ample for the needs of this market at the present time and the tendency of values has been downward. Even orchids are in over-supply and are sold only at prices that may reasonably be classed as "mark-down". When one sees high-grade Cattleya Trianae offered in the window of a high-price store at 50 cents each at retail, the rest of the story is obvious. Cattleyas are much in evidence in all the wholesale establishments. Bulbous flowers are increasing in quantity and variety and improving in quality. The majority of tulips offered so far, however, are of little account and make one feel a sort of pity for the poor over-forced bulb which was capable of doing so much better if given a fair chance. Carnations seem very plentiful everywhere and are again down in price. Figures quoted on roses in our tabulated lists are the average prevailing prices for the various grades. There are, however, some preferred stocks from certain highly esteemed growers which find a market at very much higher prices but these sales are limited and special and to quote them in our regular market price-lists would serve no purpose other than to mislead and confuse.

There was a good volume of business here last week and trading on the whole has been as satisfactory as could be expected. Of course, we cannot brag about prices which on the average have been lower than this time last year. Roses, carnations, orchids, violets; all classes of flowers, all along the line, are too plentiful. There are indications of a falling off in supply of Beauty and Richmond roses, especially in the shorter grades. White roses have been in good demand, and there

are very few left over. Killarney is a little off color, but still it is much preferred by the buyers at present to Maryland, which is not a favorite as a winter rose. The carnation market cleans up pretty well but still the prices are not good, although there is not a very big crop. The orchid market is dominated by the cattleya; fine flowers as a rule but nothing satisfactory about the demand and lots of offers of surplus stock coming in from outside at absurd prices. Camellias are a feature of the market and, strange to say, the colored go better than the white. Spring flowers such as sweet peas, daffodils, Roman hyacinths, daisies, etc., go more satisfactorily than the staples. Greens sluggish.

The market during the last week was greatly overcrowded with everything in the cut flower line and at times making things quite unpleasant for our commission men. In this line we class carnations, sweet peas and paper whites. These had to be sold very cheap in order to make them attractive for the buyer. Roses scarced up somewhat and some of our heavy shippers must be off-crop so the price held up well on these. Violets and lily of the valley were in plenty. We have had mild weather, but the weather man says, look out for cold

and dark weather this week. This should scare things up and prices may advance.

NEWS NOTES.

La Manda Park, Cal.—Charles F. Stone has gone into the greenhouse business here.

Mt. Clemens, Mich.—The greenhouses formerly owned by James Taylor have been purchased by Arthur Bevershlag.

Middleport, N. Y.—The greenhouse of John H. Gould was wrecked Friday evening, Jan. 10, by the heavy fall of snow. Loss \$3,000. No insurance.

INCORPORATED.

New Britain, Conn.—Vultz Floral Company. Capital \$20,000.

Elmhurst, Ill.—Wendland & Keimel Co. have incorporated as florists, with capital stock of \$100,000.

Evans City, Pa.—Harmony Nurseries, capital \$10,000. Incorporators: B. W. Smith, C. H. Smith and H. L. Blind.

Raleigh, N. C.—Scholtz, The Florist Incorporated. Capital \$6,000. Incorporators: E. P. Scholtz, Mrs. Nellie Scholtz, J. I. McCallum and others.

Cleveland, Ohio.—Standard Pump & Engine Company has increased its capitalization from \$25,000 to \$100,000 and has opened a retail sales headquarters at 1406 West Third street.

CALADIUMS

CALADIUMS FOR PRIVATE GARDENS.

Beautiful New Fancy-leaved Caladiums. Colors most exquisite from a transparent white and pink to deep claret and vivid red. Price from 50c. to \$1.00 each; \$5.00 to \$10.00 per dozen. The following are the most brilliant: **Marian A. McAdow**, glowing red, narrow green border; **Mrs. Jessie M. Thayer**, deep velvety red center and ribs, interspaces changing from pure white to light red; **Caro Nome**, rosy-red center and ribs, creamy ground color; **Frances M. Laughlin**, transparent rose, metallic zone, green border; **Elizabeth A. Oehlenschlaeger**, violet rose, constantly changing colors; **Minna Hoffmann**, creamy ground, changing to a most beautiful transparent rose; **Ella Wheeler Wilcox**, transparent white, suffused with green; **Picuhy**, transparent white, light green border-ground; **Rio de Janeiro**, considered in Europe the most exquisite of all caladiums; ground-color a transparent rose. **Caladium marmoratum (Alocasia Roezli)**, green with large whitish spots, grows 6 feet high in good soil (1.00 each; clumps, \$2.00 to \$5.00). Also the beautiful **Dioscorea discolor**, a strong climber with velvety heart-shaped leaves, purple underneath, striped above with white (\$1.00 per tuber. More beautiful and satisfactory than **Cissus discolor**).

200,000 Giant Flowering Cyclamen, August seedlings. We received first prize on our blooming cyclamen at the show in Cleveland, O., and hold other first prizes. Our aim is strong growers, a well built five petal flower, with good color and fragrance, many of them at one time, well marked foliage and general good habits. **Strong August Seedlings**, \$2.50 per 100; \$20.00 per 1000.

What others say about our blooming plants: **Mr. E. A. Corson**, Rochester, N. H., Nov. 15, 1912: "Cyclamens received and am more than pleased. They are certainly fine plants and such a range of color. Arrived in good condition too."

Plants in bloom for Christmas, 75c., \$1.00, \$1.50 to \$2.00 each. Cultural directions with all orders. **Christ**, **Winterich**, **Cyclamen specialist**, **Defiance**, O.

DAHLIAS

Dahlias, named sorts, strong divisions, \$1.25 per 100. Send for list. **C. W. Hoffman**, R. 13, Dayton, O.

Dahlias—2500 field clumps, latest varieties, cheap for cash; or what have you to exchange? **Geo. H. Walker**, **Dahlia Expert**, **North Dighton**, Mass.

NEW DAHLIAS FOR 1913.

Dorothy Peacock, **Mrs. J. Gardner Cassett**, **Golden Wedding**, **New Century Dahlias**, etc. Big stock of best cut flower dahlias. Write for surplus list and special prices. **Peacock Dahlia Farms**, **Williamstown Junction**, N. J., Post Office, **Berlin**, N. J.

For List of Advertisers See Page 103

DAHLIAS—Continued

East Bridgewater Dahlia Gardens are the largest and most up-to-date in America. Over 850,000 field clumps to offer at right prices. Be sure and send your wants to J. K. Alexander, The Eastern Dahlia King, East Bridgewater, Mass.

PUBLICATIONS RECEIVED.

The Book of Grasses, by Mary Evans Francis. This elaborate volume, just published by Doubleday, Page & Co., merits more than passing notice and—we must frankly and regretfully acknowledge—a much more intelligent review than we feel qualified to give to it. We realize, however, that we are far from being alone in our very imperfect knowledge of the grass family for the general ignorance regarding this, the most common, most multiform and most widely distributed of Nature's verdure, embraces horticulturists of all classes and even the great majority of those who sell the seed, in the few prominent commercial kinds, as well as those who buy and plant it for grain, pasture or lawn purposes. The very commonness of grass is a chief reason, undoubtedly, for the prevalent indifference to its study, while even the sight of a mere list of the species recognized and classified by the botanist is enough to appall the would-be student. Yet there are many for whom the grass in its manifold aspects has a resistless charm, to whom although "it bears no blazonry of bloom to charm the senses"—quoting the eloquent words of the late John J. Ingalls—"its homely hue is more enchanting than the lily or the rose."

The little that has been written about our common grasses has dealt chiefly with their value to the agriculturist or has been so intricate and technical as to repel anyone but the most patient scientist. This book is the first of any consequence written for the amateur which takes up in a simple yet comprehensive manner the common and rare species of grass. The author's popular descriptions, although accurate, are in simple terms and fascinating language which betokens the love which the author plainly cherishes for her subject and are followed in each case by technical descriptions which are the results of careful observations as well as close study of the leading scientific works on the subject of grasses. The Sedge family and Rushes are fully covered as well as the true grasses.

The illustrations are very beautiful, all from original photographs. Sixteen of these have been reproduced in full-page color plates and sixty-four are in black and white. There is an index to English names and one to Latin names; a calendar of the common grasses according to their seasons of most abundant blooming and a list of grasses according to the locations where they flourish, also a complete analytical key.

The price of this volume, 350 pages, is \$4.00 net, postage 35 cents. It can be obtained from the publishers, Doubleday, Page & Co., Garden City, N. Y., or from the office of HORTICULTURE. It should have a place on the book-shelf of every gardener.

The Annual Proceedings and Bulletin of the American Rose Society which has just come to hand is a very creditable publication and will prove of great interest and value to the rosarian and all who desire to know more about the culture in America of the Queen of Flowers. It is handsomely illustrated with views of the great exhibition at Detroit last spring and other interesting pictures. By all means join the American Rose Society and

HART MAKES HANDLES FOR POTS

With Paper or Porto Rican Mats They Make Baskets. These are the Well-Known HART'S HANDY HANDLES.

Shipments are being made daily eastward to Boston, westward to San Francisco—and everywhere else.

Once used always used, because they are SO HANDY.

Prices per dozen—No. 1, \$2.50; No. 2, \$3.50; No. 3, \$4.00; No. 4, \$5.00; No. 5, \$6.00.

GEORGE B. HART, 24 Stone St., Rochester, N. Y.

Secretary Benj. Hammond, Fishkill, N. Y., will send you a copy of this book and in many other ways see that you get full value for your annual dues.

Sweet Peas Up-to-Date (with appendix). This useful little volume, first published by W. Atlee Burpee in 1910, has, as its name indicates, been fully revised and with the appendix which gives a complete description list of the new Spencer varieties, by whoever introduced, here or abroad, becomes an indispensable handbook for anyone desirous of being "up-to-date" in the knowledge of this fascinating flower.

City of Boston, Department of Parks. 37th Annual Report of the Board of Commissioners. A very interesting story of a very busy year. The cost of maintenance and various improvements for the year was \$404,974.71. Boston's park and playground debt is \$7,482,347.39.

American Gladiolus Society Bulletin, No. 6, has come to hand. Like its predecessors it contains some excellent material of interest to the gladiolus fancier. Eugene N. Fischer contributes a general cultural article of much value.

The Annual Report of the Park Commissioners for the City of Haverhill, Mass., just published, contains a very interesting narrative of Pentucket cemetery, over 250 years old, which is under the care of the park commission.

New York Agricultural Experiment Station Bulletin No. 350 is on "Some New Apples from Known Parents." Popular edition, summarized by F. H. Hall from Bulletin by U. D. Hedrick and Richard Wellington.

Felix & Dykhuys, of Boskoop, Holland, announce that on January 1, 1913, the firm of Van Balen & Co., of Boskoop, was combined with their firm. This can undoubtedly be called a happy combination. Mr. Dykhuys will now devote all his time to their American trade. Mr. Alb. van Balen, who is favorably known all over Europe, will take care of their European trade, and Mr. B. B. C. Felix will as before devote all his time and energy to the nursery department, which has been constantly increased and improved, and now considered the best in Boskoop.

OBITUARY.

"Garibaldi" Tricola.

A familiar face will be missed from the Chicago flower market for Mr. Tricola, commonly called Garibaldi, passed away last Sunday. He occupied but a humble place in the trade, peddling the flowers he bought, but will be kindly remembered.

Mrs. William Aherne.

Mrs. William Aherne, wife of Wm. Aherne, the well-known florist of Columbia, Pa., died on the 6th inst., aged 63. Mrs. Aherne was a lady of most estimable character, highly educated, of unusual culture, character and mental attainment, a forceful writer, and always at the forefront in the civic duties of her neighborhood. She was much loved by everybody who knew her. Her husband, four sons, and four daughters survive.

The Crowl Fern Co. will move their headquarters from Millington to Springfield, Mass., in the coming spring. They have several million ferns in cold storage.

LEMON OIL CO'S
STANDARD'S
SOLUBLE INSECTICIDE
NO ODOR NO POISON

Guaranteed under the Insecticide Act. 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

½ Pint - - 25c; Pint - - 40c; Quart - - 75c
½ Gallon, \$1.25; Gallon, \$2.00; 5 Gallon Can, \$9
10 Gallon Can - - \$17.50

ENFORCING THE INSECTICIDE LAW.

W. M. Hays, Acting Secretary of Agriculture, has sent out under date of December 20, 1912, notices of Insecticide Act judgments as follows: Sherwin-Williams Co.—"Strictly Pure Paris Green"; pound packages, 4 to 13 per cent. short weight in an invoice of 3000 cases seized in Minneapolis. Devoe & Reynolds Co., Chicago—Paris Green; adulterated and misbranded. Sherwin-Williams Co. — Arsenate of Lead; adulterated. Devoe & Reynolds Co.—Lead Arsenate; adulterated and misbranded. "Shoo Fly" Manufacturing Company, Phila., Pa.—"Shoo Fly," the Animal's Friend; short measure. Dr. G. Hess & Clark, Ashland, O.—"Instant Louse Killer"; misbranded and short measure. F. A. Thompson & Co., Detroit, Mich. — "To-Bak-Ine Liquid Poison"; "labels false and misleading." F. A. Thompson & Co., Detroit, Mich.—"Thompson's Rose Nicotine;" statements on wrappers false and misleading.

The Connecticut River has not been closed to navigation this year, a condition not before known in its history. The Elm City Nursery Company report that at the present time there is no frost whatever in the ground at New Haven, Conn. Massachusetts is having an equally remarkable experience; H. Huebner of Groton reporting that the ground is entirely free from frost and that he was planting trees up to January 21.

Woodhaven, N. Y.—Henri Beaulieu has an advertisement in "Chat," offering a reward of five dollars for the arrest and conviction of persons who broke his windows and tore down his fence on December 14th.

POTASH

Your fruit is not at its best in yield, flavor, color or shipping qualities unless the Potash supply is adequate and available.

A fertilizer for fruit should contain at least 12% Potash

Many growers use annually 200 lbs. Muriate of Potash per acre.

Potash also insures strong wood and early and continuous bearing.

Write us for prices if your dealer doesn't carry Potash Salts; also for our free books with formulas and directions.

W. E. Marshall & Co., New York.—1913 Catalogue of Flower and Vegetable Seeds, Plants and Sundries. Well gotten up, with an attractive novelty list and descriptive notes.

S. M. Isbell & Co., Jackson, Mich.—Seed Annual, 1913, 112 pages, freely illustrated. Cover shows vegetables and flowers in colors. Also Wholesale Price List for Market Gardeners.

W. Atlee Burpee, Philadelphia, Pa.—Wholesale Price List for Market Gardeners, Florists and Farmers' Clubs. The well-known "Blue List." Indispensable if you want to know what's what.

Burnett Bros., New York City—Seeds, Bulbs and Plants, General List for 1913. Burnett's Scottish Chieftain pansies in true colors form a very attractive cover illustration. An excellent catalogue throughout.

J. M. Thorburn & Co., New York—Trade List for January, 1913. This is one of the standard trade lists for vegetable and garden and tree seeds. A telegraphic cypher is attached to each article as listed. A business book all through.

John Lewis Childs, Flowerfield, N. Y.—Trade Price List of Choice Gladioli and other Summer Flowering Bulbs and Plants. The firm issuing this catalogue is well known as among the leading gladioli houses of the world. Quotations in this wholesale list are very tempting.

Richard Diener & Co., Mountain View, Cal.—Seeds, Bulbs, Plants, for Spring 1913. This interesting catalogue is devoted largely to a list of new geraniums, with illustrations, which Mr. Diener states represent the cream of some 8000 seedlings. California Giant carnation is another nov-

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Ea.	Dos.	100
10	20 in.	\$1.45	\$16.00	\$130.00
20	18 in.	1.80	14.00	115.00
30	16 in.	1.00	11.25	92.00
40	14 in.	.65	7.00	56.00
50	12 in.	.45	5.00	40.00
60	10 in.	.38	4.00	32.00
70	8 in.	.30	3.50	28.00

Manufactured for us exclusively. The best tub ever introduced. The neatest, lightest and cheapest. Painted green, with electric welded hoops. The four largest sizes have drop handles.

HENRY A. DREER, Seeds, Plants, Bulbs, and Supplies, 714 Chestnut Street, Philadelphia, Pa.

elty offered. Other good things are promised.

Maloney Bros. & Wells Co., Dansville, N. Y.—List of "Guaranteed Trees, from Nursery to Planter." This catalogue is a most creditable production—typographically handsome and on fine paper. The cover illustration in colors, of a cluster of Elberta peaches, is particularly good.

J. M. Thorburn & Co., New York City—"High Class Seeds, 1913." Always of refined exterior and showing distinct individuality in lay-out, this catalogue holds a valuable place in the season's catalogue publications. The great number of varieties of both flower and vegetable seeds listed is worthy of note—more, we should say, than are listed by any other American house.

Get This Loose Leaf Book Now— We Send It Free

FROM these pages shown you would think it a book on boilers; but it's more than that — a lot more. It's a Florists' Supply Book of greenhouse materials. The first half is devoted to greenhouse heating. Not just boilers, pipes and fittings, but pages of useful information such as you have wanted time and time again. There are 108 pages in the book now, but it's made up looseleaf fashion, so more pages can be added.

It works like this: We send you the book of 108 pages now; and then every once in a while (perhaps oftener) we will mail you additional pages all ready for putting right in the book. All you have to do is, simply turn back a couple of fasteners and in the pages go.

Every time we get out a new thing of importance we will promptly print up some pages about it and mail them to you.

You can see that such a book will be invaluable to you, because it can **always be kept right up to date.**

Sent for copy right now, while it's on your mind. Don't put it off till tomorrow. for day after tomorrow you may need it badly.

Hitchings & Co. New York Offices **Factory**
1170 Broadway Elizabeth, N. J.

ERECTED AT RUMSON, N. J.

SEEING how attractive and practical this arrangement is, do you wonder why **THE LUTTON PATENT CURVED EAVE** method has changed Greenhouse Construction during the past few years? The result has been the most successful house that can be produced; the other concerns who had been producing the same antiquated buildings for years had to simply destroy their patterns as well as their catalogues and start anew. Just ask some of our imitators to show you some of their curved eave houses built before **THE LUTTON PATENT** was granted, you will then be convinced that you had better consult with me.

WILLIAM H. LUTTON, DESIGNER AND BUILDER West Side Ave. Station, Jersey City, N. J.

Don't forget this important fact: every cross tie is double angle iron; every gusset plate at the eaves is double.

No. 1.
Joining point of double angle cross truss, strut and ridge rod tie support.

No. 2.
The ridge showing the wrought iron joining plate with the ridge rod cross tie support bolted to it.

No. 3.
Column gusset plate (double) rigidly tying together the angle iron column, the angle iron cross tie (double) and the steel rafter.

No. 4.
Double gusset plate bolted together the guaranteed wrought iron post and steel rafters.

Important Construction Points

In the Wm. R. Nicholson New House at South Framingham, Mass.

IT's an iron frame 52x200. It was erected right over a smaller wooden house which was not removed until after the Decoration Day stock was sold. It is our two column compression truss design. The columns are not pipe, but made at our factory by bolting together two angle irons. You can at once see what strength such a column made such a way, must have.

The supporting and non buckling strength of columns made this way is so great that we can place them about 40 feet apart and still be able to use only an exceedingly simple form of compression trussing.

When you walk in this house of Nicholson's you scarcely notice the columns, they are so wide apart.

There are two things you do notice, however, and **keep on noticing**, they are the convincing rigidity and surprising lightness of the entire frame; also the particular attention given to each part that **every part** shall have abundant strength.

It is evident that the construction has been carefully thought out and every stress and strain proved up by greenhouse engineering experts.

It was far from an easy task to sell Mr. Nicholson this house, because he is the kind of man that has to be shown and convinced step by step and part by part. He tried every way possible to shoot holes in the way we proposed to frame it. In fact he was one of the hardest men to convince we ever had to deal with.

But ask him or write him about what he thinks of his house now.

Better yet, go and see it.

See for yourself.

Convince yourself.

Let the house do its own talking.

If you'll do this, we will run the risk of anyone else getting your order. If you can't go we will gladly send you an interior photograph 24 inches long and full particulars.

What Mr. Nicholson Thinks of It.

"It took me a long while to make up my mind to build a Lord & Burnham house. Although we had several of this concern's Iron Frame houses on the place, houses that were satisfactory in every way, still it did seem to me that the price they asked was a bit high.

"The more, however, that I studied the details of the house that this concern proposed to build for me and began to realize the carefulness with which the structural strains had been cared for, the more I became convinced that I could not afford to build any other house—I **could not afford** to have a house that **had a doubt**. Now that the house is up I am thoroughly convinced that I made no mistake.

"When I go into the house and see how light it is and how strongly it is supported by the columns (made of double angle-irons bolted together), and look at those double angle-iron cross ties going across the house, also the strong way in which the trussing is treated, and then look at the eave and see that double gusset plate strongly holding together the steel rafter and wrought iron post, I am convinced **beyond all doubt** that there is **no doubt** about the superiority of Lord & Burnham houses.

"Then, again, after the terrific high winds we had last week, we didn't lose a pane of glass even from the houses you erected for us fourteen years ago. They stood as firm as a rock."

Very truly yours,

Wm. R. Nicholson

GERANIUMS

We have a splendid lot of 2 and 3-in. stock ready for immediate shipment, and are booking orders for future shipment to the extent that we would suggest to prospective customers for after Easter orders, that they be placed at an early date, to in any way insure delivery. We can have them ready for you at our regular price of \$2.00 per 100, \$18.50 per 1000, for 2-in., or \$3.00 per 100, \$25.00 per 1000 for 3-in.

We have the following ready for immediate or future shipment, from 2-in. pots:

	Per 100	Per 1000		Per 100	Per 1000
Abutilon Savitzl.....	\$3.00	\$25.00	Chrysanthemums, 75 Pompon Varieties.....	2.00	18.50

IT IS A STRANGE FACT

that a day-old colt can run as fast as its mother. This has been brought about through evolution; since the day when horses ran wild and their means of escape from their enemies was flight. If a colt could not run fast enough it was left behind and eaten, so only the swiftest lived. Finally the breed improved by elimination of inferior stock, and the colts were born fleet of foot. It is the old story of the survival of the fittest. In the lily bulb business a similar process took place not long ago. Formerly fields "played out" and bulbs deteriorated after a time; but by careful attention and considerable expense a better grade of seed bulbs was secured, from only the healthiest plants, for new crops, so that today the Horseshoe Brand Giganteum fields in Japan are by far the finest lily fields anywhere in the World. The seed-bulbs from these fields are of superior quality to anything ever produced, which is the best kind of assurance to our customers that our future crops will always be of the highest standard. You need such lily bulbs in your business, and we need your orders, which means your co-operation in the proper maintenance of this high standard of quality. Prices reasonable—sent on request.

Not How Cheap
But How Good

RALPH M. WARD & CO.

THE LILY HOUSE

71 MURRAY STREET,

Cold Storage bulbs for delivery any time in the year.

FINE FERNS

We have a magnificent stock of exceptionally fine **NEPHROLEPIS** in the following varieties, viz:

ELEGANTISSIMA. 6-in. pots, 50c. each; 8-in., \$1.00 each.

ELEGANTISSIMA COMPACTA AND MAGNIFICA. 3½-in. pots, 25c. each.

HARRISII. An improved fluted form of *Bostoniensis*. 8-in. pots, \$1.00 each; large specimens, \$3.00 each.

BOSTONIENSIS. 8-in. pots, \$1.00 each.

VIRIDISSIMA. 6-in. pots, 50c. each.

CYRTOMIUM FALCATUM. Fine specimens. 6-in. pots, 75c. each.

SMALL FERNS FOR FERN PANS. Assorted varieties. 2¼-in. pots, \$3.50 per 100.

ASPARAGUS PLUMOSUS NANUS. Extra strong plants. 2¼-in. pots, \$1.00 per 100.

ASPARAGUS SPRENGERI. Extra heavy plants. 4-in. pots, \$10.00 per 100.

COLD STORAGE LILY OF THE VALLEY

We carry only one grade, and that the very highest quality obtainable. Case of 250 pips, \$5.00; case of 500 pips, \$9.50; case of 1000 pips, \$18.00.

Hamamelis vernalis

HAMAMELIS VERNALIS
A New American Witch-Hazel.

This new and most interesting American shrub is now flowering for the first time under cultivation in the Arnold Arboretum. The first blossoms were open on January 15th, the earliness of the date of flowering being probably due to the phenomenally mild winter experienced to date in New England. The plants are only about 2½ ft. tall, and were received in October, 1908, and cannot be more than six years old. They are quite bushy and the two-year-old wood is densely covered with flowers which have a delicate fragrance and are rather smaller than those of the other species. The inside of the calyx is wine-colored; the narrow, strap-shaped petals are erect-spreading, somewhat undulate with the apex inflexed, usually yellow, often golden, and in some flowers stained with wine color. The leaves resemble those of the common American Witch-Hazel, except that they are more hairy and often somewhat glaucous on the under surface.

This new Witch Hazel is native of Southern Missouri, Arkansas and Louisiana, where, Prof. Sargent tells us, "it grows in the gravelly beds and margins of streams, forming great thickets. The habit is stoloniferous, and the plants rarely exceed six feet in height." That a *Hamamelis* occurs in these regions has been known since 1845, when Engelmann collected specimens. It has been frequently collected since that date, but it was not until 1911 that its distinctive characters were recognized and it was described and figured as a new species by Prof. Sargent in his *Trees and Shrubs II*, part 3, p. 137, tab. 156. It is distinguished from the common *H. virginiana*, not only in the season of flowering but also by the habit, more persistently hairy branches and leaves, different fragrance of the flowers and the wine-colored inner surface of the calyx. In this latter character it

agrees with the Asiatic species and is in fact another link between the floras of the two continents.

Hamamelis vernalis is perfectly hardy in the Arnold Arboretum and has the distinction of being the first woody plant of the year to put forth flowers, preceding its Japanese relatives in the matter by fully ten days. The dwarf habit, early and free-flowering qualities and the pleasing fragrance of the blossoms unite in making this newcomer a welcome and valuable addition to our list of hardy shrubs.

This new *Hamamelis* and the species from Japan and China. (*H. japonica*, *H. japonica* var. *arborea*, and *H. mollis*) deserve to be much more widely known and extensively cultivated. They are the first of shrubs to put forth flowers, free flowering, perfectly hardy, and excellent subjects not only for planting in parks and gardens generally, but especially for town gardens where flowers produced in January, February and March are particularly welcome.

F. H. Wilson.

Massachusetts Boosters

Well! well! It is high time. I was glad to see the new move spoken of in your last. Massachusetts has every advantage over California, which I look upon as a humbug land. They have a fine climate, but who can live on climate? It has been boosted beyond reason. It is the most pitiful and pathetic land I know of—millions of acres begging for water and can't get it. The water supply is exhausted. Last spring hundreds of thousands of oranges lay on the ground knocked off by frosts. Apples are worth more than oranges. Grand old Massachusetts is an apple state. You get as good land there for \$100 per acre as you pay one or two thousand for in California. The good Lord attends to the irrigation and don't charge a cent. Nebraska orchardists are netting, clear of expense, \$185 per acre—not a bad showing. They don't have to use smudge pots; they can sleep nights; so with Massachusetts. Get up a boom and you don't have to lie about it, as the 4000 real estate agents of Los Angeles are inclined to do.

C. S. Harris.

York, Neb.

Our Cover Illustration

We present as a cover illustration this week a view of the interior of the *Nepenthes* house at the Royal Gardens, Kew, England. The genus *Nepenthes* comprises upwards of fifty species, hybrids and varieties, most of which are included in the Kew collection which is the most complete in existence and the picture shows how successfully these interesting plants are cultivated there.

The *Nepenthes* are all grown in baskets suspended from the rafters and on the ground beneath them is a miscellaneous collection of stove plants. Directly behind the well-known *Dracæna Godseffiana* and *pan-danus* which appear in the foreground may be seen two plants of the curious "cat's face flower" (*Tacca cristata*). The common name of this plant refers to its fancied resemblance when in bloom to the face of the domestic cat.

Red Spider versus Damping Down

'Lay on, Macduff,
And damn'd be him that first cries 'Hold, enough.'"
Shakespeare.

The expected has happened. Since the publication of my article on Red Spider in *HORTICULTURE* of Jan. 4th each successive copy has been scanned with trepidation, fearing the coming onslaught. And when the storm broke it came from an unexpected quarter; my esteemed colleague George H. Penson has fallen foul of my views. However, I trust that the knowledge that I have entered the lists with such a doughty opponent will so sharpen my wits as to enable me to refute his (for once), fallacious reasoning.

It is a grand thing in a controversy if you can take your opponent's argument and turn it against himself, "For 'tis the sport to have the enginer hoist with his own petar." Let us carefully examine the instance cited by Mr. Penson to prove that damping down is efficacious in preventing the attack of red spider upon plants. Here it is: In a house where more than half the floor space was open water tanks and where (owing to evaporation from these tanks and possibly frequent damping of walks, etc.) the atmosphere was probably always laden with moisture there was no spider for some months until some was imported into the house on plants of *Clerodendron fallax*, and before these had finished flowering the spider had spread to all the other plants in the house. Mr. Penson here generously concedes that moisture will not *kill* spider, but he asserts in a most positive manner that it will prevent it. His theory appears to be, that, providing there is *no* spider in a given house, then, moisture will prevent its appearance there unless carried in on a plant or otherwise imported. I will go farther than that for I will positively state that if a house of plants be absolutely free from spider or spiders' eggs, and be kept as dry as the sands of the Sahara Desert there will never be one single spider in that house, providing none are imported from without; and every man who does not believe in spontaneous generation of life must support this statement. This being conceded, let us ask what possible effect moisture can have upon red spider. Mr. Penson says moisture will not kill it. He cannot believe it prevents its breeding, for did they not breed so rapidly in his house which was always moist that they covered everything? It certainly doesn't seem to produce any disease amongst them, for did they not thrive admirably? Nor can it be that the environment was in anyway objectionable because they multiplied and covered every plant. Moisture then appears only to have any effect on spider when the spider is not present, a sort of distant treatment. Why did they neglect to damp the house where the *Clerodendrons* were previously growing? or was this a strain of spider which had become immune to moisture? Mr. Penson asks why the spider always starts or makes its first appearance on a peach tree right where the foliage touches the pipes or hangs over a main and further says "Take a bench of beans, the driest end is sure to secure the lead in the spider race." The answer is—Spider usually secures a start in a house that has reasonably good care, in those spots which are the most inaccessible to the hose or syringe and where there is sufficient heat for its rapid propagation; and these conditions are generally found at the back of a bench and near the heating pipe or in a vinery or peach house at the bottom of the tree or vine

and near the heating pipes. As heated air has a greater capacity for moisture, the chances are that there is a greater amount of atmospheric moisture in these very spots than in the other parts of the house. Pardon the reiteration, but heat favoring rapid propagation, and being out of convenient reach of water applied with force, and with that correct upper cut, is the cause of spider making its appearance in quantity, in those places mentioned by Mr. Penson.

Educating a Gardener

Under the above heading Vernon T. Sherwood attacks me for saying things in my article on "Neglected Opportunities" which I never said. He implies that I said that it was necessary for a gardener to go to college, but while I think it would be a splendid thing if every gardener could take a college course as a part of his training, I merely urged that the young gardener take advantage of every opportunity of improving his knowledge, stating what I thought were some good reasons for doing so. It is no "obsession or fetic" that the man drawing the highest salary that I know of, in our profession, is a college graduate, and there are a lot more holding some of the most desirable positions, to the credit of themselves and the satisfaction of their employers. Quoting Mr. Sherwood he says:—"To my mind the place to learn estate management is on an estate, and a moment's reflection will so obviously convince anyone that this not only applies to our profession, but also to rail-roading, engineering, or any of the other higher callings." If Mr. Sherwood instead of taking *one* moment's reflection will "make it two," he will probably arrive at the conclusion that he is dead wrong, and will be convinced that the engineer who learns his profession by working for the local city engineer has not one chance in ten thousand with a graduate of, say the Massachusetts Institute of Technology, nor the doctor who acquires his knowledge (were it possible) by working under some other doctor, have any chance with a graduate of Johns Hopkins University, or any other good medical college and, without citing more instances, the same thing holds good nearly everywhere. And Mr. Sherwood might have taken *two* moments reflection on the man (or is it super-man) who can tell whether a soil is good or otherwise by "feel and look;" if he had he might not have had quite so fine a contempt for the man who gives or gets the analysis of a soil. I do not blame him a bit for his admiration of the man who can tell the good from the bad soils by "feel and look." Were it my good fortune to meet such a man my admiration would be profound, yea! almost worship. However, it strikes me that the touch which could discern a lack of lime in a sample of soil would be of a most delicate order, and the X-ray eye that would discover a deficiency of nitrogen in soil would be a valuable accomplishment to its possessor. "Look and touch" can only be a guide to a soil's physical condition and is useless to determine its chemical constituents. For that, we must turn to the man with a knowledge of chemistry. And he is mostly a college graduate.

Edwin Jenkins

Lenox, Mass.

A CORRECTION—In Edwin Jenkins' article on "Greenhouse Heating," in our issue of January 25, the word "maximum" was used instead of "optimum," through no fault of Mr. Jenkins'. The "axiom" should read as follows:

Optimum temperatures should be maintained.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Mildew

With the prevailing warm, rainy weather, it requires great skill and patience on the part of the grower to keep this dreaded disease out of the greenhouses. Although it can easily be killed, the plants themselves will be a long time recovering from the attack and should this happen to be a bad one it is doubtful whether the plants would recover at all, but will continue to grow on very feebly. Keep after the ventilators. See that you do not water on rainy days, unless it is absolutely necessary. Then be careful not to splash the water all over the house. It is also important not to wet the bottom foliage any more than is necessary. All these little things will do wonders in preventing mildew if they are heeded and a little care used. Again we take the liberty to endorse at least a pipe or two of steam in each house. We prefer steam heated houses, as we find it much easier to regulate the heat. It is an easy matter to tell the fireman to keep on so many pounds of steam, and then with a good boiler and draught it is simple to keep a certain amount of steam all the time.

A very little sulphur applied to the steam pipe here and there will also help to keep this enemy out. Only be careful not to use too much of it, as sulphur fumes are a great enemy to plant life. Usually a little sulphur applied about every twenty feet on the steam pipe (or on two of them, should the house be over twenty feet wide,) will be sufficient. You can watch the results and should sulphur applied in this way seem to be too weak you can easily increase the quantity, doing so a little at a time so as to make sure not to have the fumes too strong.

The Young Stock

This weather, to say the least, is certainly not ideal for propagating purposes. It is very difficult to keep the necessary temperature in the sand without raising the temperature above too high. With the rain and fog it is not too good for the plants to have the ventilators open too much. It is best to have the ventilators in the propagating house cheese-clothed; this will help to break up the air currents a little. It is also a good plan to stretch a little cheese-cloth across the bench every here and there. Not over the cuttings, but up and down from the roof of the house to the level of the bench.

Potting

Some of the earlier-made cuttings will soon be ready for the pots. Be sure these are clean, and well crocked as the young cuttings will want good drainage to make any headway in the first pots. It is poor policy to insure good drainage, and then worry yourself half to death about the plants not drying out properly. Of course black rot is likely to set in and once it does the losses will be heavy. It does not take very many cuttings to lose a day's work and we all must realize that every little waste means some profit gone. After potting the cuttings shade heavily—say two thicknesses of paper, the first few days. After a while the shading can be put on later in the morning and taken off earlier in the afternoon until finally it can be left off altogether. This should not be within at least ten or twelve days.

Do not shade the cuttings on cloudy or rainy days, as this would not do them any good and would be likely to do them harm.

The Soil

Be sure that the soil is not too wet, and that it is finely screened and free from all lumps. A little bone-meal can be added, but not too much, as the object of the first potting should be to have the plant establish a nice root system, after which it can be shifted to a larger pot with more and richer soil. Then it can grow, as it certainly must if the surrounding conditions are favorable. It is best to use only fine old compost for the soil, avoiding all newly-made soil which is bound to have a little fresh manure in it. Use only well-decayed manure if you have to mix your soil just now. A least bit of soot can be added without fear of harm. Do not add too much of it though, or you may soon be wishing you had not.

Benches With Deep Soil

Right now during this cloudy weather is the time that will prove which is best for the plants—the deep soil or the shallow. We are sure that those who took our advice last summer and planted all their stock in shallow soil will be well pleased now for their plants will dry out much better than if they had planted in deep soil. We always claim that more soil can always be added without very much trouble, should it be necessary, but usually when manure is always applied when it is needed no more soil will be required than that which was put into the benches originally.

Roses on Long Island

No doubt if some one had told me that roses, old plants, planted on the 16th of December would grow to perfection, I would have mentioned something about Missouri, or "show me." Yet that is the case. These roses—Killarneys and Radiance—have twenty-inch stems with well formed buds. Melody does very well free from mildew. We think Long Island is the coming greenhouse country and we hope to see other flowers besides carnations, growing in quantities. All roses do exceedingly well outside, and one time I had pleasure to see some extra fine Beauties, right near the sea shore too.

These were in greenhouses, however, where it was claimed roses positively would not grow. Here at least "The Man Behind" got the credit.

Fish Scrap Fertilizer

We do not know as it is anything new, but where it can be had it is certainly worth trying. There are several different brands, and we would not advise anyone to apply much of it to the benches without first experimenting and carefully noting results. It is best to know what you are about before using any kind of preparation. We have used it in the greenhouses with good results, applying it the same as we would apply bone-meal, and then watering it into the benches. The only objection to using it is the smell all over the place. But this is nothing if it brings results, as the ventilators can be used a little more freely and it soon goes away.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Propagating Grape Vines

No time is better suited for propagating grape vines than the present. They have been rooted in January but it was not advantageous in any way. While rooting is comparatively easy at all times, February and March seem to inspire a natural instinct to root and grow. The grape vine has an ambition to be self-supporting in every branch, inasmuch as whenever the least irregularity occurs from the main feeding source they at once set out to make roots from all "quarters." These aerial or adventitious roots as they are known, are formed on the hard wood on any portion of the main stem or spurs. If these were left undisturbed, under natural conditions they would in time reach the soil and assist in supporting the vine. This is only an instance of how the vine seems ever ready to make roots. When growing under glass any quantity of these should be regarded as a warning of something wrong down below, for sure it is a bad sign.

Thinking of the vine in a wild state as being not strong enough to support itself individually as the stronger trees do, brings one's mind to picture portions rent from their accustomed place,—once supported by an arm of strength or gently swaying branch, now dashed to the ground, perhaps the greater portion of life's sustenance cut away. What do we find under such circumstances of partial support? A gradual decay? No—more roots. At the point where the vine comes in contact with the soil there it will root, which in some degree is equivalent to layering. Notice, both modes of natural root production are from the hard wood. It is not an impossibility to root cuttings from the young growths but the percentage would be very small indeed.

Vines can be propagated from seeds; new varieties are raised in this way but otherwise seeds are not used, the usual methods adopted being by cuttings, layers or eyes. Cuttings is the method generally used for propagating outside varieties of grape vines in quantity. Shoots are taken at pruning time about a foot long with a "heel"—that is a portion of the preceding year's wood at the base—and inserted in a bed prepared for them, allowing the two top eyes only to grow.

Layering in a crude way has been mentioned but it is very useful in propagating our own vines and also hardy varieties. The latter are easily brought into contact with the soil, but under glass it is not so easy. Probably a growth would have to be grown expressly for it or in the case of an ordinary lateral a pot or pan can be suspended underneath and kept properly moist. Cut away a little of the underneath wood, preferably near a joint and peg the growth down into the soil. When rooted gradually sever it from the parent.

The usual method adopted for propagating vines under glass is from "eyes" taken from last season's laterals. Select good plump eyes on well ripened wood. Cut them away singly leaving three-fourths of an inch of wood on each side. Make this cut obliquely from the underneath side of the eye to the top; this gives more rooting surface than a right-angled cut and is enough in itself to root from, but a slight abrasion of the bark underneath the eye will give additional rooting surface. Peg the

eyes down firmly into 4-inch pots filled with nice open compost. Plunge the pots to the rim in a bottom heat of 70 degrees, keeping the top temperature 55 to 60. Water the eyes in and spray them over occasionally until growth commences. Eyes should root in three weeks if they are right, when they must be taken out of the bottom heat. Give them a little air as the first leaf expands, increasing it as growth increases. When the 4s are filled out with roots pot them on into 6s.

Complete Winter Work

Finish up all top dressing, etc., in the late houses without delay. Roots will soon be moving in the latest houses. In addition to this the next eight or ten weeks will be crowded with work of all descriptions which will not wait, so get all in hand that you can by doing up all that remains of the winter work right away.

Disbudding Peach and Nectarine Trees Growing in Pots

Peach and nectarine trees growing in pots or tubs having a bush or pyramid shape require quite as much attention to disbudding as their companions trained on the trellis. Little tying is done to these trees to make them shapely, so it devolves on the selection of suitable buds so situated that when growth finishes at the end of the year the tree will be evenly balanced. The advantage of this will be readily seen, not only in handling and staging but the fruit will be more uniform in shape and size. A one-sided tree cannot be turned around after being once located with others. It is a big help to the fruit to turn the trees around occasionally so that they all get the same amount of sun and air. Keep the center of the tree open always, leaving only enough buds so that all the ensuing growths get full benefit from the light. Let those that remain on the outside have a definite part in keeping the tree in good shape. Encourage growths near the base as these are frequently being broken. The trees should be gone over at least three times, removing a portion of the superfluous growths each time.

Ventilation

The present and the two succeeding months are very erratic, making airing a matter of great importance. All kinds of weather are liable to be experienced and it takes a wide-awake eye to detect the sudden changes and be ready for them before they are upon us. See that the houses do not run up in a morning before a little air is put on. Sudden changes in the atmosphere outside and the direction of the wind must be noted at once and the houses shifted over, reduced or closed down as the temperature calls for. After a spell of dull weather the first day's bright sunshine will often "try" the tender foliage of a vine or peach—particularly the former, in which case do not rush a whole lot of air on; the probability is that this would distress the weak foliage even more. Rather strike the happy medium and keep the floor moist. Avoid cold draughts or mildew will be your companion for sure.

Stop the hot water boilers with the herald of a bright day, unless it is freezing sharp. It takes time for hot water pipes to cool, and if the fire is kept going right up to the time they can be dispensed with, they will remain

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Sweet Peas

Sweet peas will now welcome some liquid manure as a stimulant—either cow or sheep manure; a bushel of the former or a peck and half of the latter to about 50 gallons of water. Start by using once a week and in two or three weeks you can give them some twice a week as the roots will become more active. The beds can also have a light mulch of either cow or sheep manure mixed with an equal amount of soil and spread on about half an inch thick of the cow manure and about half that quantity when using sheep manure, followed with another application in about three or four weeks and so on. Keep the soil at an uniform degree of moisture at the roots and preserve a genial moisture in the atmosphere, but always give plenty of ventilation whenever possible without causing cold draughts. Keep them as near 50 degrees at night as you can, with a rise of about 15 degrees during bright days.

Cinerarias

To bring these in for Easter they will likely want a temperature of from 48 to 50 degrees at night with about 70 degrees on all bright days. During dark or dull weather let them run up to 55 degrees. Always remember never to force these plants as then they will prove a sure failure. Give them a bench well up to the glass to keep them from drawing. They should be gone over every week or ten days and spaced so they will have plenty of room. Cinerarias are air-loving plants so give them ventilation at every opportunity as the weather will permit. Keep a watch as to watering as the roots should never be allowed to become dry. Give them manure water once or twice a week and keep it up until the flower trusses begin to show color, which will improve the plants both in substance and color of foliage and bloom. To keep them free of aphids they should have frequent but mild fumigation.

Ficus

Now is a good time to repot any of these plants that may need it. When repotting these plants pick away as much of the old soil as you can get without injury to the roots. For a suitable compost mix fibrous loam three parts, well rotten cow manure one part, with a sprinkle of bone meal, and pot them firm. It is well to think of increasing stock now as the right conditions of heat and moisture can be maintained. A very good way to propagate ficus is to insert two or three joints in a two-inch pot of sand and loam mixed in equal parts and tie up the leaves so as to stand them close together.

Mr. Farrell's next notes will be on the following: Chrysanthemums; Easter Lilies; Palms; Orchids; Seeds to Be Sown; Secure Easter Stock Now.

hot for some hours longer. Stop the fires early and allow the pipes to cool off gradually as the sun increases, which is far better than stopping the pipes right off in any one or several of the houses. Likewise open them up at once when a storm is signalled.

Globe Artichokes

Make provision for filling any "gaps" that may occur through the winter months by sowing now. At the time of writing we are experiencing a summer-like weather

These pots can be plunged in a warm propagating bed which can be covered with a frame to keep a humid atmosphere, and with a bottom heat of from 80 to 85 degrees they will root very nicely. They can also be mossed and by keeping the plants rather dry at the roots and the top where the moss is constantly moist, they will make roots into the moss in about five or six weeks, when they can be cut off and potted up.

Gardenias

Gardenias that were rooted in December and early January will make the best stock for planting out during May and June. These plants will need plenty of attention right along as they never should be allowed to receive a check in any part of their growth. Keep well up to the glass where the temperature runs from 65 to 68 degrees at night and in bright weather they can run up to 80 degrees. Ventilate at every possible chance, but in such a way as to avoid chilling draughts. The best compost for this young stock is a very turfy loam that has the fibrous parts broken into small pieces, with one-fourth of well rotten cow manure and some sand. When potting see that you pot each and every plant firm. Keep the atmosphere moist by damping down the walk two or three times a day and give them a good syringing on all bright days.

Lobelia Kathleen Mallard

This lobelia is very serviceable and the most reliable of all the lobelias to grow. Where you have stock plants give them every care and attention from this out. Place them well up to the glass where they can have plenty of light and they will soon respond. With about 50 degrees at night they will soon give you plenty of fine cuttings which will propagate very rapidly. The best way is to grow them on in flats as they spread over the soil emitting roots from nearly every shoot, and can be divided up and potted, making fine stock by next May. If you have none of this lobelia you should procure some immediately as you will find them very useful.

Pansies

Pansies from seed sown about the first of December in flats and kept in a cool house will now be ready to be transplanted into other flats and grown on until about the first of March when they can be transplanted again and can be planted out into frames about the middle of April where they will give a good account of themselves. Where you have failed to sow there is plenty of time yet to make a sowing which will produce nice plants by late spring.

which, I am afraid, will be disastrous to globe artichokes and subjects of a similar constitution. There is time yet to see the thermometer go away below zero. What chance have sensitive roots against such conditions? It is a well-known fact that bees winter much better through a good cold winter than a mild one. Many plants are the same way. Give the seedlings a temperature of 55 F. If potted on into sixes good stock will be ready for planting out and in some localities small heads can be gathered from these before fall.

that a master hand is guiding all the manoeuvres and if things don't go like well-oiled clock-work next August it will not be the fault of that tireless, broad-gauge hustler, S. A. F. Vice-President Wirth. His abilities are of a high executive order as has been well-proven on many former occasions when they were called into action. He works himself and makes a most inspiring leader.

Useful discussion

Our reading columns begin to give evidence that when we promised our readers some spirited handling of some very live topics as a result of the accession of Mr. Jenkins to our staff of regular writers we knew whereof we spoke. Discussion by observant and experienced men on matters of fundamental concern to every grower of plants for any purpose is a kind of literature which commands attention and, in the long run, brings out facts of incalculable value to the profession and the trade. So we welcome these communications from the bright men who have convictions and are not afraid to give expression to them. Controversy for the sake of controversy we have no room for but on questions of methods and pertinent practical philosophy our columns are open to all those who are equipped with a practical knowledge of what they are talking about.

A summary January

The weather is a weather-beaten subject. Excuse us for dragging it forth. But with dandelion blossoms spangling green lawns on the anniversary of Burns' frigid and blustering birthday we may perhaps be pardoned for trespassing this once. Mr. Wilson gives us in this issue the first news and the first description of the first bloomer of the year among our hardy shrubs—blooming now for the first time in cultivation at the Arnold Arboretum. If the present salubrious temperatures should continue much longer, there will be other precocious bloomings which will mean serious consequences to the flower garden and the orchard. We have been thinking that if the Carnation Society had contemplated a January convention as of yore, this year, there would have been no dandelions or budding shrubs. As a breeder of zero blizzards the Carnation Convention was a howling success every time!

Growing and gravitating

Whenever undertaking to comment upon or criticise one or another of the various movements now agitating the florist, nursery, seed or other departments of horticultural activity we should all keep it in mind to be very careful in forming opinions and avoid the mistake of basing our estimates of these things in the abstract rather than upon their relationship to the general process of horticultural development in this country. Clubs, societies, literature, publicity campaigns, trade expedients, experiments and theories—all are but factors, small or great, contributing to the gradual development of American horticulture. It is only within a few years that we have come to fully realize our interdependence and the great advantages of cohesion and unity. Back of all our detached, sometimes narrow, and often conflicting or ill-advised efforts, each aiming for some particular ideal, a vital force is busy and as these endeavors gradually merge together we shall eventually see our American horticulture reach a plane of highest honor among the world's industries. In the meantime let us practice patience and forbearance and give everyone a chance to be heard.

It is wise and fitting that we pause for a moment from our zeal concerning the approaching National Flower Show and take notice of that other more distant but also important S. A. F. event—the Minneapolis Convention. Detailed information regarding the advance work being done locally, in addition to the general story which we present in this issue, shows

Out of the Ginger Jar.

The editor of this paper evidently thinks himself a very superior person. He suppresses all the finest thoughts we send in to him. Why? We don't know. Only, we gather from his editorials, that he thinks his cue is:—the benediction:—"Be quiet, my children; God bless you!" But there's nothing in that.

The Jenkins lad who writes for this paper has the style about him, all right! We'd like to meet him. We guess we'd never get to bed. We'd convoy each other to the top of the hill—and then back again—half a dozen times! before the moon sunk behind Ben Lomond. But, as a starter to our better acquaintance, let me ask him what he knows about "tree vaccination." Is that proposition an "axiom" or "a fallacy?" And who can tell us where is the "Royal Nursery of England?" There is a party round here near Philadelphia who has been calling Prof. Surface in question and who writes to the daily papers saying that vaccination for trees is all right and signs himself a graduate of "The Royal Nursery of England." Have heard of Kew and Chiswick, but the R. N. E.—let's hear about that. Is there any such institution of learning?

Definition of a diplomat: "A man who belongs to a royal family and when he's wrong he's right." This is from Tommy of the Bellevue-Stratford. Tommy meets all the multi-millionaires and takes care of their creature comforts—and gathers wisdom, incidentally, as well as tips. So he must be right even if he is wrong. Ed. Lonsdale's idea of a diplomat, as I remember it, was "the lad who could be on both sides of the fence at once." Gurney Hill's idea of a diplomat would be, I think: "I'm your friend; now tell me all about it." Modest John Burton's idea of a diplomat would be, I fancy: "Well now, I don't know anything about that proposition; of course you know more about it than I do." P. Welch's idea of a diplomat would probably be: "My dear sir! You've got to consult the authorities on a thing like that; this thing is not as simple as it looks!" But wouldn't it make an interesting chapter if all the moguls from Pat O'Mara down were to honestly tell us their definition of a diplomat. I'm going to offer a valuable prize for the man whose definition I think is best and I buy the dinner to the winner. In case any one may doubt the genuineness of this offer, I wish to announce now, that I think Tommy gets it. But we'll see.

GEORGE C. WATSON.

BRITISH HORTICULTURE.

The National Rose Society.

A satisfactory record of progress was presented at the annual meeting of the National Rose Society in London. The total number of members is 5504, this being a net increase of 379 over last year, and of 3020 since 1907. The financial position is equally encouraging. An excellent programme has been arranged for 1913. For the first time a spring show is to be held in London on May 1st. This will enable the members to have an opportunity of

CATTLEYA MOSSIAE ALFRED DIMMOCK.

Our illustration depicts a very charming variety of the old favorite *C. Mossiae*. The flowers are large and of remarkable texture and having that desirable attribute of a good cattleya—a broad expanded and distinctively colored lip. The variety is said to have originated from a cross of *C. aurea* with *C. Lawrenceana* at the orchid conservatories of Clement Moore, Hackensack, N. J. The flower shows the influence of *C. Lawrenceana* in the

form and color of the labellum; the sepals and petals are golden yellow, with a beautiful flushing of crimson-purple. As a hybrid, this cattleya is extremely interesting and valuable from the fact that under normal conditions the two parents flower at widely different periods of the year—one being a spring bloomer and the other an autumn bloomer. The group of plants shown in the picture was exhibited by Sir Geo. Holford at the International Horticultural Exhibition.

seeing the best type of roses for forcing. C. E. Shea was elected president for two years and E. Mawley was again installed as honorary secretary, his services being fittingly recognized.

Some Other Societies.

The Perpetual Flowering Carnation Society has held its annual meeting at which the following officers were elected: President, Lord Howard de Walden; chairman of committee, J. S. Brunton; vice-chairman, W. E. Wallace; treasurer, L. J. Cook; secretary, T. A. Weston. Arrangements are being made for a spring show to be held in Leamington, Warwickshire.

The members of the National Hardy Plant Society, at their annual meeting, decided to co-operate in a primula conference to be held in April. A show will be held by the society in June.

G. Gordon has been elected president, J. Green, treasurer, and J. B. Riding, secretary, of the National Dahlia Society. W. H. ADSETT.

Some advertisements are as valuable as the best reading matter, full of sound practical advice. Read "Why Failures Result" on page 168, and, incidentally, put the advice into practice and see how it proves.

A BEDDING PLANT QUERY.

Will some of your readers please inform me as to whether or not there is any definite rule or way to ascertain the number of plants required to fill flower beds of given sizes and shapes such as stars, oval, diamond-shaped beds, etc. SUBSCRIBER.

There can be no hard and fast rule as to the number of plants in a bed as circumstances of size, location, soil, etc., all count. A fair spacing for geraniums would be from 9 to 12 inches apart each way; Madame Salleroi would be set closer, of course. Cannas, on the other hand, should have, at least, 15 to 18 inches space each way and the larger growing ones will require more. Salvias should have 15 inches, coleus 9 inches, French marigolds 9 inches, zinnias and African marigolds 12 inches, *Centaurea candidissima* and *Cineraria maritima* 9 to 10 inches, *alternantheras*, golden feather lobelias and other small edging material about 4 inches and *heliotrope* 10 or 12 inches according to whether soil is light or heavy. The foregoing are simply suggestive. A knowledge of the probable spread of a plant during a season's growth will enable the planter to use proper judgment.

CLUBS AND SOCIETIES

AMERICAN ASSOCIATION OF NURSERYMEN.

Nurserymen are beginning to inquire regarding the arrangements for the convention of this Association, which is to be held in Portland, Ore., June 18th, 19th and 20th next.

The selection of date was left to the Executive Committee by the last convention, and the National Nurseryman says they have "exercised good judgment in deciding upon those dates, as that will be immediately following the great rose festival" to be held in Portland. Then, too, there will be a large gathering of Pacific Coast nurserymen, which will afford a splendid opportunity for a genuine "getting together" of the members of the craft.

J. B. Pilkington, the generalissimo of arrangements, and myself have been in frequent communication for the past few weeks and matters are shaping nicely, thanks to the popularity and enthusiasm of the general. In all probability the magnificent new Hotel Oregon will be chosen as headquarters. It possesses a palatial auditorium for meetings and ample space for exhibits, both of which will be furnished by the management without expense. Hotel rates will be reasonable, varying from \$1.50 to \$3.00, one or two persons, without bath; with bath, from \$2.00 to \$6.00; numerous elegant suites composed of private parlor, private dining-room, and one, two or three sleeping chambers, with private bath, at rates furnished by the management on application.

The famous Oregon cherries will be ripe at the time of meeting and an ample supply of this luscious fruit will be at the disposal of members. Pilkington says, "there are two bites to an Oregon cherry," and he knows.

Members of the American Association should now decide upon their plans for attending this notable convention. It is up to all those who live east of the Rockies to assist in making the event one never to be forgotten; the Pacific Coast men may certainly be depended on to do their part to make it so.

The Trans-continental Passenger Association has published its schedule of rates and will issue summer tourist tickets from Chicago to Portland, returning by same or any other direct route, for \$75.00. The Trunk Line Passenger Association announces "special occasion fares" within its territory, and it will be possible to buy a ticket in New York City to Portland and return for \$111.30. The rate from Rochester will be \$96.30. The Trans-continental Association has been asked to include our members in the "special excursion" class, and this request has been referred to interested lines for their decision. If granted, the rate from Chicago will be \$7.50 less.

President Meehan has appointed Marsden G. Fox of Rochester, N. Y., to rally the eastern men on the subject of special cars, and that gentleman at once inaugurated a vigorous canvass, the results of which are quite gratifying up-to-date. He is hoping that members in the middle, southern and southwestern states will arrange

to connect at Chicago so that all can cross the continent together.

Members will do well to send in their membership fee early to the secretary, and those who use the Badge Book should get their copy in as soon as possible. Those who can do so now are asked to advise the secretary of their intention to go to Portland.

The secretary will be pleased to answer any questions and furnish such information as he can if members will address him 204 Granite Building, Rochester, N. Y.

JOHN HALL, Secretary.

INDIANA MEETINGS.

Indiana florists have had two meetings close together—one at Columbia City and the other at Indianapolis. A committee has been appointed to arrange for joint meetings hereafter.

The Northern Indiana Florists' Association met in regular session at the New Clugston Hotel, Columbia City, January 13. The morning was spent in visiting the greenhouses and arranging exhibits. Dinner was served at 12.30, after which the regular business session was held, President J. D. Conner, Jr., presiding. A paper was read by Christ Winterich, Defiance, O., on cyclamens and it was received with much favorable comment. There was a fine exhibition, comprising the following:

Christ Winterich, Defiance, O.—Display of cyclamens; very fine; also some five-inch primulas.

Harry White, North Manchester. Four inch cyclamens and ferns.

Wagoner Floral Co., Columbia City.—Carnations and Bride roses.

W. Frank & Son, Portland.—Killarney roses and carnations, also a white and a dark red seedling; favorable mention as coming carnations for commercial purposes.

Chicago Carnation Co., Chicago.—Vase of their new red carnation, The Herald; flowers good and stem very strong.

Johnson Floral Co., Kendallville.—Gladious bulbs and Dracena indivisa.

Wm. Terrell & Son, Bloomfield.—White Enchantress.

Mt. Gilead Pottery Co., Mt. Gilead, O.—Sample pots.

A. L. Randall Co., Chicago.—Florists' supplies.

A. A. Arnold, Chicago.—Cut flower boxes.

Simon Hunfeld, Muncie.—New mole trap which the committee pronounced "very good."

The Indiana State Florists' Association elected the following officers at their meeting January 14: W. W. Coles, Kokomo, president; John Hartje, Indianapolis, first vice-president; J. V. Vesey, Fort Wayne, second vice-president; O. E. Steinkamp, Indianapolis, secretary; H. L. Wiegand, Indianapolis, treasurer.

There was an extensive display of new carnations, including Merry-Go-Round from Stuart & Haugh, Commodore from E. G. Hill Co., St. Nicholas and Radiance from Baur & Steinkamp, Wm. Eccles from Scott Bros., The Herald from Chicago Carnation Co., a set of splendid promising seedlings under number from F. Dorner & Sons, Salmon Beauty from Traendly & Schenck; also Rose Queen sweet pea from the last named and standard varieties of carnations from several local growers.

NEBRASKA HORTICULTURAL SOCIETY.

The forty-fourth annual meeting of the Nebraska Horticultural Society has just closed. It was by far the best meeting ever held. The attendance was large and there was the greatest enthusiasm as if they met to celebrate a great victory. We have attended many annual state meetings, but never saw any where such a display of fruit as was gathered here. There were 1500 bushels on tables in boxes and barrels. The boxes were packed in the most artistic style—showing the rich fruit in the most attractive manner. In color they varied from deep green up to the darkest red of the Arkansas Black. Our growers have stolen the methods of the western packers and make their fruit as attractive as possible in boxes. The old style of packing in barrels, with a layer or two in the bottom and another on top and worthless culls in the center, has gone out, and the new style based on strict honesty has taken its place. Every layer in the box must show the same and so dealers and purchasers know what they are getting. The large collection sold readily to dealers who soon distributed them to eager purchasers. The Nebraska apple is famed for its luscious flavor, which far transcends that of the Washington or Oregon apple. The papers read were mostly on the apple. They were of high order and the discussions showed the result of years of careful experiments. Quite a number of visitors from neighboring states were present who added much to the interest of the meeting.

York, Nebr. C. S. HARRISON.

NEWPORT HORTICULTURAL SOCIETY.

A business and social meeting of this Society was held on the evening of January 28th and was well attended by the members and their families. The business session was mostly devoted to accepting offers of prizes for the show which is to be held under the auspices of the "Newport Garden Association," and this Society on June 25th and 26th. This show will be held on the grounds of "Harbor Court," the estate of Mrs. John Nicholas Brown and promises to be a very interesting event as a very attractive premium list has already been settled on and is being printed. A second addition to the schedule will be necessary for later offers of premiums.

Following the business part of the meeting Harry A. Bunyard of New York gave a very instructive lecture on the big International Flower Show which was held at London last year and which he visited. His talk was illustrated with many stereopticon views of the show, which gave a very clear idea of the high quality of the exhibits, and made an impression on some of the members that is likely to result in some worthy imitations of the London exhibits being seen at the coming Newport show. At the close of the lecture Mr. Bunyard was given a rising vote of thanks; then songs and refreshments kept all in good humor till a late hour.

J. R.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Officers—President, J. K. M. L. Farquhar, Boston, Mass.; vice-president, Theodore Wirth, Minneapolis, Minn.; secretary, John Young, 54 W. 28th St., New York; treasurer, W. F. Kasting, Buffalo, N. Y. Next convention, Minneapolis, Minn., Aug. 19-22, 1913.

For Full Information, Schedules, Space for Trade Exhibition, etc., write to John Young, Secretary and Manager for Trade Exhibition, 54 West 28th Street, New York City.

President Farquhar has appointed on the Tariff and Legislative Committee: Patrick Welch, Boston, Mass.; Patrick O'Mara, New York City; James McHutchison, New York City; J. Charles McCullough, Cincinnati, O.; Philip Breitmeyer, Detroit, Mich.; Wm. F. Gude, Washington, D. C.

JOHN YOUNG, Secretary.

MINNEAPOLIS CONVENTION PREPARATIONS.

Local affairs of the Society of American Florists and Ornamental Horticulturists' convention to be held in August next, this city, are to be conducted under the name of the Convention Association of Minneapolis, acting under the auspices of the Minneapolis Florists' Club and The Minnesota State Florists' Association.

A full list of committees has been appointed and pamphlet of general plans adopted by the local Executive Committee. All arrangements are made that can be done until the Executive Board of the Society of American Florists and Ornamental Horticulturists are here next month. After their final actions other matters will be taken in hand.

It is the plan of the trade here to make this convention one that will go down in the annals of the Society of American Florists and Ornamental Horticulturists' conventions, as one beneficial to the exhibitor, overcoming the financial burden on the local trade and entertaining the visiting trade in a creditable way.

Mr. Theodore Wirth, chairman of the local Executive Committee, and vice-president of the Society of American Florists and Ornamental Horticulturists has been working along these lines that will give all concerned that which the convention was intended for, "Advancement of the trade," without undo expenditure of money.

A hearty welcome is extended to the trade to be sure and make arrangements early so that presence will be seen with us at this twenty-ninth annual convention of the Society of American Florists and Ornamental Horticulturists.

The local Executive Committee is composed of Theodore Wirth, chairman; W. D. Desmond, Hugh Will, C. N. Ruedlinger and C. F. Rice, secre-

NO merchant carries last year styles, and you would not care for old styles; therefore, your customers demand new varieties of Carnations of the "Better Kind," and it is up to you to furnish them with up-to-date novelties such as our New Scarlet Carnation

THE HERALD

Besides, this is a money proposition: **The Herald** will produce at least one-third more blooms than any other scarlet; early, free and continuous bloomer; stem long and always stiff; flowers large, full and of a clear even shade of scarlet; calyx absolutely non-bursting, making it the highest type of a commercial carnation and one of greatest value to you. All cuttings strong and well rooted.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The following committees for 1913 have been appointed by President Kennedy: Exhibits, William Sim (chairman), C. Holbrow, Wm. Patterson, T. H. Westwood, H. M. Robinson, Alex. McKay, Eber Holmes, John Campbell, W. O. Nickerson, A. K. Rogers, Joshua Lawsen, Chas. Sander, K. Finlayson, W. H. Elliott, J. Van Leuwen, A. P. Calder, Sr., Henry Penn, Geo. M. Anderson and Donald McKenzie; Entertainment, P. J. Turley (chairman), John Reid, J. W. Hamer, G. W. Butterworth, A. G. Sawyer, Geo. H. Noyes, Peter McManus, J. M. Brickley, Frank Murray, W. E. Fischer, W. A. Hastings.

February 18 will be "Carnation Night" at the club, with short papers by special noted experts. Numerous exhibits of novelties and standard varieties will be staged. It will also be "Application Night" and a big addition of new members is promised. President Kennedy will make an address which will contain many new suggestions. The National Flower Show and other matters will also come up for discussion. W. N. CRAIG, Sec.

HORTICULTURAL SOCIETY OF NEW YORK.

The fall exhibition of this society will be held from October 31st to November 4th, inclusive, at the American Museum of Natural History. The announcement is made thus early so that other societies may avoid, as far as possible, conflicting with this date.

A special feature of this exhibition will be a silver cup, valued at \$100.00, offered by the Society for twelve vases of chrysanthemums, in twelve varieties, three blooms of each, stems 18 inches long. It is expected that this will result in keen competition. Announcement is made at this early date so that ample time may be given for preparation. The exhibition committee is now at work on a schedule which will be issued early in the spring. GEORGE V. NASH, Sec.

The Syracuse Rose Society has elected a delegation of six members to attend the meeting of the Federation of Florists' Clubs which is to be held at Ithaca, New York, on Feb. 12th.

The Western Dahlia & Gladiolus Association will hold its annual meeting and bulb show in Chicago on February 7 and 8, at 66 E. Randolph St. The program includes a number of interesting essays.

The New Bedford (Mass.) Horticultural Society will hold a banquet in the Parker House on Thursday evening, Feb. 6. The speakers will be John K. M. L. Farquhar, president of the Massachusetts Horticultural Society, and David F. Roy of Marion.

President E. G. Hill of the Florists' Hall Association has appointed Mr. J. F. Ammann of Edwardsville, Ill., vice-president of the Florists' Hall Association, to fill the unexpired term caused by the death of Mr. John T. Temple.

The schedule of prizes for the exhibi-

Why Failures Result

The following is an abstract from a communication received:

"I would like you to advise me how much Aphine to use. . . . The reason I make this inquiry of you direct is, I used Aphine in my house (for green aphids) in a mixture of one teaspoonful to each quart of water without success. . . . This is the way Aphine was used by partly giving me information. . . ."*
(*DIRECTIONS.—Six teaspoonful.)

Had the inquirer followed directions, instead of accepting advice of the friend, his results would have been different.

In this instance Aphine was not condemned, but information sought of the manufacturer and advice given in reply—carefully follow directions—then your results will be satisfactory.

How many, failing to get satisfactory results from a product after using according to some one's suggestions not following directions, have condemned that product; whereas, investigation may have turned failure into success for you?

"THE WISE MAN SEEKETH KNOWLEDGE"

For full information see advertisement, page 168.

Special prices on quantity to commercial growers.

bition of Forced Gladiolus Blooms to be held in connection with the National Flower Show of the Society of American Florists and Ornamental Horticulturists at New York has been issued by the American Gladiolus Society. Copies can be had on application to the secretary, L. Merton Gage, South Natick, Mass. Gladiolus Day will be April 8.

Special prizes from members of the Newport summer colony will be a feature of the joint flower show of the Newport Horticultural Society and the Garden Association at Newport in June.

The Horticultural Society is made up for the most part of gardeners of the summer residents, while the Garden Association is an exclusive summer colony organization, inaugurated last year for the purpose of urging the beautifying of the summer estates.

Those that have already offered prizes are Mrs. Hamilton Fish Webster, Mrs. Charles F. Hoffman, Mrs. Arnold Hague, Mrs. William Grosvenor, Mrs. George L. Rives, Mrs. I. Townsend Burden, Mrs. Stuyvesant Fish and Mrs. Frederick Pearson.

The seventh annual banquet of the Nassau County Horticultural Society was held at the Oriental Hotel, Glen Cove, N. Y., January 23. About 100 well-known men were present at the gathering, including representatives of various horticultural societies of New York State and New Jersey as well as Long Island. Arthur Herrington of Madison, N. J., acted as toastmaster and introduced the first speaker, W. H. Siebrecht, president of the New York Florists' Club. Mr. Siebrecht spoke on the National Flower Show and urged the Glen Cove Society to use its efforts to aid in the success of the exhibition. E. J. Brown, president of the Nassau County Horticultural Society, presented to John F. Johnson, who has just retired as president, a token of esteem from the Society. Mr. Johnson accepted with a few words of appreciation.

NEW GLADIOLI REGISTERED.

Public notice is hereby given that the following named varieties of gladioli have been registered by the No-

menclature Committee of the American Gladiolus Society for the originator John Lewis Childs, Flowerfield, N. Y.:

Fireflare.—Bright, soft salmon-rose, with beautifully marked and rayed center. Flowers large, perfect and of great substance. Spikes stout, compact and perfect in form.

Fireking.—Long graceful spikes showing half a dozen immense blooms open at the same time. Color intense fire scarlet. More brilliant than Brencleyensis, Cardinal, Mrs. Francis King or any other variety. It is perfectly grand, and will become the leading cut-flower variety of its color.

Mrs. F. M. Lupton.—A distinct light rose, equal to Panama or America. Large, wide-spreading flower and long perfect spike.

Rareray.—Large, wide-spreading flower of a rare bright lilac-pink, with carmine flaked throat. It is a very rare and most beautiful and desirable shade of color.

Shedown.—Soft, delicate pink flower, exquisitely marked and mottled in center. Enormous spike and large, wide-spreading flower of perfect form.

Southampton.—An immense spike of large flowers. Color a soft orange-rose, sometimes slightly flaked. White bars and light yellow throat. This is quite a distinct and most pleasing color, and a splendid flower in every way.

All of the above are of Childs' type.

Star or Wonder Blackberry

A wonder indeed! in growth, in excellence, in productiveness. Berries large and luscious, bears in clusters like a grape for two months. A single plant has yielded over two bushels in a year. Headquarters for St. Regis Everbearing, the best red Raspberry, and Caco by far the choicest of all hardy Grapes. A full assortment of Strawberries, Raspberries, Blackberries, Grapes, Currants and Gooseberries;

Garden Roots, Hardy Perennial Plants, Shrubs and Vines, Evergreen and Shade Trees, Roses, Hedge Plants, etc. Illustrated descriptive catalog replete with cultural instructions, free to everybody. Established 1878; 200 acres; quality unsurpassed; prices low.

We are the largest handlers of Cannas in the world. Our prices upon Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three, sometimes four eyes—are sound, dormant, and are packed 250 in a box; two can be "cleated" together and shipped as one. One box of 250 sold at a

thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices for quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us, we will substitute or send only the best for all purposes.

All the Above Cannas Sold F. O. B. New York or Chicago

WINTERSON'S SEED STORE, 166 North Wabash Ave., CHICAGO

ARTHUR T. BODDINGTON

SPEDSMAN

342 West 14th St., NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Cheap Seed Packets; the Other Side.

Before Mr. Watson is so sure that Burpee's 2c. packages of seeds for school children will ruin the seed business, he ought to find out whether they contain 2c. worth or 5c. worth of seed. And he ought to know also, that the Home Gardening Association here in Cleveland has annually sold over a half-million packets of seeds at 1c. each for the last three or four years, about half of which went to the school children of this city, and our business is by no means ruined but rather quite to the contrary. It is infinitely better for all concerned that seeds be sold even at 1c. per packet than that they be given away by the Government. I take it that children grow up and when they are old enough to have a sizeable garden, they will not be satisfied with penny packets and will then patronize the seedsmen. Give them a taste of the possibilities of a back-yard and their hands will itch for the hoe and rake with the first warm days of spring. I say encourage and educate the child even if it is necessary to sell him seeds at a penny. It isn't necessary to give him 5c. worth. A small quantity at first makes him hungry for more later on. I might add that the department stores, at least in this city, have for years sold seeds at a penny a packet. Cleveland, O. C. E. KENDEL.

American Seed Trade Association.

A meeting of the Executive Committee was held at Detroit, Jan. 21st, attended by President Chas. N. Page, Secretary C. E. Kendel and Messrs. Kirby B. White, Charles D. Boyles, C. N. Keeney, and W. D. Ross of the committee. A tentative program was arranged and Cleveland, Ohio, was chosen for the next convention city with headquarters at the new Statler Hotel. The date is set for June 24-26, 1913.

Notes.

Articles of incorporation of the Pieters-Wheeler Seed Company have been filed by A. J. and H. M. Pieters of Hollister and L. W. Wheeler of San Jose, Cal. The capital stock is placed at \$25,000.

H. Beaulieu of Woodhaven, N. Y., has moved his seed business to a larger and more desirable store with all improvements, close to the railroad station, post office, etc., to accommodate his business which is steadily growing.

We understand that William F. MacKenzie of Westwood, N. J., has been elected to fill the position of customs examiner in the horticultural department at the port of New York, made vacant by the death of James B. Kidd. The trade look forward to most amic-

able relations with the new examiner, who is already well known.

CATALOGUES RECEIVED.

Peacock Dahlia Farms, Berlin, N. J.—Wholesale Price List of "The World's Best Dahlias."

F. W. Eberle, Albany, N. Y.—Seed Annual 1913. A good practical catalogue well illustrated. Asters in colors are used as cover attraction.

Thomas J. Grey Co., Boston, Mass.—Annual Seed, Plant and Implement Catalogue for 1913. An up-to-date and practical publication. Hollyhocks make an attractive garden picture on front cover.

W. E. Dalwig, Milwaukee, Wis.—Catalogue of Seeds. A very creditable publication, profusely illustrated and covering thoroughly the field of seeds and garden plants. A wholesale price-list for market gardeners, of seeds in bulk is also received.

Charles H. Totty, Madison, N. J.—Chrysanthemums, Carnations and Roses. A trade catalogue, including besides the above specialties, Gladioli, Hardy Asters, etc. The cover shows a fine portrait in colors of Totty's sterling rose novelty Mrs. George Shawyer. The Wells-Pocket-Totty novelties for 1913 are represented by some beautiful half-tone pictures. Seeing them means the determination to have them at once.

The Maule Book, W. H. Maule, Philadelphia.—A cheerful visitor always and one of the most entertaining—there is so much Wm. Henry in it. We have never yet seen a dull edition during the thirty years it has come to us. Wm. Henry has the rare gift of being able to write just as he talks—sincerity, pith and point in every page—and there are 176 of them. We fear however, that he has inherited from his Scottish ancestors a vein of grim humor, and that he is liable once in a while to "put one over" on some of his distinguished competitors, when he talks to them down around the Union League about the season's prospects and so forth. You never know just how to take these solemn jokers.

Of Interest to Retail Florists

THE GOULD WEDDING DECORA-
TIONS.

The general story of the Gould wed-
ding has by this time become familiar
to everybody. However it may interest
our florist readers to learn a little
more about the floral decorative work
—what was used and how used. Alex-
ander McConnell, who, as stated in our
notes at the time, had the contract for
the work, has kindly supplied us with
a few notes on the subject which we
gladly pass along for the benefit of our
readers.

In the parlor, or "South Room,"
groups of tall palms were arranged to
form a bower, under which the cere-
mony was performed. Interspersed
through this bower were longiflorum
lilies in profusion. The effect was very
beautiful—together with the white
satin "priedieu" and rail and the wed-

ding aisle—which was formed of white
aisle posts (each post decorated with a
bunch of white roses and white ribbon)
and broad white satin ribbon.

Two broad mantels in this room were
banked and filled with lily of the val-
ley. Above these mantels, over mir-
rors there were arranged in loose,
graceful effect, American Beauty roses
in deep vases. The fireplaces were
banked with a fine variety of crotons.
This room was also decorated with
garlands of Asparagus plumosus, inter-
sprinkled with white roses, suspended in
the garlands.

At the south end of the residence is
the "Sun Parlor." This was decora-
ted with Alabama smilax and groups
of growing orchids, fastened to the
walls. The hall was arranged with
Asparagus plumosus and American
Beauty roses; the library with vases of
white roses and Alabama smilax. The
art gallery was also decorated with
large vases of American Beauty roses
and the music room with pink Killar-
ney roses and Alabama smilax. The
buffet table had high vases of white
roses and garlands of Farleyense fern,
interspersed with white roses.

ST. LOUIS RETAILERS.

The Retail Florists Association of St. Louis held its regular monthly meeting on Monday night, Jan. 19th, at the Washington Hotel. A committee was appointed to confer with the member of the Florist Club at its next meeting. Theo. Miller started a discussion on Ideal Locations for Retail Flower Stores which made things very interesting for a while. The election of officers resulted as follows: President, C. C. Sanders; vice-president, Theo. Miller; secretary, Alex. Geranios; treasurer, Fred H. Weber; sergeant-at-arms, Max Herzog. The next meeting of the association will take place Feb. 16.

1129 ARCH STREET, - - - - - PHILADELPHIA, PA.

CHICAGO NOTES.

Miss Corinne Pearson of A. L. Vaughan & Co., is back after a siege with bronchitis.

N. Wietor and Mrs. Wietor are at Ocean Springs, Miss., enjoying their winter vacation.

John Welch, who has greenhouses at North Hoyne avenue, will open a store at Robey street and Leland avenue.

Miss Marion Garland, daughter of Solomon Garland of Desplaines, began her career as a florist today, selling her father's stock in the Fairbank Building.

There seems to be a difference of opinion about the return of the former occupants of the Flower Growers' Market to their old quarters in the Fairbank Building.

The Foley Manufacturing Co. has taken on new office help to handle the correspondence and resultant orders coming earlier than usual this year on account of the open winter.

J. A. Budlong, whose name means lily of the valley in Chicago, finds the general lack of roses in short and medium lengths to add favor to that already favorite flower. No matter how large the cut, the demand equals it.

Two thousand roses will be among the Easter stock of potted plants at Ernest Oechslin's. They will include several varieties especially adapted for the season. Mr. Oechslin has entirely recovered from the gun shot wound of a few years ago.

A. T. Pyfer reports the sales of The Herald carnation as very gratifying, all the stock up to March 1st being now booked. The Herald can be seen any day at the salesrooms where it is keeping up its reputation as a good commercial variety by being shipped to all parts of the country.

One of the large orders of the past week was a decoration for a dance given by Mrs. Harold McCormick to the Grand Opera singers at the Congress Hotel. It required 10,000 bulbous flowers. Another event at the same place is a reception also given by Mrs. McCormick on the 31st. Both were in charge of Henry Wittbold and for the latter he has transformed the gold room into an Italian garden with

DRACÆNA MASSANGIANA.

DRACÆNA MASSANGIANA

One of the most effective and desirable of the variegated decorative foliage plants. It is a sport or form of *Dracaena fragrans* having a lovely golden variegation extending through the center of the leaf. It is regarded as preferable to its sister variety *D. Lindenii* which has the golden variegation

on the edge of the leaf principally, being less liable to suffer from exposure or rough handling, the golden edge of the latter being more tender than the tough solid green border of *Massangeana*. Our picture shows one of the houses full of this popular subject at the Dreer plant range, Riverton, N. J.

a sky scene completely covering the ceiling. Blooming plants, palms, wild smilax and scenery painted for the occasion will be required.

Visitor: Chas. Loechner, New York City.

BOSTON'S NEW FLOWER MARKET.

The opening up of the new and spacious headquarters of the Boston Flower Exchange at Winthrop Square, is scheduled to take place on February 15. There will be a grand reception, speeches by eminent men, collation, floral display, etc., all in keeping with this event which promises to be an epoch-maker in the development of Boston's great flower industry.

NEWS NOTES.

Baltimore—J. D. Blackstone have moved from their old store into a new building at 421 N. Howard street, where they have a larger show front. Their window display is most unique.

Cincinnati, Ohio—Henry Nieporte, of J. M. McCullough Sons Co., and Miss Julia Vogt were united in wedlock on Wednesday of this week.

Mr. and Mrs. P. J. Olinger's guest, Miss Margaret Weiland, Mrs. Olinger's sister, has returned to her home in Evanston, Ind.

Visitor: Julius Dillhoff, of Schloss Bros., New York.

PHILADELPHIA NOTES.

A sensational exhibit was brought over from New York yesterday by S. S. Pennock. We have seen many white carnations but this one called "Matchless" seems to be the real thing. This is in store for 1914—not sooner. But look this up. Call and see it at Pennock-Meehan Co.

A new flower store has been opened at Bryn Mawr, Pa., by Mrs. A. H. Pike. It is located at near the center of the borough (Lancaster and Bryn Mawr ave.) and is spacious and well-fitted up. Besides the regular trade of a populous and well-to-do community, there is the Bryn Mawr College nearby, also Rosemont and Villa Nova to draw from; so that this venture ought to prove a success. We welcome the newcomer and wish her every success.

When Commodore Westcott and John Burton and your scribe foregather for a social chat, the talk is genial and interesting—covering business, the affairs of state, and harmless personalities. All's well, for half an hour, when in comes George Anderson. After the usual compliments and other persiflage, comes a remark about the new 1913 gear in a bevel spiral for a new valve stem in a differential and what same could do in effecting a saving of sparks in the carburetter at ninety miles an hour, etc., etc.—then the war is on and the meeting is busted, as far as the Commodore and yours truly are concerned. Abas! the auto wagon!

Visitors: Nels Nelsen and wife, Tamaqua, Pa.; Wm. H. Potter, Wilmington, Del.; E. Howard Smith, Hazleton, Pa.; James Brown, Coatesville, Pa.; A. B. Haven, Santa Ana, Cal.; Peter Fisher, Ellis, Mass.; M. A. Paten, Tewksbury, Mass.

IN BANKRUPTCY.

Joseph G. Leikens, a florist of No. 251 East 49th street, has filed a petition, with liabilities \$3,026 and no assets. He has a military uniform, bearskin shako, sword and side arms, valued at \$150, which are exempt. Among the creditors are Elsie De Wolfe, who obtained a judgment against him on January 4th for \$540, on which execution was issued, but nothing could be found to levy upon, and Mrs. Elizabeth W. Ellis, \$930, on a note. Of the liabilities \$270 were contracted in Newport, R. I., for storage of plants and flowers and for water.—*New York Press.*

INCORPORATED.

Glenview, Ill.—American Horticultural Company, capital stock increased from \$25,000 to \$50,000.

Los Angeles, Cal.—Market Seed Company; \$10,000. J. S. Cannon, J. J. Gallagher, E. Sidebottom, R. W. Allen, G. H. Brooks, directors.

New York City—Flushing Rose Gardens, 156 West 95 St.; \$50,000 capital stock. Incorporators, F. C. Kronmeyer, H. B. Mulliken, E. J. Moeller.

Zanesville, Ohio—The Imlay Co., capital stock \$20,000. Incorporators—John D. Imlay, Hugh Imlay, William S. Imlay, Manning Imlay. The new company will take over the florist business of John D. Imlay.

Wilmette, Ill.—The Northwestern Floral Co. is dissolving partnership, one partner buying the entire plant and the other building a new range.

HART MAKES HANDLES FOR POTS

With Paper or Porto Rican Mats They Make Baskets. These are the Well-Known HART'S HANDY HANDLES.

Shipments are being made daily eastward to Boston, westward to San Francisco—and everywhere else. Once used always used, because they are SO HANDY.

DURING RECESS.

New York and New Jersey Plant Growers.

The annual banquet of this Association was held at Martin's on Wednesday evening, January 29th. The surroundings, decorations, etc., were in harmony with the occasion and everyone of the one hundred present enjoyed himself—or herself, for about half the participants belonged to the fair sex. Speaking was limited to brief remarks by F. R. Pierson of Tarrytown; J. K. M. L. Farquhar, president of the S. A. F.; W. H. Siebrecht, president of the New York Florists' Club, and Thomas Roland of Nahant, Mass. The keynote for all was the National Flower Show and the duties and obligations of the Association in connection with it. After the talking there was a delightful vaudeville entertainment and concert. The table was lavishly strewn with cattleyas and oncidiums.

Scores of Cook Co. Bowling League, January 22, 1913.

Notes.

The annual dinner of the Oyster Bay Horticultural Society took place on Wednesday evening, Jan. 29th.

The Greek-American Florists' Association will hold their sixth annual ball at the Terrace Garden, New York City, on Thursday evening, Feb. 20th. The usual good time is in prospect.

The annual dinner of the North Westchester Horticultural & Agricultural Society was held at Mt. Kisco, New York, on January 16th. C. H. Totty of Madison, N. J., served as toastmaster in his usual very acceptable manner. Among the speakers were many members of the New York florist and seed trade.

PUBLICATIONS RECEIVED.

The program of the Sixth Annual Farmers' Week to be held at the New York State College of Agriculture, Ithaca, N. Y., February 10 to 15, 1913, has come to hand. We would call attention to the program of the New York State Federation of Floral Clubs to be held on Wednesday, February 12.

Friday, February 14, will be home gardening day. In connection with the meeting of the Federation of Floral Clubs, an exhibition will be held. It is desired that all growers of new varieties of carnations, roses and other flowers will send in exhibits of their stock for this show. From present indications this will be one of the largest of the mid-winter exhibitions and it is hoped that all growers of novelties will participate. It may be of interest to some of our readers to also call attention to the meeting of the New York State Vegetable Growers' Association, the program of which is also included. Special mention should be made of the horticultural banquet Wednesday evening, and the address by Dean L. H. Bailey to the Assembly Thursday evening. Copies of the program can be procured from Prof. A. C. Beal, Dept. of Horticulture, Ithaca, N. Y.

NEWS NOTES.

Topeka, Kansas—James Hayes, who has been in business many years on West 8th street, has moved to a new location at 819 Kansas Ave.

Tarrytown, N. Y.—The F. R. Pierson Company have commenced the erection of a new building, which will be a model in the way of a modern flower store. It will be completed about July 1st.

EVER READY POT COVER

The modern way of artistically decorating unsightly clay flower pots. Makes plants sell better as they are artistic and attractive. Inexpensive, durable and instantly applied.

Made in four colors and many sizes. Sample will be sent on receipt of 10c.

Flower Market Reports

BALTIMORE Business during the past week has been somewhat dull, owing to the warm weather. Incoming stock is extremely heavy. Yellow tulips and narcissus are good and in demand. Roses are not holding up very well; carnations are of good quality and coming to the front. Harrisii lilies are in good demand, but the supply is moderate. Plenty of asparagus and a fair demand.

BOSTON Business here is fairly good, considering the weather conditions which have favored auto-riding and other out-door pastimes in preference to flower-decked indoor diversions. Roses are not over-plentiful and prices are holding well up to top-notch. Carnations, on the other hand have weakened decidedly and are still tending downward. Bulbous flowers of all kinds are coming in very freely but are sold fairly well under the circumstances. Violets are receding more and more. The singles are the only saleable ones, nobody caring for the doubles, once so popular. The quotations on double run about half of what is asked for single violets. Sweet peas are still quite short of stem but are improving. Cattleyas and gardenias are decidedly weak, bringing quoted figures with difficulty. Quality good, generally.

BUFFALO The market the past week was such that one day enough stock was had to supply all, and the following day everything was short, especially on the line most needed. No complaint can be made as to weather conditions the past week, it being spring-like and it certainly had a tendency to give flower lovers spring fever, as daffodils, tulips, freesia and other spring stock cleaned up well. Good carnations sold, though there was a superfluous number of ordinary reds and Winsor. Roses are still on the short side, especially beauties. There are fine lilies and these have also shared in demand. At the time of mailing this, the weather is cold and stock on the scarce side. Weddings are booked for this week and all white stock will have a good call. On McKinley's birthday a little extra carnation business is expected.

CHICAGO Mid-winter trade averages very fair one day with another, a particularly busy time followed by a day or two of depression. This condition was quite marked during the past week when week-end business was extra good and Monday and Tuesday were very quiet. The only thing that marks conditions as unusual is the continued shortage of medium and short roses this week reaching into the longer grades for those who must have roses had to pay the price and take the long ones. Prices nearly or quite as high as at Christmas prevail on roses. Carnations are decidedly abundant and poor grades are not selling. All kinds of bulbous flowers are bringing fair returns to the growers and the rose shortage is to their advantage. Lily of the valley is to be had in any quantity but meets ready sale. Orchids are quoted low and violets are not meeting a strong demand. There are plen-

ACACIA

With its beautiful long sprays of soft yellow flowers, and delicate green foliage; artistic and beautiful, attracting the buyer looking for something unusual. Price \$2.50 per bunch.

ty of callas and an abundance of all kinds of green.

McKinley Day passed with but little recognition and no effort apparently was made to keep alive what started out to be one of the florists' special days with plenty of sentiment behind it. Not a window bore even a card to remind the passers-by that Jan. 29th was McKinley Day, and with the retailer and wholesaler alike the observance of the day is apparently a thing of the past.

CINCINNATI Business is at best only fair. The market has assumed a much better appearance owing to a considerable let-up in the supply, which, however, has not tightened to such an extent that there has been an appreciable increase in prices. Shipping business is very good. Roses of all kinds clean up nicely. The demand is especially strong for the colored va-

rieties. The supply of white roses is relatively larger than the pink and red. They are, however, taken up nicely. Sweet peas follow right in the footsteps of roses. All that arrive sell and more might easily be used. The call for lily of the valley is very much better than it was a fortnight ago and all receipts clean up well. Carnations are still in heavy supply. The pinks and red sell nicely while the white move more slowly. Other offerings include violets, orchids, gardenias, narcissus, jonquils, tulips, poinsettias and freesia. Narcissus are a glut while the others named find more or less good market.

NEW YORK While not exactly torpid, business in this market seems to lack the spirit which one would expect to see a week preceding the Lehten quietus. Again it is noticeable that the

Flower Market Reports

(Continued from page 161)

grade of goods most readily consumed is not the very select but rather the medium and the long-stemmed rose drags away behind his more diminutive brother in popularity. This does not quite apply to the American Beauty for the so-called medium grades of this favorite are at present no good and of the long-stemmed "specials" there are not enough to go around and consequently they are bringing a record price. With the exception of the Beauty no other flower is doing any sprinting. Violets are cheaper than ever before at this date; carnations are at about half normal price for the season; cattleyas are a burden for those who have to carry them and they can be had very low; all bulbous stock is plentiful and inclined to accumulate. The retail people are not complaining, as a rule. They have little reason to complain for the season has been on their side most of the time and they are getting their goods lower than ever before, quality being considered. And quality is uniformly good.

We have pleasure in reporting a slightly improved market here the past week. Some dullness is always expected after the holidays, and this year it was worse than usual. When the old stagers took note that the period between New Year and Lent was unusually short they said: "We will have a good brisk trade, as the period is shorter." The briskness did not materialize. In fact it was duller than usual—to the great confusion of the prophets. It is best not to prophesy until after the event. If there had been a good brisk demand all flowers would have been scarce. As it was there was enough of most everything except American Beauty roses. What few "specials" there are coming in bring top quotations and all the grades below that are not worth having—in fact, no good. Other roses not specially plentiful. The yellow varieties are cropping perhaps better than any of them. The carnation market has improved a little. Prices have stiffened considerably over last week's doldrum situation. Pink Delight and the two Wards have been leading the procession as to quality. There is nothing cheering to report regarding orchids. Supply redundant and demand sluggish. Gardenias are moving a little better. A big volume of violets was moved but there was no appreciable improvement in prices. Lily of the valley was brisker and sweet peas es-

MISCELLANEOUS

	Last Half of Week ending Jan. 25 1913	First Half of Week beginning Jan. 27 1913
Cattleyas.....	20.00 to 35.00	20.00 to 50.00
Cypripediums.....	10.00 to 12.00	10.00 to 12.00
Lilies, Longiflorum.....	6.00 to 8.00	6.00 to 8.00
Callas.....	6.00 to 15.00	6.00 to 15.00
Lily of the Valley.....	1.00 to 4.00	1.00 to 4.00
Narcissus, Paper White.....	1.00 to 1.50	1.00 to 1.50
" Trumpet.....	1.00 to 3.00	1.00 to 2.00
Roman Hyacinths.....	1.00 to 1.50	1.00 to 1.50
Tulips.....	1.50 to 3.00	1.50 to 3.00
Violets.....	.20 to .35	.15 to .35
Daisies.....	1.00 to 2.00	1.00 to 2.00
Mignonette.....	2.00 to 6.00	2.00 to 6.00
Sweet Peas.....	1.00 to 1.50	1.00 to 1.50
Gardenias.....	8.00 to 25.00	8.00 to 25.00
Adiantum.....	.50 to 1.00	.50 to 1.00
Smilax.....	8.00 to 12.00	6.00 to 12.00
Asparagus Plumosus, strings (per 100).....	35.00 to 40.00	35.00 to 40.00
" & Spreng. (100 bunches).....	15.00 to 25.00	15.00 to 25.00

pecially so. The chief reason for the latter was the vast improvement in quality. Some fine long-stemmed stock was to be seen around with good flowers, good color, and good substance. The crop of this will be getting larger from now on and soon we will have the Spencers with us. From then the sweet pea will be a big factor in the flower market. Daffodils are going well. Double Von Saff made its appearance last week. In a week or two we may look for Emperor and Horsfieldi.

Trade was much better last week in both wholesale and retail circles. There was quite a lot of stock coming in but a notable feature was the big shortage in roses and the heavy demand for them. There was not nearly so many carnations as a week ago, but enough to fill all orders, all grades and varieties being well represented. Violets are in plenty. Sweet peas have shortened up a great deal. All white bulbous stock is still overplentiful. Quite a few nice orchids were seen in the market last week.

PERSONAL.

Fritz Bahr and Mrs. Bahr, of Chicago are visiting California.

N. S. Halsted of the St. Clair Floral Co., Belleville, is out for the nomination of mayor of Belleville, Ill.

L. Merton Gage, secretary of the American Gladiolus Society, is in Bristol, Vt., for a ten days' vacation.

Mr. and Mrs. Charles A. Byer and two daughters of Chambersburg, Pa., are in Florida for a month's sojourn.

George Hampton, formerly with the H. F. Michell Company, has taken a position with J. G. Neidinger of Philadelphia.

Robert Halliday, Baltimore, is recovering from a very sore hand and is gain able to attend to business at his store.

Jos. Millang, manager for the New York Cut Flower Co. at its salesrooms on West 26th street, has been obliged to go away, on his doctor's orders, to recuperate after sixteen years' uninterrupted grind without a vacation. He sailed on the Majestic for Europe on January 26, and after a month's absence expects to return in trim to reel off sixteen years' more of hustle.

St. Louis visitors—Harry Balsley of Detroit and Julius Dillhof of Schloss Bros., New York.

Obituary.

Bunzo Suzuki.

Bunzo Suzuki, who for many years was well-known throughout this country as a member of Suzuki & Iida, and later, when this firm consolidated with The Yokohama Nursery Co., Ltd., of Yokohama, Japan, died very suddenly in Kagoshima, Japan, on December

BUNZO SUZUKI

13th, 1912, while on his way to Formosa Island. Suzuki & Iida established their wholesale importing business in America in 1893. In 1905 Mr. Suzuki went to London and established a branch office under the name of The Yokohama Nursery Co., where they have been doing business ever since.

Bunzo Suzuki was well liked in the trade, and of a most pleasing personality. By his candor, sincerity and conciliatory traits he made staunch friends wherever he went and the most cordial relations with customers, for the concern he represented. When, a few years ago, he retired from the American field and returned permanently to Japan his departure was regretted by a wide circle of personal friends in the trade.

Lydia C. Conard.

At her home in West Grove, Pa., January 21, Lydia C., widow of Alfred F. Conard, died in her 74th year. She had been in good health up to the 28th day of September, but on that day she suffered a stroke of paralysis, from which she never recovered. She was born near West Grove, on the old homestead farm, a daughter of Samuel and Mary Ann Hughes, and is survived by a brother, Mark Hughes, of that town, and a sister, Hannah, widow of Edward Savery, West Chester.

Her husband, who died some years ago, was for many years a partner of the late Charles Dingee, these having organized the firm of Dingee & Conard about the year 1860, but later this was dissolved and Mr. Conard organized the Conard & Jones Com-

LEMON OIL CO.'S STANDARD SOLUBLE INSECTICIDE

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

1/2 Pint - - 25c; Pint - - 40c; Quart - - 75c
1/2 Gallon, \$1.25; Gallon, \$2.00; 5 Gallon Can, \$9
10 Gallon Can - - \$17.50

Dilute with water 30 to 50 parts

pany, in which he was active up to the time of his death.

Mrs. Huss..

J. F. Huss, superintendent of the Goodwin Estate, Hartford, Conn., mourns the loss of his mother who passed away at her home in Lausanne, Switzerland, as announced by cablegram a few days ago. Mrs. Huss lived to a ripe old age being nearly 93 years old. She was born at Lausanne on July 20, 1820. Her health was good until about a month before her death when she began to fail rapidly. When her two sons became gardeners she also had become greatly interested in horticulture and was a sustaining member of the Lausanne Horticultural Society.

F. A. Friedley.

F. A. Friedley, well known to the florist trade of Cleveland, Ohio, and who was associated with his son, who is manager for the J. M. Gasser Company, died on Jan. 16th. The funeral

The Recognized Standard Insecticide.

Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

"JIM" SHEA IN RHYME.

Few department officials at City Hall enjoy the distinction of having a song dedicated to them, and Supt. "Jim" Shea is one of that few. It is a parody upon "Rings on Her Fingers and Bells on Her Toes," written by Assistant Corporation Counsel Joseph A. Campbell in recognition of "Jim's" appointment as superintendent of Boston's park department. The parody was first heard at a meeting of the famous Clover Club. It runs:

"Oh! Big Jim Shea, we're glad to say,
Is boss of all the parks;
The Civil Service passed on him
With flattering remarks.
Of all the men they ever knew
They felt constrained to say
That the great arboriculturist
Was Superintendent Shea.

CHORUS.

"For he has—
Swan boats on the duck pond,
Toadstools in the park,
Caruso in the monkey house,
And dogwood trees that bark;
Tigers in the Tigery,
Lions full of play,
And the elephants coohee-coohee
dance
At sight of Big Jim Shea.

"The Miocene and Pliocene
Are open books to him,
The Darwinian theory takes the count
When diagnosed by Jim;
The Dinosaur would dine no more
If Jim could have his way.
For the great zoologist by far
Is Superintendent Shea.

"The lobsters at the aquarium
All grasp him by the paw,
Saying, 'Jim, now will you have us
broiled?
Or, do you like us raw?'
The horseshoe crabs turn up their tails
And pointedly do say
That the Gasteropods unanimous are
For Ichthyologist Shea.

"The cuckoos and the filaloos
All whistle as he rides by,
The rhinoceros follows him
With love-light in her eye;
The camels he has banished—
Now, what indeed do you think,
He'll have no animal in the zoo
That's so blamed slow to drink."
—Boston Traveler.

BOSTON PARK AND RECREATION APPOINTMENTS.

The Boston City Council on Monday, January 27, unanimously passed the ordinance consolidating the Park, Bath, Public Grounds and Music Departments into a Department of Parks and Recreation, under the control of a commission of three members, the chairman of which is to receive \$7,500 a year and the other two members to serve without pay.

The ordinance provides that one of the members shall be a landscape engineer or architect with an experience of at least three years. Over each of the two divisions of parks and recreation shall be placed a deputy commissioner at a salary of \$4,200 a year.

The Mayor has already announced

that he has selected D. Henry Sullivan
of the Public Grounds Department to
be chairman and Robert S. Peabody
and Daniel H. Coakley of the present
Park Board to be the unpaid members.

Supt. James B. Shea of the park department will get one of the positions as deputy at \$4,200 a year, the same salary he receives at the present time. It is understood that Supt. Hugh C. McGrath of the bath department will get the other \$4,200 a year position in charge of the recreation division.

H. C. Warner of Mitchell, S. D., who died several months ago, left one of the largest collections of named varieties of Gladiolus, Peonies and Iris in the United States or in the world. The collection consisted of 352 named varieties of Gladiolus, 347 named varieties of Peonies, and 136 named varieties of Iris. This valuable collection was sold at public auction, January 17, at Mitchell, S. D., and entire lot was purchased by the Gurney Seed & Nursery Co. and they will all be moved to Yankton in the spring and placed in trial grounds.

Columbus, O.—Peter Fornot & Son, range of greenhouses; Cottage Rose Gardens, range of houses.

FIRES.

Aberdeen, Wash.—The Ellis Greenhouses suffered a loss of about \$2,500 by fire on January 7th; fully insured.

Gallena, Mo.—The Gallena Greenhouses were damaged by fire on January 14th to the extent of about \$1,000.

The Boston Co-operative Flower Market, which occupies the basement of the building 2 Park street, Boston, suffered some loss and much inconvenience from a fire which started in another part of the building early on the morning of January 24. H. M. Robinson & Co. lost a quantity of florists' supplies on which there was no insurance.

The Massachusetts Committee on Agriculture has reported to the legislature:

Bills to increase from \$10,000 to \$50,000 the amount available to be expended by the state forester in reforestation; to provide an appropriation of \$75,000 for continuing the work of suppressing gypsy and brown tail moths; to provide that the state shall reimburse towns having a valuation of less than \$2,000,000 for one-half of their expenditures in fighting forest fires, and to require that local moth superintendents and forest wardens be appointed in January, rather than in March or April. Also a bill authorizing the city of Boston to pay a sum not exceeding \$3000 to James Thornton on account of injuries received while an employee in the park department.

Why the U-BAR

LOOK at the wheels of a bicycle—see what slender little, wire-like spokes they have—yet what strong, sturdy wheels they are. Surely no one would think of going back to the clumsy, old wooden spoked wheel.

Did you ever stop to think how like the bicycle wheel, U-Bar greenhouses are?

No heavy wooden roof bars or large iron framing members—but in their place a complete, all steel frame of U-Bar as light and strong in proportion as are the bicycle spokes.

The cypress core bar is steeped in a chemical preservative before it is placed in the U-Bar.

The galvanized steel U-Bar completely protects the core bar from the inside moisture of the house.

The drip does not drip. It follows down the bottom of the U-Bar, to the purlin lead-offs, or to the cast iron sill. No drip grooves to get stopped up.

Then there's the curved eave—everybody knows the U-Bar curved eave was the original curved eave. It is admitted to be the most practical and attractive of all the curved eaves.

No reinforcements of the curved parts of the U-Bar are needed—no heavy iron members to break the view from the inside looking out; or show a heavy line from the outside, looking in.

There's only one U-Bar curved eave, and that's the eave *made with the U-Bar*.

Others may look like it, but that's *the only way* they are like it.

We tell you these things as a matter of protection to yourself.

If you want the finest greenhouse sold today, for private estates, public institutions or florist show houses—you want the U-Bar.

See to it that you get it.

THE CORE BAR.

It is made of Cypress steeped in a chemical preservative.

THE U-BAR.

It is made of steel, heavily galvanized and then aluminum painted.

U-BAR GREENHOUSES

PIERSON U-BAR CO

ONE MADISON AVE., NEW YORK

CANADIAN OFFICE, 10 PHILLIPS PLACE, MONTREAL

CURVED IRON EAVE STYLE "S."

This Eave is intended for use on detached houses with either fixed glass or side sash.

It is practically all exposed to the inside heat of the greenhouse and so is ice clearing.

KING GREENHOUSE EAVES

THEY SOLVE THE EAVE PROBLEM
THEY MAKE THE LEAST POSSIBLE SHADE

and as you can see

present no surface for icicles to form on. They have great strength with lightness. They are designed and made for the purpose and not adapted from stock structural shapes.

WE WANT TO FIGURE WITH YOU.

CURVED IRON EAVE STYLE "L."

This Eave although lighter than Style "S" is amply strong for all Eave purposes.

It obstructs little light and is ice clearing in the most severe weather. It is intended for use with fixed glass only.

KING CONSTRUCTION CO.

Home Office and Works
NORTH TONAWANDA, N. Y.

New England Sales Office
7 WATER STREET, BOSTON, MASS.

ERECTED AT RUMSON, N. J.

SEEING how attractive and practical this arrangement is, do you wonder why **THE LUTTON PATENT CURVED EAVE** method has changed Greenhouse Construction during the past few years? The result has been the most successful house that can be produced; the other concerns who had been producing the same antiquated buildings for years had to simply destroy their patterns as well as their catalogues and start anew. Just ask some of our imitators to show you some of their curved eave houses built before **THE LUTTON PATENT** was granted, you will then be convinced that you had better consult with me.

NEW CARNATIONS

WM. ECCLES LADY NORTHCLIFFE BRITISH TRIUMPH

WM. ECCLES. The First Prize winner at Detroit last year in the Red or Scarlet class, and the Silver Medal winner of the New York Horticultural Society for the best undissected seedling.

The scarlet everyone was waiting for. Has a strong rigid stem, a perfectly formed 3½-inch flower, non-bursting calyx, highly perfumed, a grand keeper and as free as any scarlet to date.

LADY NORTHCLIFFE (Engelmann). A beautiful salmon pink in color, much resembling "Pink Delight." Has a well built up flower, and just enough in it not to burst the calyx. While the flower is not the largest (about 3 inches), it is fully as free as "May Day," and will surely make a grand bread and butter sort.

BRITISH TRIUMPH (Engelmann). One of the finest things ever raised in England. The color is a striking shade of Crimson. The flower is 3½-inch in size and well built up. It has the sweetest perfume of any carnation ever raised and its keeping qualities are the best. Has a fine stem, good constitution, and free.

PRICES: \$12.00 PER 100, \$100.00 PER 1000

THE minute a compositor begins work on an advertisement, that minute he becomes a salesman, and his sole thought should be to set an advertisement that will sell goods. This advertisement is set plain and simple because the facts are plain and simple. We offer you no "big sacrifice," or anything like that, but simply some real good Cold Storage Giganteum at a price which will net us a fair profit. These bulbs were packed in Japan for storage purposes, and they are as good as we can get. We have them in original large cases, but we especially draw your attention to our Baby Cases of 100 bulbs each. Packed that way in Japan, mind you—not shoveled in a soap box. All from the very best fields in Japan and in good condition. You can have these bulbs delivered at regular intervals—or at any time you wish. Just send us your instructions and we will do the rest. Prices include expressage east of the Mississippi River, as follows:

HORSESHOE BRAND GIGANTEUM

BABY CASES

Size, 7 to 8 inches.....	\$8.50 per case of 100
" 7 to 9 "	9.00 " " "
" 8 to 10 "	12.00 " " "

(Expressage will be allowed on any orders booked previous to this advertisement, for deliveries after February 15th, 1913.

ORIGINAL CASES

Shipped by freight, excepting in February and March; no express or freight allowance.

Size, 7 to 8 inches.....	\$21.00 per case of 350
" 7 to 9 "	21.00 " " "
" 8 to 10 "	25.00 " " "
" 9 to 11 "	22.00 " " "

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Chrysanthemums

Where you have slow growing varieties or new varieties that you want to increase as much as possible, start now and work up a good batch. While some of the growers for exhibition purposes have some of their stock rooted by this time, for the general run of growers for exhibition purposes, now is the proper time to begin. Give all stock plants a well-lighted bench where the temperature runs about 50 degrees at night. When taking cuttings, only well-shaped, sturdy short-jointed cuttings should be chosen for propagation. To place a cutting in proper shape for the sand, all that is necessary is to free it of the lowermost leaves. In the propagation bed they will want frequent sprinkling, also shading on sunny days. When they have made roots about half an inch long they should be potted without delay.

Easter Lilies

Lilies wanted for Easter should be far enough advanced now to show the flowers well above the foliage and to be certain that they will be in on time, they should be turning from green to white by the last week of this month and not later than the first week in March. Where not so far advanced as above mentioned, they should be pushed by a brisk forcing temperature of about 70 degrees at night with about twenty degrees higher during the day. From this out lilies will consume great quantities of water. To enlarge the flowers and give color to the foliage, liquid feeding applied once or twice a week will prove a great benefit. Just now when the buds are well exposed to view, look out sharply for the ever-bothersome Aphis and fumigate once or twice a week to keep them in check. It is better to do all hard forcing now than later so as to give the plants a gradual cooling off. After most of the buds show white and a bloom or two has opened, is the time for this cooling process, first allowing the lilies to reach this stage without retarding their steady growth. They can then be held back in good shape for ten days if finally placed in as low a temperature as 40 or 45 degrees.

Palms

Before we get busier than we already are we should take time to overhaul our stock in palms. Though a most patiently suffering plant-family, neglect to do right by them invariably tells. It will be found that the appearance of specimen palms is wonderfully improved by good sponging—an operation never too often repeated—with a good insecticide such as Aphine, Lemon Oil or Fir Tree Oil. A badly infested plant is hard to clean and should never be placed back among others until it is freed of all insects. While any period in the year is a good time for the transplanting of root-bound stock, the repotting now of all palms will be

especially good before they start too much root action. Use a substantial heavy soil which has been plentifully enriched with old manure and bone meal. Keep a congenial atmosphere and temperature, not much below 60 degrees at any period now, as they will be making renewed root action from this out.

Orchids

Now that we will soon be reaching the middle of February, which means stronger sun, most orchids will be better for some shade, but of course that does not say to darken them up too much. Shading that can be let up and down at will is the best, because when the sun is weak up to nine o'clock in the morning and with less power from three o'clock in the afternoon, and on dark days, they can have the benefit of its moderate influences. Keep all orchids that are starting into growth well syringed every good day and as the season advances it can be done twice a day. Wet down paths and walks two or three times a day so as to have abundance of moisture in the atmosphere. The different pests will spread now from this out, so it will be well to give your orchids a good sponging often with some good insecticide.

Seeds to be Sown

This is the season when many kinds of seeds must be sown. All such seeds as asparagus, cannas, celosia, cuphea, gloxinia, grevillea, begonias, dracaena, musa, smilax, salvia, torenia and vinca can be started in a temperature of about 65 degrees. Such seeds as antirrhinums, ageratum, asters, centaurea, hollyhocks, marguerites, lobelia, petunias, Phlox Drummondii, stocks, verbenas and wallflowers can be started in a temperature of about 55 degrees. The following perennials can also be sown: coreopsis, dianthus, delphiniums, gailardias, gypsophila, iberis, incarvillea, lavandula, lobelias, lychnis, pentstemons, tritoma, etc. These can all be sown in flats or pans provided with proper drainage and for a compost there is nothing better than new loam, leaf mold and sand in equal parts. Fill the flats and press the surface firm and smooth. On this sow the seeds. After they have been thoroughly watered, keep shaded and moist until the young seedlings begin to appear, when they should have full light. All these young plants will require careful watering, transplanting and other attention. Many of the kinds named above may be sown in successive lots up till March.

Secure Easter Stock Now

It is well to look over the stock of Easter plants now and see if you will be short of anything for that date. Many a small grower has not room enough to grow the stock that his trade demands so now is the time to buy before the best is culled by early buyers. There are quite a few plants that are better to buy, as they can be more cheaply and better grown by the specialist.

Mr. Farrell's next notes will be on the following: Begonia Gloire de Lorraine; Care of Adiantum Farleyense; Dutch Bulbs for Easter; Euphorbia Jacquinæflora; Frames of Pansies, etc.; Geranium Lorraine; Care of Adiantum Farleyense; Dutch Bulbs for Easter; Stock Plants.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Pot Vines in Flower

As pot vines come into flower raise the night temperature to 65 to 70 F. with the usual advance by day. Fine mornings the house can be damped down in the usual way first thing, after which no more moisture should be put down until after the flowers have been fertilized. This should be done around noontime. The pollen will be dry by this time and can be seen moving around when the vines are shaken. Black Hamburg is the safest variety to grow for this work on account of its setting the berries so easily and combining the other essential good qualities of an early grape. Later in the season a good shake of the vine is sufficient to secure a good set providing other conditions are favorable. With pot vines coming in at such an early date and often in adverse weather, it is advisable to fertilize the flowers with a soft fur brush to reduce the percentage of seedless berries to a minimum. After fertilizing, damp the house down well. This is one of the most important times of the whole season that the house should have all the air that it is possible to give it. In mild weather this is simple, but when it is freezing hard all day it is not so easy. Take advantage of any sunshine that may come to get just a little on.

Muscat of Alexandria Grape

To Muscat of Alexandria belongs the honor of being the best-flavored grape in cultivation. This is a great thing to say, but it is a generally acknowledged fact. Like most of our exceptionally good things it is harder to grow than most of the other varieties. This recalls an instance of a melon tried out two years ago, undoubtedly the finest thing in cultivation, but one can be excused for calling a regular demon to grow. No plant would carry more than two fruits; an average would be less than one-and-a-half; this coupled with all its other troubles caused us to discard it. Muscat of Alexandria is not such an outrageous offender, but has some peculiar characteristics, which if catered to will make it one of the most prolific in addition to its excellent flavor. The first of February is a good date to start an early Muscat house. I said "Muscat house," using the general phrase of the gardeners when referring to Muscat of Alexandria but which is not definite, as there are a number of Muscats, including several well-known black varieties. Muscat of Alexandria vines started now will come along in good shape and ripen their fruit at a good time. Give them the ordinary routine for the first few weeks.

Thinning Strawberries

Soon after strawberries have gone over flowering they must be looked through to make a reduction of the fruits set. With these very early batches the thinning process is easy, as generally the number of perfect fruits with a stem of fair length is seldom in excess. A simple method when thinning is to first remove all the poorly-set fruits, then take off those with the shortest stems until the requisite number is reached. This should be about six until later on in the season. The longest stemmed fruits are desirable because they will keep up

away from the water and also have a better opportunity to get sun and air when ripening. After thinning give the plants all the feeding they can take. A shelf near the glass is the best location for strawberries to finish their fruit unless a house is given up to them entirely.

Vines Bleeding

After a viney has been started for about a week the sap commences to flow and there is a danger of "bleeding" from cuts or where the outer barks have been taken away deep enough to cut into the live wood. Every drop of exuded sap is waste—so much life blood and energy gone. It is similar in our own bodies; one can bleed to death. Bleeding of vines is very much to be regretted as once a cut or fractured part of the stem commences to bleed the chances of stopping it right away are very few. Up to the time a few leaves are expanded it will be advisable to look over the rods periodically to detect any bleeding. It is often a hopeless task to undertake to stop a wound which has been bleeding for sometime. The continual exuding of the sap prevents one from obtaining a dry surface to work on. Could this be brought about for a few minutes it would be an easy matter to stop the bleeding. This is the time which reminds anyone of "styptic" and the advantages of using it at pruning time. Once an application of this has hardened over a cut, bleeding is impossible. Use this in preference to all substitutes. A very old remedy is to push a small potato over the spur; sometimes this will stop it and sometimes not. Powdered charcoal applied as a dryer and followed immediately with a dressing of Styptic has succeeded in some cases. As a last resort the bleeding wound can be burnt with a hot iron until it is dry, when the cells will often be closed up and bleeding cease. These are only a few of the many ways this evil is combated with—none of them are sure; there is no sure remedy for it once it is started until nature in her own way stops it after a few leaves are opened. Late pruning is often the cause and should be avoided.

Tomatoes

Tomatoes can be planted out in the benches from 2½ inch pots or potted on into fours. The latter way is preferable at this season of the year. It must be borne in mind, that a tomato will not stand being root-bound. No matter what size pot they are in and being intended for growing on they must be shifted at the right time. In some cases they apparently seem to get over being root-bound but the crop is not so heavy. Immediately the fours are nicely filled with roots transfer them to the benches. These should not be filled with soil if only one row is to be grown and trained up the trellis near the roof. About one foot of soil will be found sufficient. A board can keep this in its place.

Large houses can be used successfully for growing tomatoes, in which case each bench will receive the full complement of soil and the plants will be planted through the whole bench and tied up to stakes. Big crops have been secured this way. Use soil that was stacked with manure last fall. No other feed will be needed until the first two trusses of fruit are set.

Out-door Vegetables and Fruit

Early Seed Sowing

Early in the month of February the above heading may look a little incongruous, though the past month has been mostly suggestive of balmy spring, and tempting us all the time to sow peas and other early vegetables. However, those who have a greenhouse and who wish to grow some large Ailsa Craig onions or giant leeks must now have them under way, and as soon as they are large enough to handle, should be potted into a light and rather rich soil. If it is practicable, add a little soil from last year's onion patch, for it seems that there is something about the onion as about the legumes which benefits them by inoculation with soil which has previously been occupied by their kind. This is stated as a hypothesis merely and not as a fact, but if a number of the readers of HORTICULTURE will co-operate with the writer and each put this suggestion into operation with about half his plants, and besides using a little of the old onion soil in each successive potting, will plant this half so treated on the same plot as was used for onions last year, treating them otherwise the same as the rest, then by comparing notes next September or October, we shall know if this be a fact or not. Be just as kind to the leeks as you are to the onions and never let them get dry, giving a night temperature of about 55 to 60 F. Globe artichokes should be sown now or earlier and don't be afraid of growing too many because only a portion of them will bear this summer. Even if you can carry the old plants through the winter it is always wise to raise a lot of seedlings as they will invariably come in later than the old plants. The young artichokes should have most liberal treatment and be encouraged to make good plants in at least six-inch pots by planting-out time, May first to tenth. Sow during this month, lettuce for an early crop in the frames; we have always liked May King for this. Soon after this, sow a batch of Big Boston, as this variety takes about two weeks longer to mature than the May King. Egg plants, peppers, cabbage, cauliflower and tomatoes for earliest crops may now be sown. If celery is wanted in June or July it should be started at once; the varieties golden self-blanching and white plume are the best for early work. If you have not already done so, make a planting plan for the vegetable garden for the coming season; it will facilitate the work greatly when the rush comes.

Saving and Caring for Manure

If you were not fortunate enough to get all the manure drawn on the garden last fall, now would be a good time to get some on while the ground is frozen and when it is possible to drive nearly anywhere without doing damage. This matter of manure is a subject worthy of our most painstaking study and it will be dealt with from time to time in these notes in its various phases affecting crop production.

Most gardeners have charge of some live stock and consequently have to do with the saving of the manure from these, and, even if not, he certainly should have a thorough knowledge of the most approved methods of conserving this important product. Manure should be kept under cover until drawn out and spread on the garden, because if exposed to much rain, the most valuable fertilizing ingredients are leached away. The lighter manures, such as horse manure, should be consolidated by tramping and sometimes it is advisable to add a certain amount of water to it. The one great weakness of most systems of manure saving is the lack of any proper means of saving the liquid excrement.

The folly of this will be apparent to everyone when they realize that of the total nitrogen in the manure, liquid and solid, two-thirds are in the liquid, and of the total potash four-fifths are in the liquid; therefore, when we remember that nitrogen is at once the most valuable and at the same time the very element that is most likely to be missing in our soils, it is borne in upon us that every provision should be made to gather and to save from waste this extremely valuable source of soil fertility—the liquid manure. The best method of accomplishing this will vary with varying conditions. On a small scale where there are but few animals to deal with, the best way would be by using abundance of absorbent bedding material, but where there is a greater number of animals, a large concrete tank would answer best, the tank to be fitted with a suitable pump to pump the liquid either into a water cart or through pipes to where it is wanted. For some reason gypsum or land plaster (calcium sulphate) has been a favorite material in most places to use in cow stalls, horse stalls and hen houses as an absorbent. While this is a little cheaper than "Floats," or raw ground phosphatic rock, the latter is far and away the best material as it stiffens up the manure pile in the very element in which it is weak, viz, phosphoric acid, and besides this, it prevents to a large extent the burning or fire-fang of manure and in this process of burning there is a loss of ammonia, which is quite serious, as for every seventeen pounds of ammonia gas that escapes, there is a loss of fourteen pounds of nitrogen, equal to a loss of one hundred pounds of nitrate of soda. If, from lack of storage room, as frequently happens, the manure must be drawn out and stacked, it should be topped off so as to shed most of the rain fall. Frequent turning of a manure pile is always beneficial as, by so doing, the growth of bacteria is promoted; this bacteria is the means of bringing about the changes which make manure into available plant food.

Edwin Jenkins

Lenox, Mass.

Facts and Fancies

Mr. Editor:—Truly we did not know what the New Year had in store for us, and each week when HORTICULTURE arrives, we look to see what different bottle Friend Jenkins has uncorked, and try to estimate the amount of fizz. We were all anxious for the uplift, and hail it accordingly and trust that a few neighborly comments by the way will add incentive for the future, for we are glad to note that the editor has promised that it shall be continued.

The tirade against the poor little red spider, who by the way is not a spider in the sense we usually accept him, and this possibly is the reason he is designated by his Latin name, has been with us since boyhood and we know, that a real nice moist growing atmosphere is not agreeable to him, but very good for the plants. He should not be admitted; it is not good policy to wait until he has eaten up the Cyperus because he could not get at the Victoria. Truly "Violence is the watchword in a case like this, applied through the hose with great pressure," but, in the next penful of ink the soft pedal is put on, and that "with this in the hands of the careful and thorough cultivator (coupled with eternal vigilance) the terrors of red spider disappear like mist before the morning sun." Which being interpreted means, the old custom of a fine spray of water under pressure applied

to the whereabouts of the pest, especially to the under side of the foliage. We thus learn that red spider is "a terror."

Then, Sir, we are told in your recent issue that "Damping down is a mistake (fallacy)—why the parenthesis?—in any houses other than stove or orchid houses, except occasionally as when a grapery is starting into growth, or on an extremely hot parching day in summer when the roots of the roses, etc., are unable to send up water fast enough to take the place of that evaporated from the foliage, when the damping of walls, floors, or any part of the house is necessary to prevent wilting." This is a condition often seen even in March and April, plants wilting after a few dull sunless days; why not damp down, or even spray overhead?

It is hard to understand, too, why it is that orchid houses are excepted as being susceptible of damping down at all times. I have often treated houses of orchids without water even on the floors for a week at a time in July and August, and the plants did well.

Some years ago, before the advent of our friend Jenkins, an excellent cultivator stated in the leading horticultural journal at that time, that he would rather trust to the hygrometer than the thermometer in the culture of exotic plants under glass, and he knew how. This was much discussed, even ridiculed at the time, but as the years go on this question of "atmosphere" resolves itself into the place at the top, and the stickler for exact temperatures no matter what the other conditions are, is in wrong. A high temperature on a cold night with no moisture present, is a grand birthday night for red spider.

The phrase "stove house," too, seems to have been rejuvenated and reads strangely. It had been agreed upon in American horticultural parlance that it should have no place; "warm house" or "tropical house," but stove-house never again! Possibly it savored of red spider.

We are told, too, that "A damp atmosphere certainly appears to favor black spots on Beauties." Just a year ago on a zero morning, it was a revelation to see the grower of Beauties at the great Poehlmann Bros.' establishment, spraying Beauties vigorously, and some of the Beauty houses were getting a bath the same day at four P. M. Black spot is unknown there, foliage down to the benches on plants several years old, and the best growers in Massachusetts tell me they have to send west to change their stock of Beauties at times. There is nothing much more certain than that there are things that "certainly appear to be" that are not.

There is an element of uncertainty in the statement that the cutting-bed fungus is the result of too much dampness in the atmosphere. Far better it would seem to have it in the atmosphere than at the base of the cuttings. When we see half a million carnation cuttings rooting without a visible loss, all under the same roof as the flowering plants, with no other provision made except a cloth hung up to keep the atmosphere more moist by keeping away draughts of air, it would seem to be that the changing of sand and other precautions as to cleanliness are much to be appreciated yet.

Mr. Jenkins tells much that is true under the head of "Neglected Opportunities." We see very much more here than in the East, of men who are graduated from state and other horticultural schools and they make good. There are plenty of gardeners who are taking instructions from such all over the country, and so it will continue to a certain extent. The fifteen years of a gardener's life between fifteen and thirty must be golden indeed if he can earn a living in his profession, make good with his employers, and, on the side, get the list of attainments as quoted, "an insight into landscape gar-

dening, modern methods of poultry handling, up-to-date dairying, intensive cultivation of the land, construction work such as road building, land drainage, with a little knowledge of chemistry, physics, or natural science."

Now Mr. Editor, after being preached at in the same strain for 35 years and being still young, and coming some short of these requirements it would seem that some of that time had been wasted; and yet, the years were busy ones.

There is one possession the college men cannot take from the gardener, and they are all envious of him in that they do not have the knowledge of plants that grow. In this age, when all outdoors is becoming more and more man's recreation ground, it is not enough to know everything that comes from the soil should be familiar, even the weeds, especially by their common names. It seems so good to note that Mr. Jenkins did not include botany among his list of accomplishments. Botanical names are a continuous exercise and seemingly will be.

Mr. Jenkins' future notes and axioms will be awaited with interest, and the above friendly comments are intended only to emphasize the fact that there are usually at least two opinions about most things, with perhaps a modicum of truth in each. Gardeners are better far than they used to be or ever were, and yet, the axiom for the week is:

"A healthy growing plant should never be allowed to get dry at the root."

Lake Forest, Illinois.

E. D. Orpet.

Antirrhinum

Elevated by popular favor, from the plebeian rank of common garden annual in colors of a certain rustic gaudiness to the higher level of marketable cut flowers commanding remunerative prices. This has been the evolutionary feature of *Antirrhinum majus* during the last two decades. The marked change in the general estimation was the direct result of the introduction of a new tall-growing race producing spikes of larger flowers in clear shades. Particularly for the pure white, yellow and rose pink varieties the demand is ever increasing. The long stems and good lasting qualities in a cut state make the flowers of the new snapdragons an excellent material for indoor decoration. For this reason we find them at present worthy of the more valuable space under glass; in fact there are few conservatories without some *Antirrhinums* on the benches.

My personal experience in growing *Antirrhinums* has been in the main limited to outdoor culture and their employment for various garden effects. For the latter purpose not alone the tall-growing giant snapdragons, *Antirrhinum majus grandiflorum*, but also the large-flowering half-dwarf type, *Antirrhinum majus nanum grandiflorum*, prove highly satisfactory. The varieties of the last mentioned race will be found particularly well adapted for bedding. Aside from the bushy growth and handsome dark green foliage, the long floescence and the free-flowering habit as a rule decide the issue. Planted in separate colors the effect in floral color combination is, of course, far superior to the use of mixed shades. Annuals throughout the north, perennials in the mild warm climate of the south, *Antirrhinums* represent a splendid material for herbaceous borders, especially for midsummer flowering. In New England seacoast resorts they rank among the best paying cut-

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Packing in Winter

With the cold weather here at last, the packing and shipping will have to change accordingly. We say "the cold at last." No doubt the readers of HORTICULTURE who have seen winter long ago will think this a little belated advice, but as for us right here in the East, it applies well. But to go on with the notes on packing: Do not be afraid to use plenty of newspaper as it is much cheaper than frozen roses. It is best to secure some heavy wrapping paper and wrap all the boxes in that, putting plenty of newspaper underneath. Do not crowd the roses too much. It does not pay. If you have been doing so, try to pack them the right way. You may not receive more for your stock the first time you do so. It will take time for the buyers to get wise but after that they will always look for your stock. Always aim to have the whole box of roses even; that is, have them all open about the same, and not have one open a good deal and another only a little bit. Careful cutting will accomplish this, and if this is done all the time, the buyers will look for the boxes, and will buy no other until after they make sure that there are no more. Pack Beauties with especial care, and see if you cannot realize the high prices paid for fancy stock at this time of the year. Use plenty of tissue paper; it is cheap considering the service it renders. No matter how good your roses are, if they are badly bruised they will not be worth what roses of a poorer quality, and not bruised, would be.

Paper vs. Wooden Boxes

This subject has many sides to it and growers must find out for themselves which answers their particular purpose better. We find that we can buy new paper boxes for what we would have to pay the express company to return the empty wooden ones. And then a good many go to out-of-town buyers who certainly intend to return them, but . . . At any rate paper boxes when bought in large quantity can be had real reasonable, and we are sure that it pays to use them.

Cutting Rope for Paper Boxes

Rope to be used for tying paper boxes should be

flowers of the seasons. In consequence thereof it is here where today the greatest care is taken in growing snapdragons out of doors to perfection.

The sowing of seed begins in January and the best strain that money will buy is considered just good enough. Seedlings in pots or shallow seed-pans are transplanted into flats as soon as they can be handled. Placed near the glass in houses of a temperature from 50 to 60 degrees, in April, the stock for cut-flower sale is potted up in 3 to 3½-inch pots. Pinching out of the tops, although delaying the beginning of flowering from two to three weeks, forces plants to branch low. One of the foremost aims should be now to secure, by careful ventilating, a sturdy growth and to harden the young plants. It is essential to plant *Antirrhinums* in the open ground as early as possible so that they may become firmly rooted and underway before the hot weather sets

cut in advance so as to save not only the time but the rope itself. The best and simplest way is to find out the exact number of feet of rope required, and then drive two nails or pegs into a piece of wood and then wind the rope around them a certain number of times, or better still bore two small holes in the side of the packing table a certain distance apart, and have two small wooden pegs which can be driven in when there is rope to be cut, and removed when not wanted, to do away with torn clothes, etc. Simple as this little arrangement is, it has proved a great time saver with us and will do the same elsewhere, we are positive.

Packing Young Stock for Shipment

The other day I was surprised to hear a complaint made that roses from a good reputable firm had arrived in a condition that was a disgrace, due to the firm's careless packing. We should always remember that the signs, "This Side Up," "Handle with Care," "Rush, Live Plants," are not always heeded by the express employees, and they cannot be always blamed either. In our opinion a box of plants should be packed so that no matter which way it is turned it will not upset the plants in the least. Never pack in cases that resemble a large hotel in size. There may be some excuse or reason for doing so in packing large specimen plants, but there is no excuse whatever for doing so in packing potted roses. Again we say do not be too shy in using paper. It will pay in the long run to use more and have the plants arrive in good condition.

Old Plants for Shipment

These should be shipped as free from soil as it is safe to do so. Put plenty of moss around the roots, and they will be O K. A large number of plants was once shipped quite some distance by express. Later a letter stating that this firm had more real estate than they needed, and that they had no fancy to buy it shipped by express, was received, which plainly told that the charges on the plants were as much as the plants were worth themselves. So let us have consideration for our brother florists and be careful not to increase their expenses any more than is necessary.

in. The soil should be well prepared and heavily enriched with cow manure. Mulching the surface around young plants proves beneficial as it protects the tender roots from being burned by the hot sun and prevents the soil from becoming hard and dry. Staking and watering must be attended to in time and every precautionary measure taken to prevent any stunt in growth. Being gross feeders *Antirrhinums* may need an application of fertilizers or sheep manure after the first crop of flowers is cut.

In order to have the colors absolutely distinct propagation in sand is often resorted to. Fall cuttings in such cases should by all means be taken from the old plants before the frost has touched them.

ing people that flowers are the best alternative for whatever they may have relinquished, for the time being, in the way of social activities? Properly handled, Lent might be made the florists' opportunity, with Easter as the great culmination instead of making the day a solitary floral event. Here is a good opening for the publicity campaign.

Production and marketing

Wallace R. Pierson, in his address at Philadelphia, a part of which appears in this issue, made a number of strong points, as might be expected from that thoughtful, yet energetic, young hustler. When he asserts his belief that the selling end of the flower business has not kept pace with the building and production end he knows whereof he speaks. Any observant man ought to be able to see that the big energy has gone into the production of the goods, and, that "the product has been left to take care of itself" is not too strong a statement. It is but a glimmer of light that has yet come to the flower industry on the problem of the popularization and distribution of its products. Every one interested should read and ponder on what Mr. Pierson has to say in this most practical and incisive paper. It touches squarely on the most vital problem which the floricultural interests are called upon to face at the present time—that of *creating a market*.

A proposed seed inspection law

As we go to press a hearing is in progress before the Committee on Agriculture of the Massachusetts Legislature on the proposed seed inspection act, the full text of which is given in this issue of HORTICULTURE. The bill embodies the views of Dr. George E. Stone of Amherst, who has handled the subject in a broad-minded manner and with due consideration for the seed trade, and if any bill for State inspection is to be passed this one has much in it to be commended. It is opposed, however, by local representatives of the trade on the ground that it is not practicable to get uniform tests and reports by the many State Experiment Stations and that it would be better to have a Federal law on which all State Inspectors and the trade could agree and which would not be at variance with local legislation. It is questioned, also, whether the passage of the law would result in the selling of a better grade of seed than is now offered and Boston seedsmen are positive that it would not.

A year full of promise

We are enabled to announce in this issue the distribution of the final schedule and prize list for the big International Exhibition which takes place in New York two months hence; also the issuance of the Annual Report of the S. A. F. for the year 1912. The completed list of State Vice-Presidents and other officials as appointed by President Farquhar and the announcement of the date for the Executive Board meeting at Minneapolis all help to bring national society activities right up to date. And now, "on with the dance." 1913 is destined to be a red-letter year in the annals of American horticulture and that the concrete strength and influence of the S. A. F. with its comprehensive scope and broad policies is now, after its many years of preparatory development, to be impressively demonstrated, seems well assured. Without indulging in either boastful retrospect or over-colored anticipations we may truly say that the national organization has "made good" and will continue to do so with increasing efficiency. It is a source of satisfaction to feel that one has been identified with the early struggling days of an organization which stands for so much today as does the S. A. F.

For a Busy Lent Here we are, right into the Lenten season. Instead of settling down, apathetical and submissive to the ancient bugaboo of dull business in Lent, why not put every faculty to work to contrive ways and means for convince-

THE RED SPIDER QUESTION.

Editor HORTICULTURE:

Dear Sir—Under the heading of "Red Spider vs. Damping Down" I would like to say that I agree with George H. Penson that damping down will to a certain extent keep down the pest. Edwin Jenkins asks what possible effect moisture can have upon red spider. I say it does have an effect. If not, why do they always go to a dry spot in the house and breed there faster than where it is always damp? I hold that if no dry places are allowed in a house it will be much more difficult for them to breed. Two years ago this month I cut down the damping in my cypripedium house and I got a dose of red spider. I fumigated at once but it did not seem to effect them much, but maybe it helped. But I also damped down to such an extent that not a dry spot was to be seen on a walk or anywhere else all day and also I gave a heavy damping when I made my last round at night, about half past ten, and I claim that to have been the chief cause of their eradication. Last year and this I have kept up the damping and I have not seen a sign of the pest. At the time I did have it so bad I would like to state that it was not brought into the house on any other plants as none had been taken in there for months previously. I further agree with Mr. Penson when he says spider always makes its first appearance on a peach tree right where the foliage touches the pipes or hangs over a main. These places are very difficult to keep moist on account of the heat. But with a little special care at these points a lot of trouble can be saved. Mr. Jenkins claims that heated air has a greater capacity for moisture, and I agree with him there, but when he says that the chances are that there is a greater amount of moisture at the above mentioned places I beg to differ, as heat rises and you will find that the moisture settles on the roof when the walks are quite dry. The above is a very interesting topic amongst most gardeners and I would like to see some more opinions expressed under this heading.

I notice in the account in your Feb. 1st issue of the Nepenthes house at Kew that you spell the name of the "Cats Head Flower" wrongly, according to what I always understood, and I think you will find that instead of *Tacca cristata* it is *Ataccia cristata*.

Yours sincerely,
MERLIN HARRIS.

Pittsburgh, Pa.

Nicholson gives *Ataccia cristata* as a synonym of *Tacca cristata*, the latter name being given the preference.—ED.

A PARK CONSERVATORY FOR BOSTON.

A new horticultural building to cost at least \$100,000 will be erected on the Fenway or some other public grounds in Boston as soon as Mayor Fitzgerald can get the City Council to transfer the necessary money from the Parkman fund income, according to a recent announcement. At the next meeting of the Council, the mayor will call upon that body to provide \$5,000 for plans and specifications for a new structure, and it is hoped to get the building under way at once.

JOHN N. MAY RETIRES.

John N. May, the veteran rose grower of Summit, N. J., announces that on February 1 he transferred to his son Harry O. May the business

JOHN N. MAY

which he has conducted for so many years on Pine Grove avenue. Harry O. May is well qualified to take up the business and conduct it with success. He has been trained in rose-growing from his boyhood and knows it from

HARRY O. MAY

A to Z. As our readers know, he has for a number of years held the office of treasurer of the American Rose Society. A host of staunch friends will join us in wishing John N. May many years of health and comfort in his well-earned leisure.

TO LENGTHEN LILY STEMS.

We noted an experiment at Julius Roehrs' last week which seems to promise success. To obviate the short stalks which are so common to the Easter lilies of late the stubby plants were caged over with a shading of paper about a foot above the pots. The semi-darkness causes the stems to draw up rapidly before forming buds, after which they are gradually exposed to full light.

BRITISH HORTICULTURE.

The Sweet Pea Annual.

The new annual issued by the National Sweet Pea Society is filled with informative matter dealing with this increasingly popular flower. Growers will welcome the inclusion of the scientific paper by Major Hurst on "Rogues in Sweet Peas," read at the society's conference, together with the instructive discussion which followed. W. Cuthbertson (Dobbie and Co.) has some interesting comments on the raising of new varieties, a subject on which he is well qualified to express opinion. Some American impressions on last year's show are given by Lester L. Morse, of San Francisco. The writer is very enthusiastic on what he describes as a "marvelous" show. "I had heard and read," he writes, "much about the wonderful results the English sweet pea grower secures in size of bloom, length of stem, breadth of leaf, etc., but I was not prepared for the impressions these giants would make on me." Mr. Morse comments on the confusion of names caused by the placing of synonymous kinds on the market. "A hundred varieties I thought I easily recognized were shown under names I had never heard of, and frequently one variety bore four to six names." Some useful hints on tackling streak disease are given in an article by J. A. Bull, who advises special manurial treatment. The book is well up to the high standard previously reached.

W. H. ADSETT.

GARDENER AND GRADUATE.

Dear Editor:—If in my letter I implied that Mr. Jenkins thought it was necessary for gardeners to go to college, then I apologize, but what I really meant to convey was that gardeners have very little reason to fear the invasion of college graduates into the field of estate management, and I am still of the same opinion, lacking convincing testimony to the contrary. The mere quoting of the fact that one or more graduates hold positions as superintendents is no more convincing than the fact that I know a man who is neither a graduate or a gardener, who is also a superintendent of an estate; he is a retired sea captain.

I must disclaim that I said the analysis of a soil can be had by "feel and look." Mr. Jenkins alters the word feel to touch, a far different word. There are means of telling whether a field lacks either lime or nitrogen without analysis as possibly Mr. Jenkins is aware. There are places where the college graduates have woefully failed, and other places where the college graduate superintendent has been compelled to recognize the gardener under him as being a worthy competitor. I wish to thank Mr. Jenkins for opening the way to a discussion, for it is thus we learn.

VERNON T. SHERWOOD.

February 3, 1913.

HORTICULTURE:

Enclosed please find \$1.00, my subscription for your valuable paper; should feel lost without it.

Yours very truly,

O. A. H.

Greenwich, Conn.

INTERNATIONAL FLOWER SHOW

GRAND CENTRAL PALACE, NEW YORK, APRIL 5 TO 12, 1913.

The final schedule of Prizes for the Third National Flower Show of the Society of American Florist and Ornamental Horticulturists and Contributing Societies in Co-operation with the International Exposition Company, has been issued and copies may now be obtained on application to Secretary John Young, 54 W. 28th St., New York City.

We shall not attempt to publish the entire list of prizes at the present time. Our readers can have them in more convenient and preferable form in the regular official publication, which is a 44-page pamphlet, well-printed in large type on heavy paper and including all the rules, scales of points, etc., of the Flower Show Committee and the various contributing societies. There are 563 distinct classes each providing one, two or three cash prizes, cups or medals. In addition to the extensive lists offered by the Society of American Florists, American Carnation Society, American Gladiolus Society, American Rose Society, and American Sweet Pea Society in their respective sections, silver cups or gold, silver and bronze medals are contributed by the following named societies:

American Institute of the City of New York, Chrysanthemum Society of America, Dutchess County Horticultural Society, Elberon Horticultural Society, Horticultural Society of Chicago, Horticultural Club of Boston, Horticultural Society of New York, International Exposition Company, Lenox Horticultural Society, Morris County Gardeners' and Florists' Society, Massachusetts Horticultural Society, Nassau County Horticultural Society, National Association of Gardeners, New Jersey Floricultural Society, Newport Horticultural Society, New York and New Jersey Association of Plant Growers, New York Florists' Club, North Westchester Horticultural Society, Paterson Floricultural Society, The Perpetual Flowering Carnation Society of England, Southampton Horticultural Society, Tarrytown Horticultural Society, Westchester and Fairfield Horticultural Society, Gardeners' and Florists' Club of Boston, Missouri Botanical Garden.

Donations and special prizes of cups or cash are credited to 33 commercial firms in various parts of this country and abroad, also from 13 amateur patrons of horticulture.

Entries must be in the secretary's hands not later than March 30th. A charge of \$2.00 will be assessed for every entry made after this date and the management reserves the right to reject any and all entries received after March 30th. All entries other than for the rose, carnation, sweet pea and gladiolus societies, should be sent to John Young secretary, S. A. F. and O. H., International Flower Show, New Grand Central Palace, 46th street and Lexington avenue, New York.

Entries for all the rose classes should be forwarded so as to reach the secretary, Benjamin Hammond, Fishkill-on-Hudson, N. Y., not later than March 29th, 1913.

All carnation entries must be in the hands of the secretary, A. F. J. Baur, Indianapolis, Ind., not later than March

26th. Exhibitors from a distance will please note the date and mail accordingly. A charge of \$2.00 will be made for each entry made later than March 26th.

Sweet pea entries will be received up to 10 o'clock on the day previous to the exhibition. A great favor will be conferred, however, by earlier notification. Entries must be made on the forms supplied by the secretary, Harry A. Bunyard, 342 W. 14th street, N. Y. C.

All gladiolus entries must be made to the secretary, L. Merton Gage, South Natick, Mass., not later than one week before the first day of the exhibition, on blanks provided by the secretary for the purpose.

Intending exhibitors should note very carefully the days on which the different classes will be staged.

Copies of the official schedule may be had by anyone calling at the office of HORTICULTURE, 11 Hamilton Place, Boston, where a stock will be kept constantly on hand, and any information will be cheerfully given to intending exhibitors or prospective visitors to the show.

Lectures, Trade Exhibition and Other Features.

The feature program for the show, while not yet completed, will include free lectures to the public every afternoon and evening. President Farquhar of the S. A. F. will speak on "Gardens of Japan." J. Otto Thilow, of Philadelphia will lecture on "A trip through the Canadian Rockies." E. H. Wilson, of Boston, will speak on "Chinese Plants." F. W. Brown, of Buffalo, has kindly consented to give his ideas on "Floral Arrangement and Art." R. F. Felton, of London, Eng., it is also hoped will speak on "Floral Decorations as used at the British Court." Other well known lecturers will be Leonard Barron, of The Garden Magazine; George V. Nash, of the New York Botanical Garden; J. H. McFarland, of the McFarland Publicity Co., Harrisburg, Pa.; and Miss Beatrice Jones, of New York, the well-known landscape artist. The lecture room, which is on the third floor of the Palace, will be used by members of the different societies for their meetings in the mornings; definite dates will be set for each society as soon as the program is properly arranged.

The board of jurors, composed of about sixty well posted men in American horticulture, will work in conjunction with about a dozen European gentlemen, in order that the show may be judged expeditiously and the prizes all awarded before the building is opened to the public.

Arrangements are being made to have the music in keeping with the magnitude and importance of the event.

Some of the commercial firms think the price of 75c., \$1 and \$1.50 per ft. (according to location) for space in the trade exhibition section is too high, but it must be remembered that conditions in New York are very different from those found in small towns. Mr. Young still has a few good locations for sale, and, as purely a business proposition anyone interested who does

not have space in this show will surely regret the fact, afterward. The building in which the show will be held (of which a very fine picture appears on the back of the Final Schedule of Prizes) rents for \$2000 per day; the lighting and other essentials are additional items; and while the S. A. F. & O. H. has an agreement with the International Exposition Co., which relieves the society of much direct responsibility, still it will have to be provided for. The cost of space, however, if any business man will sit down and conscientiously figure it out, is really very little considering the fact that automobile shows in the same building rented their space for from \$3 to \$5 per foot; and also considering the fact that an exhibitor is putting his goods before the greatest buying public in the world. When one considers, too, that more than seventy-five thousand people passed through the gates at a local exhibition one Sunday last fall just to see a chrysanthemum exhibition, the prospects for a record breaking attendance at the International Show looks exceptionally bright.

The International Exposition Company, through its arrangements with the advertising agencies, will have an announcement of the show in all the surface, elevated and subway stations, and in this way it will come to the direct notice of over two million people a day, a great many of whom will be interested in the show.

It is expected that one day will be known as "Society Day," on which day the admission fee will be double that on ordinary days. This will be the big display day of the Rose and Carnation Societies.

J. H. PEPPER,
Chairman Publicity Committee.

AMERICAN ROSE SOCIETY.

The members of the American Rose Society are quite in earnest about putting up a fine show at the coming International Exhibit in New York City. There have been special prizes of considerable value offered by the New York Cut Flower Company which have not yet been finally adjusted, the value being \$200. There is also a special prize from Moore, Hentz & Nash, of a silver cup valued at \$50 for the best six roses; six roses in each entry, no three to be of the same variety, no stem to be longer than twenty inches, the roses of each variety to be judged on their own merits and not by comparison with the other varieties. There is also a special growers' prize, first, second and third, \$15, \$10 and \$7 in cash. This prize is for the actual grower of any exhibit and not for the exhibitor, excepting in the case where he does his own growing. The object is to recognize the man who actually does the good work. This prize was first offered by Frank L. Moore of Chatham, N. J., and has been renewed by someone almost every year since. There is also another special prize reported as coming from Philadelphia, for 75 roses of any variety, excepting American Beauties.

BENJAMIN HAMMOND, Sec.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Officers—President, J. K. M. L. Farquhar, Boston, Mass.; vice-president, Theodore Wirth, Minneapolis, Minn.; secretary, John Young, 54 W. 28th St., New York; treasurer, W. F. Kasting, Buffalo, N. Y. Next convention, Minneapolis, Minn., Aug. 19-22, 1913.

For Full Information, Schedules, Space for Trade Exhibition, etc., write to John Young, Secretary and Manager for Trade Exhibition, 54 West 28th Street, New York City.

President Farquhar has made the following appointments:

State Vice-Presidents.

Ala.—W. B. Paterson, Jr., Montgomery.
 Calif.—(North) Daniel MacRorie, San Francisco. (South) Charles Shaw, Los Angeles.
 Colo.—Charles U. Fohn, Colorado Springs.
 Conn.—Wallace R. Pierson, Cromwell.
 D. of C.—F. H. Kramer, Washington.
 Fla.—C. D. Mills, Jacksonville.
 Ga.—John Wolf, Savannah.
 Ill.—(North) Fred Lautenschlager, Chicago. (South) Frank L. Washburn, Bloomington.
 Ind.—(North) J. S. Stuart, Anderson. (South) Joseph H. Hill, Richmond.
 Iowa—James S. Wilson, Des Moines.
 Kas.—Harrie S. Mueller, Wichita.
 Ky.—Fred Louis Schultz, Louisville.
 La.—Harry Papworth, New Orleans.
 Maine—Charles S. Strout, Biddeford.
 Md.—(South) R. E. Graham, Baltimore. (North) R. A. Vincent, White Marsh.
 Mass.—(East) Wm. P. Edgar, Boston. (West) Prof. E. A. White, Amherst.
 Mich.—(East) Albert Porchelon, Detroit. (West) Elmer D. Smith, Adrian.
 Minn.—Elof P. Holm, St. Paul.
 Mo.—(East) Fred H. Weber, St. Louis. (West) Miss Mary Hayden, Kansas City.
 Miss.—S. W. Crowell, Rich.
 Mont.—T. E. Mills, Helena.
 Neb.—Louis Henderson, Omaha.
 N. H.—Geo. E. Buxton, Nashua.
 N. J.—(North) Joseph Manda, W. Orange. (South) Geo. A. Strohlein, Riverton.
 N. Y.—(East) James McHutchison, N. Y. City. (West) Geo. B. Hart, Rochester.
 N. C.—S. Albert Starr, Goldsboro.
 Ohio—(North) Chas. Graham, Cleveland. (South) J. Chas. McCullough, Cincinnati.
 Okla.—Geo. Stiles, Oklahoma City.
 Ore.—James Forbes, Portland.
 Penn.—(East) David Rust, Philadelphia. (West) Samuel McClements, Pittsburgh.
 R. I.—L. J. Reuter, Westerly.
 S. C.—C. A. Moss, Spartanburg.
 S. D.—E. C. Newbury, Mitchell.
 Tenn.—C. L. Baum, Knoxville.
 Texas—Alex. Millar, Dallas.
 Va.—C. E. Cove, Burlington.
 Va.—H. Brown, Richmond.
 W. Va.—C. P. Dudley, Parkersburg.
 Wash.—Amy L. Lambly, Spokane.
 Wis.—William Currie, Milwaukee.
 Utah—A. J. Alt, Salt Lake City.
 Alberta—A. M. Tirrell, Calgary.
 Manitoba—H. E. Philpott, Winnipeg.
 Ontario—H. Dilleuth, Toronto.
 Quebec—Geo. A. Robinson, Montreal.
 ROTANIST—Prof. A. C. Beal, Ithaca, N. Y.
 PATHOLOGIST—Prof. H. H. Whetzel, Ithaca, N. Y.
 ENTOMOLOGIST—Prof. Thos. B. Symons, College Park, Md.
 WASHINGTON REPRESENTATIVE OF THE SOCIETY—Wm. F. Gude, Washington, D. C.
 COMMITTEE ON SCHOOL GARDENS—Benjamin Hammond, chairman, Fishkill-on-Hudson, N. Y.; C. B. Whitwell, Milwaukee, Wis.; Robert Craig, Philadelphia, Pa.; Michael Barker, Chicago, Ill.; F. R. Pierson, Tarrytown, N. Y.

Department of Plant Registration.

Public notice is hereby given that Richard Diener & Co., Mountain View, Cal., offers for registration the following new geraniums. Any person objecting to the registration or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date:

Flowers Single Except Where Otherwise Noted	Ay. Diameter of Flowers inches	Ay. Diameter of Truss 7-15 inches
Dr. Richard Behrend, cherry crimson.....	2 3/4	7
Jack London, bright shaded red.....	3	7
Julius Eberius, dark cherry scarlet.....	3	6
Dr. Lincoln Cothran, rose-pink, semi-double.....	2 3/4	7
Judge Lindsey, coppery salmon.....	2	6
Fresno, light cherry scarlet.....	2 3/4	6
H. Plath, fiery red.....	2 3/4	6
Anna Eberius, pale coral.....	2 1/2	6
Palo Alto, brownish red to ponceau.....	2 3/4	6
Fire Ball, bright scarlet.....	2 1/4	7
Los Altos, dark scarlet.....	2 3/4	6
Florence Metzner, dark cardinal.....	2	7
Mrs. Edward Stock, shaded rose pink.....	2 1/2	6
La Paloma, snow white.....	2 1/2	6
Tamalpais, cherry red.....	2 1/2	6
J. Stitt Wilson, orange flame.....	2 3/4	7
Ramona, salmon pink.....	2 1/4	8
Fire King, fiery orange.....	2 1/4	6
Sacramento, orange flame.....	2 1/4	6
Luisa Tetrassina, pure white.....	2 1/4	6
Mt. Shasta, snow white.....	2 1/4	7
Rosen, coral pink.....	2 1/4	7
Tacoma, deep salmon pink.....	2 1/2	6
Hawaii, fiery orange.....	2 1/2	6
Mary Garden, salmon to light rose-pink.....	2 1/2	6
Mayor Ralph, cherry scarlet.....	2 1/2	7
Governor Johnson, orange scarlet.....	2 1/2	6
Gifford Pinchoi, burnt orange and crimson.....	2 1/4	6
Gertrude Atherton, white and salmon-pink.....	2 1/4	7
Richard Diener, dark rose-pink, single and semi-double.....	2 1/2	6
Mt. Hamilton, apple blossom pink.....	2 1/2	6
Alviso, white to light pink.....	2 1/2	6
Sunnyvale, deep salmon.....	2 1/4	6
Snow Bird, snow white.....	2 1/4	6
Gilroy, carmine and scarlet.....	2 1/4	6
Tivoli, white and shaded crimson.....	2 1/2	6
White Beauty, white and light pink.....	2 1/2	6
Billie Burke, dark shrimp pink.....	2 1/2	6
Fritz Scheff, shaded rose and salmon.....	2 1/2	6

Mrs. William S. Kimball, Rochester, N. Y., offers for registration the following described new orchid.

Raisers' Description.—The plant is a sport from the well-known *Cypripedium Harrisianum* differing from the original as follows: The habit of the growth is short and compact and the plant is very floriferous. The leaves are much narrower and have a bright glossy surface. The flower scape is of

greenish color, six to nine inches in height. The flower is of medium size, beautifully formed and of a light greenish color, slightly shaded, the staminode being perfectly green.

The name which I wish to give to the above described Orchid is *Cypripedium Harrisianum* "Laura Mitchell Kimball."

JOHN YOUNG, Secretary.

January 31, 1913.

President Farquhar has called a meeting of the Board of Directors for February 25, at 10 A. M., at the Hotel Radisson, Minneapolis.

JOHN YOUNG, Secretary.

AMERICAN ENTERPRISE.

From a grower's point of view, perhaps the most striking exhibit at the R. H. S. on Tuesday last was the vase of the new American Rose, Mrs. Charles Russell, brought over from the other side by Mr. Manda, of St. Albans. We have all been reading the descriptions of this new rose in the press, but little thought we should see it in the "natural" for some time. Now who on earth in this little island would have dared to cut thirty to forty roses, with an idea of exhibiting them in New York ten to twelve days hence? Yet this idea occurred to Mr. Manda, and what is more, it "came off," for not only did he bring the rose across, but placed it before the Floral Committee of the R. H. S., and gained an Award of Merit. If this does not "lick creation," I should like a better example! —*Nurseryman and Seedsman, London.*

The Connecticut Nurserymen's Association will meet on Feb. 12th at the Experiment Station in New Haven.

MID-WINTER FLOWER SHOW.

The mid-winter flower show at Horticultural Hall, Boston, on February 1 and 2 drew an unusually large attendance. The show compared favorably with its predecessors in extent and quality. A remarkably handsome plant of *Chorozema Lowii* attracted much attention as did also a grand display of pansy blooms by William Sim and amaryllis from Mrs. C. G. Weld. William Whitman was represented by splendid specimens of *Primula stellata*, *siemensis* and *obconica* and Mrs. Fred Ayer by fine plants of *Primula malacoides* and *Erica melanthera*. Mrs. J. L. Gardner showed fine groups of hard wooded greenhouse plants, bulbous plants, etc., and E. B. Dune showed an excellent group of lilacs, acacias and ericas. There was an unusual showing of carnations from S. J. Goddard, A. A. Pembroke, Patten & Co., A. W. Preston, W. D. Howard and others. H. Huebner showed his new winter-flowering snapdragons. John Barr was awarded a certificate of merit for carnation Mrs. P. Cheney, Mrs. Lester Leland, cultural certificate for display of *Cyclamen superba*, Knight & Struck honorable mention for collection of hard-wooded plants and Mrs. J. L. Gardner honorable mention for *Aphelandra*.

CLUBS AND SOCIETIES

NEW ENGLAND DAHLIA SOCIETY.

The seventh annual meeting of the New England Dahlia Society was called to order by President J. K. Alexander at Horticultural Hall, Boston, Jan. 29th. Following the reading and adoption of the minutes of last meeting came the election of officers for 1913. John K. Alexander of East Bridgewater was unanimously re-elected to a third term as president, W. C. Brady of Wollaston, Mass., was re-elected vice-president; J. Herbert Alexander of East Bridgewater, Mass., was elected secretary, and George L. Stillman of Westerly, R. I., was elected treasurer. The Executive Committee resulted as follows: Edgar W. Ela, Woburn, Mass., J. H. Flint, Salem, Mass., C. N. Bacon, Holliston, Mass., L. B. R. Briggs, Cambridge, Mass., and Parker A. Mansfield of Malden, Mass.

Following the election Maurice Fuld, the representative of H. F. Michell Co. of Philadelphia, gave an exceedingly interesting address, stating facts regarding the progress and development of the society, and making valuable suggestions.

A communication from the Massachusetts Horticultural Society, inviting the New England Dahlia Society to hold their Annual Dahlia Exhibition jointly with them, was referred to a committee which after an interview with William P. Rich, secretary of the Massachusetts Horticultural Society, reported favorably, recommending that each society should use their own exhibition rules and regulations, and offer their own prizes in their own name. The new England Dahlia Society then voted to hold its Annual Dahlia Exhibition the 12th, 13th and 14th of September, and to help make this the largest dahlia exhibition ever held in this country. Secretary Alexander says:

"We ought to have a full thousand members before the 1913 show is held. Twenty-eight American states, including Porto Rico, and five foreign countries are already represented in our list. The New England Dahlia Society issues quarterly a "Dahlia News" which deals with all phases of dahlia life, a paper of great value to our dahlia loving members.

AMERICAN ASSOCIATION OF NURSERYMEN.

I have recently been appointed chairman of the Exhibits committee of the American Association of Nurserymen, also the joint convention of the Pacific Coast Association, which meets at the same time. I would be pleased to have all eastern parties who desire to make exhibits for this convention send word at as early date as possible for what they intend to exhibit and about the amount of space it will require, so we can make ample arrangements to handle all exhibits. We hope to make this convention the largest and best one that has ever been held by the American Association and we need the hearty cooperation of all to insure success. Intending exhibitors please write

FRANK W. POWER,
Orencia, Oregon.

J. K. ALEXANDER

Re-elected President of New England Dahlia Society for a Third Term.

By re-electing John K. Alexander of East Bridgewater, Mass., president of the New England Dahlia Society the members have chosen one of the most able and skilled dahlia specialists. There are none among the visitors to the New England Dahlia Society's show or the Massachusetts Horticultural Society's annual dahlia exhibition, who does not hold in pleasant memory his gigantic displays. His establishment at East Bridgewater has been the Mecca to which many pilgrim dahlia lovers have journeyed for practical ideas. A large storage plant, containing 11,700 cu. ft. of storage room and 4680 sq. ft. of floor space has recently been added.

ELBERON HORTICULTURAL SOCIETY.

The regular monthly meeting of the Elberon Horticultural Society was held on Monday, Feb. 3rd. The judges' decisions were as follows: W. R. Seymour, white seedling carnation, 95 points; George Masson, callas, 80; Chas. O. Duncan, carnations, 70; Chas. Russell, freesia Purity, 90. In the competition for points for the past year for those without greenhouses, August Grieb was first and Ed. O'Rourke second. It was decided to hold a horticultural ball on Easter Monday and to make it an annual affair. The annual euchre which was held on Jan. 29th proved the best the society ever held. The meeting was continued with an interesting talk by Anthony Bauer on his trip to Europe the past summer of what he saw in the horticultural line. At the next meeting, March 3rd, Wm. Turner of Oceanic, N. Y., will read a paper on the "Culture of Orchids."

W. R. SEYMOUR, Ass't Sec.

FLORISTS' CLUB OF WASHINGTON.

The members of the Florists' Club of Washington were disappointed at the failure of one of the express companies to make delivery of flowers in time for exhibition at their February meeting. S. S. Skidelsky & Co. and the S. S. Pennock-Meehan Company had each promised a few of the new roses which were to have included Irish Fire Flame, Mrs. Charles Russell, Jeannette, Milady, and others.

Their disappointment, however, was soon overshadowed by the "excitement" incident to the placing of names in nomination to be acted upon at the next meeting to serve in the various chairs during the ensuing twelve months. There will be something doing at the March meeting for the rivalry for the various positions will be very keen. The following is a list of the nominations: For president, David J. Grilbortzer (present incumbent), O. A. C. Oehmler (now secretary), and Otto Bauer (now first vice-president); for vice-president, Otto Bauer and George Cooke; for secretary, E. C. Mayberry and George Dalglish; for treasurer, W. F. Gude (present incumbent). Two trustees are to be selected each to serve for three years, and the following are the nominees: David Bissett, Peter Bissett, John Gutman, John Anderson, William H. Ernest and R. S. Jenkins.

It is expected that the local florists will occupy an entire car on the occasion of the trip to New York at the time of the annual rose show, a special rate having been accorded the club by one of the railroads.

The attendance was unusually good and considerable merriment prevailed while those present gathered around the long table where a luncheon had been spread.

C. L. L.

FLORISTS' CLUB OF PHILADELPHIA.

The best attended meeting for many moons. Wallace R. Pierson, of Cromwell, Conn., was the attraction. As Robert Craig stated it: This was an honor to our club, and we all appreciated the fine work Mr. Pierson was doing in this and other cities. Charles H. Totty spoke on the arrangements for the big flower show in April in New York and warned us that we must not think that the New York provincialism should sway us in staying out as the affair was national in its scope, and that it was not a New York but an S. A. F. affair. John Young, the secretary of the S. A. F., made one of the finest speeches we have ever heard. Along the same lines. M. C. Ebel of Madison, N. J., gave us much good advice about publicity. Robert Kift spoke; also Alfred M. Campbell. Then some others:—among them C. H. Fox, A. Farenwald and Al. Campbell. On the whole it was a fine meeting. Lots of them were there that we have never seen at a meeting before. The new essay committee has started something. Let them keep it up.

There were some fine rose and carnation exhibits. The report of the committee—forgive our pungent pen—it sounded like a footless stocking

without a leg. If you wish us to diagnose that proposition you will put us in line for the "diplomat" prize! That committee ought to be waked up.

CLUB AND SOCIETY NOTES.

The Gardeners' and Florists' Club of Baltimore will hold their semi-monthly meeting in Florists' Exchange Hall, on Monday, February 10, at 8 P. M.

The meeting of the New York Florists' Club next Monday night will be "Carnation Night." By special request all growers are invited to send in any novelties in carnations or other flowers for the inspection of the club.

Officers for 1913 have been elected by the Spokane, Wash., Horticultural Society are as follows: John W. Duncan, president; Denton M. Crow, vice-president; Alexander Carr, secretary; A. F. Kelly, treasurer. Executive committee: William J. Burnette, Samuel Younkin and Adam Noble.

The St. Louis Florist Club will hold its "Publicity" meeting, Feb. 13, at 2 o'clock. President Weber, Secretary Beneke and Chairman Ossick of the trustees are lining up the members and have a promise of a large attendance. There will also be plenty of good cigars for the smokers to burn up.

The Nebraska State Florists' Society met on January 22 at the Lindell hotel, Lincoln. Officers for the ensuing year elected were: Ed. Williams, Grand Island, president; J. W. Lawson, York, vice-president; Louis Henderson, Omaha, secretary, and J. E. Atkinson, Pawnee City, treasurer; board of directors named were: C. H. Frey, Lincoln; W. E. Davidson, York, and Harry Pence, Falls City.

At the meeting of the Central New York Horticultural Society held in Butler Hall, New Hartford, January 24, the members discussed "The Perennial Flower Garden," and many interesting points in raising flowers were suggested. There was a large attendance, good interest being shown by all present. February 14, C. H. Totty of Madison, N. J., will give a talk upon "The Culture of Chrysanthemums."

On Saturday afternoon, February 1, a large and interested audience heard the third lecture of the regular series given by the Massachusetts Horticultural Society at Boston. Prof. B. S. Pickett of Urbana, Ill., gave an interesting talk on "The Factors Influencing the Formation of Fruit Buds in Apple Trees," an especially timely subject at this moment owing to general interest in fruit culture in the East.

The next lecture will be on Saturday, February 8, by W. W. Tracy of Washington, D. C., on "The Adaptation of Local Grown Seed to Local Conditions."

At a meeting of gladiolus growers at Cleveland, Feb. 1st, 1913, in response to a previous call, The Gladiolus Society of Ohio was organized, a constitution adopted and officers elected as follows: President, C. Betscher, Canal Dover, O.; vice-president, Mrs. A. H. Austin, Wayland, O.; secretary and treasurer, Wilbur A. Christy, Warren, O. An executive committee was also ordered, consisting of Messrs. Al-

ford, Crawford and Huntington. Other committees were also named, and the society is ready for business. The membership is not to be confined exclusively to Ohio, as the name might seem to indicate, and the society hopes to co-operate in a friendly way with other organizations of similar purpose, in testing and exhibiting varieties of its specialty.

WILBUR A. CHRISTY, Sec.

Breck's Club, composed of salesmen connected with Joseph Breck & Sons, Corp., Boston, held its regular monthly meeting and dinner on the evening of February 1 at the Quincy House. The following officers were re-elected for the ensuing year: President, James T. Carroll; vice-president, Henry L. Haynes; secretary, George H. Sibley; treasurer, William J. Collins; executive committee, William F. Wilson, Harry L. Stewart and Guy C. Small. The principal speaker, George D. Winchester of the Bradley Fertilizer Company, spoke on commercial fertilizers and chemicals. An entertainment by members of the club followed. Music was furnished by Breck's orchestra, Robert E. Montgomery, leader. Alfred E. Robinson of the Breck-Robinson Nursery Company will address the club at its next meeting: subject, "Modern, Up-to-Date Nursery Methods."

After a contest for the presidency involving the reorganization of the Tacoma (Wash.) Dahlia Society into a model of the English Shropshire Horticultural Society, the Tacoma society has decided to remain as it is and re-elected the majority of its incumbent officers for the succeeding year.

President W. H. Reed took the chair with a vigorous denunciation of the plan to change the society, and of the projectors of the plan, and was then re-elected president in a three-cornered contest with George M. Lee, treasurer, and George A. Hill, superintendent of parks of Tacoma.

Mrs. Belle Freeman and Mrs. W. S. Cutler were then by viva voce vote re-elected first and second vice-presidents of the society respectively.

For secretary, Miss Marguerite McConihe and Mrs. W. D. C. Spike were nominated. Miss McConihe declined the nomination and the election was tendered Mrs. Spike unanimously.

For treasurer, George M. Lee, incumbent, was re-elected unanimously, F. Graham declining a nomination in opposition.

At Wyoming Park, which is a suburb of Grand Rapids, Mich., a club of women has done so much in the way of landscape gardening, floriculture and beautifying lawns that a new clubhouse is to be built for them in the spring. This organization, known as the Wyoming Park Garden club, is the only club of its kind in the city or vicinity, and its object is to study flowers, shrubs, lawn decoration and landscape gardening, and it has been an important factor in adding to the attractive and home-like appearance of the flourishing suburb. Although this club is just rounding out the first year of its existence, having been organized last March, the commuters have appreciated their work to the extent that the firm H. H. Wilson & Co. is

planning to build a clubhouse which shall be an ornament to the place. During the year the club has acquired the nucleus for a library, having a number of authoritative books on the subjects pertaining to everything essential to gardening and floriculture, also the leading magazines along that line. Talks on gardening are given from time to time by prominent persons interested in gardening, one of the best having been given by Charles W. Garfield. Flower shows, lawn and garden contests will be held next summer. Besides the regular offices the club has a board of gardeners, a photographic committee, committee on admissions and librarian. Mrs. G. K. Mosher of Ivenrest is president of the club.

PERSONAL.

Jacob Umlaff will take charge of the new city greenhouses on Capital Hill, Seattle, Wash.

J. Canning, of Ardsly, N. Y., sailed for Europe on the Carmania, on Wednesday, Feb. 4.

William Plumb has taken a position with the Bound Brook Nurseries, Bound Brook, N. J.

Carl Becker of Cambridge, Mass., was married on January 28th to Miss Churchill of Plymouth.

Henry Rohrbach of Baden, Mo., and Miss Anna Schultz of St. Louis were married on January 24th.

Robert Halliday of Baltimore, who has been ill for some time, has recovered and is able to be about again.

Mrs. Adolphus Gude and two daughters of Washington, D. C., are spending a few weeks at Saranac Lake, N. Y.

D. J. Dudley, Jr., member of the firm of Dudley & Son, Parkersburg, W. Va., will be married to Miss Julia Savage on Feb. 12th.

Roy Erb, recently employed at Wenatchee, has taken charge of the L. W. McCoy floral establishment at Madison Park, Seattle, Wash.

L. W. Kervan of The Kervan Company, West 28th street, New York, has gone to spend a few weeks at Miami, Fla.

M. W. Stallings, an employee of the Nunnally Company, Atlanta, Ga., was married on Jan. 22nd to Miss Alice Webster who has also been an employee of the same company for several years.

New York Visitors—Wm. Kleinheinz, Ogontz, Pa.; Arnold Ringier, Chicago.

Boston visitors: W. R. Cobb, Lord & Burnham Co., New York; F. G. Sealey, representing Julius Roehrs Co., Ruthersford, N. J.; Robert Schoch, representing M. Rice Co., Phila.; Maurice Fuld, representing H. F. Michell Co., Phila.; J. S. Hay, representing H. A. Dreer, Phila.; E. J. Fancourt, of S. S. Pen-nock-Meehan Co., Phila.; A. E. Thatcher, Bar Harbor, Me.; Prof. E. A. White, Amherst, Mass.; Eugene Dailledouze, Brooklyn, N. Y.; C. W. Brownell, Walden, N. Y.

THE FLORIST AND HIS MARKET.

(A paper read before the Florists' Club of Philadelphia, Feb. 5, 1913, by Wallace R. Pierson.)

In taking a subject for my talk to you this evening that is as broad as this, I have a reason for so doing and that reason I wish to express in just as plain English as the law allows. We are all in the same boat—retailer, wholesaler, large grower, small grower—whoever is dependent upon the florist business for a living. What I have to say tonight deals with not one market or another as the term is commonly understood but largely with the great market that is everywhere—"the people." We may raise what we will, buy and sell among ourselves, but that is not our market nor our ultimate end. We must reach out and bring money into our business from outside just as outside industries are dependent on us to support them. We have been considered a luxury in years past, and we want to be considered a necessity, and when the flower business is once settled on that basis it will continue to grow in proportion to the population.

Production Growing Most Rapidly.

For some years past it has been growing out of proportion to the population and anticipated demand has caused a building boom that has added much to the glass area and very little to the organization of the flower industry. The public has caught some of the spirit and would catch more were we, as real business men, doing our part to teach them that our product has become to them a necessity rather than a luxury and that, as a necessity, at almost all times in the year flowers are within reach of the average pocket-book.

The statement that I have made and which will, in my opinion, bear repeating although perhaps in different language is that the selling end of the greenhouse game has not kept up with the building end and this I firmly believe. Our energy has gone into production leaving the product to take care of itself or to be taken care of by those who have a customer in sight, but no selling organization has been perfected that aids in moving the output at all times to the best advantage. We have a business no one can corner. Our goods are produced from the soil; our products are perishable. Our quality is a personal matter. Were all the glass built in the last ten years constructed by a florist trust it would be no small concern. Do you believe for one minute that such an organization would sit idly by and allow the product to sell itself? I doubt it. Now, I'm not here knocking the wholesaler for he does his best to sell to advantage and the retailer no doubt tries in his way to reach the people, but I am trying to impress on you the one fact that we are all in one boat and that boat is drifting for lack of some power that is not gasoline.

The Retailer's "Snap."

The retail florist without glass in any city is perhaps the most independent one of our fraternity. All he has to do is to stop buying and he is out of business. All his assets—usually the case should he fail—are an unexpired lease, some poor accounts and an ice-box. I wager that nine out of ten of these men are above realizing that they are with us in the boat, that

our success is theirs although we all know how much of their failures is ours. The retail florist so situated with relation to what he sells is not independent, for the source of supply rules, but he will continue to rule so long as the producers allow it and no longer. The retailer who realizes that he is in the boat and that the welfare of the one is the welfare of all is usually the man with the busy store who is trying to help move stock, and who by so doing has increased his business. These men are the salvation of the grower.

The Lucky Man.

Then there is the retailer who grows his own product. I could almost defy you to name one who is not successful. I can name many that are and some of them are among our best known men in the profession, and why are

WALLACE R. PIERSON

they? Because they grow the goods and must sell it. There is business instinct there. They cannot sign over the ice-box and leave the janitor to wash their name from the window. The spirit of self-preservation keeps them at the task and I would be almost willing to state that they enjoy being business men in the modern sense of the word. You will find the advertisements of these men in the daily papers of their home towns and people with moderate means in their stores buying flowers. Some of these men were growers first who took up the retail end, because of the failure of existing flower stores to move their output at paying prices to them as producers, and others are growers to maintain a supply they must have. But, however they got into it doesn't alter the fact that they have invested capital and brains and are keeping both working to get to the one market we all want to reach—"the people."

The small grower who places his product direct is fortunate. He is in a class by himself and yet in this paper is considered one of the crowd in the boat, for his welfare is dependent on us all. Unless the retailers with whom he deals directly are above par he is getting below par for his stock. That is the way I've found it. When the market drops they drop him but they stick to him hard and

when it goes up. This grower ends by becoming one of the class who ship their product to the wholesale market to share the honor of shipping to the big city with a lot of others to get less than he got before his product, and finally he stays out in the suburbs and advertises his carnations and roses "at the greenhouse." The next season he has a new show-house in front and a delivery car, and so far as the market is concerned he becomes a buyer rather than a shipper, advertising in the local papers having brought business to him and made him independent to a large extent.

Be a Specialist.

The small florist out in the country is not located so that this is practical. How can he better himself? By being a specialist. Grow the one crop that you can do well—maybe roses, maybe snapdragons—only grow it well. Keep up the supply and the business is yours for the specialist gets to be known and his goods in demand. There is no place today in the big cities for job lots and this the small florist must realize or be the loser. The odds-and-ends of stock from a small grower, although perhaps of good quality, are in the same class with a few odd roses of unusual excellence. They don't bring what they are worth and the competition of the specialist and of the large concerns is too strenuous for a mixed lot from the country. That takes in all of them, for the large grower specializes in more than one line but each department is capable of holding its own as a rule, and the big places by holding a steady supply can maintain a sale for their goods and can, as a rule, produce better goods for the money than the small places that do not specialize. The wholesale house is between them all—a clearing house, a necessary evil—but a link in the chain that binds every man dependent on flowers for a livelihood with a common bond, and we must realize that this chain is no stronger than its weakest link.

A Common Bond of Fellowship.

That bond is the cause for which we should work. To strengthen it should be our mission; the assimilating of the idea of common fellowship in the trade will be the tie that binds. Some of that spirit has been in the air this season and that spirit, we may hope, will be the yeast that will leaven the whole but the working is slow, though if successful it will not be in vain. One of the strong links in the chain is the S. A. F. and this must be the foundation upon which to build.

(To be continued.)

DETROIT NOTES.

Mr. and Mrs. E. A. Feters visited their old hunting grounds in Toledo, making the new Stoddard Hotel their headquarters.

Wm. Barthell, for several years with Mr. Theo. Michell, has opened a store at Gratiot and Mt. Elliott streets, a naturally busy corner, besides being an important transfer point.

The Michigan Cut Flower Exchange receives occasionally a nice lot of Philadelphia carnations which are quickly bought up and retailed as high as \$2 per dozen.

Visitors—Chas. Schwacke and Jos. E. Rolker, New York; Martin Reukauf, Philadelphia, Pa.; Adolph Bohlinger, Bay City, Mich.

1892—BOSTON FLOWER EXCHANGE, Inc.—1913

OPEN THEIR

NEW FLOWER MARKET

In the heart of the Wholesale Flower District, Corner Otis Street and Winthrop Square,
Between Summer and Franklin Sts., Boston, Mass., SATURDAY, FEBRUARY 15,

WITH A

RECEPTION AND FLOWER SHOW

Cordial invitation extended to all.

Exhibits or undisseminated varieties of Carnations, Roses or Plants solicited. If exhibitor is unable to be present, send to FLOWER SHOW, No. 1 and 3 Winthrop Sq., Boston, Mass., in care of any of the following Committees:

During Recess.

Bar Harbor Horticultural Society.

The fifth annual ball of the above society was held on the evening of January 30th and in every way proved a great success. The decorations are always a feature of the event and this year they surpassed anything previously seen, many of the gardeners assisting. The roof and sides of the hall were decorated with evergreens to represent a pergola and in the center of the hall a large fountain was playing over colored lights. This was a very attractive feature and was handsomely decorated with some fine callas. The decorations on the stage carried out by the Mt. Desert Nurseries were extensive and beautiful. Forsythias in full flower, masses of Roman hyacinths, scarlet geraniums, paper white narcissus and some superb amaryllis all helped to make a very fine display.

This society is to be congratulated upon the beautiful decorations, and we understand that plans are being made to have next year's display surpass all its predecessors.

Morris County Gardeners' and Florists' Society.

The annual dinner of the Morris County Gardeners' and Florists' Society took place at Piper's Hotel, Morristown, N. J., on the evening of Tuesday, Jan. 28, about 140 being present, including many members of the trade and affiliating societies from a distance. W. F. Sheridan, made a very ac-

ceptable toastmaster. President Seibrecht, of the New York Florists' Club, A. Herrington, W. H. Duckham, C. B. Weathered, A. T. Boddington, C. H. Totty, M. C. Ebel, J. H. Sperry, W. Turner, W. E. Maynard and other "war horses" were among the oratorical performers. Mr. Duckham presented, on behalf of the society, a silver tea service to Secretary Ed. Reagan, who made an appreciative response.

Oyster Bay Horticultural Society.

The Oyster Bay, N. Y., Horticultural Society held its first annual banquet on the evening of January 29. Organized only last April this society has made rapid progress and now has 120 regular members and 11 life and honorary.

There were 70 present at the banquet. The decorations were very lavish, consisting of flowers and blooming plants. Among the well-known members of the craft present were Jas. T. Scott, P. Hamilton Goodsell, Wm. Plumb, W. A. Sperling, W. E. Maynard, J. F. Johnston, Jack Everitt, Alex. McKenzie, Andrew Wilson, Wm. Eccles, John T. Ingram, Jos. Robertson and others. J. Austin Shaw officiated as toastmaster and there was plenty of singing sandwiched in between the many speeches.

The bowling team of the Florists' Club of Washington are about to issue a challenge to similar clubs with a view to getting a couple of matched games at the time of the rose show soon to be held in New York City. Captain Ernest is whipping his team into shape to bring home all the laurels in sight.

The Yonkers Horticultural Society held its annual dinner last week and the affair was a glorious and hilarious success. C. H. Totty of Madison, N. J., served as toastmaster. All the horticultural organizations of the section were represented by prominent members and oratory was on tap till the "we sma'" hours.

Secretary M. C. Ebel states that the National Association of Gardeners has engaged the entire floor of Thum's bowling alleys on Broadway, New York, for a bowling tournament on Wednesday, April 9th, at the time of the National Flower Show, when the members of the S. A. F. will be invited to compete against the N. A. G. both in team work and individual bowling.

Obituary.

Thomas V. Munson.

Thomas Volney Munson, D. Sc., well known as nurseryman and conspicuous as viticulturist, died in his seventieth year Wednesday morning, January 22, at Denison, Tex. His father was a native of Wakefield, N. H., and his childhood and youth were spent in Colchester, Vt. Thomas V. was born in Astoria, Ill., and he became a graduate of Kentucky University in 1870. That institution employed him one year as instructor in the natural sciences but failing health diverted his energies into the nursery business. He was assistant to his father-in-law for three years, when he started a market garden and nursery near Lincoln, Neb. "In 1874, the hot winds of July cooked his garden and nursery in three days, and on the fourth day, a blackening cloud of Rocky Mountain grasshoppers settled over the face of the land and completely devoured his cooked garden."

In 1876 he removed to Denison, Tex., where he founded nurseries which have been prosperous and are widely known. Outside of his vocation as nurseryman, his specialty was experimental horticulture. "Among my large number of seedling grapes," he has written "many are remarkably fine, and of entirely new and peculiar hybrid strains." His special enthusiasm was expended in originating new fruits.

Mr. Munson had membership and official connection with organizations too various and too numerous to enumerate here. He was president of the State Horticultural Society of Texas and vice-president of the American Pomological Society.

Walter Rasmussen.

Walter, the 2-year-old son of Mr. and Mrs. Scott Rasmussen of Waterbury, Conn., died Monday morning, January 27, the result of falling into a pan of scalding water the day before. After the children had been dressed and were all supposed to be at play in the greenhouses conducted by Mr. Rasmussen, Mrs. Rasmussen prepared to wipe up the kitchen floor. She had set the pan of water down, leaving it for a few moments in the course of her preparations, when suddenly she heard crying and returned to the kitchen to find one of the older children with the baby in her arms, which she had rescued from the hot water. The child had toddled into the house and fallen backwards into the scalding water. His back and legs were entirely scalded, and though medical attendance was quickly called and everything done that could be, he succumbed to his injuries. He was an unusually bright little fellow and the deepest sympathy is felt for his bereaved parents.

Bernard F. Diedrich.

Bernard F. Diedrich, a florist of Alexandria, Va., 68 years of age, died on Saturday, February 1, at his late home, 709 Wythe street, after being confined to his home for twelve weeks with pneumonia. Mr. Diedrich was born in Hanover, Germany, and located in Washington upon coming to

No merchant carries last year styles, and you would not care for old styles; therefore, your customers demand new varieties of Carnations of the "Better Kind," and it is up to you to furnish them with up-to-date novelties such as our New Scarlet Carnation

THE HERALD

Besides, this is a money proposition: *The Herald* will produce at least one-third more blooms than any other scarlet; early, free and continuous bloomer; stem long and always stiff; flowers large, full and of a clear even shade of scarlet; calyx absolutely non-bursting, making it the highest type of a commercial carnation and one of greatest value to you. All cuttings strong and well rooted.

this country in 1865, afterward removing to Alexandria where, since 1875, he has been a resident. All his life he was engaged in the florist business and was well-known to the trade hereabouts. He was liked by all and was looked upon as being one of the experts of this section. He is survived by nine children, six boys and three daughters.

August Schuermann.

August Schuermann, of the Schuermann Floral & Decorating Co., St. Louis, Mo., died on Wednesday, Jan'y 29, very suddenly from apoplexy. He was well known about town as a decorator of large jobs with artificial material. He leaves a wife and daughter. The funeral took place on Saturday, Feb. 1, from his late residence, quite a few in the trade attending.

Hugo Lowe.

Hugo Lowe died at the Cook County Hospital, Chicago, Ill., on Jan. 23d, aged 55 years. He was interested with his wife in the flower business at 1943 North 43d avenue.

Gustave T. Cordua.

Mr. Gustave Theodore Cordua, 83 years old, a florist, died January 27, at his home, No. 46 Hillyer street, Orange, N. J. His wife and one daughter survive him.

Peter Britz.

Peter Britz of Danville, Ill., died of pneumonia on January 23rd, aged 63 years.

HENDERSON'S MAMMOTH BUTTERFLY PANSIES

Those Who Have Grown Them Write:

"Your Butterfly is the best strain of Pansy that I have ever seen and I have been growing pansies for market for many years."

W. F. HEATH,
Jaffry, N. H.

"I have tried your mammoth Butterfly Pansies for three years and find them superior to any I have ever grown."

H. G. THURSTON,
Fall River, Mass.

"I have grown large pansies before, but never saw the equal of your Giant Butterfly. The plants are 20 inches high, and the stems of the blossoms 9 inches long, while the blossoms themselves are simply monstrous, each one a broad expanse of beauty."

THOMAS C. STARR, Newton, Mass.

Henderson's MAMMOTH BUTTERFLY Pansies

We are very proud of. We have sold them for a number of years and receive hundreds of letters praising their superior beauty, size and other merits. When our trial collections of all the world's best types of pansies are in bloom we go over them daily and any plant producing flowers of superlative merit is removed to our "Mammoth Butterfly" plot. Consequently the seed is saved from the greatest variety of types, including only the best of Giant Cassiers, Bugnots, Trimardeau, 5-blotched Odier, Giant English, French and German hybrids, etc., resulting in the greatest variety of coloring, marking, blotching, veining, etc., which we offer in mixed colors. Price 25c per pkt.; 50c per 1000 seeds; \$5.00 per oz.

For all other types of pansies and in colors, see

PETER HENDERSON & CO., 35-37 Cortlandt St., NEW YORK

PLANT GROWERS' DINNER.

The accompanying picture shows the members of the New York and New Jersey Association of Plant Growers and their guests posing to "have their picture taken" previous to the onslaught upon the six-dollar feed that had been provided by their efficient dinner com-

mittee, Messrs. Julius Roehrs, Jr., Alfred L. Zeller and Herman Schoelzel. In the centre foreground Louis Dupuy, president of the Association, J. K. M. L. Farquhar, president of the S. A. F., and Thomas Roland of Nahant, Mass., will be recognized. We presented an account of this affair in our issue of

last week and have only to add one incident which we there omitted—the presentation of a watch fob and diamond-studded locket to the secretary of the Association, Wm. H. Siebrecht, Jr., by President Dupuy on behalf of the members. Mr. Siebrecht made an appreciative response.

Boddington's Quality Cannas

Are true to name, have two to three good eyes, are well cured, sound and dormant, and give absolute satisfaction. Our sales last year were nearly 700,000, and not an overgrown kick. The Canna crop this year, however, is very short, and we advise placing orders early to secure stock. Delivery can be made at purchaser's option. Remember, you may deduct 5% if cash accompanies the order.

--	--------	--------	---------

We are the largest handlers of Cannas in the world. Our prices upon Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three, sometimes four eyes—are sound, dormant, and are packed 250 in a box; two can be "cleated" together and shipped as one. One box of 250 sold at a

thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices for quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us, we will substitute or send only the best for all purposes.

Inspection of Seeds.

The following is the text of an act introduced into the Massachusetts Legislature and referred to the Committee on Agriculture. It embodies the ideas of Prof. Geo. E. Stone, of Amherst Agricultural Experiment Station.

AN ACT TO PROVIDE FOR THE INSPECTION OF SEEDS.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

Section 1. In this act, unless the context otherwise requires:—the term seeds shall include those parts of a plant which are the outcome of flowering and which are used for propagating the species and for such purpose are exposed for sale.

Section 2. The Director of the Massachusetts Agricultural Experiment Station is hereby authorized and directed, either in person or by deputy, to take samples of seeds, which may be in the possession of any importer, agent or dealer, cause the same to be examined and tested for purity, germination capacity and such other properties as may be desirable, and cause to be published from time to time in bulletins or reports of said station, the results of such examinations and tests, together with the sources of the samples, and such additional information as circumstances may advise.

Section 3. Whoever offers or exposes for sale or delivers to a purchaser any seeds coming within the provisions of this act, shall upon application of the director or his deputy, and upon the tender to him of the value thereof, furnish a sample sufficient for the examination and test of any seeds in his possession.

Section 4. To defray the cost of collecting samples, making examinations and tests, and of otherwise carrying out the provisions of this act, a sum not exceeding twenty-four hundred dollars shall be allowed annually from the treasury of the commonwealth, payable in quarterly payments into the treasury of said station. All moneys received and disbursed under this act shall be audited and reported as are other moneys placed in charge of the trustees of the Massachusetts Agricultural College.

Section 5. This act shall take effect on the first day of January in the year nineteen hundred fourteen.

PUBLICATIONS RECEIVED.

The annual report of the Society of American Florists and Ornamental Horticulturists has been received from Secretary Young. It is a 284-page volume containing much useful information in addition to the proceedings at the Chicago convention. The list of members, life and annual, now runs close up to 1500.

Missouri Botanical Garden, Twenty-third Annual Report. This comprises the reports of the officers of the board and seven scientific papers, the result, for the most part, of work done in the Graduate Library at the Garden. The total amount expended for garden maintenance and improvement during the year was \$66,072.16. Total disbursements including garden expenditures, \$283,544.40. Total receipts from rentals, interest, sale of real estate, etc., \$254,931.38.

The Annual Report of the Nebraska State Horticultural Society for 1912 has been received from Secretary C. G. Marshall, Lincoln, Neb. This is the 43d annual report of this useful society and contains all the proceedings of the annual meeting held at Lincoln, January 16-18, 1912. As in previous years the Nebraska Horticultural Society has given a fair share of attention to ornamental horticulture, forest and shade tree planting and care, greenhouse topics and other branches of horticultural science and art too often wholly neglected by so-called state horticultural societies. The reports of officers show the Nebraska organization to be prospering.

Representative Dudley M. Hughes, of Georgia, is called a farmer statesman and devotes much of his time to the agricultural interests of his district. He has requests for many new kinds of seeds, and a time ago received this letter:

Dear Dud: Sam Yopp's been tellin' me of a new seedless tomatte the Guvment is growin'. I'm writing to you in hopes you will send me some of the seeds.—Saturday Evening Post.

The Associated Chambers of Commerce of San Bernardino County, California, will petition the legislature to appropriate \$1,500,000 for the purpose of establishing a horticultural experiment station.

Of Interest to Retail Florists

EFFECTIVE ADVERTISING.

Six leading florists of Washington, D. C., had a joint advertisement for McKinley Day in the Washington Herald. The advertisement, which occupied a space 12 x 15 inches, had a portrait of the late President in the centre, and on each side were the verses, "Lead Kindly Light," McKinley's favorite hymn, and Cleveland's eulogy of McKinley. On the left was a cluster of carnations clasped with a national shield, and across the top in large letters was the inscription, "Today, January twenty-ninth, is McKinley Day. Wear a Carnation in Honor of His Memory." At the bottom were the names and addresses of the florists subscribing. Altogether, the advertisement was an excellent example of

Majestic, N. Y.-Southampton, Feb. 22	

co-operative advertising to good effect and worthy of imitation generally.

An equal exhibition of enterprise was the advertisement of Knoble Bros., florists of Cleveland, O., in the Sunday Plain Dealer of January 29. It was a full page presentation of the florists' sphere of activity, beautifully set forth in natural colors. Cut roses, blooming plants, bridal bouquet, corsage, wreath, jardiniere, decorated dining table, etc., were all attractively illustrated. It takes sand to spread out to the extent of a full-page advertisement in a metropolitan journal, but that's what you've got to come to if you want the business, now.

Cherries Are Ripe, We Have Them

Only a short time left for you to display the cherries to commemorate George Washington's Anniversary. A little bunch attached to your boxes, also tied and arranged on the handle of baskets will attract attention. Try some. They will prove very fetching.

The dainty two-tone baskets in London tints are in great demand for Easter work. Send for sample order; our selection will be a pleasing one. Combination tints, white and pink, Nile and white,

yellow and white, lavender and white and many other ones if desired. It may appear early to advertise Easter baskets but these take time to get ready.

Plenty of Waterproof Crepe Paper in the imported kind, which is the best. All good flower shades. Pleated Crepe Paper, the accordion effect, is still in popular demand. Magnolias, Green, Brown and Red, prepared and selected, of uniform stock.

THE FLORISTS' SUPPLY HOUSE OF AMERICA

1129 ARCH STREET, - - - - - PHILADELPHIA, PA.

CHICAGO NOTES.

Promising New Carnations.

The Chicago Carnation Company received two lots of seedling carnations last week from A. Jablonsky, Olivette, Mo., and C. Akehurst & Son, White Marsh, Md. Two variegated varieties, both white with deep pink pencilings, were in the first lot coming by parcel post and arriving in good condition and looking still better two days later. One will be named Thos. A. Edison and the other Variegated Enchantress, and both will be disseminated in 1915. Those from C. Akehurst & Son included No. 45, a large full pink of Rose Enchantress shade, a very striking flower with good calyx and stiff stem, and No. 40, of Lawson shade and type and not so large a flower, but with good stiff stem. No. 105 is a yellow, variegated with cerise. These are in their second year. They were forty-eight hours on the way, but revived and showed up well later and appear very promising varieties.

Pots and pans of bulbous stock are now seen extensively in the retail stores. In tulips Proserpine for light red, Mon. Tresor for yellow, and for early light pink La Matelais are the varieties used, for growers to not use the same as for cut flowers. The larger and later varieties for pans have not put in an appearance yet, for forcing causes considerable loss. In spite of the annual cry of "never again," more bulbs appear to have been grown for cut flowers this year than ever before. Many of the novelties advocated by the bulb salesman for early forcing are being tried out here, but not successfully.

Easter and the Lilies.

With Easter so early, March 23, the lily situation is of more than usual interest at this time. In Chicago and vicinity the probabilities are strong that many growers will fail to get their lilies in on time while reports from those who have been through the Middle West recently would indicate the same condition outside. In and about Chicago, Harrisii has been grown but little of late years and recently multiflorums have shown so

much disease that they are being dropped also. Formosums, coming early, are grown a little more extensively this year but the main dependence of the growers is upon Giganteum, which though later than the others, seems more free from disease and when it can be gotten in on time is more generally satisfactory. Some of the largest growers seem to have timed it about right, if one can tell so far ahead and the probabilities are that lovers of the Easter flower will not be deprived of them in Chicago, but a lily salesman last week stated that many growers in the West, without facilities for extreme forcing will fail to have their stock in on time.

Trade Notes.

Many of the women's clubs of the city are including in their programs lectures, etc., along horticultural lines. The Ridge Club has a regular floricultural department and this week enjoyed a lecture by Dr. J. M. Coulter of the University of Chicago on "Plant Relations."

J. A. Peterson, of Cincinnati, had a plant of the new begonia, "Melior," which is not yet disseminated, on exhibition at E. C. Amling's, where it was much admired. It makes a heavier growth and has larger flowers which are a trifle deeper in shade than the Glory of Cincinnati.

George Asmus, manager for Schiller, Florist, has secured a long lease on the store formerly occupied by L. Kopp, 4509 Evanston avenue, and will take possession at once, putting it in first-class condition. The plan is to sell or close up the Jackson Boulevard store and to operate this one and the Madison street store. The new acquisition is in a very desirable north side locality near Wilson avenue.

Personal.

Ed. Vilter is no longer seen at the packing counter at Zeck & Mann's.

Joe Weis is again able to be at his store at 3445 Southport avenue after a siege with diphtheria.

Mrs. C. M. Dickinson and son, Donald, left Tuesday for St. Louis, Mo., where Donald will enter a military school.

The Fleischman Floral Co. are using a third-page advertisement in one of the local dailies to keep trade stimulated as Lent appears.

Albert Cole says his wife's good nursing is responsible for his reappearance at the Amling Company's store again. He married a nurse but four weeks before a severe attack of scarlet fever.

The many friends of Wm. J. Smyth are pleased to learn that he is able to leave St. Luke's Hospital where he has been since his serious accident, December 13th. He will be confined to his home, however, for some time.

T. T. Clark, bookkeeper and assistant manager for E. H. Hunt, and Miss Helen Soderberg, of Chicago, were married, February 1st, and left for a short wedding trip. Mr. Clark's new dignity will make it harder than ever to walk with bowed head, a thing necessary in the office owing to his height, but his smile will not be the less frequent. Mr. and Mrs. Clark will live at 47th street and Lawrence avenue.

Visitors: F. P. Myers, of Chestnut Hill, Pa.; R. W. Peterson and J. A. Peterson, Cincinnati; Mr. Stuppy, of Stuppy Floral Co., St. Joseph, Mo.

CINCINNATI NOTES.

E. G. Gillett's birthday anniversary was on Ground Hog Day. On the evening before he was surprised by many of his friends and neighbors.

Visitors: Lester F. Benson, Indianapolis, Ind.; Miss Patten, of the Patten Flower Store; Wm. Gardner, New Castle, Ind.

Although the inaugural ball and similar festivities have been tabooed by President-elect Wilson, there are several plums to be handed the Washington florists and landscape gardeners in the way of decorations. The first contract thus far reported is one authorizing C. H. Merryman to furnish the 30-foot cedar trees which are to be banked on either side of the President's reviewing stand. This contract will figure in the neighborhood of \$1,000.

SUCCESSFUL FLORISTS

all over the country are using McCray Refrigerators. The circulation of air is so strong and steady that there can be no stagnation or dampness, so that your stock will always be fresh and fragrant. Furthermore the saving in ice will more than pay for the cost.

McCray Refrigerators

will lend attractiveness to your shop. Beautifully made and finished, they are lined with white enamel, opal glass, tile, mirrors or marble, as you desire. Write today for our catalog No. 73 which will give you ideas how to add to the attractiveness of your establishment.

McCRAY REFRIGERATOR CO.

Chicago Office, 55 Wabash Ave. 553 Lake St., Kendallville, Ind. New York Office, 231 West 42nd St.

PHILADELPHIA NOTES.

Charles, son of S. S. Pennock, still at hospital and liable to be for some time, but is progressing favorably.

E. J. Fancourt of the Pennock-Meehan Co., has returned from a week's business trip down East, chipper and cheerful. Must have done some good business.

Arnold Ringier of the W. W. Barnard Co. of Chicago honored our fair city with a call on the 4th inst. We tried to take him to the club meeting but he had an engagement in New York.

M. Rice Co. have a very attractive Easter folder appropriately titled "Parcel Post Helps." It contains many good suggestions for the Easter trade. Mr. Eschner says they will be glad to mail a copy upon request to any florist.

Flowers of the new rose Mrs. Charles Russell were exhibited in London recently and received an award of merit. This, too, after having made the long journey across the Atlantic and being staged two weeks after cutting, which speaks a lot for its keeping qualities. The Pennock-Meehan Co. inform us that the orders already booked for this rose to date are very heavy and it looks as if there would be a scramble to get some of it pretty soon.

Patrick Welch of Boston has sent in as an entry for the great prize, Dooley's definition: "A diplomat is a man who can put a crimp in the cards that a clothes wringer can't take out." Edward Dooner defines a diplomat as a man who is "a pusillanimous liar." Commodore Westcott: A diplomat is a man who knows when to keep his mouth shut.

Jack Mackillip's idea of a diplomat:—"Don't bother a man when he's busy." John H. Dodd's contribution: "Ha Ha! That's a twister."

"Sandy McGoon, soldier of fortune," enters the lists with this: "A diplomat is a fine old liar who has spent the best part of his life in telling lies; but has convinced his hearers that he is telling the truth." We get you, Sandy. It's a good thrust.

HART MAKES HANDLES FOR POTS

GEORGE B. HART, 24 Stone St., Rochester, N. Y.

Visitors—H. Warendorf, Hotel Ansonia, N. Y. City; H. E. Smith, Hazeltown, Pa.; Thos. Roland, Nahant, Mass.; Louis Dupuy, Whitestone, N. Y.; John C. Bodger, Los Angeles, Calif.; Wallace R. Pierson, Cromwell, Conn.; Chas. H. Totty, Madison, N. J.; C. Bourque, buyer for Dards, New York; Philip L. Carbone, Boston, Mass., accompanied by one of his right bowlers—S. Gerald Smith; Martin C. Ebel, Madison, N. J.; W. F. Fancourt, Doylestown, Pa.; John Young, New York City; R. J. Irwin, New York City.

THAT GINGER JAR MAN.

"The Jenkins lad" reciprocates the kindly wishes for a better acquaintance with the author of the "Ginger Jar" notes, who seems to have the license of the old court fool or jester, to lay about him where he wills, sparing none, not even the gray hairs of our distinguished editor. He seems to have flashes of intelligence and during one of these, asks me whether I know anything about "Tree Vaccination" and whether it is an axiom or a fallacy. This is something of a poser, but as it is a part of my religion to "never get stuck," I answer with all due respect to the upholders of tree vaccination as a cure for chestnut blight or other diseases that so far as present scientific knowledge goes the idea must be relegated to the order of Fallacies. As to the whereabouts of the Royal Nursery of England, the man who signs

himself a graduate of such nursery is well known to me, and, knowing his love of a joke I take it that he means it in the sense of the royal nursery (of mankind) of England.

I don't propose to enter the competition for your prize for the best definition of a diplomat as I agree with you that Tommy has won it, but why did you not rope in the classic definition? which is "A diplomat is a man who is sent abroad to lie for his country." EDWIN JENKINS.

Since 1835 the trustees of Mount Auburn Cemetery have paid the Massachusetts Horticultural Society \$302,297.27, and have yet to pay about \$125,000 more.

Flower Market Reports

Business seems to be

BALTIMORE on the go, right along, and none have cause

to complain. The flower mostly in demand has been the carnation, especially so on "Carnation Day." In the wholesale exchange tulips, freesia and white narcissi are mostly seen. Richmond roses are coming a little faster, while 'Maids and Brides are just about enough to supply the demand.

The bottom has fallen

BOSTON out of this market, so to speak. We hope it will

prove to be only for a brief period and that a healthy reaction may soon follow the check which the coming of Ash Wednesday seems to have administered, according to long-existing custom. Roses have responded with a moderate drop in wholesale prices and this will be appreciated by out-of-town florists who have not found much profit in handling roses at the stiff market values of the past few weeks. Carnations are decidedly a drug and there are big accumulations in wholesalers' hands that sacrifice prices even seem incapable of moving out. Bulbous material of all descriptions is also badly overcrowded as usual at this season. Other things are in good supply, including sweet peas of excellent quality.

Market brisk with still
BUFFALO a scarcity of stock, especially roses, which

seem to be the most needed flower, especially for design work. There is an abundance of other stock which can be used to good advantage, but the heaviest demand is for short roses. The longer grades of Killarney have improved in color and are now finest of the season, also Maryland is good though the buds are not large. Bon-silene is a good seller but not enough are had. Beauties, such as they are, are anything but good and sales are light. Good Richmonds are still scarce. Carnations continue in fair supply, while having a better demand than in some weeks past. On McKinley Day the demand was light and although the wholesaler made preparations for a good trade sales were small and a disappointment to the trade and a loss to the wholesaler. Cold weather was the prime cause, and as there were none sold on the street by the mission as in previous years, the spirit had fallen away. Spring plants such as tulips, daffodils, cyclamen, azaleas and other flowering plants are coming

in and the plant growers report good sales.

The last week before
CHICAGO Lent found the flower market in very good condition with plenty of flowers of good quality and a very fair demand. All first-class stock sold out without loss and each day more roses could have been sold had they been obtainable. With some wholesalers the falling off of Mardi Gras orders was noticeable this year and it seems one more of the special occasions for florists is losing out. A few large social events marked the closing of the pre-lenten period and bulbous stock has had an impetus which has made the footings larger than was realized last year. Carnations are said by some to be coming less freely but no material difference is noted. Rather more American Beauties are being cut but not enough to affect quotations. Violets are going slowly and prices do not hold very rigorously to quotations. Sweet peas are possibly a little more

in evidence this week but the number in the market is comparatively small. All kinds of roses continue scarce, especially the short and medium lengths. Advance orders for Valentine's Day are not coming in very rapidly.

The McKinley Day
CINCINNATI demand this year showed that observance of the day by the public is getting to be a thing of the past. The call for the special flower for that day hardly caused a ripple in the even course of the market. There were plenty of carnations and the good solid stock sold fairly well at the ruling price but the

Flower Market Reports

(Continued from page 107)

demand came through the usual channels for the usual purposes of the market. The rose market is very short. The demand is especially strong for good pink. Richmond are very much off crop. The receipts of good Beauties are cleaned up quickly each day. Bulbous stock is in a tremendously large supply. The receipts of tulips are far greater than the request for them can possibly utilize. Most are short-stemmed. The really good are limited in number and sell. Daffodils, jonquils and freesias are excellent in quality and have sold fairly well. Callas and lilies have been selling very nicely.

The balmy spring days of the early part of last week had a depressing effect on the local market and the great family of spring flowers and carnations competed very fiercely against one another. Still a change for cold combined with hustling wholesalers cleared the tables quite nicely by Saturday, closing the week with firm prices prevailing. Roses are still short which is often embarrassing to the store man but is a good omen for the grower as regards a heavy cut for Easter.

Business here has taken a decided drop and while roses, for instance, are not over-plentiful demand has slackened up and the situation is decidedly easy for anyone who is in the market to buy. American Beauty is still very shy and the prices that have prevailed for several weeks are still maintained on the few that are coming in. There is no perceptible change as regards orchids and other choice material, there being enough and to spare for all demands and no signs of any immediate exigency either way.

Much comment is being heard in Philadelphia wholesale circles about the low prices for flowers—notwithstanding the abnormal scarcity this season. It appears from reports of competent observers that other parts of the country are also affected—so the situation seems to be general and not confined to Philadelphia. The growers everywhere are complaining and most of them see no hope of being able to pay expenses this year. As for last week in this market business was pretty fair, and in some lines, notably in American Beauty roses, more could have been done if the stock had been in sight to do it with. In white and pink roses the medium grades sold best. The beauty scarcity is still as fierce as ever and will probably remain so for two or three weeks yet. The carnation market was very much firmer and most everything sold at top quotations. The bargain hunters were disappointed for once. Orchids—too many, little doing and prices “on the blink.” Gardenias and sweet peas—both improved in quality and moving off in excellent shape at satisfactory figures. Lily of the valley and mignonette have also sold better. Violets still congested. There is a good demand for snapdragon but very little coming in.

(Continued on Page 201)

FOUR NEW ROSES EVERY GROWER WILL WANT NEXT YEAR

Irish Fire Flame

The dainty new Single Rose, trimmest and sweetest little bud ever seen, and well named as to its lovely color. A Dickson seedling of strong, vigorous growth, very free, particularly during the Winter; color fiery crimson, shading to a rich orange salmon at the base; foliage a dark green, reverse side of leaf deep bronze; a new departure in Roses, a distinct novelty; beautiful and charming; a favorite wherever shown; nothing to compare with it. March and April delivery.

OWN ROOT: Doz., \$6.00; 25, \$10.00; 50, \$17.50; 100, \$30.00; 250, \$70.00; 1000, \$250.00.
GRAFTED: Doz., \$7.50; 25, \$12.50; 50, \$20.00; 100, \$35.00; 250, \$82.50; 1000, \$300.00.

MRS. CHAS. RUSSELL A new American pedigree seedling. Of American Beauty size and fragrance; color, a lighter cerise that does not fade to blue but to a lighter rose as the flowers age; a strong, vigorous grower; good, heavy stems; flowers carried erect, no weak necks; no blind wood like Beauty; very prolific, remarkably so considering its size. As tested in the various shows over the country this Fall, it has proven a wonderful keeper and established itself at once as a Rose of unusual merit, creating a sensation wherever shown and attracting not only the commercial man, but the public as well. Delivery after March 15th.

Doz. 25 50 100 250 1000
GRAFTED STOCK ONLY... \$7.50 \$12.50 \$20.00 \$35.00 \$82.50 \$300.00

MILADY A strong sturdy grower; excellent foliage; flowers large and double; opens perfectly at all seasons; similar to Richmond in color, although richer in color in bud form; shape of flower resembles Gen. Jacqueminot; very prolific; good keeper; the coming Red Rose. Grafted or own root, \$30.00 per 100; \$250.00 per 1000.

MRS. GEO. SHAWYER A free flowering pink Rose; very highly recommended by some of our best rose growers; has been selling exceptionally well in the New York market this season. Grafted or own root, \$30.00 per 100; \$250.00 per 1000. We guarantee not only the quality of our stock but its safe delivery by express.

Flower Market Reports

(Continued from page 199)

ST. LOUIS The market has been normal during the past week. Stocks became quite scarce and the retail business was reported good in all parts of the city. Roses are scarce in all grades and varieties and prices run up. Beauties extra fine, carnations normal, sweet peas scarce.

WASHINGTON The demand for roses is far in excess of the supply and very good prices prevail. Carnations were not overplentiful the latter part of last week and they, too, are higher priced. On the other hand, bulbous stock is coming into the market in larger quantities and at a low price and there are plenty of potted plants. Business as a whole has been quite good and there is little or no cause for complaint.

INCORPORATED.

Muskogee, Okla.—Market Seed Co., capital stock \$10,000. J. S. Cannon, J. J. Gallagher, E. E. Sidebottom, R. W. Allen, G. H. Brooks.

Dillon, Mont.—Dillon Greenhouse Co., capital stock \$30,000. Directors, Chas. Greiner of Butte, A. L. Stone and Chas. O. Horn of Dillon.

Charleston, W. Va.—West Virginia Forestry Association, for the protection and conservation of forests and promotion of forestry in general. The incorporators are: J. C. Watson, of Keyser, W. Va., R. Chaffey of Elkins, W. Va., Merritt Wilson of Wildell, W. Va., and N. J. Giddings and A. B. Brooks of Morgantown, W. Va.

Morgantown, W. Va.—West Virginia Horticultural Society, for the advancement of horticultural interests. The incorporators are: Alexander Clohan, J. R. Catron, W. B. Seibert, of Martinsburg, W. Va., W. H. Alderman and A. L. Daco of Morgantown, W. Va., H. H. Huffman of Keyser, W. Va., and M. Schwartzwalder of Pt. Pleasant.

LEMON OIL CO'S STANDARD INSECTICIDE

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

In ordering goods please add "I saw it in HORTICULTURE"

ST. LOUIS NOTES.

R. J. Windler, florist at Grand and Shenandoah avenues, has installed a fine automobile delivery during the last week.

Mrs. Schoenle of the Schoenle Floral Co., on Lafayette avenue, will open a branch store at 2318 South Grand avenue some time this month.

Michalo Dratchuer, who was employed by Grimm & Gorley, killed himself on Sunday, Feb. 2nd, by shooting, the cause being a disappointment in a love affair.

Fred Vennemann, a gardener at Kirkwood, and his wife, found a burglar in their bedroom, who shot Mrs. Vennemann several times, and she is now at the hospital in a very critical condition. The burglar escaped.

Visitors: Andrew Washburn, Bloomington, Ill.; Chas. Loveridge, Peoria, Ill.; J. F. Ammann and H. Blixen, Edwardsville, Ill.

The La Follette Bill now pending in Congress which looks to limiting the hours of female labor in all stores, factories, commercial and other establishments in the District of Columbia to eight hours per day and six days per week is meeting with considerable disfavor by local members of the trade, on account of the needs of the florist business and the necessity of women performing extra work sometimes in excess of eight hours. The law would absolutely prohibit women from working any time in excess of the stipulated eight hours and provides for three inspectors who would have access to the books of all concerns to ascertain the rate of wage paid, hours of labor, etc.

The Recognized Standard Insecticide.
Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

FOR SALE BY SEEDSMEN.

Aphine Manufacturing Co., Madison, N. J.

When writing to advertisers kindly mention HORTICULTURE.

Fertilize for Fruit, Not for Foliage

A study of the formulas of fertilizers often recommended for fruits would give the idea that foliage and rapid growth is what you seek.

The most of them lack fruit-producing

POTASH

Any fertilizer for fruits should contain at least 12 per cent. available Potash. The only Potash Salts that are safe for citrus fruits are Sulfate of Potash and Sulfate of Potash Magnesia (double manure salt).

Applications of such a fertilizer should begin at planting and continue during the life of the tree. It means earlier and longer bearing, larger yields, better grades and shipping quality, and a hard, solid, growth of wood. In all these ways **Potash Pays.**

If your dealer doesn't carry 12 per cent. Potash brands or Potash Salts, write to us for prices. We will sell any amount from a 200-lb. bag, up. Write now for fertilizer formulas and how to make them for Fruit Culture, and special free pamphlet, *Orange Culture.*

The National Nurseryman learns that John Dunbar, assistant superintendent of parks at Rochester, N. Y., has discovered a new hybrid hickory in Riverside cemetery, a cross between the bitternut hickory and the shagbark hickory. The nut, which is of unusual size, measuring one and one-half inches or more in length, is rich and sweet. Mr. Dunbar considers the variety will without doubt prove a welcome addition to our native American nut bearing trees. It is understood a quantity of nuts will be sown this season and a number of grafts will be made.

There is a bill before the Michigan legislature, now meeting at Lansing, which, if it becomes effective, will compel every florist using steam to employ a 3rd or 2nd class engineer at eight hours a day at \$3.50 to \$4.50 per day. A preliminary committee has been constituted consisting of Messrs. Breitmeyer, Bears, Sullivan, Asman, Plough, Stock, etc., to offset this by al-

Something U-Barish In A Detroit Show House

WHEN the Bemb Floral Company of Detroit built their unique store, Mr. Pochelon determined he would have one of the finest—if not the finest—stores between New York and San Francisco.

When it was decided to put the house on top of the main part of the store—the U-Bar construction was chosen. It was chosen simply because the clean cut perfection of the construction more consistently harmonized with the beauty and attractiveness of the general scheme of the store.

Just how advantageously the result is, you saw a few weeks ago in the beautiful illustrations printed in *Horticulture* and *Florists Exchange*.

We will be glad to give you particulars of this and other U-Bar Show Houses.

Keep your business right up to the minute—build a U-Bar Show House.

U-BAR GREENHOUSES
PIERSON U-BAR CO

ONE MADISON AVE. NEW YORK
CANADIAN OFFICE, 10 PHILLIPS PLACE MONTREAL

CURVED IRON EAVE STYLE "S."

This Eave is intended for use on detached houses with either fixed glass or side sash.

It is practically all exposed to the inside heat of the greenhouse and so is ice clearing.

KING GREENHOUSE EAVES

THEY SOLVE THE EAVE PROBLEM
THEY MAKE THE LEAST POSSIBLE SHADE

and as you can see

present no surface for icicles to form on. They have great strength with lightness. They are designed and made for the purpose and not adapted from stock structural shapes.

WE WANT TO FIGURE WITH YOU.

CURVED IRON EAVE STYLE "L."

This Eave although lighter than Style "S" is amply strong for all Eave purposes.

It obstructs little light and is ice clearing in the most severe weather. It is intended for use with fixed glass only.

KING CONSTRUCTION CO.

Home Office and Works
NORTH TONAWANDA, N. Y.

New England Sales Office
7 WATER STREET, BOSTON, MASS.

ERECTED AT RUMSON, N. J.

SEEING how attractive and practical this arrangement is, do you wonder why **THE LUTTON PATENT CURVED EAVE** method has changed Greenhouse Construction during the past few years? The result has been the most successful house that can be produced; the other concerns who had been producing the same antiquated buildings for years had to simply destroy their patterns as well as their catalogues and start anew. Just ask some of our imitators to show you some of their curved eave houses built before **THE LUTTON PATENT** was granted, you will then be convinced that you had better consult with me.

NEW CARNATIONS

WM. ECCLES LADY NORTHCLIFFE BRITISH TRIUMPH

WM. ECCLES. The First Prize winner at Detroit last year in the Red or Scarlet class, and the Silver Medal winner of the New York Horticultural Society for the best undisseeded seedling.

The scarlet everyone was waiting for. Has a strong rigid stem, a perfectly formed 3½-inch flower, non-bursting calyx, highly perfumed, a grand keeper and as free as any scarlet to date.

LADY NORTHCLIFFE (Engelmann). A beautiful salmon pink in color, much resembling "Pink Delight." Has a well built up flower, and just enough in it not to burst the calyx. While the flower is not the largest (about 3 inches), it is fully as free as "May Day," and will surely make a grand bread and butter sort.

BRITISH TRIUMPH (Engelmann). One of the finest things ever raised in England. The color is a striking shade of Crimson. The flower is 3½-inch in size and well built up. It has the sweetest perfume of any carnation ever raised and its keeping qualities are the best. Has a fine stem, good constitution, and free.

PRICES: \$12.00 PER 100, \$100.00 PER 1000

A NYBODY can do a part of anything, but only the complete is of actual value. The watch that lacks one cog may as well be a mass of metal in the ore. We do our part in a very difficult line by supplying a grade of lily bulbs to growers that is the best that man can produce and money can buy. The growers must do the rest. In supplying these lily bulbs every effort is used to please you all in the combination of price and quality—more than that no man can do in this business. If we could manufacture bulbs we would try and make them even better—then we might even guarantee them, but they are made by nature, whom no man can control, and it is for this reason that no guarantee of flowering results is given under any circumstances whatsoever. If you can find anybody on earth who pays more attention to lily bulbs than we do, with our connections; if you think anybody has any better bulbs; we advise you to buy from them—but don't buy from them as a price consideration, for price never yet sold an article of merit, and it never will. Horseshoe Brand Giganteum are the best commercial lily bulbs on the market today—for various reasons—and the order of every lily grower, no matter how large or small, is respectfully solicited. We need the co-operation and support of every lily grower in this country. Prices are reasonable—send for the price-list.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Begonia Gloire de Lorraine

The first two or three lots of leaf cuttings are now in 2½ inch pots; those placed in the sand after the New Year are nearly all ready to be potted. The average temperature for the newly-rooted and potted small plants should not be below 65 degrees at night, a trifle higher being better. When established, 5 degrees lower will do nicely. No manure should be used in the soil in the first two transplantings; a very sandy and porous soil, loam, sod or leaf mould suits rooted cutting the best. In the soil for later shifts, some old well-rotted manure is intermixed, in greatest quantity at the last transplanting in August or September. But the one point most important of all is care in watering, especially during periods of prolonged wet, rainy, misty or gloomy weather, while the plants are still in their infancy. When potting rooted cuttings or in repotting older plants, great pressure should not be exerted in firming the soil too hard. To insure plants of symmetrical shape judicious pinching in is resorted to and begins before the second shift becomes necessary. Now that there is more sun and light they will grow very rapidly.

Care of Adiantum Farleyense

Propagation can be done by division of the large specimens. They can be broken up into single crown or clusters of several crowns and these potted into small pots, using a very sandy and peaty soil, and placed on a bottom heated bench, kept moderately moist and heavily shaded until well established. For propagation on a somewhat larger scale the more proper plan is to divide into single crowns only; to insert these into the sand of a propagating bench with brisk bottom heat and a house temperature of about 65 degrees, to let them there form compact clumps of new roots and then pot them up carefully and again place the potted little plants over bottom heat, later on separating them into several grades according to difference in growth and corresponding difference in subsequent treatment. When these are firmly rooted they should be potted into 2-inch pots. A good sod soil, to which fine gravel or coarse sand and some peat or leaf mould is added suits these ferns. Larger specimens are benefited by a goodly quantity of well-rotted stable manure in their soil, and when thus grown for cutting purposes their fronds will prove more substantial for use and longer lived, especially if produced under unrestricted light with but a slight shading against bright sun.

Dutch Bulbs for Easter

It is time to get all Dutch bulbs well under way so as to be just right for Easter. From now and right to Easter we are liable to have very whimsical weather so see that the bulbs have a good start. All such kinds as

hyacinth, narcissi, tulips, etc., can now be subjected to pretty severe forcing which can be followed by a few days or a week of hardening off in a much lower temperature. Tulips come finest when forced in high heat about 70 degrees and then gradually hardened off in cooler quarters after the bloom is fully out, but bottom heat is at all times detrimental to perfect development. A steady forcing of from three to four weeks will bring tulips into bloom. Dutch hyacinths, narcissi, and some other bulbs belonging to this class can be grown in a temperature of about 60 degrees. They are then made to look their gayest, when fully out, by being grown slowly in a light, cool house on a bench affording moderate bottom heat. When they are well expanded they should be placed in a cool house and shaded from the strong sun.

Euphorbia Jacquinæflora

Few other plants under cultivation produce more brilliantly colored or longer-lasting flowers than Euphorbia Jacquinæflora, probably better known as Euphorbia fulgens. At this season, when the wood of the preceding year has reached the proper degree of maturity and steady bottom heat can still be depended upon, the propagation of Euphorbia fulgens is least beset by difficulties. The best ripened part of the youngest canes furnishes the cuttings, short lengths with two or more eyes to each. These pieces, with a somewhat slanting cut at the lower end, are spread on a board, or on paper, for about a day or until the bleeding has ceased. They can be placed in a propagating bed, with an atmospheric temperature of 60 or 65 degrees and 10 degrees higher in the sand. With a steady and evenly held temperature and a congenially humid and somewhat close atmosphere they will soon root. When potting give a compost of two parts of turfy sod, or well fibred loam, one part of very sandy leaf mold and the remaining fourth of thoroughly decayed and composted, spent hotbed manure. The plants thrive best under hothouse culture, in a warm and rather moist atmosphere, and should have the full light when breaking into new growth.

Frames of Pansies, etc.

Frames containing pansies, myosotis, hollyhocks, pinks, daisies, violas, etc., should be held in a frozen state, if they are that now, as long as it can be done by a covering of mats or other non-conducting material. It should be made a point in frame cultures of this kind not to expose hard frozen stock to excessively warm weather until the season is far enough advanced. Covering up pansies too early in the fall, and again uncovering them too early in the spring has ruined many a fine lot of them. Pansies for late sales can yet be grown. Sow in boxes, let them grow to sturdy little plants in a cool, well-lighted and well-aired house, and plant into frames in April.

Geranium Stock Plants

Every grower should start now and pick out his stock

plants for the production of his stock for another year. In order to keep them growing they should be shifted until they are in a 5-inch pot. For a compost use a good rich mixture, as fibrous soil three parts and well-decayed manure one part. Pot firmly and give a good

thorough watering to penetrate all the soil. Give them plenty of light and all the sun possible with a temperature of about 55 degrees at night, increasing by day to 70 or 75 degrees. Keep all the buds picked off, which will throw the full strength into growth.

Mr. Farrell's next notes will be on the following: Crotons; Care of Violets; Decorative Foliage Plants; Fancy-Leaved Caladiums; Primulas; Shading Palms and Ferns.

OUT-DOOR VEGETABLES AND FRUIT

The Orchard

On any days suitable for out-door operations the pruning of the orchard should be attended to, and in doing so it is well to bear in mind the several objects to be aimed at in pruning fruit trees generally. These are a balanced and desirable formation, next a sufficient thinning of growths to let in all the sunlight possible to every part of the tree, and last pruning to obtain the formation of fruit spurs, though this last object is undoubtedly better obtained by summer pruning than by the same operation in winter.

Pruning Young Trees

In pruning young trees a definite object must be kept in view, viz.: the framework of the future tree. Four to six main branches should be selected and it is important that these leave the trunk at different heights and still be as near the ground as possible. In the second year these main branches should be pruned back to twenty or twenty-four inches long and during the second summer secondary branches, two in number, should be allowed to form on each of the main branches, taking off all others. In the third summer two or three side branches should be formed on the secondary shoots and so on till a good fruiting tree is formed.

Old Trees and Tree Surgery

In old trees we often get a lot of what are called sucker or water growths, and as a general principle these should be removed at the earliest possible moment, but there are times when they may be left—or at any rate some of them—to build up a new frame, at the same time gradually removing the oldest and weakest branches. By this means old trees may be renovated and made to do as well as ever. It is frequently necessary to remove large branches from full-grown trees for various reasons, sometimes because the wind has broken them and at other times for the purposes of thinning, but whatever the cause it is very desirable for the operator to have some little knowledge of the fundamentals of tree surgery, upon which here follows a little digression. These are the days of the most active campaigning on the part of the tree experts, of various grades, who are daily soliciting the owners of estates to have their trees attended to at once, implying frequently that if the trees are not given expert attention immediately the most dire results are almost sure to follow. Now this may be very good business on the part of the tree experts and it may be expedient for the gardener in most cases to have these men do the work but I feel sure that all sensible men will agree with me when I say that the gardener or superintendent should have sufficient knowledge of the proper care of all trees, be they fruit or forest, ornamental or useful trees, to properly supervise the work of the professional tree pruners. I do not propose here and now to write a treatise on this subject but only to state a few of its elementary propositions and then to tell the reader where he might easily obtain fuller knowledge from the foun-

tain head. Briefly stated, I would take as of first importance the removal of decaying or dead limbs or branches. If the cut is to be made out on the branch and not back to the trunk be sure to make a rather long sloping cut toward the tree from a branchlet or a bud, this branchlet or bud to act as a conveyer of sap out to the extreme end of the cut so as to promote healthy healing over of the wound. Should it be necessary to cut right back to the main trunk, if the branch be a heavy one it should be first cut off some two or three feet out so that it will not make a long ugly tear in the bark of the tree trunk as it is very apt to do in falling. This being accomplished it should next be cut right back and the wound carefully trimmed to conform to the shape of the trunk. Do not be afraid that you will make too big a wound; this will not do a quarter the damage that leaving an inch or two of the limb which you are attempting to remove will do. It is in this cutting back close to the trunk that most men fail in this class of work. All wounds should be painted over with coal tar or with a good paint. The next matter of importance is the care of holes which we so frequently find in trees that have been neglected. With a chisel or other suitable tool remove all the decayed matter and then fill the hole with a good strong mixture of Portland cement, finishing off in such manner as to shed the rain. Treat it as a dentist treats a hole in a tooth—exclude air and moisture. A further development of this subject would deal with the trimming of trees to get a proper shape or a new head on old trees by the process known as pollarding, but for these I will refer my readers to the fountain head above referred to, viz.: a little book on tree pruning by A. Des Cars and published by the Massachusetts Society for the Promotion of Agriculture. A careful perusal of this little book will ground its readers with sufficient knowledge to properly supervise the work of the tree experts or to have it carried out by his own men.

The Making of Hot-Beds

For those who have no greenhouse and still wish to get some early vegetables started, it is advisable now to commence to save some litter from the horse stable and to take care of this under an open shed or in a basement. Give it frequent turnings and moisten with water if too dry and add about a third of its bulk of leaves if these can be gotten handily. The importance of the proper cure and preparation of fermenting material for this purpose is most frequently overlooked and leads to much disappointment, for, if not prepared in this way the result is sudden and intense heat and consequently rapid cooling, instead of the steady lasting heat secured by the methods advocated above. In about ten days to two weeks this material should be in ideal condition and that will be about the right time to get the hot-beds in operation.

Edwin Jenkins

Lenox, Mass.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Thinning Peaches and Nectarines in Pots

The thinning of the fruit on pot trees is a process which requires considerable attention to get the best results. When completed the crop should be spread evenly over the whole tree, so aim to this effect from the start. With an ordinary good set there will be a quantity of clusters of small fruit. These should be reduced to one the first time over, also remove any having two pistils. Some varieties, such as Advance nectarine will have a quantity of fruit apparently set but will not swell them all. Go easy on these for a time until the good ones are discernible. It will be advisable to go through these early trees two or three times before stoning and leave a crop and a half to stone, which will allow for any failing in the stoning process. A little feeding given weakly will help the trees for a few weeks after setting, but cease as the stoning period draws near. Be sure to keep all growing trees clean.

Setting Cherries

Cherries are mean things to set at any time. It seems the more you coddle them the worse they repay you for it. When growing outside experiencing all kinds of weather they set with a freedom that is surprising. Follow nature as much as possible with them inside. Keep them cool and airy. Not only fertilize the flowers in the ordinary way but shake the trees as often as you go into the house. Spray the trees over with a fine spray after fertilizing.

A Red Spider Digression

The unexpected always happens and so it did with Mr. Jenkins and his article on red spider. Apparently the storm hung off for quite a while, but it was inevitable, coming from an unexpected quarter. Mr. Jenkins very generously detailed my letter in an endeavor to turn my argument to my own contradiction, but it is erroneous to assume the same can be accepted in that light entirely. There is still some good dry powder left with a never failing spark so again I open up the fray.

I would like to ask Mr. Jenkins why there was no spider in the house I alluded to previous to its importation? Syringing was out of the question; never was practiced in that house on account of the quantity of bloom in there; the floors were dried off after watering, the water space alone being more than adequate to counteract the dryness. Why did it develop most quickly in the driest places? The "pun" of moisture having effect on spider "when spider is not present" can be answered when we learn where spider comes from in the first instance. Referring to our strain of spider on that place, I cannot say it was any different from what is being

continually met with every day. There may be "extra fine strains" or several varieties. In this I plead ignorance, all are alike to me—just spider. Of the treatment of the clerodendrons previous to the time I mentioned I know nothing; sufficient for the present purpose to take them up at the time they came to me as distributors of evil.

Taking Mr. Jenkins' answer—"Spider usually secures a start in a house that has reasonably good care in those spots which are the most inaccessible to the hose," etc.; "at the bottom of a tree or vine and near the heating pipes" (note the latter sentence). Now, why should the bottom of a vine or tree be inaccessible to the hose? We read of short hoses not able to reach the bottom of a tree or end of a bench properly; whose fault is this? Again, any man who knows his hose is not sufficiently long enough to reach where he wants it to is a fool if he does not get another length coupled on to it and get it where he wants it. When measuring hose lengths for any house I cannot imagine a man who has the interest of his charge at heart who would "cut" on a few feet of hose at the expense of spider in corners, etc. Mr. Jenkins concludes by saying, "Heat favoring rapid propagation is the cause of spider." If so why do we get it on carnations and violets having a temperature of about 50 and 45 respectively? Violets at the temperature named can get as lovely a lot of spider as anyone wishes to deal with. Following Mr. Jenkins' theory one would naturally conclude that violets at 45 would be exempt and all the spider would be found on melons at 70. Had he included an adjective in his sentence and said "dry" heat I would have acquiesced with him. To my mind there is no other artificial heat than dry heat unless made so by evaporating pans. Some contain more moisture than others, but all are dry.

Now I'll quote another instance that is in existence today and has three men of wide experience to back it up and all are agreed on the point I am about to bring forward and which is the keynote of all this space being utilized on this subject—the dryer your house, artificially, so much easier spider increases. A certain rose house of large dimensions has concrete walks and benches throughout, about the driest of all materials used. These three men are known to say they never had to fight spider in houses having an ordinary ash walk and benches made of other material than concrete, as they do in this one. Ask them why and they tell you the dry cement causes it. I do not wish to enter on a rose debate entailing spot and spider; that is not the point but I will say I have seen the house in question, saw spider but no spot. The men referred to are rose growers of wide experience and the temperatures approximately were the same. Further where the mains go into the house, which is near the center, they have more trouble than elsewhere. Why? There is no lack of hose or pressure. Now these three men having grown roses in different houses, in the same temperature, say the moist ash walks are a great assistance against spider and also that the driest part of the house more easily succumbs to its ravages.

For a
"fixed" Easter

The business world generally, and especially the flower growers and dealers, will hail with satisfaction the news that a practical scheme for rearranging the calendar so that Easter may be a fixed date, is under consideration by the Congregation of Rites at the Vatican. Ecclesiastical changes so radical as are here proposed require long deliberation and we can hardly expect to see this reform accomplished at once, but it has been advocated repeatedly by the Swiss and German governments and it is at least a hopeful sign that it is receiving attention from the only tribunal that can put it into practical effect. For the flower and plant industry it would be a great boon to have the Easter celebration come on a uniform date each year.

The daily papers give accounts of the destruction of many valuable orchids and other plants that can never be duplicated, at the Royal Gardens, Kew, England, by the militant suffragettes. It is very difficult to convince one's self that members of the fair sex, of good breeding and refined associations, could ever be guilty of such an atrocious act of savagery.

"O woman! lovely woman! Nature made thee
To temper man; we had been brutes without."

Thus sang the poet over two hundred years ago. Is it possible that the time is coming when the sentiment will have to be reversed? We are sorry for Kew, for, in a way, its loss is the loss of the entire horticultural world. We are sorry for the misguided marauders who imagine they can help their cause by venting their fury upon the flowers!

Flowers
for everybody

Sarah Bernhardt's recent comment on the average American's indifference to flowers amounts almost to a reproach.

In France, she tells us, the desire for the possession of flowers and growing plants is universal among all classes—the very poorest as well as the rich. There is not a street in the big towns where a flower shop cannot be found. Every householder, even in the most obscure byways, likes to have growing plants in the window and a few flowers on the table is the rule in all homes and not the exception as in this country. The actress instances also the general use of plants in the cottages, flowers on automobiles and elsewhere, and the wearing of corsages by the ladies, in England as contrasted with the absence of these adornments here. Just why our people are so dormant in this respect may be variously explained but it will be generally admitted that the criticism is well justified. HORTICULTURE thinks the florist trade blameworthy in part, and has so stated at various times. The American public are not naturally unappreciative of the beautiful things which Nature has so lavishly given but the condition of commotion and unrest in a new and rapidly developing country have diverted their attention to other matters. The time is now here, we firmly believe, when they are ready to listen and learn from the florist and gardener how to make use of and enjoy the loveliness which is at their call and which can add so much to the joy of living. And it is most inspiring to see the evidences all about that the florist trade is really beginning to wake up to its duty and its opportunity.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Potting Cuttings

The first pottings that the young cuttings receive should be in very carefully prepared soil. Crock all the pots well and if it is possible use at least some charcoal to mix in with the other material which is to be used for the purpose. We find it pays to use charcoal where it can be bought for a reasonable figure. Considerable time can be saved by getting charcoal which has already been ground quite fine and can be used at once without crushing. Charcoal when used as crock will be a great help in keeping the soil in a sweet condition, which would not be so were other materials used all alone. Not that it has to be used; there are thousands of plants grown that have never had charcoal as crock, nor had any charcoal mixed into the soil. These plants were in the hands of growers who knew, however, and the soil was kept sweet by watering very carefully at all times.

Watering During Cold Weather

During this very cold weather when plenty of fire heat has to be used, the benches should be watched very carefully to see that there are no dry spots here and there. By going over the benches every so often, these spots can easily be detected and attended to. Although we advise letting the plants get quite dry before giving them any more water, we would never recommend this to be carried too far. It does the roses no good to have their roots in soil that is fairly sogged with water most of the time. Hence the drying out when properly done will be a great benefit to the plants. Soils will vary greatly, and all of us must judge for ourselves just what the nature of our soil is and then handle it accordingly.

When you find that you have to water the whole house, it is best to go over these dry places and water them first and then follow with the watering proper; for these spots, if allowed to go unremedied, will cause loss to the grower. Be sure to see that the bottom of the benches is not dry when the surface appears to be quite wet. This will happen in many cases where the heating pipes are underneath the benches.

Lime

Keep right on blowing air-slaked lime underneath the plants every evening following a watering or a syringing. It helps wonderfully in drying out the air and will be a great help in preventing some of the diseases which a rose plant is subject to.

Liquid Manure

Now that spring is on its way to us, the plants are the first to feel it. By their own nature they will begin to grow with far more energy than they have during the winter months. Rapidly growing plants will take much more feed and water, than plants that are just growing along slowly. The liquid that has been applied before this was no doubt quite weak as it is best not to use it too strong during the winter months. This can be changed now and it can be made very rich, using good cow manure to make it with. A little bonemeal may also be dropped into the tank, especially when there are

steam pipes in the tank so that the liquid can be boiled. A little soot is very nice too and will give the plants and blooms extra color if it can be added. It is best to throw a whole bag of it into the tank, bag and all and then it will gradually soak through into the water which the tank contains.

Lime and Liquid Manure

Once in a while some lime can be added, when it is desired to sweeten the soil in the benches, or to kill a lot of worms which come in with the manure, and are hard to get rid of otherwise. It is not advisable to make the lime water very strong; sooner use it twice. Where electricity is employed in pumping the water it is an easy matter to apply it any time as it takes but a few minutes to start the pump going. We are surprised that so many places are without it. It certainly gives one man a chance to do two men's work. The first cost is the only time it is more expensive than any other power, but after that it is cheaper by far.

Manure for the Spring Mulches

This should be brought into the manure shed now, if it is not yet in place and should be turned over as often as time will allow. The object of doing this is to have the manure as well decayed as it is possible to get it, for manure that is green is not available to the plants, or at least the largest part of it is not. By having the manure well prepared, the plants will take hold of it at once and you can have better results, and what is more the danger of burning the foliage of the plants is done away with.

Making Room for the Young Stock

This topic is as old as rose-growing under glass itself, and we can only advise growers to use their best benches and their best houses to house their young stock. It will pay in the long run. You must not expect to produce extra fine plants, where the old plants have all they want to do to keep alive. This applies to all other stock as well as roses. If you have a lot of old leaky houses on the place, tear them down as soon as you get a chance and replace them with new and more up-to-date structures. You are losing good money trying to grow good stuff in old, tumble-down houses that resemble a shower bath every rainy day. There is nothing in it. When you build, build right. The best is none too good you will find, and the man that builds cheap, will pay dear in the end. It makes a great difference whether you keep all the profits, or spend them for repairs. A greenhouse should receive a coat of paint every other year. Use very thin paint so as not to have it an inch thick. It will pay. Always work for the future. Notice the construction of the new railroads. They are not only built to last, but also to reduce the cost of upkeep to the minimum. And we should certainly do the same. How disappointing it is when you have a nice little sum set aside, everything paid for, and if it was not that you have to rebuild some of the houses, all would be well. But... Well, let us build right.

THIRD INTERNATIONAL FLOWER SHOW

NEW GRAND CENTRAL PALACE, NEW YORK, APRIL 5-12, 1913.

One of the few really grand buildings in New York is the new Grand Central Palace, 46th street and Lexington avenue, close to the magnificent and newly opened Grand Central Station of the New York Central Railroad, and easily and quickly reached from any part of the city. The building is notable for the immense amount of floor space it provides, and for the many conveniences presented in its general arrangement, such as are not approached by any other public building in the city. In this building will be housed the Third International Flower Show, to open Saturday, April 5, and continue until Saturday evening, April 12.

The main floor, mezzanine floor and floor above have been engaged, at an expense in the neighborhood of \$12,000, and the premiums to be offered will in all probability exceed twice that amount in value—an undertaking which in magnificence, has never before been attempted in the history of horticulture in America.

Entering the building by the main entrance one is confronted by the grand staircase, large enough to accommodate a big crowd of people at one time; and at the sides are the ticket offices, each presenting an easy approach. The staircase, owing to its design and surroundings, permits of lavish floral decoration, and something wonderful in this direction is in store for the public. From the staircase one emerges into the main hall, a triumph in point of architecture. Massive stone columns with Corinthian capitals, support the floor above, and the ceiling is most ornamental. A stone parapet surmounted by large vases gives prominence to the mezzanine floor, from which a splendid view of the main floor is obtained. The main floor is about 275 by 185 feet altogether, including a cafe and restaurant, which

FIGURE 1. Flower Show quarters, No. 1.

occupies a space about 25 by 122 feet. Between the columns on the main floor, running transversely, are a series of "halls" each about 40 feet wide, but these halls will not be reckoned with separately in the layout of the show, and the columns will lend themselves very nicely in the arrangement of exhibits. View No. 1 shows a section of this floor, looking from the mezzanine parapet, the views showing perhaps one-fifth of the floor and a portion of the mezzanine floor. The top of the stairway is seen in the rear and the hall back of the entrance stairway parapet, shown in View No.

2. No. 3 is a view taken from a point near the south elevators on the main floor, to the left of the stairway and looking west from under the mezzanine floor. This view gives some idea of the excellent light available. No. 4 shows one of the side sections of the main floor, 152 feet long. The third floor is of about the same dimensions as the main floor, but there is a much smaller open area in its center. The artificial lighting arrangements are superb—not a gloomy spot anywhere.

All who have visited these sections of the building express themselves as highly pleased with them as being excellently adapted to flower show requirements. The freight elevators are of more than ordinarily large capacity, as may be imagined when it is stated that the largest motor trucks were placed on the main floor at the recent automobile show without difficulty. The cafe and restaurant are first class in every respect and the service of the finest, at moderate prices. The telegraph and telephone service, too, is most ample.

J. H. PEPPER,

Chairman Publicity Committee.

Amateur Interest.

John Young, as secretary of the International Flower Show, has received a cordial communication from Mrs. Francis King of Alma, Mich., expressing the friendly attitude of the Garden Club of Michigan of which she is president, and asking for a supply of the exhibition stickers for use on official stationery. From Mrs. Andrew Squire, of Cleveland, Ohio, comes also a letter on behalf of the Garden Club of Cleveland, as its president, in similar cordial strain and affording pleasing evidence of the ready co-operative sentiment entertained by the amateur horticultural people as regards the big exhibition and its objects.

FIGURE 2. Flower Show quarters, No. 2.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The meeting of this club on Monday evening, February 10, was a most enthusiastic one, 128 members being present. Plenty of able speakers were there and the present situation with the big International Show so close at hand affords ample opportunity and incentive to oratory of the kind that enthalls and inspires. So the crowd was there and it was in a mood to listen, too. The matter of entertainment of the visitors at the time of the show is, of course, an engrossing subject, and it is gratifying to be able to say that no idea of trying to outdo other occasions will be allowed to influence those entrusted with the responsibilities of this department. There will be no wild extravagance and this is in accord with club sentiment and the well-known wishes of the S. A. F. officials and members.

Secretary Young called attention to the meeting of State Federation of Floral Clubs at Ithaca, Wednesday, February 12, and urged as many as possible to be present. President W. H. Siebrecht, John Young and Harry A. Bunyard will represent the club and Mr. Bunyard will also deliver a lecture. Charles H. Totty spoke enthusiastically on National Flower Show matters and suggested that the florists take liberally of trade tickets for use only the first night of the show. C. C. Trepel immediately placed an order for 5,000 tickets for the first day.

Exhibits were made by the following: A. S. Burns, Jr., carnation Electra; H. B. McKnight, three seedling carnations; Cottage Gardens, carnation Matchless; J. D. Cockcroft, carnation Northport. The judges gave a preliminary certificate to Electra.

M. C. Ebel of Madison, N. J., read a pertinent paper on the subject of "Publicity," and was accorded a vote of thanks. John Bodger of Los Angeles,

Cal., and H. E. Philpott, of Winnipeg, Man., Canada, who were present, also made brief addresses. Another very welcome visitor was Adolph Farenwald, president of the American Rose Society. A committee with J. Austin Shaw as chairman, was appointed on the recent deaths of the mother of W. G. Badgley and the mother of Geo. H. Blake.

LANCASTER COUNTY FLORISTS' CLUB.

On January 30th a party of 22 members visited the establishment of M. J. Brinton at Christiana. Mr. Brinton is the successor of a very worthy sire, who knew how and did grow a variety of plants and flowers to perfection, and is now living in the original homestead taking an active interest in the work and giving his big boy advice. Mr. Brinton's carnation range is almost ideal and his Gloriosa altogether ideal, certainly the best in this part of the world. A bed of O. P. Bassett was absolutely without any imperfections. If this bed could be duplicated everywhere all other reds would be relegated to the rubbish heap. Mrs. Brinton surprised us with a very fine lunch, and that it was fully appreciated goes without saying. She made an ideal hostess and was extended a vote of thanks by everyone of us.

Coming back toward Lancaster the first stop was made at Mr. Ranck's where the unusual spectacle of the main crop of flowers having been cut over the holidays was seen, every other grower in this section having his main crop just coming on. Here we saw an immense large pure pin's sport of Gloriosa. The next stop was at Mr. Denlinger's where a fine lot of Alma Waid were in evidence, the dark weather making them closely resemble Prosperity. The third stop was at Mr. Landiss' of Paradise, where we saw benches of Benora and Lawson En-

chantress, also a few lupins, which were a curiosity to most of us.

The fourth and last stop was made at the two adjoining and interlocking establishments of Chas. B. and Elmer Weaver, their glass combined making the largest place in the county. Chas. B. grows sweet peas in his new 400-foot house exclusively as well as in some others and calendula and mignonette in the balance. Elmer is a carnation and tomato man. Here Comfort was in strong evidence and is well liked. He has discarded Enchantress for Pink Delight and has a fine lot of them, and contemplates making White Wonder his exclusive white. He uses concrete benches for propagating and as he is building new ones they must be satisfactory. His boiler cellars are connected with a Chinese puzzle of alleyways and our Jacob Flear almost lost himself in them. A search party found him inspecting the ash carrier and other mechanical appliances used here.

A jolly but tired party reached Lancaster at 5 P. M. Outside of the sociability of these trips they are educators. Sometimes where there are but one or two houses there are found ideas that the larger grower overlooks and that are worth money to him.

Our next meeting is February 20th, "Carnation Night," the one chance to show a scattered bunch of carnation growers your novelties at one point. Any one sending flowers, have them addressed to H. A. Schroyer, Lancaster, Pa.

ALBERT M. HERR.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The club meeting on Feb. 4th was unusually well attended for it was both election and carnation night. There being no opposition the secretary was instructed to cast the ballot of the club for the following nominees who were declared the officers of the club for 1913:

President, Nell McCallum; vice-president, E. C. Reineman; secretary, H. P. Joslin; assistant secretary, W. A. Clarke; treasurer, T. P. Langhans; executive committee, E.

National Flower Show Quarters, No. 3.

National Flower Show Quarters, No. 3.

C. Reineman, C. H. Sample, Aug. Frisch-korn.

The new president made a graceful little inaugural speech, and the applause which greeted the new administration was mingled with praise and appreciation of the old, the membership and finances of the club having shown substantial improvement the past year, and it was with hearty goodwill and feeling that the members rose and gathering around the retiring president, E. C. Ludwig, sang "For He's a Jolly Good Fellow."

The new president is a native of Scotland. He spent several years in Australia and for some time was an orchid collector in South America. For the last few years he has been employed by the Department of Public Works, Pittsburgh, as superintendent of West End Park, which under his supervision has become one of the most beautiful of the city parks.

The first act of the new president was to display before the club a fine pencil drawing on a large scale of the "Bull Moose" fern, a native of Australia, the fronds of which are almost an exact reproduction of the antlers of the bull moose. What an opportunity was lost to the "Bull Moose" party and to the plantsmen in the late campaign that they did not produce this fern on a large scale for party emblems!

The Auditing Committee reported the books of the club examined and found correct. Messrs. W. A. Clarke, T. P. Langhans and E. C. Reineman were appointed a committee to provide for a reception at the March meeting.

Much to the disappointment of the members, although it was "carnation night," very few carnations were shown either by home or distant growers. This feature of the club meetings, the exhibition of plants and flowers, has always been very interesting and steps will be taken to insure in the future an increase rather than diminution of the exhibits before the club.

Jas. Wiseman made an exhibition of carnations which, considering they were grown under city conditions, merited and received a cultural certificate. To Carl Bichner, gardener at Dixmont Hospital, was also awarded a cultural certificate for collection of cyclamen and primulas. The subject for the March meeting will be Easter plants.

H. P. JOSLIN, Sec'y.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

At the February meeting of the Gardeners' and Florists' Club of Baltimore, Mrs. Austin Gallagher of the Woman's Civic League addressed the club and asked the co-operation of members for the third annual flower market to be held at Washington Monument, May 7. A committee was appointed to secure signers to the next legislature for a state horticultural building of modern type to be erected in Baltimore. The building to be adapted especially for horticultural and allied exhibitions, and to contain a museum for minerals, cereals, forestry products, etc. It was new carnation night and new carnations were shown by S. Edw. A'ehurst, who had bunches of a sport from Enchantress and a seedling No. 45, which the club had already awarded a certificate on.

Gustav A. Lutz showed white seedling "Mrs. Perry"; Boyd Merritt also had a sport from Enchantress; Scott Bros., Elmsford, N. Y., sent a bunch of Wm. Eccles. The committee scored these specimens from 85 to 90 points. M. Thaw and H. J. Quick exhibited some grand sweet peas. The club will hold its annual banquet the second Monday in March.

CLUB AND SOCIETY NOTES.

The Engelmann Botanical Club held its meeting on Monday night, February 10, at the Missouri Botanical Garden.

Among the papers to be read at the Farmers' Institute at Provo, Utah, on February 24 to 28, will be one by Dr. R. J. Evans, on "Better Seed and How to Get It."

The Cincinnati Florists Club's meeting was a very brief one. It hardly took a half hour in all. After the meeting the members present went over to Alt. Heidelberg to hear the cabaret show there and enjoy refreshments.

Arthur Shurtleff of Boston will deliver a lecture, with stereopticon illustrations, on "Landscape Arrangement of Public Parks and Private Grounds," at Horticultural Hall, Boston, on Saturday afternoon, February 15. On the following Saturday Dr. Donald Reddick of Ithaca, N. Y., will talk on the "Diseases of the Violet."

At the monthly meeting of the Ladies' Florist Association of Rochester, N. Y., Feb. 4, at the home of Mrs. John Dunbar, the following officers were elected: President, Mrs. Charles Suhr; vice-president, Mrs. Fred Vick; secretary, Mrs. C. F. Boland; treasurer, Mrs. E. Fry. The next meeting will be held on the afternoon of March 4th at the home of Mrs. R. F. Nagle, 17 Vick Park B.

The Chicago Florists' Club held its regular monthly meeting February 6th, 1913. Edgar F. Winterson, Jr., was elected chairman of the sports committee. The coming annual meeting of the Illinois State Florists, March 4th, at Peoria, Ill., was announced and it was agreed that the train leaving Chicago at 9 A. M. over the Rock Island railroad would be the official train of the Chicago Florists' Club, and that this was to be the official notice of the club to its members.

The Westchester and Fairfield Horticultural Society will hold its first annual supper at Germania Hall, New Rochelle, N. Y., on February 18th, to be preceded by bowling in the afternoon. As a large number of our members are in the "championship" class, some keen matches are expected. We are hoping for a large gathering of members and friends on this occasion, as we want this to go down as one of the chief events in the society's history.

OWEN A. HUNWICK,

Cor. Sec.

The Yonkers Horticultural Society held their regular monthly meeting in Hallywood Inn on Friday, February 7th. The flower show committee reported a balance of \$47 from the Fall Show. A very enjoyable and instructive hour followed in discussing the different methods of growing veg-

tables in cold frames and hot beds, also the habits of growth of trees and shrubs. The executive committee have promised an essay for the next meeting and Robert Cochrane has offered a prize for the most meritorious exhibit, so it is hoped the members will turn out strong and bring their best to fill the exhibition table on Friday, March 7th.

WM. MILLS, Sec.

About 60 members of the New Bedford Horticultural Society enjoyed their annual banquet at the Parker House on Feb. 6. Owing to the kindness of James Garthly of Fairhaven, the dining room was very handsomely decorated with flowers, ferns and palms, while Mr. Garthly and vice-president David F. Roy furnished carnations for the guests. It was a cosy little party and the menu was thoroughly enjoyed as was the after dinner speaking and the singing. Mr. Roy gave an interesting talk on chrysanthemum culture. The past year has been the most successful in the history of the organization. More members have joined and more interest taken than in years, and the prospects for a successful future are very bright.

THE BOSKOOP ROSE SHOW.

We have received the following communication regarding the great rose show which will be held in Boskoop, Holland, July, 1913:

Again the Government has shown its interest in this enterprise as the exposition will be held under the patronage of His Excellency the Minister of Agriculture, Industry and Commerce.

The committee has been obliged to greatly extend the grounds of the exposition, in order to meet the wishes of the very large number of exhibitors. Around the Rosarium, which will cover about an acre, will be built a pergola 600 feet long. This pergola alone will require 3000 climbing roses, which have already been grown in pots for this purpose. In the Rosarium will be placed thousands of roses, bush and standard form; to keep the display in good shape during the time of exposition, there will be a surplus of 50,000 bush roses and 6000 standard roses in 300 varieties, all grown in pots. In the background of the Rosarium will be erected an Italian floral temple with side wings 120 feet broad, 12 feet high.

The program for cut roses is ready and will be mailed in a few days. The competition in class 1 (new roses not yet in commerce) will be open also for growers outside of Boskoop, and the committee therefore advises those who have good novelties to apply for a copy of the program. Several gold medals will be available for this class. The best known rose growers of Holland and other countries will be invited to act as members of the jury.

E. Y. Teas & Son announce that because of the advanced age and feeble health of E. Y. Teas, the senior partner, and of his desire to retire from an active business life, they have closed out their entire line of nursery and florist stock and that F. E. Teas, the junior partner, will continue in a similar line, giving especial attention to growing gladiolus for the wholesale trade.

BOSTON'S NEW FLOWER MARKET.

ALEXANDER MONTGOMERY
Rose Committee.

On Saturday, February 15, the Boston Flower Exchange, Inc., will open their new Flower Market, as announced in their advertisement in our issue of last week. The new location is in the centre of the wholesale flower district, spacious and eligible, facing on Winthrop Square. On one side of the square is the wholesale establishment of Welch Bros., and on the other that of N. F. McCarthy & Co., and this concentration of interests is regarded by all concerned as a most excellent move, handy for buyers, and particularly convenient for growers with wagons or auto-trucks as there is plenty of space in the square and tributary streets, while the express offices are also close at hand.

This move has long been contemplated by the Exchange and its success being now assured the event is to be celebrated with a reception and flower show on Saturday. Eminent gentlemen, among them being Mayor

Fitzgerald, will speak, there will be music and refreshments and the occasion will be made memorable for those who participate. The latch string is out for everybody and all will be welcome.

The street floor and basement of the new quarters comprise upwards of 22,000 square feet of floor space. The main salesroom is divided into 200 stalls. It is expected that removal from the old market on Park street will have been completed and regular business opened at the new headquarters on Monday morning, February 17.

CARNATIONS AT PETER FISHER'S.

The writer spent a pleasant hour recently at Peter Fisher's. He went there primarily to see his new carnation "Gorgeous." As to the justness of the bestowal of so fulsome a designation none can dispute, who have seen this carnation. Mr. Fisher regrets that its parentage has been lost. The color is hard to describe, and many unsatisfactory attempts have been made. If anyone can remem-

E. ALLAN PEIRCE
Chairman Flower Show Committee.

ber seeing Sweet Pea "Vermillion Brilliant" at the last Sweet Pea Show, he may get an idea of its color. There is, moreover, a touch of orange which gives a pleasing effect under certain aspects, with regard to the way light strikes the flower, and no matter whether it be from the back or front. It is a good even round flower, large, but not dense, and does not appear to be affected by strong light, as many such shades are.

Off and on, some interesting bits of information came out in the matter of seedling raising. The key note of it all was "you never can tell." It is not wise to presume because you work on two first-class varieties that you can expect first-class results. Lawson is a shy seeder. Out of 21 seedlings 18 were buff, yellow, or chocolate; one, a clear yellow single was the parent of Beacon. Some of the best seedlings come from singles. The veteran Tailby of Wellesley has given frequent confirmation of this, and the famous Grace

LESTER W. MANN
Plant Committee.

Wilder had a single for a seed parent.

Again some good for one reason may be no good for others or may be first-rate one year and valueless another. Benora amounted to nothing the first year, and is now one of the best variegated varieties grown. Mr. Fisher has been fully justified with this variety. Two sports of it have appeared, one with a tinted instead of pure white ground, and very effective; and a scarlet one. While on the matter of sports, some points came out. The writer has found plants from leaf eyes are very liable to sport, and Mr. Fisher, that leafy tops will.

Last season Mr. Fisher had some grand flowers from an Enchantress seedling, which this year is no good—bursts. The rule here is to test seedlings three years, and never name one until it has been tested thus long.

Other seedlings under test are 174, a

Manager.

"MRS. GEORGE SHAWYER"

We can still quote March delivery on this sterling Rose but would ask that you do not delay too long before investigating its merits.

SHAWYER and MILADY, \$30.00 per hundred; \$250.00 per thousand. Grafted or Own Root.

CARNATIONS

NORTHPORT: The leader in the dark pink section.

COMMODORE: The freest blooming scarlet we have.

ENCHANTRESS SUPREME and SALMON BEAUTY: Two fine sports from Enchantress.

\$12.00 per hundred; \$100.00 per thousand.

CHAS. H. TOTTY, Madison, N. J.

white, full but not dense flower; will propagate all possible; 137, a fine light pink, will be heard from later; 250, white, full and free, medium size. It is no doubt good policy to grow such varieties; even though they do not bring as much as larger flowers, they make up in quantity, and come in useful in many ways where large flowers would be wasted; besides lots of people will buy medium-sized flowers—even prefer them aside from the lower price, while with others, the price is a consideration; 235, one of the finest, style of white Enchantress; 252, light pink, promising; 81, Portia-red, bright, free, splendid stem, medium size; No. 55, Winsor shade, splendid flower, finely built, stem and calyx perfect.

Mr. Fisher's treatment of cuttings is slightly different from that of most growers. There is a fair amount of bottom heat, with abundance of air. No soft growth or damping is seen. In the matter of a propagating material, a very coarse sand is used which from a casual examination would appear to contain a small proportion of clay, and this, I think, if not essential, is a great help. No pounding is done; none appears necessary, or would not, if clay is present. The cuttings are watered in once and not watered afterwards. There is no rust.

Wellesley, Mass. T. D. HATFIELD.

BOSTON CO-OPERATIVE FLOWER MARKET.

A meeting of the stockholders and stallholders of the Boston Co-operative Flower Market was held at the Quincy House, Wednesday evening, February 12th, to hear the report of the directors as to progress made towards consolidating with the Boston Flower Exchange, Inc., and going with that organization jointly into the new market in Winthrop square. It was a very earnest meeting, there being about sixty gentlemen present and the serious proposition which has been before the members for a long time was carefully debated from all sides. The four-years' lease of the salesrooms now occupied on Park street and other drawbacks were deemed sufficient to make the proposed removal injudicious and it was finally decided by a unanimous vote to abandon the idea of consolidation and to continue business at the old stand. It is proper to state here that no ill-feeling towards the rival market was in evidence and the decision

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

An Inconvenient Postal Ruling.

It is an open question whether the mail order trade has been helped or hindered by the new parcel post act but it is not at all to the liking of the mail order houses that they are unable to utilize the stamps which are sent to them for small amounts where the sender does not want to go to the trouble of securing a post office or express money order. Heretofore these stamps could be utilized to a considerable extent on the mail packages sent out, but, under the ruling of the Post Office Department that seed packages must be stamped with the parcel post stamps the use of ordinary postage stamps is prevented. No doubt the principal mail order firms will be able to figure out the advantages or disadvantages of the new plan by the end of the present season. It looks to us as if it was another argument in favor of the fractional currency plan advocated by mail order houses irrespective of the line of business.

Surpluses and Tardy Contracts.

Reference has been made in these columns to the rather tardy way in which dealers are contracting for their requirements in peas and beans for another year. Last year there was feverish haste to get in lest they be left out altogether. There is a tendency this year to go to the other extreme. No doubt many have more or less of a surplus of these goods to carry over and they doubtless want to know just about what this surplus will be before placing any orders for the 1913 crop, and quite possibly their stand is the right one. We simply mention it because attention has been called to it by some of the growers of peas and beans,—many expressing the fear that they will not be able to contract all of their seed stocks. This will not be surprising as most of them have reserved very liberal seed stocks and it would seem to us that they

(Continued on Page 26)

Star or Wonder Blackberry

A wonder indeed! in growth, in excellence, in productiveness. Berries large and luscious, bears in clusters like a grape for two months. A single plant has yielded over two bushels in a year. Headquarters for St. Regis Everbearing, the best red Raspberry, and also by far the choicest of all hardy Grapes. A full assortment of Strawberries, Raspberries, Blackberries, Grapes, Currants and Gooseberries; Garden Roots, Hardy Perennial Plants, Shrubs and Vines, Evergreen and Shade Trees, Roses, Hedge Plants, etc. Illustrated descriptive catalog replete with cultural instructions free to everybody. Established 1878; 200 acres; quality unsurpassed; prices low.

J. T. LOVETT, Box 153, Little Silver, N. J.

No merchant carries last year styles, and you would not care for old styles; therefore, your customers demand new varieties of Carnations of the "Better Kind," and it is up to you to furnish them with up-to-date novelties such as our New Scarlet Carnation

THE HERALD

Besides, this is a money proposition: *The Herald* will produce at least one-third more blooms than any other scarlet; early, free and continuous bloomer; stem long and always stiff; flowers large, full and of a clear even shade of scarlet; calyx absolutely non-bursting, making it the highest type of a commercial carnation and one of greatest value to you. All cuttings strong and well rooted.

Boddington's Quality Cannas

Are true to name, have two to three good eyes, are well cured, sound and dormant, and give absolute satisfaction. Our sales last year were nearly 700,000, and not an overgrown kick. The Canna crop this year, however, is very short, and we advise placing orders early to secure stock. Delivery can be made at purchaser's option. Remember, you may deduct 5% if cash accompanies the order.

We are the largest handlers of Cannas in the world. Our prices upon Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three, sometimes four eyes—are sound, dormant, and are packed 250 in a box; two can be "cleated" together and shipped as one. One box of 250 sold at a

thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices for quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us, we will substitute or send only the best for all purposes.

Seed Trade

(Continued from page 224.)

should have anticipated a reduced demand this year instead of reserving as liberal stocks as they did a year ago. Should there be a full crop the coming year there will be surpluses galore, but we believe that most of these surpluses will be in the hands of the growers themselves, and their disposition up to them.

A New Departure.

There are reports which we believe are authentic that Rogers Bros. of Alpena, Mich., have bought a ranch in Montana of several hundred acres. This is something of a departure from the general policy of the growers who have depended on the farmers to raise their crops so that in the event of short crops the losses would fall on both parties and not wholly on the seed grower. Doubtless Messrs. Rogers have discounted all these possibilities and are acting from well thought out and clearly defined policies. Should they be successful in securing uniformly good crops, their example may be followed by others in their line of business.

German vs. Canada Peas.

To meet the demands for Canada field peas many thousands of bushels of German white peas have been imported this year and sold as Canada peas. As they are generally grown for the green fodder when planted, these peas will doubtless fill the bill fairly well and where they are used as pigeon peas they should be just as acceptable. It is certainly a fact that they can be sold at a considerably lower figure than the genuine Canada field peas. We note that Baltimore and Philadelphia dealers are quoting them at \$1.70 to \$1.75 f.o.b. while genuine Canada field peas are quoted at from \$2.15 to \$2.25. It is a singular reversal of ordinary conditions to find these peas selling at such comparatively high prices because of the very short crop, while the fancy large-bodied varieties are in surplus and are being offered in many instances down to contract prices.

"Free Seeds" and the Surplus.

In a statement which we assume emanates from the Department of Agriculture at Washington, an effort is being made to prove that because of the manner under which it is conducted the free seed distribution is really a boom to the seed trade. The main reason advanced in support of this rather remarkable argument is that the Department by its policy of buying surplus stock towards the end of the season removes these from the market, thereby leaving prices to follow their legitimate course. Doubtless there is some basis for this claim and no doubt it often does aid the wholesale dealers but we fail to see where it can benefit the retailer in any respect. Knowing that this demand from the Department is coming each year certain growers deliberately plan to produce surpluses to meet it. It is well known that a California grower followed this plan for several years, growing the varieties which he produced on the Coast largely in excess

HENRY F. MICHELL COMPANY

518 Market Street, - - - Philadelphia, Pa.

of the requirements of the legitimate seed trade, anticipating that he would be favored with a very large percentage of the Government's order, and as a matter of fact he was. There is no insinuation in this that everything was not conducted in a perfectly proper manner but he seemed always able to underbid most of his competitors and received the lion's share of the business. However, this is aside from the point we wish to make, which is that knowing the very large requirements of the Department, growers frequently create surpluses purposely to supply this demand and legitimate or accidental surpluses are not materially benefited by the Department's purchases.

The Cannery Convention.

The annual convention of the National Canned Goods and Allied Associations, which was held at Louisville, Ky., the present week, was, as usual, very largely attended and the hotels of this hospitable town were taxed to the utmost to care for the crowds attending the convention. Four years ago the convention was held at Louisville and with a few exceptions those who attended were well satisfied with their treatment. That is one reason why Louisville was able so soon to secure the convention again, while other towns which made strenuous efforts to secure it were turned down because of the narrow short-sighted policy of the hotels in charging all canners double rates.

The display of machinery may have been a little less complete than at Rochester last year, for the reason that there was considerable less floor space to be apportioned among the exhibitors. Last year the officials of the Machinery and Supplies Association urged exhibitors to take all the space they wanted, while this year it has been necessary to restrict them somewhat. Without wishing to disparage other towns it really looks as if Rochester had scored one on all of her competitors who are seeking to secure the National Canned Goods Conven-

tion, by the ample size of her exhibition hall and the abundant space which each exhibitor knows he can have for the display of his goods. We are advised that additions have been made to the very commodious hall since the convention of last winter, materially increasing the floor space.

Of Interest to Retail Florists

Among the inexpensive devices for a Valentine gift we must mention some violet chip baskets, with hamper cover and handle, about 4x7 in., at Penn's, Boston, in which had been inserted a pretty, blooming heather in 3-in pot, and a plain tumbler filled with water, the tumbler and pot held in place with sphagnum. It became only necessary to insert a bunch of violets and a little asparagus with a knot of ribbon, to make it an ideal Valentine gift. A row of these little arrangements stood ready for the few moments' finishing touch in the customer's presence.

DETROIT WINDOWS THIS WEEK.

Mr. Pochelon shows an interesting window decoration, picturing a large steamboat and several yachts sailing along the coast of Algiers, using Japan maple and five specimens of Cactii growing amongst the rocky cliffs very effectively.

B. Schroeter had one window filled with pots of white azaleas neatly trimmed with pink crepe paper and bow.

Potted tulips and hyacinths nicely trimmed made a very effective window at J. F. Sullivan's, and many of these plants were disposed of.

Breitmeyer's had a display of white lilac and double flowering almonds, both very well done.

FRANK DANZER.

Cherries Are Ripe, We Have Them

Only a short time left for you to display the cherries to commemorate George Washington's Anniversary. A little bunch attached to your boxes, also tied and arranged on the handle of baskets will attract attention. Try some. They will prove very fetching.

The dainty two-tone baskets in London tints are in great demand for Easter work. Send for sample order; our selection will be a pleasing one. Combination tints, white and pink, Nile and white,

yellow and white, lavender and white and many other ones if desired. It may appear early to advertise Easter baskets but these take time to get ready.

Plenty of Waterproof Crepe Paper in the imported kind, which is the best. All good flower shades. Pleated Crepe Paper, the accordion effect, is still in popular demand. Magnolias, Green, Brown and Red, prepared and selected, of uniform stock.

CHICAGO NOTES.

Some New Plants.

Frank Oechslein's range of plant houses is a thing of beauty now, filled with blooming and decorative stock. Thousands of pots and pans of bulbous stock are just in prime condition, and being sent out for St. Valentine's Day. Among the hyacinths was noted the new Lady Derby, which was on trial here last year and is this year grown extensively. It is a good shade of light pink and a full, well-built flower, the individual flowers hanging like bells, hiding the inside and giving a general drooping effect. A new tulip, the La France, is a pretty thing, large and strong and very delicate white shaded with pink.

The azalea houses are especially interesting now as many of the new varieties sent over by the Belgian growers for trial, under number, are now in bloom. Many of them are very promising. Among the regular stock is a comparatively new one here, Mrs. Jean Peeters, a deep glowing rose shade, almost red, and blooms in clusters. Mrs. J. Haerens, new here, is a deep pink, softer in shade than Vander Cruysen. Haerensiana has a striking flower, very light salmon, slightly deeper in the center and is grown here in quantity now for the first time.

Valentine Notes.

This day is apparently gaining in favor with patrons of the flower shops, though very little is done in the way of window advertising except the occasional use of the old-time heart-shaped boxes. This year a new box has appeared with an appropriate cover design and suitable for long-stemmed flowers. It is very attractive and was gotten up by a local retailer who is noted for original ideas.

One of the department stores offered 2000 pots of tulips, hyacinths and daffodils and several hundred cyclamen plants for a St. Valentine's Day sale an event which will be to the interest of the florists in the future if not especially this year.

The interior of J. Mangel's store presented a holiday appearance. Large azaleas and other blooming plants

were artistically decorated and grouped to appeal to the eye of the valentine hunter and incidentally to his purse.

Trade Items.

N. J. Wietor is quite enthusiastic over his trip to the sunny South land and brought home many good snap shots of the pecan and orange groves.

Weiland & Risch have given up their retail store recently opened on East Washington street. It is very difficult to get an attractive window display in a basement store.

Fred Strail is getting things in shape for the opening of the new Williams store at the corner of Wabash and Monroe avenues. The floor space is nearly 50 x 50 feet, with plenty of light from the sidewalk. For a basement location there are splendid facilities for handling a large trade and the equipment will be of the best.

The Herald carnation, the Chicago Carnation Company's prolific new red, is proving a wonderfully easy plant to propagate. Almost no failure to root in the bench and Manager Pyfer is more than pleased with results. Duplicate orders are now coming from those who have received their first stock, the large, strong cuttings appealing favorably to the growers.

Visitors: Mr. McCarthy, representing Carbone, Boston; Wm. Dykes, representing Ed. Jansen, New York; H. E. Philpott, Winnipeg, Man., Canada; E. S. Thompson, Benton Harbor, Mich.; Wm. Espel, Benton Harbor, Mich.; August Fredrickson, St. Joseph, Mo.; Mr. Welke, Milwaukee, Wis.; Mr. Haisch, Memphis, Tenn.

WASHINGTON NOTES.

There seems little doubt but that the local florists will be on the job for the New York show. Plans for the gathering together of a party large enough to warrant securing a special train have been progressing well. Some little entertainment will be provided the travelers enroute but the nature of this has not as yet been made public. There's going to be some big surprises sprung especially as regards those who will make the trip; the stay-at-homes will be there in a body. The bowling team is also figuring on making the trip and to play games with star teams from other cities. Washington has quite a reputation for bowling so that the local team can be expected to walk away with some of the honors. Anyhow, they are looking forward to some good matches.

In connection with the automobile carnival now in progress, a handsome silver cup is offered to the firm having the best decorated store and in at least one instance this has been promised to the decorator in the event of his display winning. Mr. Oehmler's decoration consists of a garden scene with the walls and ceiling completely covered with smilax and other trailing plants. Spruce trees have been placed here and there throughout the large store and azaleas, lilacs and other potted plants give color to the scene. Lighted Japanese lanterns are also used. At the rear of the store is the garden wall, behind which is located the string orchestra, and on either side are the cement garden settees. At one side is the old well with the sweep in action.

The Buick display, done by George Cooke, is one of the handsomest ever seen in this city. Ten large urn-shaped baskets have been employed to carry out one part of the decoration. These are filled with the choicest of cut flowers in an artistic manner. Vines cover the walls and ceiling, with wall pockets in which are ferns and flowers. Several hundred sweet peas and carnations are being given away at the store each evening.

Obituary.

W. A. Talbot.

Warren Allen Talbot, one of the oldest citizens of Norwood, Mass., and for 35 years a well known and highly respected florist, died on February 7, after a long illness, aged 83 years. He leaves a widow and one son.

Charles H. Barrett.

Charles H. Barrett, a well-known retail florist of Concord, N. H., died on Thursday evening, February 6, after a long illness. He has been in the flower business in Concord since 1899. His widow and one son survive him.

Fred C. Schmeling.

Fred C. Schmeling, well known and popular as a florist in Milwaukee, Wis., died at a sanitarium on January 31, after an illness of four weeks with grip and pneumonia. Mr. Schmeling was born in Germany and came to Milwaukee at the age of 17—35 years ago. He leaves a wife, three daughters and two sons.

A. J. Furbush.

Albourne F. Furbush, well-known florist and gardener of Lynn, Mass., died of pneumonia on the evening of February 3rd after an illness of eight days. He was born in Lynn August 28, 1864, and has always resided there. He was well known and very popular among the people of Nahant, Lynn and neighborhood. He is survived by a wife, six daughters and four sons.

Joseph Fink.

In the passing away of Joseph Fink, Chicago loses one of its early florists and one who was actively engaged in the business till the last. Joseph Fink was born in Austria, March 16, 1836, and spent his early years in that country. During the forty years he has been in this country his home was in Chicago and for many years he has been located at 2644 Herndon street. His death took place February 7th and the funeral was held at the residence, February 10th. Mr. Fink is survived by his wife, three daughters and three sons.

Walter Tickner.

Walter Tickner, who planned and superintended the laying out of many of the parks and grounds in Rochester, N. Y., died on February 8th, at his home in that city, at the advanced age of 77 years. Mr. Tickner was born in England and learned his trade there and came to Rochester 23 years ago. He was well known as a landscape gardener and architect and laid out many plots that have become show places of Rochester. He planned Willow Pond and Kodak Park, the latter one of the largest industrial parks of the country. He also laid out the extensive grounds surrounding the East avenue home of George Eastman and the park of the German-American But-ton Company.

Denver, Colo.—W. C. Reed, an Ohio shipper of nursery stock, has instituted a suit against F. L. Rounsevell, entomologist for the State of Colorado, for the destruction of 10,000 trees shipped to an Arapahoe County fruit grower two years ago. The amount claimed as damages is \$6,500.

HART MAKES HANDLES FOR POTS

With Paper or Porto Rican Mats They Make Baskets. These are the Well-Known HART'S HANDY HANDLES.

Shipments are being made daily eastward to Boston, westward to San Francisco—and everywhere else. Once used always used, because they are SO HANDY.

Prices per dozen—No. 1, \$2.50; No. 2, \$3.50; No. 3, \$4.00;
No. 4, \$5.00; No. 5, \$6.00.

GEORGE B. HART, 24 Stone St., Rochester, N. Y.

PHILADELPHIA NOTES.

Henry F. Michell is on a trip to Bermuda. Expects to return home about March 1st.

Among the visitors in Philadelphia the past week was Henri Beaulieu of Woodhaven, N. Y., who wanted a vacation and wisely chose Philadelphia as a good place to come to. Incidentally he says he picked up a nice batch of orders.

Our old friend, Chas. L. Seybold, late of Baltimore, now superintendent of parks, Wilkesbarre, sends compliments under date of February 7th to all his old friends around Philadelphia, and says that he hopes to pay them a personal visit very soon. We surely will be glad to see him.

At Dreer's seed store the January trade has been unprecedented and beyond all expectations—especially in the flower seed department. It was fondly believed that the old overtime proposition had been abolished for ever; but four nights a week have been the rule this year, in spite of every precaution.

R. Brunswick, who is now in charge of the advertising department of M. Rice Co., is establishing a mail order department which will supervise the filling and shipping of all mail orders, and wherever possible all mail orders will be shipped the same day as received. This department should be of great benefit to customers who want goods in a hurry.

Tom Hogan is no believer in a mark-down sale. He says nobody will buy unless you threaten to mark things up. Evidently Mr. Hogan has been taking a leaf out of the book of our esteemed glass magnate, Ed. Flood. Mr. Flood for ten years back has been able to convince us all that rock-bottom had finally been reached and that it was simply a question of days, or even hours, when she was bound to jump. If you ever meet Ed. Flood you will go up against "some diplomat"—believe me. Dennis Connor of the Lord & Burnham Co., with his "boiler a day" and the rest—is a close second in the same field.

Paul Richter, general manager of the H. F. Michell Co., is busy superintending alterations to the store. A sub-floor has been formed at the rear, giving much added space for the office forces. The shipping department has also been rearranged and enlarged—allowing for a forwarding and receiv-

ing room separate. In the main building and the annex the many floors are heavily stocked at present with grass and garden seeds, etc., in anticipation of the spring rush. Mr. Richter pointed out to your correspondent one little item of 225,000 pounds of red top in stock—which is quite some for a retail store—and is an indication of the extent of other grasses on hand. Sub-galleries are on every floor—each packed to the limit. Since entering these new stores two years ago over \$35,000 have been spent in alterations and improvements.

Visitor—Mr. Gorly, of Grimm & Gorly, St. Louis, Mo.

NEWS NOTES.

New Hampton, Iowa—F. R. Robinson has leased the greenhouses of the New Hampton Floral Co.

Augusta, Ga.—P. J. Berckmans Company report orders coming in freely, especially for ornamentals. They are completely cleaned out of many things, especially of broad-leaved evergreens. This section is peculiarly blessed with a great variety of broad-leaved evergreens which can be grown successfully in this latitude.

Harlan P. Kelsey of Salem, Mass., left the other day after a very pleasant visit of a few days.

EVER READY POT COVER

The modern way of artistically decorating unsightly clay flower pots. Makes plants sell better as they are artistic and attractive. Inexpensive, durable and instantly applied.

Flower Market Reports

BALTIMORE All roses are in demand, with a good supply excepting American Beauties, which are still scarce. Carnations meet with a good demand and what are to be seen are of excellent quality. Jonquils and tulips are selling very rapidly and there is a good call for orchids. Single and double violets move slowly and this holds true with sweet peas also, but the red varieties should be in demand for St. Valentine's Day.

BOSTON Notwithstanding the clear, sunny, wintry weather enjoyed since the ground hog did his annual stunt the quality of carnations and some varieties of roses seems to have taken a downward step and the market shows a certain proportion of low grade material. Since Ash Wednesday history has been repeating itself and business has eased up quite noticeably and prices have followed the downward route; yet there is not much to complain about and the trade from outside points is sufficiently active to indicate that the Lenten season will be far from barren. Tulips vary as to quality, many being but rags and of no value to anybody. Yellow narcissi are plentiful and good—worth more, really, than the prices prevailing. Beauty roses are imperfect, as a rule, no matter what grade they may perform in as to length of stem, etc. In fact, all roses are a little off in quality. Violets are still in the dumps.

CHICAGO The market has been practically in the same condition for the past month, a steady supply meeting a steady demand with medium roses as the stock shortest in supply. Long roses sell well, but there is no shortage and, therefore, no difficulty to fill orders of any size. With short and medium grades there is a general

cleaning up each morning, causing a running about after stock to fill later orders. Beauties are only fair in quality and there are few really first-class ones offered. Lilies are moving well and there are many of them on the counters. All kinds of bulbous stock are offered in quantity, and all kinds are moving to good advantage. Paper whites are dropping off a little in supply, while tulips and narcissus are more abundant. Corone d'Or are seen now and bring the top price on tulips—five cents. Something seems to be the matter with the violet market this year. Doubles are losing out as favorites and singles go slower than in former years. Sweet peas, on the contrary, are more popular than ever.

CINCINNATI Last week gave us the first bit of real winter this year. The receipts of stock, however, did not diminish but on the contrary seems to

increase, both in quantity and quality, for old Sol was on the job almost continuously. The average business is only fair for the prices are very moderate. Judging from the way the retailers talk, both local ones and from out-of-town, this year's St. Valentine day will prove a good one. There are very heavy supplies of violets, both double and single. Both are very good. Sweet peas are in a larger supply than at any other time this year and are selling nicely. Lily of the valley offerings are excellent in quality and large in quantity. For the past week, however, the demand for this last has been only ordinary. Orchids, and fine ones, too, are coming in regularly. Richmond roses are in a better supply than a fortnight ago and they and Red Carnations will undoubtedly clean up easily. The rose cut is about normal. While the demand gen-

Flower Market Reports

(Continued from page 233)

erally takes up all of them still there are some days when there are quite a few left over. Carnations, when good and solid have been finding good sales. Bulbous stock of all kinds is in overly large supply. A good bit of the stock is of a good quality but as long as people can get good roses and carnations at a reasonable price they do not seem to want any of this line unless they need it to fill out and round out their supply.

All greenhouse products have taken a slump except roses, which are coming a little more plentifully, but still hold themselves aloof of the terrible slaughter going on between the lower classes consisting principally of Dutch products and carnations. Under these conditions prices were anything but stable and a few retailers took a jump at some job lots and arranged sales of carnations at low prices. During this coming week we expect a little steadier tone with Valentine's Day coming, which always brings a good demand for violets and spring flowers.

The past few days have demonstrated that the coming in of Lent is no serious detriment to the flower business provided that the weather man helps out. Had the weather continued warm and spring-like the product would have swamped the wholesale marts and then the bargain-hunter would have got in his bear tactics with a vengeance. But it so happens that wintry weather conditions have befriended the flower grower while at the same time, appearing to load him up with a big coal bill. It is not so much what the market is as what it might have been that we should take to heart. There are some short-comings and very plain evidences that the market is weak but it might be worse. The principal victim of the present conditions is the carnation. The "divine flower" is surely feeling the pinch just now. There are too many of them, by far, and the question of enlarging and extending the market should be a perpetual burden on the mind of the carnation grower. Perhaps, after this year's experience, he will get busy.

Flowers have not been going with the old vim, but considering that the last week included the first days of Lent conditions have been reasonably satisfactory. The supply of American Beauty roses has im-

proved somewhat, also the quality—although the shorts are still scarce and inferior. Good Killarneys have sold well, at rather lower quotations. Yellow roses are holding their own all right. There were some especially fine Melody to be seen. Richmond was in better supply but the demand did not keep pace. Quotations on carnations have receded slightly, but a pleasing feature of the market was that no flowers of these went to waste. Mrs. Ward is still the leader and some very fine White Enchantress are arriving. The red section does not show up so well—our old standby, Beacon, having apparently gone back on us, and nothing better to take its place so far. Among the promising reds showing up for next year the Wm. Eccles, a very large well-formed flower of pure color, will be largely grown and looks like a money maker. Orchids are still too many. Experienced salesmen state that they never saw these sell so low in Philadelphia before. Sweet Peas—about the liveliest item on the market—quantity and quality both O. K. Daffodils and lily of the valley rather sluggish. Acacia still a feature. More could be sold if available.

ST. LOUIS Plenty of stock every day but demand slow and a lot of the stock left over after morning sales. Roses

more plentiful than for some time past and violets a glut almost any day. Roses and carnations held up fairly all week in price. Bulb stuff is coming in fine and the supply is large. Sweet peas are more than enough for the demand at any time of late. Some extra good business is looked for on St. Valentine's Day this week.

WASHINGTON Business during the past week or ten days has been much better than was expected. Lent seems to have made no great impression on business. The near approach of the inaugural events and an early Easter is going to tax the output of the growers to quite an extent but there is little doubt but that they will be able to hold their own. Roses and carnations have been quite scarce and good prices have been prevailing. Plenty of potted plants such as azaleas, rhododendrons, lilacs, tulips, etc., are to be had; sweet peas also are plentiful.

THE FLORIST AND HIS MARKET.

(A paper read before the Florists' Club of Philadelphia, Feb. 5, 1913, by Wallace R. Pierson.)

(Continued from page 184d)

Let us consider briefly what this society means to the average florist. It means a picnic and a vacation in the summer, free lunches and a social time with a lot of kindred spirits (and other spirits), and a feeling when he gets home that the florists are after all a jolly bunch and a lot of pretty good spenders. But that is not all. There is creeping into that organization a feeling that as a National Society there is a purpose to accomplish and that purpose is the elevation of the florist profession from the huckster standard to the dignity of a business. The meetings should be to better business conditions and not to settle seedsmen's arguments with the ruling that votes are power. That feeling has brought about the National Flower Shows to teach the people of the world that we are alive to some of the opportunities of horticulture as a profession in America, to instill into our minds confidence in ourselves as a whole as American business men, and to teach us to respect our calling in life by showing us public opinion of horticultural achievements.

The S. A. F. and Its Possibilities.

I look forward to the day when we shall be in reality not only a Society of Florists but an organization of florists with serious intent and business betterment the sole interest, and with such a spirit we will have the co-operation not of one florist out of ten but of the entire profession. There are, of course, features in every exhibition that are wholly trade features but they all have instructive value and more instructive to the public than to the profession. Any flower show properly advertised educates the public to the flower industry and anyone who fails to support the next National Flower Show in the Grand Central Palace will be doing himself and his profession an injustice, and deserves to lose his share of the benefits which must result to the business as a whole. It is up to the newspapers to make or break this show financially, but aside from the financial end they will be doing a great injustice to the people of the country as a whole if they do not give an educational exhibit of this character all the prominence it deserves. It is one of the many unexplainable things, that newspapers crave to give the American people glowing accounts of insignificant celebrations and scandal and fail to give prominence to that which is not only interesting to many but instructive to all.

Ideal "Publicity."

This brings us to the question, Are we putting the material before them in such shape that it can be used? We certainly are not. What then, is the solution? At the last convention in Chicago a motion was passed providing for a Publicity Committee of the Society of American Florists and there is reason to believe that at the call of President Farquhar there will be a meeting in connection with the National Flower Show and that a resolution will be drawn up to present to the Society in convention at Minneapolis to have the Society appropriate

annually for a term of years a sum large enough to insure a fitting start for this work. The balance of the necessary funds must come from the Florists' Clubs and private individuals. No man can head a Publicity Bureau who does not have his entire time devoted to it and be successful and accomplish the purpose. No man can be obtained to fill this position for a small salary; it takes money to make it go. Would not the S. A. F. with its \$3.00 a year membership be doing the right thing to make it a business organization if every florist in this country could become a member on the grounds that two-thirds of his yearly donation would be used to advance his profession and benefit his business? I believe so, and that properly canvassed they could be induced to join. Then a Publicity Bureau could have a chance to become a power and a few of the good things it could do would be the dissemination to the papers of proper information relating to flowers and plants and teach the public what flowers are used for and how; bring to public notice special flower days and make them national; teach the florist how to properly conduct his local advertising; show political parties that a flower is an appropriate party emblem; bring pressure to bear on the government to teach home beautifying, to enhance value as well as to improve the farm land; assist magazines of national scope to obtain articles that relate to flowers; aid in advertising National Flower Shows; teach the people that the parks are their property and their gardens, and instill in them local pride in their parks and flowers; make our big days like Memorial Day—national in their scope—and teach some sections of the country that flowers at Easter are a necessity as they are in the East. Perhaps I am painting this too rosy but it is worth the thought.

Co-operation, Not Competition.

We want co-operation rather than competition and unless we have it there will be more florists selling their own product direct to the real market and that is—"the people." Consider the possibilities of the parcel post and the demand that has come from the people. "Buy from the producer" is the watchword of modern times and they are doing it more and more in every line of business. It is to be regretted that plants are not included under parcel post rates as well as cut flowers. Consider the possibility of an organization of growers with a chain of stores spending the money they are now paying for commissions in proper publicity and advertising, catering to the people direct, bidding for parcel post shipments to be made direct from the greenhouses. This class of business would be a big feature. The people enjoy buying from the real source of supply and they like to buy direct from the greenhouse as experience has proven. Parcel post has aided in making such an arrangement possible.

I tell you, gentlemen, we are all in the same boat. We do not want competition. We want co-operation but unless there is co-operation of retailers, wholesalers and growers there will be competition and plenty of it. Some of us may then realize that we allowed the goose that lays the golden eggs to

starve to death for lack of business sense.

The Mission of the Florists' Club.

A link in the chain that binds us all together is the local florist club. It is to be hoped that the Florists' Club of Philadelphia has proven this to the local people,—that the florist business in Philadelphia is on the level; that it has educated them to the fact that you are producing for them the best products of American floriculture; that you have made Philadelphia and the State of Pennsylvania proud of its flowers. If not, your mission has not been accomplished, but you have the foundation to work with right here in the Club. Every dollar that you spend collectively to boom your business and put it before the public in its true light will come back to you individually many times over. You have a new organization here in Philadelphia, the Retail Florists' organization. Let us hope that it will be conducted as an organization of business men, in sympathy with the grower and his problems, willing to meet with you, becoming a part of your organization, ready to aid in solving the problem of getting flowers to the real market—"the people."

I am not under the impression that this talk to you tonight is going to be a heal-all, that everything will follow the course I have mapped out, but if it gives you the basis for thought and aids in strengthening the bond of fellowship and helps to impress on you the fact that our interests are mutual, I shall be satisfied.

PERSONAL.

John T. Neville has leased his greenhouses at Chester, W. Va., to J. E. Colton, and has secured a position in Hartford.

N. F. McCarthy and daughter of Boston, are planning to sail for Bermuda on Tuesday of next week, for a stay of a month or more.

Robert Macdonald, superintendent of the Johnstone estate, Hamilton, Mass., has some sensational entries in the big dog show at the Grand Central Palace, New York, next week.

Miss Lizzie Dirwanger and Mrs. George Coyle, daughters of the late Jos. A. Dirwanger of Portland, Me., have been in Boston for the past week on account of the illness and death of their little niece, daughter of Joseph Dirwanger.

New York visitors: John Bodger, Los Angeles, Cal.; H. E. Philpott, Winnipeg, Man., en route to England; Geo. Wyness, Frides Crossing, Mass.

Boston visitors: George Hendry, Whitinsville, Mass.; W. W. Tracy, Washington, D. C.; Wm. Jurgens, Newport, R. I.; F. E. Conine, Stratford, Conn.; R. O. King, North Tona-wanda, N. Y.; A. F. Faulkner, New York, N. Y.

Cincinnati visitors: E. E. Stewart, Rives Junction, Mich.; Mr. Frank, Portland, Ind.; S. S. Skidelsky, Philadelphia; Mr. Goudy of Dreer's, Peter Welland of New Castle, Ind.; Myer Heller, New Castle, Ind.; Wm. Dittman and daughter, of New Castle; Fred Rupp, of Laurenceburg, Ind.

OUT OF THE GINGER JAR.

The classic definition of a diplomat, which, according to Ed Jenkins, is "a man who goes abroad to lie for his country," appears to us crude and superficial. I have not entered the lists yet, but I do claim here and now that a man can be a diplomat without being a liar. The true definition is really far wider and broader than Mr. Jenkins seems to think.

For instance, if Mr. Jenkins said nothing about the burnt biscuits served up to him some morning—out of consideration for the feelings of an unfortunate—I'd say he was in a fair way. If he'd eat the things, and enjoy them, then I'd say he is really on the right track, and in line for that prize.

Disraeli said Salisbury was a diplomat because he was a lath painted to look like iron. Carnegie said Gary was a diplomat because Gary was "a pawky chiel." Which was best? There's a test for some of you. Disraeli or Carnegie?

And now comes Willis N. Rudd, who says:

I see George Watson wants a definition of a diplomat. That's easy. A diplomat is what George C. Watson is. If G. C. W. does not give me the dinner on this, somebody will hand me the historic whetstone, so I will win out either coming or going.

I don't know anything about a historic whetstone. If Willis N. Rudd sits down to a dinner with yours truly his job will be to convince the aforesaid he's got the best of it. A dish of diplomacy for two in such case would mean that you make your guest believe he has the bargain, and at the same time (unconsciously) keep enough for yourself to pay the freight.

But all that aside, there's no man we'd rather sit down to dinner with than Willis N. Rudd—no matter who pays the freight. The great question, however, the more it is considered, widens out into John Dodds' definition: "It's a twister," which isn't a definition at all.

Mr. Editor, will you kindly ask Mr. Jenkins for a definition of the word "pawky." Some outlanders in Pennsylvania don't seem to know. And we must look to the axiomatic man for help.

G. C. WATSON.

PUBLICATIONS RECEIVED.

The Worcester County Horticultural Society's schedule of premiums for 1913 has been sent out.

An interesting and very attractive prospectus of the Pennsylvania School of Horticulture for Women at Ambler, Pa., has been issued. The illustrations are original photographs mounted on the pages and the text describes the need for the existence of the institution, the history of the movement for the training of women in horticulture, the possibilities for occupation, the situation and equipment of the school, the methods of instruction, courses, expenses, etc. The address of the secretary is Miss Hilda Justice, West Clapier street, Germantown, Pa.

The Art Treasures of Washington, by Helen W. Henderson. An account of the Corcoran Gallery of Art and of the National Gallery and Museum, with descriptions and criticisms of their contents; including also an account of the works of art in the Capitol and of the most important statuary

LEMON OIL CO'S STANDARD INSECTICIDE

NO ODOR NO POISON

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

½ Pint - - 25c; Pint - - 40c; Quart - - 75c
½ Gallon, \$1.25; Gallon, \$2.00; 5 Gallon Can, \$9

in the city. Washington has more than its share of bad and mediocre art and the author of this book has not hesitated to point it out. The work aims to cover the seriously conceived works of art of a public character, but private collections are not considered.

The first chapter is devoted to the development of Washington as a model city and will naturally appeal with particular interest to the horticulturist. Several diagrams are given, showing the original scheme as laid out by George Washington and L'Enfant and the efforts at adaptation of this ideal by the commission appointed a few years ago to consider the beautifying of the city. There are upwards of 60 full page reproductions of portraits, views, statuary and architectural subjects. The text contains a vast amount of valuable historical material gathered together with much patient care and the book is well worth having.

Published by L. C. Page & Co., Boston. Price, \$3.50 net.

Alma at Hadley Hall, by Louise M. Breitenbach, with illustrations by John

Goss, is one of three entertaining books of fiction recently issued by L. C. Page & Co. It is a tale of semi-nary life, just that and nothing more. No romance with a wedding at the end or any of that sort of stuff, but just a nice natural story that will deeply interest the young girl of school age. Price, \$1.50 net.

The Girls of Friendly Terrace, by Harriett Lummis Smith. Another charming story for the girl reader. Its naturalness and freedom from forced sentimentality gives its incidents a refreshing, true-to-life flavor, and its characters a reality of existence which at once wins the reader's undivided interest. \$1.50 net. L. C. Page & Co.

Naomi of the Island, by Lucy Thurston Abbot. Another L. C. Page & Co. publication. An absorbing little romance dealing with Maine seacoast life. Marked by fidelity to conditions, customs and personalities as they are found among the lowly folk that find a home on the rock-bound islands and headlands of the Pine Tree State. Price, \$1.50 net.

Medford; ideal location for florist; 30,000 feet land, large 10-room house with improvements, barn, carriage house, hen-house, large steam heated greenhouse, fruit and garden; located in center of city; an exceptional offer. Price \$6500. Boulevard Storage Co., 317 Salem St., Medford, Mass.

FOR SALE—Fresh from factory, new; 10 x 12, 18 x 18, 18 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. Parsbel-sky Bros., Inc., 215-217 Havemeyer St., Brooklyn, N. Y.

ing of February 8th, fire broke out in one of the new buildings of the Department of Agriculture. The flames had gained considerable headway before they were discovered by a watchman. The blaze was confined to a room in the basement in which were stored records and supplies belonging to the Bureau of Plant Industry. Many of the records were destroyed. The loss to the Government will not be fully known until the officials of the bureau have had opportunity to investigate, but it will reach into the thousands of dollars. The fire was caused by the explosion of a barrel of alcohol used in preserving plant specimens.

EXPENSIVE DEER.

M. H. Walsh and Miss Fay of Woods Hole, Mass., have made a claim on the County Commissioners for damages caused by the browsing of the state-protected deer on their rose plantations last year. The amount of damages claimed is over \$4,000. W. J. Stewart of Boston and H. V. Lawrence of Falmouth were called by Mr. Walsh to testify as experts on the extent of the injury.

The Frame of Our Iron Frame

YOU know that it takes much more strength to hold a weight out at arm's length, straight from your shoulder, than it does when held closer to your body.

How altogether reasonable it is to apply the same principles to framing a greenhouse!

Our method of iron framing is based on that same principle of placing the supporting members in such a way that the load is distributed and eased up, so that there are no excessive strains on the columns.

Trussing, unless it is the compression type -we protest against using.

Look at this 55 foot house above and compare its extreme simplicity of compression framing with other houses of similar widths; and you surely must be impressed with the advantages of such simplicity in construction.

Do you know all you want to know about that new Cantilever construction of ours? Better get posted.

HENDERSON'S MAMMOTH BUTTERFLY PANSIES

Those Who Have Grown Them Write:

"Your Butterfly is the best strain of Pansy that I have ever seen and I have been growing pansies for market for many years"

W. F. HEATH,
Jaffry, N. H.

"I have tried your mammoth Butterfly Pansies for three years and find them superior to any I have ever grown."

H. G. THURSTON,
Fall River, Mass.

"I have grown large pansies before, but never saw the equal of your Giant Butterfly. The plants are 20 inches high, and the stems of the blossoms 9 inches long, while the blossoms themselves are simply monstrous, each one a broad expanse of beauty."

THOMAS C. STARR, Newton, Mass.

Henderson's MAMMOTH BUTTERFLY Pansies

We are very proud of. We have sold them for a number of years and receive hundreds of letters praising their superior beauty, size and other merits. When our trial collections of all the world's best types of pansies are in bloom we go over them daily and any plant producing flowers of superlative merit is removed to our "Mammoth Butterfly" plot. Consequently the seed is saved from the greatest variety of types, including only the best of Giant Cassiers, Bugnots, Trimardeau, 5-blotched Odier, Giant English, French and German hybrids, etc., resulting in the greatest variety of coloring, marking, blotching, veining, etc., which we offer in mixed colors. Price 25c per pkt.; 50c per 1000 seeds; \$5.00 per oz.

For all other types of pansies and in colors, see

NEW CARNATIONS

WM. ECCLES LADY NORTHCLIFFE BRITISH TRIUMPH

WM. ECCLES. The First Prize winner at Detroit last year in the Red or Scarlet class, and the Silver Medal winner of the New York Horticultural Society for the best undisseminated seedling.

The scarlet everyone was waiting for. Has a strong rigid stem, a perfectly formed 3½-inch flower, non-bursting calyx, highly perfumed, a grand keeper and as free as any scarlet to date.

LADY NORTHCLIFFE (Engelmann). A beautiful salmon pink in color, much resembling "Pink Delight." Has a well built up flower, and just enough in it not to burst the calyx. While the flower is not the largest (about 3 inches), it is fully as free as "May Day," and will surely make a grand bread and butter sort.

BRITISH TRIUMPH (Engelmann). One of the finest things ever raised in England. The color is a striking shade of Crimson. The flower is 3½-inch in size and well built up. It has the sweetest perfume of any carnation ever raised and its keeping qualities are the best. Has a fine stem, good constitution, and free.

PRICES: \$12.00 PER 100, \$100.00 PER 1000

Careful Buyers Who Investigate

always secure the best lily bulbs, the best facilities, the best service. They are therefore able to grow better lilies, give better service and make a greater profit than those whose buying is carelessly done, or hurriedly, or whose judgment is influenced by what they are told or what they think or what someone else thinks for them. An experienced salesman can tell a careful buyer usually by the looks of his establishment. To the balloonist some places must look like something the cat had brought in over night. Other places have an appearance of order, cleanliness and regularity that sets them apart in a class by themselves. Usually they are the most prosperous in the business. The judicious buyer buys Horseshoe Brand Lily bulbs—principally because they average better results than any brand known. Of course, some other bulbs flower well, and perhaps in instances you have seen our brand which were not so good. Bulbs, a product of the soil, are subject to climatic conditions, and a small percentage may "go back" any time. But the greenhouse strain is the greatest, where they are subjected to various treatments which too often are very improper. However, all conditions being equal there is no brand sold that will equal Horseshoe Brand Giganteum year after year for productiveness and profit to the grower. Many buyers have learned this by experience. Experience costs money and we can save you that cost, which is sometimes considerable, if you will buy this Brand in the beginning, and the sooner you begin the better for both of us. Prices are reasonable—sent upon request. Write now.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Crotons

Young crotons propagated from cuttings during the winter months will make very nice specimen plants in 5 or 6-inch pots by early fall if they are looked after carefully. A frequent moving and turning around of the plants is very beneficial in keeping them uniformly furnished. A good compost for this potting is turfy loam three parts, leaf mold two parts, and one part of well-decomposed cow manure, with a good sprinkling of sand. With these plants thorough drainage is absolutely necessary. Give them a stove temperature of from 65 to 70 degrees at night. Keep on shifting as they may require until 5 or 6-inch pots are reached. For good-sized specimens larger pots will be needed. Keep well up to the glass but shade when the sun is powerful so that they may suffer no injury to their leaves. When they have filled the pots in their last shift, give manure water once or twice a week for the development of the foliage. Do not overwater the plants and on the other hand see that they do not become too dry. Syringing should be given on all bright days for this is the only way to keep down red spider. Give care to ventilating so as to ensure a circulation of fresh air without cooling the temperature of the house too much.

Care of Violets

Conditions are just right for the propagation of violets now. In a violet house, where the stock is up to date, it will not be hard to find good stock for propagation. It pays to examine them somewhat closely so as not to let any slip in that show the least trace of mites, weakness or spot disease. Do not allow the cuttings to wilt at any time either before they are inserted or after they are placed in the sand. Put them into sand in the coolest part of the propagating bench, or in well-drained boxes filled with sweet sandy soil and keep moist and shaded. The cuttings with frequent sprinkling will soon supply themselves with ample, energetic action for a transplanting into other boxes, when a much richer soil can be used, and when the roots have taken to the soil and the plants become firmly established shading will only be necessary on extremely bright days. To keep the stock in a sturdy condition you should keep a well-ventilated house as they do not like a stagnant, muggy atmosphere. Do not let the temperature go above 45 degrees at night, and 10 to 15 degrees higher with sun heat will be right.

Decorative Foliage Plants

Now before the hustle and bustle of spring starts every florist who carries a line of decorative foliage plants should give them a thorough going over, such as cleaning, repotting and resetting. They all will be greatly benefited by a sponging with some good insecticide such as Fir Tree Oil, Aphine, or Lemon Oil. This can be followed by a good syringing which will put them in a fine clean shape. After they have had this thorough cleaning each and every plant should be given a repot-

ting or some new soil, removing as much of the old soil down to their active roots. This should be done very carefully with a dull piece of wood, thus removing all the old soil that is clogged with stagnant moisture and rotting root fiber. For a compost they will want a well-enriched soil according to their different likes. Give pots or tubs plenty of drainage to let the water pass off freely. Now when the sun has more power to raise the temperature you will be able to give more air from ten o'clock in the morning until two in the afternoon. While all foliage plants should have a full measure of light they will need some shade from this out.

Fancy-Leaved Caladiums

It is time now to put in a good batch of these gorgeous foliaged plants. A good way to start the tubers is to place them in a flat with some moss on the bottom. On this they can be arranged close together. Fill in and cover them all over with about an inch of moss. The flats can be placed in a house where the temperature runs from 65 to 70 degrees at night and on some bench where they can have a vigorous bottom heat as they like a brisk top and bottom heat to start well. Be very careful in watering until they are well started; they should only be kept in a moderately moist state. When they have made a fair amount of roots they can be potted into 3 or 4-inch pots, using plenty of drainage. For a compost mix turfy loam three parts, leaf mold two parts, and well decomposed cow manure one part, and sand enough to make it porous. For good-sized plants keep shifting until they are in 5 or 6-inch pots. Place them well up to the glass and as the sun gets strong they will need some shade from nine o'clock in the morning until three in the afternoon. Give care as to watering through all their stage of growth.

Primulas

From the middle of this month until the end of April sowings of primulas should be made at intervals of about four weeks. It is better to supply the demand, which is good from early in the fall until spring, with stock reared in successive batches, than to rely on the outcome of one or two sowings. The first lot, to be sown now, should be seeds of such kinds as Kermesina Spends, rubra, Chiswick Red and Rosy Morn; also, at least one flat of the best strain of *Primula obconica*; this latter to be followed, by another sowing of the same in April. Prepare flats or pans with a mixture of equal parts of new loam, leaf mold and some sand. For the top, sift finely and on this sow the seed and cover very lightly and press firmly. Place in a close moist place at about 60 degrees at night and cover with a pane of glass and keep shaded with paper until the seeds start to germinate, which should be in two or three weeks. When sufficiently large to handle prick out in flats and keep well up to the glass in a temperature of about 50 degrees at night. When they begin to crowd in the flats they should be potted up into small pots, using a good rich compost.

Mr. Farrell's next notes will be on the following: Aquatics; Care of Young Carnations; Lemon Verbenas; Cyclamen; Lily of the Valley in Cold Storage; Stimulants for Plants; Shading; Palms and Ferns.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Spider

Be very careful not to allow Mr. Spider to become acquainted with the under side of the foliage of the roses. This is likely to happen as soon as syringing is neglected the least bit. Keep right at it and syringe the houses thoroughly every week. When syringing, syringe so that the water does not fall back on the benches. Try to send as much of it into the walks as possible. There are several reasons why this should be done and one of them is that the water after leaving the plants generally contains a spider or two, and if these are thrown down into the walk and not back on the bench they will be where they can hardly get to their comfortable positions again, and this is just what is wanted. With the many insecticides on the market, trials can be made with one or two of the better class and results can be watched. But we would never advise anyone to rely on these alone to keep their houses free from this dreaded enemy.

Mildew

Some of our readers who do not know what mildew really is will no doubt wonder why we allow this subject to come into these columns so very often. Yet there are places where it ought to come much oftener to keep the growers from forgetting to pay proper attention to their air. Houses properly ventilated will seldom get a dose of mildew. And mildew is not the only thing good ventilation will prevent. Quality roses are always produced in well ventilated houses.

In the Propagating House

Here is where things ought to be quite lively at the present time. Here, too, care should be used in turning the wheels of the ventilators, for the cuttings demand as much care in this respect as the old plants do. We try to keep the temperature in this house as cool as possible without being cold. This is from 52 to 56 degrees F. The object of this is to keep the young cuttings from growing before the roots start. If this should happen the young cuttings will not root so very well, and what is more, the cuttings should not make any growth in the sand, as it is not the right kind. The young cutting has plenty of chance to grow after it has been properly potted and placed in the rose house proper.

Watering

With perfect drainage there is little fear as to over-watering, and during this cold weather when plenty of fire heat has to be used, the sand should be carefully looked over to see that there are no dry spots anywhere. Cuttings should never be allowed to wilt and we should always bear this in mind. Aim to water in the morning so that the cuttings have a chance to dry off before night. It does them no good whatever to remain so, and should they happen to be Beauties, then a dose of spot is likely to appear. Watch out for this and the minute one is seen it should be picked off at once. It is much easier to do this than to wait until the spot spreads all through the batch.

Selection of Wood for Propagation

If we are in no hurry to have plants real early, we much prefer to propagate during this month than any

earlier, or later either. The wood now will have the effect of the longer sun, and we find it is much easier to handle than the earlier-taken cuttings. In selecting Beauty wood, it is well to use only wood with the live thorns on it, as the wood with dead thorns is likely to be a little hard and therefore a little more difficult to root. Of course that is not saying that this wood should never be taken as that would not be true, for there are thousands of Beauty plants grown and no attention is paid to the wood in this respect. Aim to have the wood about the same quality all the way through. It will pay to do this, for the cuttings will run much more even than if the wood is of several different kinds. With Killarneys it is well to select wood from plants bearing only the very deep pink flowers. Carefully observing this rule the pale pink Killarney can in time be weeded out and most of the good rich color type of plants will remain. With the whites it is the same way. Take cuttings from the strong healthy plants bearing the most double flowers and you soon will have a strain of Killarney that will be hard to beat.

The Value of a Practical Training

The "fallacy" of Mr. Jenkins' article on "Neglected Opportunities" lies in the fact that human nature is unchangeable or as the old saying is "It is hard to put old heads on young shoulders." How many of us can look back after reaching the age of 30 years and not regret the opportunities, something useful which we have neglected of learning? The developing youth can hardly be expected to change into the serious-minded, observing man of mature years in a day. In comparing the college graduate to the engineer who is a graduate of the Massachusetts Institute of Technology or a doctor who is a graduate of Johns Hopkins University, Mr. Jenkins loses sight of the fact that the engineer and the doctor get the practical training as well as the theoretical. The doctor's college course is supplemented by a hospital experience where he gets the actual practice in the treatment of different cases under the supervision of doctors of larger experience. But where is the agricultural college that can give the practical training sufficient to fit a young man to take charge of an estate of some extent? The only place he can get it is on a private estate under a competent superintendent and a young man who would be willing to spend a few years in actual practice in that way after his college course would probably be better qualified than the average gardener. Why is it that the majority of the private places in this country are filled by men of foreign birth? Simply because these men have had the opportunity of a wider experience gained by working on the large estates on the other side, and thereby are better qualified. The ability of the man to "produce the goods" is just as important in private as in commercial gardening and being a good talker and up in the use of scientific terms will not carry a man very far, if the ability to accomplish results is not behind it. The case of a professor formerly connected with the Agricultural Department is an example. He persuaded a

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Trellis Trees in Flower

Probably by this time quite a number of trees growing on the trellises will be in flower. With ordinary care there should be no lack of perfect flowers, some of the larger flowering varieties making the trellis look like a hanging blanket. These are not more productive than their less elegantly arrayed sisters. To one of these belongs the distinction of carrying more pollen than any other variety that has come under our notice. This is Victoria nectarine with petals so diminutive that at a distance they are scarcely discernible. Either large or small are welcomed in their respective sections, coming as they do after the critical resting season, yet to the man who is looking for "eats" flowers do not appeal. To the grower it is "step lively" and the next development is looked for. In good weather these trees will set their fruit easily but it is advisable to go over the flowers most likely to be wanted, in the usual way, after which give the trees a sharp shake and damp the walks, etc. This damping should only be practiced in good weather. Advance the air as the sun power increases and keep it on as late in the afternoon as is permissible to maintain a temperature of 55 to 60 F.

Treatment of Apples and Pears in Flower

Apples and pears are uncertainty itself until the first swelling is over. At the time the petals are falling it is no sure thing to say which are set properly and which are going to fall, for sure some will fall. Something seems to possess a tree once in a while and the percentage of fruit falling will be very small, which to me seems unaccountable, for the next-door neighbor will not swell half the number with identically the same treatment. An excessively dry atmosphere is not good for them; have it sufficient to dry the pollen only and after fertilizing spray the trees over with a fine spray of water at the same temperature as the house. Err on the cool side rather than the hot. Anytime when convenient, in addition to the mid-day fertilizing, give the trees a sharp shake to disseminate the pollen.

Fig Houses

Fig houses can be started right away. Should the border be at all dry give it a soaking and keep the house good and moist in addition to syringing twice a day. Let the night temperature be 40 to 45 F at night for about ten days, when a five degree rise should be given them. The first crop, now tiny fruits on last year's wood, will soon swell away as the sap of the fig easily moves. Some of the largest fruits are secured from the first crop, the second one often being greater in quantity than in quality.

Thinning Pot Vines

At this early date the bunches on pot vines are not

ten-pounders yet they will require near the same amount of skill and care to thin them properly. The crop itself should first be selected. Probably there are ten or a dozen bunches to the pot all set well; this being so, select the best shaped ones, at the same time spreading the crop over the whole vine. There is no danger of over-cropping these vines, in the sense we allude to when speaking of the permanent vines; next year's crop need not be considered for they will then be "no more." This being the case, then, leave as many bunches as the vines are able to finish properly. Six I think should be the limit; more can be left but generally they will not color satisfactorily, making them look unripe. After making the final selection of the bunches proceed to thin the berries. See that the scissors are cleaned up previous to commencing, otherwise the rust will mark the berries. Make due allowance for these being grown in pots and leave the berries a little closer than is customary on permanent rods. Soon after thinning the berries are very liable to contract mildew in those localities where it is prevalent. Air with the utmost care and judgment. I do not mean be afraid to give them air; that is a misconception, for the coddling idea will prove one of the biggest mildew breeders that is known. Rather, in mild weather with the sun shining, keep on raising the leeward vents so long as the thermometer shows 80 degrees. Be ready to counteract any quick changes of wind or outside temperature. Avoid draughts at all cost. After thinning is through, give the roots all the encouragement you can. A feeding twice a week for a start will help them; this can be increased in quantity and quality as the roots get used to it.

Cucumbers

With the increasing sun power cucumbers will be growing freely. Continue to top-dress as the roots show through the previous addition. When in full crop the soil can be made richer, pressing it down with the hand when applying it to the bed. Stopping and tying must be attended to. Every second joint should be "stopped." Where there is not sufficient room for the young foliage to develop cut out any old or worn out leaves. The plants will take more water along now than at any other period of the year. Cool nights will result in hot pipes to maintain the requisite temperature, drying out the bed at the same time, while the plant will absorb considerably more through the day. Occasional applications of manure water will help the plants, but do not give it to them when absolutely dry at the root; rather water with clear water first. If the bed is allowed to become dry enough to cause the plants to wilt at any time, the probability is the fruit will twist or curl instead of growing straight. Other checks are also the cause of this.

wealthy gentleman to go into the growing of mushrooms for market. A large house was built on the gentleman's estate with the professor in charge of the growing. After two years the business resulted in a failure, the gentleman being out \$10,000 before he cried "Hold! Enough." Nevertheless we should be ready to give due credit to the

man who makes a success of what he undertakes whether college graduate or of the old school.

A display of virility

No one who chanced to look in upon the stirring jubilation at the opening of Boston's new wholesale flower market last Saturday would ever think that any cares or anxieties ever troubled the mind of the merry, merry flower grower. Light-hearted and sanguine they thronged around the spacious mart, admired its appointments and congratulated one another on the grand development of their business which it seemed to presage.

The turn-out was a decided surprise to everyone and altogether was a good proof that there is a great latent force in the florist industry not half realized by even the most optimistic.

To educate retailers

The proposition to provide instruction classes in floral decorative art and salesmanship as presented by President Kennedy for the consideration of the Gardeners' and Florists' Club of Boston has the merit of novelty to say the least. Whether it can be put into successful operation or not remains to be seen but we should like to see it tried. That it is much needed will not be denied although it must ever be remembered that if artistic perception is not inborn artistic ability will not be easily acquired. Yet as Browning has so well put it:

"When the fight begins within himself,
A man's worth something."

Perhaps Mr. Kennedy's proposal will solve the problem of how to get the young retail florist element interested in the club. If so he will have a big mark to his credit.

To restrict working hours of women

It would look as though the La Follette bill which provides that no women shall be employed in any business establishment in the District of Columbia for more than eight hours in any one day will be enacted into law. Quite a number of women are employed in the florist business in some cities and such a law will bear hard on many of them if passed, as, although the usual hours per day are not excessive, it sometimes happens that the help in a flower store must stay for a longer period as well as an occasional call on Sunday and unless the bill be amended so as to apply to men, also, the result will be that men will replace the women in many cases. Our Washington correspondent in calling our attention to this matter, says that this bill was introduced upon the request of a number of ladies formed in an organization called the National Consumers League who desire it passed there so that it can be passed by the different State legislatures. It would be a serious matter with the florists of the Capital City as it would preclude Sunday or overtime work of their female employes and this would be especially inconvenient during the holidays.

An encouraging forecast

The alleged drift of experience in commercial horticulture towards isolated specialization has been duly bemoaned by many writers in recent years who have seen in the changed conditions the passing, never to return, of the broad-gauge culturist thoroughly equipped in all departments and capable of growing successfully the plants of all climes. A gloomy outlook for horticulture it has seemed to many as they have seen the big flower factories develop and the labor of producing the roses, carnations and violets for the great flower marts taken out of the control of the trained gardener and divided among troupes of employees each with his one specified duty to perform and with little prospect of ever learning or caring to learn how to do anything else. Yet, today, when the flower factory has reached a magnitude beyond all expectation and is undoubtedly pregnant with still greater surprises for the future it is an indisputable fact that the call for the fully-equipped highly educated and proficient gardener is more insistent than ever before. And we look to see the demand increase. The forecast carries with it every inducement for the young man to put out his best endeavors to acquire a wide experience and liberal education.

Fallacies and Axioms

A wise scepticism is the first attribute of a good critic.—*Lowell.*

To my gentle critics I wish to say anent the red spider question, that I am trying to set the wheels in motion for an authoritative, exhaustive, scientific test of the merits of moisture in checking red spider, and the result of this test will be published in this paper and it may show that even three rose growers of wide experience may fall into error in reasoning from cause to effect.

Bleeding of Grape Vines

Here is one of the fallacies that has survived a long age in the annals of gardening, and many pounds of styptic as well as many a good potato has been wasted in vain efforts to stop this harmless flow of water, to say nothing of valuable space in gardening papers and books, as well as the ink that has been spilled about the means of preventing bleeding, so-called. I use the latter qualification advisedly, for this flow of water is no more analogous to bleeding in animals than is the dripping of a faucet when it needs a new washer. My gentle critics who *know* things will say. Why! what is the matter with this man! Does he mean to say that the loss of so much sap will not injure a vine? And I put on the soft pedal in anticipation and say that I most assuredly do. A little thought will convince any fair-minded man (and how rarely we find a gardener who is not a fair-minded man) that this is not sap at all that is lost, but merely water which is pumped up by root pressure, or brought up by capillarity, if you will. It may, and undoubtedly does hold a few salts in solution, but is in no sense sap. Sap is produced after this same salt-bearing solution has passed up to the foliage and there gone through a most complex process of elaboration brought about by the light or rather the chemical rays of the sun, coupled with the absorption of air and the action of that mysterious compound chlorophyll. This sap having been produced in the manner aforesaid travels to every part of the plant, here forming flower buds, or fruits, in another place bark, in another the pith in the stem, and so on even to the very extreme root hairs on the rootlets. Now of course a certain amount of elaborated sap is stored up at the buds ready for the next season's growth, but not in a form that it could be wasted by this process erroneously called "bleeding." If you will pardon the personal note I might say that I have had vines which bled (if we must call it so) from early winter until active growth commenced in spring, and these same vines made splendid growth not only the following summer but in many subsequent years. Barron in his work on "Vines and Vine Culture" says "But there need be no fear that a vine otherwise in good condition will bleed to death." This of course is a very conservative statement and the writer is prepared to go much further than this; however we will leave that for the Axiom. Again anticipating my friends who *know*, I would say that the most competent authorities inform me that it has never been proven that taking maple syrup from the maple tree ever injured a tree and, further, for the benefit of my friends whom I know that, with the sole object of setting me right, would rake up the case of the turpentine pines in the South, I would state that this is in no way analogous to the matter here discussed.

Axiom.—Bleeding of grape vines is not injurious.

Fallacies Concerning Book Knowledge

The writer has had the misfortune to meet many gardeners, young and older, who had the most supreme

contempt for any knowledge which had been acquired from books, and they usually boasted that they had gotten their knowledge of their profession from experience. I might add parenthetically that it is said that "experience is a dear school, but fools will learn in no other." These men who were so proud of their experience forgot that, even if they had not added to their own knowledge by the written or printed word, all their lives they had been learning more or less from other men's experience, by word of mouth, and by the use of their eyes. For it is inconceivable that a man could start in any profession without making use of that vast store of accumulated knowledge, which comes of other men's past experience. Before the advent of printing most knowledge had to be handed down by the spoken word, and while some progress was made then it was very, very slow. Do not understand me as saying that a man can become an efficient gardener or florist by the aid of books alone; far from it. But I do state, with all the emphasis of which I am capable, that, given equal ability the well read man is far more efficient and capable than his unread brother. What is such a paper as *HORTICULTURE* but a book published every week and who so bold as to say that its readers have not been greatly benefited by the perusal of, at any rate, most of its pages. A man cannot learn to be a carpenter from books but he can learn a great deal pertaining to his trade from them, and it has come under my observation that the men that do this are the men that get the best positions in their business, as I am sure, is true also of ours. Sometimes I think that a little of this contempt which we have seen toward book learning and college training is tainted with envy by those who do not possess either, and this leads me up to the axiom in this matter.

Axiom.—Useful knowledge, from whatever source, is valuable.

Questions for the Wise Ones

Why is the lime from the water used in syringing only deposited upon plants in the shade, and on the glass partitions and never on the glass of the roof or the sides of a greenhouse?

Are cement walks or floors in greenhouses in any way deleterious to the plants?

To the thousands who will rush to reply to these two simple questions, I would state that they are asked in good faith, with the belief that correct replies will add to the useful stock of knowledge of hundreds besides the writer, and I would like to add a word or two of advice. Do not answer until you have thoroughly weighed all the evidence in the matter as it is only TRUTH we are aiming at and not the desire to bolster up some pet theory.

Edwin Jenkins

Lenox, Mass.

A Beautiful New Hydrangea

Our cover illustration shows a plant of *Hydrangea* Madame Maurice Hamar, one of a set now being offered to the trade in this country by H. A. Dreer. These are all French hybrids and are recommended as being much superior to our well known standard Otaksa—this being one of the parents in each case. The new comers respond to the same cultural conditions and treatment as is usually given to Otaksa, and have thus far given great satisfaction wherever tried. All Easter plant growers will find them indispensable before long.

BOSTON'S NEW FLOWER MARKET.

The new quarters of the Boston Flower Exchange, Inc., were formally opened on Saturday afternoon, Feb. 15. The event was signalized by a fine display of flowers and a great throng of visitors from all departments of the florist business. A band of music was in attendance and a bountiful collation was served in the basement room during the whole afternoon. As promised, Mayor Fitzgerald was on hand to open the proceedings and received a most vociferous welcome. He expressed congratulations on the fine display of flowers and the splendid quarters that had been secured and cordial good wishes for prosperity. He closed by calling upon the band and the assembly to join him in one stanza of "America." President W. C. Stickel of The Market, President J. K. M. L. Farquhar of the S. A. F. and President W. J. Kennedy of the Gardeners' and Florists' Club followed with felicitous remarks but the hubbub of a thousand voices made their remarks inaudible beyond their immediate vicinity. Everybody was delighted with the accommodations for business and the light, airy surroundings.

The display of flowers was of especial merit, not a few promising novelties being in evidence, as the following list shows, carnations predominating.

The following exhibits were noted:

Thos. Roland, a splendid group of acacias, cyclamen, amaryllis, ericas and orchids. Wm. Nicholson, Pocahontas and other carnations. Peter Fisher, Gorgeous carnation. A. N. Pierson, rose Milady, carnation Rosette and Adiantum Farleyense. F. R. Pierson Co. ferns. Patten & Co., carnation Princess Dagmar, Chicago Carnation Co., carnation The Herald. J. D. Cockcroft, carnations. S. J. Reuter, roses and carnations. Pierce Bros.,

OPENING OF BOSTON'S NEW FLOWER MARKET

carnations. A. S. Parler, Princess of Wales violets. Littlefield & Wyman, carnations. A. A. Pembroke, carnations. Scott Bros., carnations Wm. Eccles, Lady Northcliffe and British Triumph. John Barr, carnation Mrs. B. P. Cheney. F. P. Putnam, carnations. New England Conservatories, roses. Mann Bros., splendid collection of narcissi, tulips, iris, lilacs, Azalea mollis, etc. F. W. Vose, cinerarias. W. D. Howard, carnations. S. J. God-

dard, carnations. Caroline E. Ball, carnations. Willow Hill Greenhouses, genistas. F. Dolansky, gardenias, lily of the valley and cattleyas. Buxton & Allard, Economy bracket. Waban Rose Conservatories, roses Mrs. Chas. Russell and No. 96, the latter a glowing soft pink. Geo. E. Buxton, snapdragon. Paine Bros., bulb flowers. J. W. Minot, carnations. C. S. Strout, carnations. W. W. Edgar Co., flowering plants.

W. C. STICKEL

President Boston Flower Exchange.

President ever since the founding of the Market in 1892. One of the best growers of market carnations in Boston. Greenhouses at Lexington.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Officers—President, J. K. M. L. Farquhar, Boston, Mass.; vice-president, Theodore Wirth, Minneapolis, Minn.; secretary, John Young, 54 W. 28th St., New York; treasurer, W. F. Kasting, Buffalo, N. Y. Next convention, Minneapolis, Minn., Aug. 19-22, 1913.

For Full Information, Schedules, Space for Trade Exhibition, etc., write to John Young, Secretary and Manager for Trade Exhibition, 54 West 28th Street, New York City.

President Farquhar has appointed Wm. F. Gude, Washington, D. C., chairman of the tariff and legislative committee, in place of Mr. Patrick Welch, who is unable to serve as chairman, but will remain on the committee.

Department of Plant Registration.

Public notice is hereby given that Ant. C. Zvolanek, Lompoc, California, offers for registration the following sweet peas:

Any person objecting to the registration of same or to the use of the proposed names is requested to communicate with the secretary. Failing to receive objection to the registration the same will be made three weeks from this date.

RAISER'S DESCRIPTIONS.

OGATA—Color: chocolate self, slightly wavy standard. Plant up to 10 ft. high and branching. If sowed August 25th, begin to bloom in 65 to 70 days. Parentage: white late Spencer X Zvolanek's crimson, seedling of first generation.

SKYAIR—Color: standard lavender blue, wings light lavender. Plant up to 10 feet high, of branching habit. If sowed August 25th, begin to bloom in 65 days to 70 days. Parentage: lavender, late Spencer X Zvolanek's Blue, seedling of first generation.

VERA—Color: lilac pink standard, wings lavender. Plant over 10 feet high, of branching habit. If sowed August 25th, begin to bloom in 65 to 70 days. Parentage: lilac late Spencer X Zvolanek's Pink, first generation seedling.

CARDINAL—Color: Bishop red self. Plant up to 10 feet, and branching habit. If planted August 25th, begin to bloom in 65 to 70 days. Parentage: white late Spencer X Zvolanek's Crimson, seedling of first generation.

GOLDEN WEST—Color, light yellow self, standard, slightly wavy. Plant up to 10 feet high and branching. If sowed August 25th, begin to bloom in 65 to 70 days. Parentage: white late Spencer X Jack Hunter, seedling of first generation.

ORANGE NORA—Color: standard orange, wings salmon pink, wavy flower. Plant up to 10 feet high, branching habit. If sowed August 25th, begin to bloom in 60 to 70 days. Parentage: orange late Spencer X Zvolanek's Orange, out of first generation seedling.

NORMA—Color: bright, clear pink self, slightly wavy. Plant up to 10 feet high and branching. If sowed August 25th, begin to bloom in 65 to 70 days. Parentage: Countess Spencer X Zvolanek's Pink; seedling out of first generation.

PINK NORA—Color: bright pink self, slightly wavy. Plant up to 10 feet high, of branching habit. If sowed August 25th, begin to bloom in 60 to 70 days. Parentage, Countess Spencer X Zvolanek's Pink, first generation seedling. Remarks: This represents the Gladys Unwin, of the winter-flowering type

NORA—Color: pure white, slightly wavy, long stem, bearing over 30 per cent. of four flowers. Plant up to 10 feet high, of branching habit. If sowed August 20th, begin to bloom in 65 days. Parentage: white late Spencer X Fl. Denzer, seedling of first generation. Remarks: This is the same as Nora Unwin, only winter-flowering.

MORNING STAR—Color: light clear rose self, of wavy and crinked habit. Stem long, bearing usually over 40 per cent. four or more flowers. Plant strong up to 10 ft. high of branching type. If sowed August 25th, begin to bloom in 60 to 70 days. Parentage: rose-pink late Spencer X Pink Beauty, seedling of second generation.

GOLDIANA—Color: light yellow self, standard and wings large and wavy; plant up to 10 ft. high, of branching habit. If sowed August 25th, it begins to bloom in 60 to 70 days. Parentage: late white Spencer X Jack Hunter; seedling of third generation.

February 15, 1913.

JOHN YOUNG, Sec.

Objections having been filed to some of the names given the new sweet peas, handed in for registration by Anton C. Zvolanek, Lompoc, Calif., December 20, 1912, Mr. Zvolanek wishes to substitute as follows:

Azalea instead of Butterfly; Camellia instead of White Butterfly; Excelsior instead of White Curliana; Mona instead of Hercules; Claudia instead of Orange; Vera instead of Pincus; Eola instead of Apricota; Flora instead of Appleblossom; Dora instead of Orchid Beauty; Diana instead of Cereus; Velma instead of Lilac; Orella instead of Bush Butterfly; Una instead of Azuren; Olivia instead of Indian; Laura instead of Bishop; Goldiana instead of Jealousy; Ina instead of Flag; Elvira instead of Blue Flag.

The following names are withdrawn: Antoinette, Sunset, Lucifer, Evening, Heaven.

(Mr. Zvolanek in the preceding list gives Vera and Goldiana slightly altered and amplified descriptions over the descriptions originally given to Pincus and Jealousy, respectively. —E.D.)

Any person objecting to the registration of these sweet peas, or to the use of the proposed names, is requested to communicate with the undersigned at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

As no objection has been filed, public notice is hereby given that the registration of the new sweet peas Why Not, Dolansky Spencer, Salma, Smalley Spencer, Mrs. Sim Spencer, Bohemian, My Darling, Venus, by Anton Zvolanek, becomes complete.

February 15, 1913.

JOHN YOUNG, Sec.

INTERNATIONAL FLOWER SHOW, NEW YORK, APRIL 5-12.

The New York Cut Flower Co., 55 West 26th street, is offering a grand silver vase, value \$200, for the finest display of cut roses, irrespective of number of varieties shown. This premium does not appear in the final schedule of prizes, just issued. A supplementary schedule will be issued before the show opens, to take care of the prizes that will be offered from now on.

In the final schedule, Class 87, "First Prize, Silver Cup" should instead read, "Grand Silver Medal and \$15" as a first prize, and that same is offered by the Horticultural Society of Chicago; in Class 91 in Section "C" the medal offered is the grand bronze medal of the Horticultural Society of Chicago.

Class 524, the M. C. Ebel prize, is open to members of the National Association of Gardeners only; notice of

this fact was inadvertently omitted from the schedule.

The most noteworthy classes in the final schedule are Classes 192, 193 and 194, covering \$200 for the most valuable economic plant, which may be a new fruit, new vegetable, or other plant which has a distinct economic value; \$200 for the most valuable new foliage plant; and \$100 for the most valuable new flowering plant. These prizes are to be awarded for plants not yet in commerce, showing characters distinctly new and useful. Should the entries in any one class not be meritorious enough to secure an award, the total money assigned to that class may be divided among the two remaining classes, providing the plants exhibited in the remaining classes are worthy of such a prize. Should no plant exhibited be considered worthy to secure an award under these conditions, the entire prize may be withheld. These prizes are offered by the Missouri Botanic Garden of St. Louis, and, as far as known, no schedule has ever contained such a liberal provision. These offers should bring numbers of exhibits from the growers of novelties in Europe.

Anyone desiring a copy of the Final Schedule of Prizes may have one on application to John Young, secretary, 54 W. 28th street, New York.

J. H. PEPPER,

Chairman Publicity Committee.

AMERICAN ROSE SOCIETY.

The executive committee of the American Rose Society held a meeting to consider best dates for exhibits and to arrange special prizes for the International Exhibition, April 5 to 12, 1913. Harry O. May, of Summit, N. J., was chosen manager of the Rose Division.

The following dates were decided upon in connection with the International Flower Show Schedule:

Divisions F and G shall be staged on Saturday, April 5th; Divisions B and C shall be staged on April 7th; the exhibits for the New York Cut Flower Co. Cup shall be on Thursday, April 10th. All special prizes not included in the International Flower Show final schedule shall be completed for on Thursday, April 10th, 1913.

All entries must be made with the secretary of the American Rose Society not later than March 29. The American Rose Society exhibit shall be governed by Rule No. 2 of the International Flower Show.

Philadelphia rose growers offer a special prize for 75 roses, any variety or varieties, excepting American Beauties and undis-seminated varieties.

The Toronto Horticultural Society offers a silver medal and a bronze medal for purposes to be designated by the American Rose Society.

The New York Cut Flower Co.—A cup of \$200 in value.

Special Growers' Prizes, \$15, \$10, \$7.
The Peter Henderson & Co. Prize.—For best plant of the rose, "Silver Moon." First prize, \$15; second prize, \$10.

The Peter Henderson & Co. Prize.—For the best plant of rose, "Dr. W. Van Fleet." In 8-inch pot or tub or larger. First prize, \$15; second prize, \$10.

Mrs. Frances Roche, Newport, R. I., has filed the following:

"I desire to offer a prize of \$50 for a new rose to be grown under glass, to resemble as nearly as possible in color the 'Marchal Niel,' but with a stronger stem, to be competed for at any show the Society selects after June, 1913."

A word from California:—The Panama Canal Committee of San Francisco offers a prize of \$1,000 to be competed for in 1915.

BENJAMIN HAMMOND,

Secretary.

Fishkill-on-Hudson, N. Y.

Development of the China Aster

CALLISTEPHUS CHINENSIS
The Original China Aster.

was originally a foot and one-half to two feet high, upright, and with single flowers in blue, violet or white. The first development was the production of double flower forms and then came the variegated, quilled, and finally (1890-1895) long-petalled, commercial forms such as Comet, Queen of the Market and Branching. The numbers of varieties have been increasing until now some of the European firms catalogue 500 to 650 varieties. These are largely dwarf or semi-dwarf, or of colors or styles that are not liked in America, because here the flowers are grown for cutting rather than for garden decoration.

The foregoing is a brief summary of the remarks by George Arnold in his stereopticon address on "The Aster," before the New York Federation of Floral Clubs on February 12, 1913. The pictures shown illustrated the development from the original single aster to the latest evolution, including several photographs in natural colors. Dis-
eased plants and methods of culture

were illustrated and described. Interesting pictures, some of them in colors, were shown of the Vick Seed Farm, and the trial grounds. Fields of asters were shown, with ribbons of various colors across them. Methods of planting and cultivating asters, and of harvesting and curing the seed were also illustrated. We present herewith several of the pictures reproduced.

NEW ENGLAND NURSERYMEN.

The annual convention of the New England Nurserymen's Association will be held at Horticultural Hall, Worcester, Mass., Tuesday and Wednesday, February 25 and 26. A full program for a two-day meeting has been arranged by the executive committee, which will include practical talks and discussions by prominent nurserymen and horticulturists from the several New England states. Dr. W. E. Britton, State Entomologist of Connecticut; A. E. Stene, State Nursery Inspector of Rhode Island; Walter C. O'Kane, State Agent of New Hampshire, and Dr. W. S. Regan, Inspector in Massachusetts, are to take part in the discussion of nursery inspection laws, rules and regulations. Daniel A. Clarke of Fiskville, R. I., will speak on "New Plant Introductions." Stephen Hoyt of New Caanan, Conn., will give an illustrated talk on the moving of big trees. Ernest F. Coe of the Elm City Nurseries, New Haven, Conn., will speak on Horticulture in Japan, illustrated by stereopticon views. Practical papers on propagation, storage houses, herbaceous perennials, etc., will be presented by Mr. Stevens of South Framingham, Mr. Barnes of Yalesville, Conn., and others. An important feature of the occasion will be the annual dinner and banquet at Hotel Warren on Tuesday evening the 25th.

WHITE PERFECTION
A Modern Type.

SHORT PETALLED TYPES
Not Adapted to Commercial Flower Uses.

CLUBS AND SOCIETIES

NEW YORK STATE FEDERATION OF FLORAL CLUBS.

The regular meeting of the Federation was held in the Agricultural College, Cornell University, Ithaca, N. Y., Wednesday, Feb. 12. Present: President W. F. Kasting, vice-presidents Erl A. Bates and E. R. Fry, secretary John Young, treasurer W. A. Adams, Prof. J. F. Cowell, Buffalo; President W. H. Siebrecht of N. Y. Florists' Club, Harry A. Bunyard and H. C. Steinhoff from New York; George E. Thorp, Dr. Edmund M. Mills, Syracuse; H. N. Hoffman, Elmira; Fred W. Vick and George Arnold, Rochester; Prof. A. C. Beal, Ithaca, and several florists unattached. A very interesting lecture was given by Dr. Mills on the "Rose and its Culture," illustrated by lantern slides. Then followed a lecture by Harry A. Bunyard on "Twentieth Century Horticulture." The slides used by Mr. Bunyard were very fine but owing to the very poor condition of the lantern they did not show up at all well, which caused the lecturer considerable annoyance.

A business meeting followed. President Kasting reported as to the progress made towards securing an appropriation of \$60,000 from the state for building greenhouses for experimental work in floriculture and vegetable culture. The outlook at present was very encouraging that the appropriation would be made. Dr. Erl A. Bates reported progress for the committee appointed to secure an appropriation from the state for a horticultural building at Syracuse. They were having the support of the vegetable and fruit growers' associations in the endeavor to secure same. On the subject of the greenhouses for experimental work in floriculture and vegetable culture, President Kasting explained that 60 per cent would be for experiments in floriculture and 40 per cent for vegetable culture.

Prof. Beal reported on the amount of greenhouses in the state, that is, area covered exclusive of sash and frame houses. Prof. Beal was requested to prepare a letter to be sent to all the clubs, members of the Federation, giving statistics as far as possible of the florists' interests in the state, and to cover in this paper the interesting points made in his address to the

meeting. A committee was appointed to get in touch with the new Secretary of the State Fair Commission to assist him in strengthening the flower show and schedules in connection with the State Fair; also a committee on extension to assist in organizing floral clubs in different parts of the state, so they could join the state organization, thereby making that society so much stronger. President Siebrecht invited all the delegates and their ladies to be present at the National Flower Show in New York City. The meeting adjourned to meet at the State Fair in September. In the evening there was a horticultural banquet tendered the visitors.

JOHN YOUNG, Sec.

NEW JERSEY FLORICULTURAL SOCIETY.

At the February meeting of this society, State Senator Austen Colgate discussed with the members a resolution recently adopted by this society favoring the appointment of three professional gardeners on all park boards and shade tree commissions.

The Senator said he would introduce a bill to that effect and if it should be defeated the society should suggest names of candidates for appointment when vacancies occurred and he would do all in his power to have them appointed.

In monthly point competition the following awards were made:

Wm. Reid, carnations, 90 points, roses 84; Max Schneider, carnations, 85, sweet peas 70, freesias 70; Frank Drews, sweet peas 60; narcissus 60, cyclamen 70; John Dervan, roses 83; Fritz Berglund, carnations 75; Emil Panuska, Platyclinis glumacea 75, Cineraria 82.

Not for Competition — Seedling rose, Frank Drews, certificate of merit; violets, Max Schneider, hon. mention; roses, John Dervan, certificate of merit.

Charles Ashmead was elected vice-president to fill the unexpired term of George B. Wilson, who resigns to take charge of the Taylor estate in Jericho, L. I.

There were a number of prizes offered, namely: Gold watch by Lord & Burnham Co. for highest number of points in monthly competition; silver cups by Hitchings & Co., Stumpp & Walter Co., and \$20 in gold by Mr. Wm. Runkle.

Carnation Night will be held on March 14th.

JOHN DERVAN, Sec.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The February meeting of this club, last Tuesday evening, was one of the best of the season. The attendance was large, there was a superb exhibition of carnations, sixteen new members were added to the roll and the discussions were full of vim and timely instruction. President Kennedy presented his recommendations for the year, including the appointment of a legislative committee and a lecture committee and suggested a change in the manner of electing executive committee members so that two shall hold over in office each year. His most radical recommendation was that a class for instruction in the art of floral decoration and in the business of buying and selling, providing means for the advancement of young men in the retail flower trade on lines similar to those followed in the landscape gardening classes which this club has successfully conducted for several years, be instituted.

Peter Fisher gave an interesting talk on "Carnations," his contention being that growers should aim to produce the higher grades in fewer numbers in preference to the avalanche of medium and low grade stock, which has the effect of glutting the market and lowering prices. A. A. Pembroke followed with an interesting talk on ventilating, watering, soil and fertilizers. This brought about a lively discussion on the fertilizing question and the value of commercial fertilizers, participated in by W. H. Elliott, Jas. T. Scott of Elmsford, N. Y., and others. Mr. Scott intimated that the boys in England know more about the use of fertilizers than many of the growers here. S. J. Reuter of Westerville, R. I., gave a resumé of his 42 years' experience as a carnation grower, approving of Mr. Fisher's methods, as did also M. A. Patten. An invitation from the W. W. Edgar Co. to visit their plant houses on March 8th, was accepted by the club. Thomas Roland spoke on the International Flower

"MRS. GEORGE SHAWYER"

We can still quote March delivery on this sterling Rose but would ask that you do not delay too long before investigating its merits.

SHAWYER and MILADY, \$30.00 per hundred; \$250.00 per thousand. Grafted or Own Root.

CARNATIONS

NORTHPORT: The leader in the dark pink section.

COMMODORE: The freest blooming scarlet we have.

ENCHANTRESS SUPREME and SALMON BEAUTY: Two fine sports from Enchantress.

\$12.00 per hundred; \$100.00 per thousand.

CHAS. H. TOTTY,

Madison, N. J.

Show, urging a creditable representation of the Boston gardeners and gave information as to how to ship exhibits, and State Vice-President Edgar told of the transportation arrangements for the Minneapolis convention. The exhibition for the evening was one of the best ever made by the club. The number of carnation novelties was large. Scott Bros. showed Wm. Eccles, British Triumph and Lady Northcliffe; Patten & Co., Princess Dagmar; Jas. Wheeler, three seedlings; Peter Fisher, Gorgeous and a bunch of brilliant seedlings; S. J. Goddard, seedlings and Lady Northcliffe; A. A. Pembroke, Benora and others; W. D. Howard, Eureka; E. G. Hill Co., L. C. Midgley, J. D. Cockcroft and others also showed several varieties; Miss Amy Lowell showed Coelogyne cristata, Chatsworth variety; Mrs. J. L. Gardner, Cypripedium Dicksoniana, and the W. W. Edgar Co. staged a lot of fine genistas, oranges and forced bulb stock.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The regular monthly meeting of the Society was held in Doran's Hall, Feb. 14th. After a lengthy discussion it was decided to hold the fall show in Stamford, Conn., date to be announced later. Quite a number of splendid exhibits were staged, which were judged as follows:

Robt. Williamson, cultural certificate for Coelogyne cristata; James Stuart, cultural certificate for amaryllis; P. W. Popp, honorable mention for carnation California Giant; A. L. Marshall, highly commended for Bryophyllum calycinum; Louis Whitman, highly commended for vase of Richmond roses and lily of the valley; W. J. Seeley, highly commended for Primula obconica; Anton Peterson, highly commended for Nephrolepis elegantissima; C. A. Hakamon, vote of thanks for Christmas flowering sweet peas; Edward Frenzell, vote of thanks for Sweet peas and Narcissus Poeta's Ideal Hybrid; A. L. Marshall, vote of thanks for Narcissus Golden Star and Amaryllis vittata hybrid.

The chief topic of the evening was the illustrated lecture on the International Horticultural Exhibition by H. A. Bunyard. Mr. Bunyard spoke in glowing terms on the splendid exhibits staged at the meeting and also the large number of members present, also requesting their support towards the success of the International Flower Show to be held in New York in April. Wm. Scott of Scott Bros., Elmsford, N. Y., has promised to speak at our next meeting.

E. S. MILLER, WADING RIVER, N. Y.

PERSONAL.

Fred E. Palmer and daughter of Brookline, Mass., have returned from their visit to Panama.

James Lowe has taken the position of gardener at the estate of Mrs. Fenno on Ox Pasture Hill, Rowley, Mass.

Frank L. Hotchkiss, New Haven, Conn., has sold out his business and gone to California for several months' sojourn.

W. Baker, formerly employed by F. Macrae & Sons of Providence, R. I., is now with Joseph Kopelman, Oaklawn, R. I.

D. F. Roy of Marion, Mass., is accompanying his employer, Col. Converse, on a few weeks' fishing trip at Miami, Fla. Happy pair!

James F. M. Farquhar returned last Sunday from his European trip much refreshed in body and spirit and bringing with him a number of plant novelties.

President Farquhar and Thomas Roland left Boston on Friday, the 21st inst., for the Minneapolis meeting of the S. A. F. executive board. They will spend a day in Chicago.

We learn with much solicitude and sincere sorrow of the critical illness of our old friend, J. Austin Shaw, who is dangerously sick with brain fever at the Methodist Episcopal Hospital in Brooklyn, N. Y. All our readers who know Mr. Shaw—and who does not—will join with us in earnest wishes that his life may be spared and in sympathy to his family in this time of anxiety and dread.

Boston visitors: James T. Scott, Elmsford, N. Y.; Vernon T. Sherwood, Charlestown, N. H.; S. J. Reuter, West-erly, R. I.; A. Kakuda, New York; Geo. E. Buxton, Nashua, N. H.; Chas. Schwake, New York; D. J. Coughlin, Newport, R. I.

Cincinnati visitors.—H. G. Crowell, representing S. S. Pennock-Meehan Co., Philadelphia, Pa.; Martin Reukauf, representing H. Bayersdorfer & Co., Philadelphia, Pa., and Milton Alexander, New York.

CLUB AND SOCIETY NOTES.

The Chicago Greenhouse Vegetable Growers' Association held their annual meeting at Rogers Park, Chicago, on Sunday, February 16th.

At the next meeting of the Elberon (N. J.) Horticultural Society, March 3rd, a paper on "Orchids" will be read by Wm. Turner of Oceanic.

Secretary Young informs us that enthusiasm as regards International Flower Show matters is speeding up and exhibition space is going more lively than of late.

At the February meeting of the Los Angeles County (Cal.) Horticultural Society, George M. Garland of Des Plaines, Ill., addressed the members on the History of Greenhouse Construction.

The Jersey inspection tour of the New York and New Jersey Association of Plant Growers took place on February 21st. The Long Island trip will be held February 26th and party will meet the autos at the subway station at Atlantic avenue, Brooklyn, at 9 A. M.

No merchant carries last year styles, and you would not care for old styles; therefore, your customers demand new varieties of Carnations of the "Better Kind," and it is up to you to furnish them with up-to-date novelties such as our New Scarlet Carnation

THE HERALD

Besides, this is a money proposition: *The Herald* will produce at least one-third more blooms than any other scarlet; early, free and continuous bloomer; stem long and always stiff; flowers large, full and of a clear even shade of scarlet; calyx absolutely non-bursting, making it the highest type of a commercial carnation and one of greatest value to you. All cuttings strong and well rooted.

ORDER NOW.

OBITUARY.

Mrs. Jacob Elicker.

Mrs. Jacob Elicker, who has been engaged in the florist business at Homestead, Pa., for many years, died on February 6th of Bright's Disease, after a two weeks' illness. She was aged 47 years. One son and one daughter survive her.

Mrs. E. V. P. Ritter.

Mrs. Ritter, wife of E. V. P. Ritter, president of the International Exposition Company, of New York, died last Saturday morning. The close relationship between Mr. Ritter and our readers in view of the approaching International Show, in which he is jointly interested, will, we know, inspire a fellow feeling of sympathy with that gentleman in his great bereavement.

William D. Ellwanger.

William D. Ellwanger, a son of the late George Ellwanger, and himself an active figure for many years in the business and social life of Rochester, died after a brief illness on Sunday, Feb. 16th, at his home No. 510 East avenue. He had not been in very good health for some time but his condition had not been considered critical.

Mr. Ellwanger was president of the Ellwanger & Barry Nursery Company and also president of the Ellwanger & Barry Realty Company.

His club connections were numerous and his name appeared in the directorate of several business institutions. Besides his wife he leaves one daughter, Evelyn S. Ellwanger.

GLOXINIA ERECTA SUPERBISSIMA

Having during the past season been requested to secure some specially fine Gloxinias for exhibition purposes, we have made arrangements with a noted Gloxinia specialist in England to reserve for us some of the most distinct types. The bulbs are not so large as the Named Varieties, but this is a characteristic of most Erecta superbissima varieties.

BODDINGTON'S IDEAL PRIZE GIANT MIXED. Great variety of superb colors.

CYCLOPS. Velvety carmine, shading to a broad white border, throat dotted with dark red.

DUCHESS OF YORK. Flowers of a rich dark blue, each petal being edged with a broad band of white. A most striking and lovely variety.

SPOTTED HYBRIDS. Whenever exhibited, they create intense interest. The delicate markings, in an infinite variety of forms, add a special charm to the flowers.

SUTTON'S WHITE. A giant white flowered variety.

DUKE OF YORK. Large scarlet Gloxinia with deep white edge to each petal. A magnificent flower.

HER MAJESTY. This exquisite Gloxinia is still unsurpassed by any other white variety. The flowers are as pure as newly fallen snow, and are borne on short stems, just clear of the elegantly recurved foliage.

READING SCARLET. In color this is the most brilliant Gloxinia in existence, being an intense glowing scarlet variety of the true Crassifolia habit. An admirable companion to Her Majesty.

GOLIATH. Violet and white, fine variety.
Per doz. \$1.50, per 100 \$10.00

Boddington's Quality Tuberous-Rooted BEGONIAS

Single-Flowering Tuberous-Rooted

For planting in beds and where color effect is desired. Our stock of these bulbs will be found true to color and free from mixture.

Crimson	Rose White, Pure	Salmon	Scarlet Yellow	Pink, Light Copper	Orange
---------	---------------------	--------	-------------------	-----------------------	--------

Large bulbs measuring 1 1/4 inches and upward, separate colors or all colors mixed, 35 cts. per doz., \$2.25 per 100, \$20.00 per 1000; extra large bulbs, 1 1/2 inches and up, same colors as above, 40 cts. per doz., \$2.75 per 100, \$25.00 per 1000.

Double-Flowering Tuberous-Rooted

These can be depended upon producing 100 per cent. double flowers and contain very large and choice varieties.

Crimson	White, Pure	Yellow
Scarlet	Copper Bronze	Orange
Rose	Salmon	Light Pink

Large bulbs measuring 1 1/4 inches and upward, separate colors or all colors mixed, 50 cts. per doz., \$3.50 per 100, \$30.00 per 1000; extra large bulbs, 1 1/2 inches and up, same colors as above, 65 cts. per doz., \$4.00 per 100, \$35.00 per 1000.

Single Crested Begonias

This strain of Begonias ranges in all colors—salmon, pink, white, yellow, copper and scarlet; petals carry on the upper side a crested-formed cockscomb. Separate colors, 80 cts. per doz., \$6.00 per 100; mixed, 75 cts. per doz., \$5.50 per 100.

Single Frilled Begonias

These are of the finest types of the single Begonia, the petals being heavily frilled on the edges. To color, 10 cts. each, 65 cts. per doz., \$5.00 per 100; all colors mixed, 60 cts. per doz., \$4.50 per 100, \$42.50 per 1000.

Single Begonia Bertini

A beautiful bedding Begonia, brilliant vermilion flowers of rare beauty. As a bedder it stands unrivaled. 80 cts. per doz., \$6.00 per 100.

Double Begonias

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Canners' Convention.

Some further information about the recent Canners' Convention will, no doubt, prove interesting to our readers, and about the first item we note is that the attendance, according to the registration figures, fell some 200 short of last year's at Rochester. From reports we have, however, we infer that the number of camp followers was larger this year, making the total attendance nearly the same as last year. Perhaps one of the reasons why the registered attendance fell down a little is due to the fact that the floor space was insufficient to meet all demands, and many had to submit to a cutting down of their space. Last year at Rochester nearly all the brokers had booths; this year none of them had any. The difference in floor space explains the reason, Rochester having something over 80,000 sq. ft., while Louisville had slightly over 54,000. The seed growers were well represented, as usual.

Seed Trade Honored.

The seed trade received signal recognition in the election of W. C. Langbridge as president of the Canning Machinery & Supplies Association, this being the second time any one connected with the seed trade has had the honor to preside over the association. The last seedsman-president was W. R. Roach, who has been connected with the Jerome B. Rice Seed Co., as is also the newly-elected president. We have been advised that the honor came to Mr. Langbridge entirely unsought, and in fact, against his wishes, but we are glad that the seed trade has thus been recognized, and we know he will discharge the duties of the office with credit to himself and the business he represents.

Cutting Contract Prices.

As spring approaches what we have feared, and in fact predicted, seems to be materializing into a more or less unpleasant fact, that is that a large number of surplus offers are appearing and prices are now being cut below contract figures of last year. This is, of course, directly due to dealers' ordering largely in excess of actual requirements, the result of repeated short crops and short deliveries. This year they have received 100 per cent on a large percentage of their items and fairly liberal percentages where deliveries were short. While there will be some temporary demoralization, no doubt matters will eventually right themselves as in the past.

Notes.

Atlanta, Ga.—The Everett Seed Co. succeeds the firm of J. H. Everett & Son as wholesale seedsmen.

Tacoma, Wash.—Carl and F. J. Morrisse have organized the Morrisse

J. AUG. DRAKE, SEEDSMAN
CHESTER, NEW JERSEY

Seed Co., and opened business at 1131 South C street.

Thomas J. Grey has disposed of all his interests in the T. J. Grey Company, Boston, to the company. Mr. Grey retired from active participation in the business some time ago, but held his stock in the corporation, which he has now relinquished at its par value.

The little touch of winter we have had since the first of the month seems to have had the effect of lessening the volume of mail order business in most centres, but we assume that it is only temporary, and with the return of pleasant weather mail order trade will boom again.

Two resolutions, one calling on the postmaster general to furnish the Senate the cost of distribution of seeds through the mail under frank and the other calling on secretary of agriculture to inform the Senate of the cost of the seeds, were passed by the United States Senate on February 18.

J. Charles McCullough has returned to his home in Cincinnati after an absence in California since December.

Mr. McCullough sustained a rather painful injury, having been accidentally shot in the arm, and that member has not improved or responded to treatment as rapidly as could be desired. We understand, that Mr. McCullough is still suffering some inconvenience from the injury.

fort that was made to secure the dollars that valentine senders were so willing to spend. One florist who added a few suggestions to his usual window display reaped a big harvest in comparison and showed his long order list to the writer.

Baltimore—Business during the past week has been good besides showing quite a progress at this time over last year. Orders for Valentine's Day were fair with a supply enough to meet the demand, while a still larger business is predicted for Washington's Day.

Among some of the lovely floral displays new this year are handsome baskets (heart-shaped in design), made of gilded straw and of different sizes. These hold flowers according to their size. Bunches of violets, gardenias, sweet peas, orchids and roses, all lend themselves to filling these truly charming baskets. Floral design work has not been so very heavy, but numerous decorations for weddings and balls, have been undertaken.

CHICAGO NOTES.

Trade News.

Walter Scott of Lagrange, Ill., will move to a larger store at 19 South Fifth avenue.

"Daffodils in red, pink and white," was the announcement of a down town department store for Valentine's Day.

Peter Reinberg will hereafter bring his flowers from the greenhouses to the salesroom in a motor truck. The new machine is 21½ ft. long and known as a Mack car.

The Foley Manufacturing Co. is shipping the material for the new range of greenhouses for August Doemling, Lansdowne, Pa. This firm is also now erecting a private conservatory for E. S. Moore, vice president of the Rock Island R. R. at Lake Forest, Ill.

Some of the down-town florists are planning to devote a portion of their windows to suggestions of Washington's birthday. Some fine plants of "Jerusalem cherries" and double-flowing cherry will be used in memory of the episode in the early life of Washington.

A. T. Pyfer, manager of the Chicago Carnation Co., received a very gratifying letter and photograph last week from Guthrie, Okla. A shipment of 100 blooms of The Herald left Chicago, Jan. 31st, reached Guthrie, Feb. 2nd, and the flowers were photographed on the afternoon of Feb. 4th, showing the blooms erect and apparently as fresh as when cut. This corroborates the claim that The Herald is a splendid commercial variety.

The rigid rules of the Chicago Florists' Credit Association last week brought the financial affairs of Harry C. Rowe, 20 E. Monroe street to a crisis. Mr. Rowe states that he has settled with his creditors and also purchased the interest of his partner, Phil. Eschling, who has been in the store for several years and who recently left for other lines, is now back and Mr. Rowe has the business in better shape than before.

Fred Munzing has bought the four greenhouses, stock, store and fixtures and leased the land at 6001 Evanston avenue, formerly operated by the North Edgewater Floral Co. He will

take immediate possession retaining the same name. The place is well stocked, is in a very desirable location and Mr. Munzing will be in good condition to take care of his full share of the north shore patronage, having had several years' experience. Mr. Munzing has been for the past seven years with Frank Oechlin and previously with C. Frauenfelder, and is well known to the trade.

Personal.

George Gobel is on a brief trip to New York.

J. C. Vaughan is in Miami, Fla., where Mrs. Vaughan is spending the winter.

Mrs. Joseph Fink, whose husband passed away last week, has gone to make her home with her daughter in Milwaukee.

P. J. Foley took a week-end business trip visiting points in Illinois and Indiana, where the Foley Manufacturing Company is erecting greenhouses.

The engagement of Maude E. Loycon and George C. Bredesen is announced and the wedding will take place March 29. Miss Loycon is in the office of E. H. Hunt, which place seems lately to be a favorite with cupid.

Visitors: Wm. Hartshorn of the conservatories of the State Penitentiary, Joliet, Ill.; W. P. Craig of Robt. Craig Co., Philadelphia; Jos. E. Rolker, of A. Rolker & Sons, New York.

Edgar Winterson, Jr., is endeavoring to get a bowling team in Chicago to play against the Milwaukee boys.

FLORISTS' TELEGRAPH DELIVERY.

Rocklin & Lehman of Sioux City, Iowa, have had the following strange experience, through which their brother florists may benefit:

Early in December they sent in an order to the firm of Dobbie & Co., Edinburgh, Scotland, stating that they wished to have flowers sent to a certain patron in time for Christmas. The letter head of Dobbie & Co. is styled as follows: "The Seedsmen and Florists" and some time later Rocklin & Lehman received the following letter:

"Gentlemen: We duly received your letter with inclosure. We are sorry that we do not grow cut flowers for sale, and have none to supply at the present time.

We have sent the letter to Mrs. _____, and advised her accordingly.

Regretting we are unable to be of service to you on this occasion, we are,

Yours faithfully,

DOBBIE & CO."

Investigation by the Florists' Telegraph Delivery revealed the fact that it is a common thing for foreign firms to style themselves "florists" even though they only grow a few garden flowers in season. It is well for the American firms to be sure that their European correspondents are prepared to furnish flowers at this season of the year.

Mr. Chas. Dards, of New York, has volunteered to advertise the Florists' Telegraph Delivery in the International Flower Show program. Mr. A. Pochelon, secretary, thought very highly of the results which might be obtained when approached for an adv., and is more than pleased with the enterprising spirit shown by Mr. Dards, who is generally found to be a leader in such matters.

The most instructive paper rendered by Mr. Wallace Pierson recently is certainly interesting reading for members of the Florists' Telegraph Delivery. There is much in it which ought to be profitably adopted by an organization of retailers for the general furtherance of the flower business. The paper is ahead of the times in thought and gives the many retailers an inspiration for making greater strides in the future.

IRWIN BERTERMANN,

President.

Less Ice With Better Results

The McCray System of Refrigeration, which insures a perfect circulation of cool, dry air, will not only reduce your ice bills, but will keep your stock in the best condition—fresh, fragrant and attractive.

McCray Refrigerators

Are made so as to display your flowers to the best advantage. They can be lined with white enamel, opal glass, tile, mirrors or marble to suit your convenience. Write for our beautiful Free Catalog No. 73, which shows refrigerators for florists, both stock and built-to-order, in all sizes and styles.

McCray Refrigerator Co.

KENDALLVILLE, IND.

PHILADELPHIA NOTES.

One bad feature of the approach of spring is that it gives nearly all the boys—and some who are old enough to know better—an idea that they can whistle. We have noticed also that a visit to the punch bowl has one bad feature—it gives many people an idea that they can sing.

Harry S. Betz will open a retail flower store at 11th street and Lehigh avenue on the 26th inst. Mr. Betz is well known in the trade having for many years occupied a responsible position in the Dreer establishment at Riverton. In addition to conducting a general retail flower business Mr. Betz will also do landscape work.

Stephen Mortensen, one of our most successful rose growers, says the mild winter has been peculiarly unfavorable to the rose crop, making the flowers (what few have been harvested since the new year) soft and unsatisfactory. Conditions are much better now, especially with Richmonds, which have greatly improved the past two weeks.

Mr. and Mrs. Charles E. Meehan left New York on the 15th inst on the S. S. "Carillo" bound for the West Indies and Panama. This is strictly a vacation trip and business will be forgotten. The itinerary includes stops at Kingston, Port Royal, Costa Rica, Colon and Panama. The return trip will be made on the same steamer, due in New York about March 11th.

John McIntyre, one of Philadelphia's distinguished commission florists, on being interrogated held up his right hand and asserted that he would not fill a retail order even if offered to him cash down. To the best of our knowledge and belief John is a truthful man, yet shortly after this episode he was seen walking up the street with a wire design in his hand. Josh Billings said: "They say the frog is a virtuous animal but the incessant humming he keeps up o' nights causes me to suspicion the frog."

A frequent question asked by the inquiring visitor: Is there much building going on or contemplated this season? This has of course to be answered—Oh, yes; about as usual, you can't stop the enterprise of our horticultural engineers. Which provokes a heavy sigh. We console them with: Oh, well; it was just the same twenty-five years ago; the little fellow with

HART MAKES HANDLES FOR POTS

With Paper or Porto Rican Mats They Make Baskets. These are the Well-Known HART'S HANDY HANDLES.

Shipments are being made daily eastward to Boston, westward to San Francisco—and everywhere else. Once used always used, because they are SO HANDY.

Prices per dozen—No. 1, \$2.50; No. 2, \$3.50; No. 3, \$4.00;
No. 4, \$5.00; No. 5, \$6.00.

GEORGE B. HART, 24 Stone St., Rochester, N. Y.

the obsolete found it hard to compete with the progressive and up-to-date greenhouses and it is just the same to-day. Progress or perish is the watch-word.

Visitors—George Ebeile, Baltimore, Md.; Charles W. Scott, Yokohama Nursery Co., New York City; George Leapley, of Leapley & Meyer, Washington, D. C.; C. A. Dards, New York City; H. L. Holmes, Harrisburg, Pa.; Stephen Mortensen, Southampton, Pa.; H. W. Doughten, Moorestown, N. J.

NEWS NOTES.

Marysville, Cal.—Andrews & Alexander have gone out of business.

Tyler, Tex.—The florist business of the late James Whitten has been sold, together with the greenhouse property, to C. B. Yost, who will conduct the business.

A civil service examination will be held in Alexandria, Va., on February 26, for the position of assistant forest pathologist at a salary of \$1400 to \$1800 per annum.

Charleston, S. C.—John Salmon has bought out the greenhouses and nurseries of C. M. Newman and the business will be conducted by him hereafter, under the management of F. Aichele.

Sunbury, Pa.—C. R. Rossiter, a prominent florist, was fatally shot on February 12th by Morris, his son, lately returned from an insane asylum, thought cured. The maniac was final-

ly captured after holding a posse at bay for several hours.

Amherst, Mass.—W. H. Elliott on February 10th, W. H. Duckham and C. H. Totty on February 11th, and Eber Holmes on February 14th were among the interesting speakers last week in the floricultural department of the Massachusetts Agricultural College.

DON'T FAIL

Flower Market Reports

BOSTON Trade has been decidedly on the quiet side all this week and the prospect of some mild weather together with the holiday Saturday would seem to favor a still greater drop in values within the next few days than has yet taken place. There are plenty of roses, carnations, violets, bulb stock, etc.,—in fact, everything in flowers and plants. Quality holds good on most lines except that carnations from some sources run poor, there being many split and otherwise imperfect blooms. Bulb stock is accumulating considerably in wholesalers' hands.

BUFFALO Business has fallen off considerably, though there have been days when it has been brisk. There is sufficient stock in all lines, although roses are not too abundant and this has helped the carnation situation to some extent. There has again been an oversupply on paper whites and short stem tulips, but good colored La Reine, Yellow Prince and Cottage Maid have had a good call. Narcissus, all kinds, have been in good supply. Lilies are fine, also freesia, mignonette and sweet peas. Lily of the valley is on the very quiet side and violets have had little or no demand except on Valentine's Day when a little extra business was had on them.

CHICAGO Last week market conditions were unchanged until Friday when rose stock eased up a little and carnations suddenly seemed to be hardly equal to the demand. There has been such a continued shortage of medium and short roses that even a slight increase is welcome, but the chief difference is

in the long-stemmed stock. Not that there is any surplus nor likely to be in the near future. Carnations were decidedly in demand Saturday and every flower cleaned up. Growers say the splits are nearly all cut and stock from now on will be mostly of the higher grades. Lilies are coming in rather freely but all sell. Violets came into Chicago in such quantities that the price went down to anything one would pay on Valentine's Day and the day following. This was especially true of doubles which have been poor property here all the winter. Some fine Princess of Wales held up to quotations, a lot of 65,000 selling readily in one house. Sweet peas, violets and red roses were the three favorites for

Valentine's Day. Tulips and other bulbous stock form a very large part of all the stock seen on the counters. There is plenty of all kinds of green.

The supply of good **CINCINNATI** stock in market is easily sufficient to take care of all calls. It is only the good stock, too, that realizes the price. Seconds and inferior grades are yielding a very low average. The call from out-of-town buyers is very large. Most all of the good clean Killarney, White Killarney and Bride roses are selling up nicely. Richmond receipts clean up at sight when the stock is in good condition. There is an active demand for short and medium Beauties. The

Flower Market Reports

(Continued from page 200)

long ones are not selling any too well, although they manage at times to clean up. The sweet pea cut has increased tremendously. The good long ones sell easily while their shorter confreres find difficulty in obtaining a market. The supply of lilies, too, has increased until the market in this line is easy. All the stock offered for the past fortnight has been the good solid kind that delights the retailer. The carnation supply has held up steadily as far as blooms are concerned. A large number of either split carnations or some that have been held too long are being dumped into the market, but the supply of good local stock has been sufficient to take care of most of the wants. At the present time, however, judging from the appearance of the receipts, the local growers are going off crop. Neither violets, orchids or bulbous stock of any kind are finding a very strong market. As long as there are roses and carnations in adequate numbers the local buyers do not seem to take kindly to the other lines. The feature in the green goods market is the heavy call for cut ferns.

Business conditions have not changed materially from those reported last week. The volume of business must, however, show a considerable increase if it is to use up the augmented supply of roses which must now be reckoned with. A strong downward tendency may be looked for. All other crops are on full tilt and with quality generally good, except that quantities of low grade carnations and sweet peas are coming in from growers who lack in skill, attention or equipment or something of that sort and who will be candidates for the poorhouse if they have to depend upon the returns from the sale of these outclassed goods.

There was considerably more vim in the cut flower market here last week. This was especially true towards the end of the week when trading was very brisk indeed. Prices stiffened very materially all along the line—the leaders in that respect being carnations, orchids, and Richmond roses. The general run of roses were not in large supply and the clean-up was excellent. No doubt the St. Valentine episode of the week helped considerably. Gardenias, violets and sweet peas, were all plentiful and good and met with ready sale. Rather too many daffodils, but there was a big overturn of these at fair

Gardenias	8.00 to 25.00	8.00 to 25.00
Adiantum50 to 1.00	.50 to 1.00
Smilax	6.00 to 12.00	6.00 to 12.00
Asparagus Plumosus, strings (per 100)	35.00 to 40.00	35.00 to 40.00
" & Spreu (100 bunches)	15.00 to 25.00	15.00 to 25.00

prices. Paper whites nearly over, but the freesias are now abundant and fill that gap nicely.

ST. LOUIS

The market was equal to the big demand all during last week and from reports among the retailers Lent has cut but very little figure so far—of course St. Valentine's Day business came in during the week and kept us all very busy. The sale for this day was mostly for violets and our commission men say over 200,000 violets were received on Thursday and Friday and all cleaned up nicely. Sweet peas, too, had a big call and sold as well as violets only there were not so many. Roses are coming in better and are more plentiful. Carnations are up in price and today bring 4 and 5 cents for extra quality, with supply large. Bulb stock sells at usual prices and plenty of them at any time.

WASHINGTON Saint Valentine's Day and the Automobile Carnival

brought a large amount of extra business to the stores, which, last week, took on a decided holiday appearance. Roses continue scarce. Carnations are retailing at 50 cents per dozen at a number of the downtown stores although the growers and commission houses are cleaning out their stock at from \$2.50 to \$4.00 per hundred. Sweet

peas are very plentiful. The supply of snapdragon and lupines is increasing but the demand exceeds the supply. There is quite a little call for novelties including magnolias, peach and other blossoms which cannot be supplied by local firms. Lilies and callas are moving well.

"Many growers of violets in Poughkeepsie and Rhinebeck have given up the growing of this flower because they say they are no longer worn. The turkey trot and like dances are so rough that the flowers are knocked off after a few minutes."

Now we know what happened to the "Up-the-Hudson" product. We did think it was something else.

How and where to construct a public park or private estate was entertainingly described by Arthur A. Shurtleff, engineer of the Boston Park Department, at Horticultural Hall, Boston, Saturday afternoon, February 15, 1913.

CATALOGUES RECEIVED.

Wm. Toole & Son, Baraboo, Wis.—Guide to Pansy Culture and Catalogue of Seeds and Plants, for 1913.

M. Rice Co., Phila., Pa.—Large Illustrated Sheet and Price List of Easter Baskets and Novelties.

Daniel A. Clarke, Red Oak Nurseries, Fiskeville, R. I.—A select list of hardy ornamental plants, in neat, pocket size. Illustrated.

F. H. DeWitt & Co., Wooster, Ohio.—Geraniums and Pelargoniums, for 1913. An illustrated list of these standard specialties.

Rumsey & Co., Ltd., Boston.—Illustrated Catalog of Spray Pumps and fittings. Apples in natural colors used as a cover illustration.

Albert A. Sawyer, Forest Park, Ill.—Folder Sheet of the Sawyer "Aster-mum." Illustrated and convincing. A view of a field of these flowers makes a gorgeous picture.

E. S. Miller, Wading River, N. Y.—Trade Price List of Bulbs and Hardy Plants, Spring of 1913. A well selected list in which lilies and gladioli are especially prominent.

W. W. Wilmore, Denver, Colo.—Dahlias, 1913. A very interesting and complete illustrated catalogue of dahlias. Many beautiful novelties are listed. Special Trade List also.

William Tricker, Arlington, N. J.—Water Lilies and Hardy Old-Fashioned Garden Flowers. A list that every one interested in aquatic gardening will want. Handsome illustrations.

B. Hammond Tracy, Wenham, Mass.—Cedar Acres Gladioli. A very attractive and fetchy publication, nicely illustrated and with a very artistic cover, in colors. Size just right to slip into the coat pocket.

Eastern Nurseries, Jamaica Plain, Mass. Wholesale Trade List. As usual this catalogue presents in its selections the best things in hardy shrubbery, trees and herbaceous material. Many desirable sorts of recent introduction are listed.

Chamberlain & Gage, South Natick, Mass.—Price List of Gladiolus Bulbs, 1913. An enticing list for the gladiolus fancier, particularly in the novelty list which is an exceptionally advanced one. This is a catalogue that will sell the goods, all right.

James Vick's Sons, Rochester, N. Y.—Vick's Garden and Floral Guide. As usual one of the "winner" catalogues. Cover illustrations in color, inserts are White Perfection and Peach Blossom asters and Southport Globe onions. Good material in a vast quantity has been condensed into this book.

Bertrand H. Farr, Wyomissing, Pa.—Farr's Hardy Plants. This is always one of the most beautiful and high-class American trade publications for the year. The principal changes over the edition of last year are two handsome new color plates, an index to the 590 varieties of peonies described and a set of new iris seedlings of Mr. Farr's own raising. A conventionalized treatment of German iris in natural colors makes an appropriate cover illustration.

M. H. Walsh, Woods Hole, Mass.—Handbook of Roses. A thoroughly artistic production embellished with numerous beautiful pictures and list-

WIZARD BRAND MANURE

is especially useful to the florist in winter when the crude rough manure supply is wet, frozen and hard to get.

Sheep or Cattle Manure Pulverized or Shredded

A kind for every use and in most convenient, effective form. Saves labor, is ready for instant use when most needed and can be depended upon.

One hundred pounds in a bag equals a whole wagon load of stable manure.

Don't fail to specify **Wizard Brand** when you order and you'll get the best. Your supply house can furnish it if you insist, or we ship direct promptly.

THE PULVERIZED MANURE COMPANY

31 UNION STOCK YARDS, CHICAGO

ing all the most desirable roses of the various classes. Naturally the climbing and rambler sorts are given especial attention and several novelties of sterling merit are included. There are full page half-tone plates of specimen plants of Mrs. M. H. Walsh, Lucille, Lady Blanche, Arcadia and others, and on the cover page appears Winona in colors.

C. S. Harrison's Select Nursery Co., York, Neb.—This catalogue bears the inscription "Finest Collection of Ornamentals West of Chicago." The contents give strength to the claim. That this firm, with the climate conditions confronting it in a large section of its field has succeeded to the extent of putting out a catalogue such as the one before us is a great credit to them and their enterprise. "Beauty is wealth" has been the slogan of this venerable pioneer for many years and this publication by his firm is a most capable missionary.

PUBLICATION RECEIVED.

Modern Strawberry Growing, by Albert E. Wilkinson.—One more addition to the useful Garden Library series. The author is instructor of horticulture and in charge of extension work at Cornell University. In this book he has provided a very practical manual on the strawberry industry, the only one that has been published in 25 years and hence indispensable to anyone interested in the culture for home use or for marketing of this, the most popular of small fruits. Modern Methods of Growing, Modern Methods of Packing and Modern Methods of Selling, are fully treated in its 16 chapters, filling over 200 pages. The text is illumined by 32 illustrations showing the various operations. The book is published by Doubleday, Page & Co., Garden City, New York, at \$1.10 net. HORTICULTURE can supply copies at publisher's price. It meets in most complete and satisfactory manner the need for information on this important industry and we do not hesitate to commend it strongly to our readers.

FOR SALE

GLASS FOR SALE. Cheap for cash; 250 boxes of 16 x 21, double thick, B quality, hand-made glass, \$2.50 per box. F. O. B. Newtonville or Bemis. H. A. Harris, 77 Walnut St., Newtonville, Mass.

A bill appropriating \$60,000 for a range of greenhouses at Ithaca, N. Y., has been introduced at Albany by Assemblyman Jackson of Buffalo.

FIRES.

Paterson, N. J.—The retail flower store of Ed. Sceery was burned out on February 6th.

Monticello, N. Y.—The greenhouse owned by John O'Neal at Colonial Park was burned to the ground on February 10th.

Northampton, Mass.—The greenhouse of William Lacey at Pine Grove was damaged to the extent of \$300 by fire on February 14th; cause, overheated pipes.

Fort Thomas, Ky.—Fire destroyed Henry Gorkel's home, near his greenhouse plant, on Sunday last. Mrs. Gorkel discovered the fire but only in time for them and their family to get out of the building.

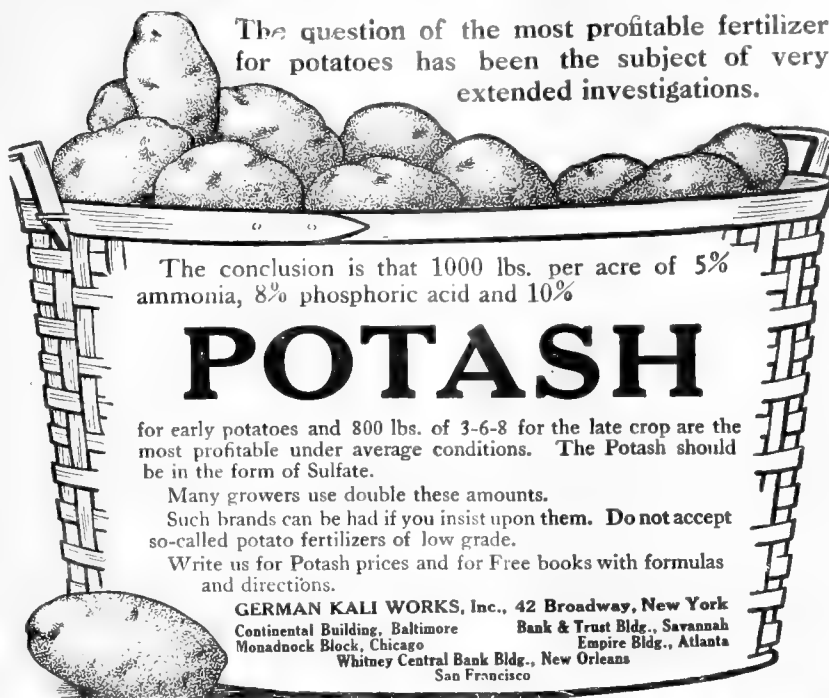

NEWS NOTES.

Bloomington, Ill.—F. W. Glenn, heretofore sales manager for the Bloomington and Phoenix Nurseries has resigned and will start business on his own account.

Jamestown, N. D.—E. A. Williams of the Wheeler Floral Co. has bought out his partner in the greenhouse business, A. K. Wheeler, and will conduct the business alone hereafter.

Oklahoma City, Okla.—C. Galeener and L. C. Oliver have dissolved partnership and Mr. Galeener will continue the business of the Great Western Nursery Company, Mr. Oliver retiring.

San Francisco, Cal.—The MacRorie-McLaren Company have purchased the stock of the Pacific Nursery, consisting of evergreens, shrubbery, trees and roses occupying 70 acres of ground.

The question of the most profitable fertilizer for potatoes has been the subject of very extended investigations.

The conclusion is that 1000 lbs. per acre of 5% ammonia, 8% phosphoric acid and 10%

POTASH

for early potatoes and 800 lbs. of 3-6-8 for the late crop are the most profitable under average conditions. The Potash should be in the form of Sulfate.

Many growers use double these amounts.

Such brands can be had if you insist upon them. Do not accept so-called potato fertilizers of low grade.

SLUG-SHOT

USED FROM OCEAN TO OCEAN FOR 29 YEARS.

Sold by Seed Dealers of America.

Saves Currants, Potatoes, Cabbage, Melons, Flowers, Trees and Shrubs from Insects. Put up in popular packages at popular prices. Write for free pamphlet on Insects and Blights, etc., to B. HAMMOND, Fishkill-on-Hudson, New York.

LEMON OIL CO'S STANDARD INSECTICIDE

SOLUBLE IN WATER
NO ODOR NO POISON

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

PATENTS GRANTED.

1,052,545. Bench for greenhouses. Michael Winandy, Chicago, Ill.

1,052,789. Scuffle-hoe and garden trimmer. John E. Bergstrom, Rock Island, Ill.

A new greenhouse manufacturing establishment has been started at North Tonawanda, N. Y., under the name of the Parks Construction Company. An office has been opened in the Real Estate Exchange Building.

The Recognized Standard Insecticide.

Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, root, wire and grub worms, maggots, cut lice and ants. Used one part to 400 parts water. It does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

FOR SALE BY SEEDSMEN.

Cocoanut Fibre Soil

Trees mulched with this article will grow larger fruit, better color, and ripen more uniformly than by any other means. We have proved it.

20th CENTURY PLANT FOOD CO.

27 & 29 OCEAN ST.,

BEVERLY, MASS.

The head of lettuce grown under Single Light Sash has a spread of leaves $10\frac{1}{2}$ in. wide.

Grown under single light sash

Lettuce grown under our Double Lite Sash outspreads the Single Light heads by $3\frac{1}{2}$ in.

Grown under our "Double Lite" sash

On the same day in February, lettuce was planted in two, two sash frames, side by side, one having Single Light sash, the other Double Lite. The smaller head was grown under the Single Light, the other under Double Lite.

Special Price on Sash

Both Single and "Double Lite"

EVERY year along about this time we generally make a special offer on our Sash That Last in quantities of 25, 50 and 100.

Next week we will send out over 15,000 letters stating this year's offer on both our Single and Double Lite Sash.

The offer holds good for exactly 30 days—which gives you up to March 24th—but not a day longer.

If you fail to get the offer by mail, let us know at once. We will send it next mail.

Don't put off buying our Sash That Last—get in on the offer this year—save some money.

Five Unanswerable Questions

ARE you one of the ones who says you "can't see any difference between the U-Bar Curved Eave house and other Curved Eave houses?" Come with us inside this house, and let us ask you some questions.

1. Tell us now, what other Curved Eave construction is there that the roof bars do not require reinforcing at the curved part?
2. What construction is there that needs nothing but a narrow little strip of $\frac{3}{8}$ -inch iron to keep the bars properly spaced at the bottom of the curve?
3. What construction is there that combines roof bar and rafter in one while still not using any larger bar

than any other curved eave constructions require, built other ways?

4. What construction is there that has the roof bars and gable bars all metal enclosed and protected from the destructive moisture of house?
5. What construction is there that has an entire—not part—but an entire steel frame—a frame galvanized and aluminum painted throughout?

If you know of any such construction, **buy it. Buy it,** because, without a doubt it's every bit as good as the U-Bar. But if it's not built with the U-Bar, it can't be as good as the U-Bar. The Pierson U-Bar Co. are the only U-Bar greenhouse builders.

NEW CARNATIONS

WM. ECCLES

LADY NORTHCLIFFE

BRITISH TRIUMPH

WM. ECCLES. The First Prize winner at Detroit last year in the Red or Scarlet class, and the Silver Medal winner of the New York Horticultural Society for the best undisseminated seedling.

The scarlet everyone was waiting for. Has a strong rigid stem, a perfectly formed 3½-inch flower, non-bursting calyx, highly perfumed, a grand keeper and as free as any scarlet to date.

LADY NORTHCLIFFE (Engelmann). A beautiful salmon pink in color, much resembling "Pink Delight." Has a well built up flower, and just enough in it not to burst the calyx. While the flower is not the largest (about 3 inches), it is fully as free as "May Day," and will surely make a grand bread and butter sort.

BRITISH TRIUMPH (Engelmann). One of the finest things ever raised in England. The color is a striking shade of Crimson. The flower is 3½-inch in size and well built up. It has the sweetest perfume of any carnation ever raised and its keeping qualities are the best. Has a fine stem, good constitution, and free.

PRICES: \$12.00 PER 100, \$100.00 PER 1000

He Laughs Best

who laughs last, is often the case with lily bulb buyers, who make price their sole argument in buying. The writer knows one of this type—the genuine razor-back variety—who always wanted something for nothing, and for that reason we could never sell him bulbs. Last fall this man bought some Multiflorum at a low price, from a two-cylindere salesman, who was silly enough to guarantee them 85% true. Well, this florist was tickled to death with his bargain—felt just like the fellow who was wrecked on a desert island with the girl who had refused him the night before. That was last fall. Now, after the plants are grown, this particular buyer feels about the size of the nipple-end of a lemon. Swears he won't pay for the bulbs—though he will likely be obliged to. Now, even if he don't pay for the bulbs, where will he get even on his time, labor, expense and loss of business profits? It has been a good dose of business-medicine for him—the kind that cures; and he knows it. He admits he was wrong—thank goodness he's man enough to admit it. Now, he has bought Horseshoe Brand Giganteum for fall, 1913. No strings on the order, no promises, and at standard prices. Our business is large lily bulbs—we have spent years to get where we are today in the business, and we endeavor to deliver the goods instead of promises. Write for prices and the new Horseshoe Bulbology, out in March.

Not How Cheap
But How Good

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Aquatics

There is a growing demand for aquatic plants every year. Now is a good time to sow seeds of *Nymphaeas*. Use shallow pans filled with a mixture of soil and leaf mold in about equal parts and some sand. For the last half inch, sift the soil fine and press firmly and on this sow the seed and cover with about a quarter of an inch of sand. The pan can be given a good watering and allowed to drain. Place the pans in tubs where they can be submerged about two inches under water. Place the tubs where they can have some bottom heat and in a temperature of from 65 to 70 degrees. When the seedlings have made about two leaves pot into 2½-inch pots and keep on shifting until June. All this time they should be kept submerged in a tank or tub. For a compost use heavy loam three parts, well rotten cow manure one part.

Care of Young Carnations

After the cuttings are well rooted it does not improve them to let them remain in the sand; in fact it is liable to weaken them because there is little nourishment in the sand. Before potting, you should ripen them just a little by giving them more sunlight than they had while rooting. In fact, this should be begun as soon as they start to shove out the roots. Gradually give them a little more sun each day, until by the time they are ready to pot they will be able to stand the full sun on a bright day. Use fresh soil that has been exposed to the weather and, to lighten it, add a little sand and old rotten manure from the hotbed if you have it. Screen it through a ½-inch mesh and see that it is about right in moisture. When taking the cuttings from the sand give them a slight shake to shake the sand from the roots and don't take out more than you can pot in an hour or two. Press the soil firmly and do not fill the pots too full, but be sure there is a little loose soil on top to prevent baking. Water them thoroughly as soon after potting as practicable. Keep shaded until they take root when they should be set where they will get full sunlight all day if possible. The temperature should be about 48 degrees to 50 degrees.

Lemon Verbenas

Old plants of lemon verbenas, rested for a couple of months, should now be started afresh. The newly made growth roots readily. Place them in a moderately warm propagating bed firming well around each cutting. By keeping them watered and moist with shade they will

soon root. When well rooted these can be potted up in 2½-inch pots using any good soil. Keep shaded until they stand the sun, when they should have full exposure.

Cyclamen for Easter

Plants should now be well studded with buds. To give their foliage a superb finish and texture they should be exposed to plenty of light and air. Give manure water, alternating with pure extract of soot, each to be given once a week until the flowers are fully expanded. Keep them in a temperature of about 50 degrees at night with about 70 degrees during sunny days. They should be spaced quite often. Give them a light weekly fumigation as the aphid is a very persistent enemy to these plants. Go over them every day and later on two or three times a day and give those that are the driest a good watering. Syringe daily until buds begin to open, when it should cease.

Lily of the Valley in Cold Storage

After the beginning of March frames cease to be a safe place for lily of the valley. Pips not used up by that time, or only temporarily stored in frames for the winter must go into cold storage proper. The stock to be forced soon will be all right in from 26 to 28 degrees, while that to be held longer keeps best in from 23 to 25 degrees. Of more importance than degree is steadiness, and while the temperature should never be higher than 28 degrees or lower than 23 degrees the mark most easily maintained between these two extreme points should be held to right along with unwavering regularity. A repacking for cold storage is not absolutely necessary in the case of valley wintered over until now in cold frames, but to be on the safe side with that which is to be held back until late in the season, the bundles, if in any way dry, should be dipped up to the crowns in water, and then be stood upright and close together in boxes, and instead of sand or soil, dampened moss should be used in repacking.

Shading Palms and Ferns

It is time now to give all palms and ferns some shading on the glass before they become burnt with the sun. It is well not to make the shading too heavy at first; just enough to break the strong rays of the sun as these plants like plenty of indirect light. Naphtha and white lead makes a good shading; is easily applied and effective. It can be applied with a brush or syringe as desired. Later on as the sun becomes more powerful apply some more as the occasion may require.

Mr. Farrell's next notes will be on the following: Acacias; Callas; Easter Preparations; Orchids; Potting Soils; Ventilation.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Propagation of the Fig

Through an oversight the propagation of the fig has been omitted. The space originally intended to be devoted to it was used for another topic and so we find it occurring after a few remarks on starting a house. The method adopted for propagating the better known varieties is by offsets, which, if not done previously, can be taken off with a little root and put in suitable sized pots at once. Scions for grafting will have been laid by at pruning time. Other recognized methods are from seeds, layers, cuttings and budding. Seeds have been the source of origin of new and improved varieties, many of which have been raised under glass. Brown Turkey seems to date back further than any other variety, but just whether it is the same one mentioned in biblical days is very doubtful, although ever since then the fig must have been in existence and that was long before greenhouses were thought of in America or Europe. Layers and cuttings are made similarly to the vine but the cut should be near a joint. Budding is not practiced to any great extent but is a possible method. Seedlings are often long in showing their true characteristics; grafting on a good stock will shorten this considerably.

Some Pests and Diseases of Melons

After finishing a crop a melon plant can be discarded in perfect health. Some will show signs of wearing out but there are instances where the presence of pests or diseases are very visible. Neglect is often the cause of this, especially if "live stock" is the trouble. One of the worst enemies of a melon is red spider. I wrote on Jan. 6th, 1912, "An excessively dry atmosphere with insufficient syringing can usually account for this" which after all that has been written recently, I still abide by. When the plants are still in the seed pots moisture and the syringe must be kept in close attendance and continued right up to the time of ripening, with the exception of the time the plants are in flower. Green fly is constantly appearing, especially through the spring months. Fumigate on its initial appearance, otherwise all young growths and flowers will be crippled. Thrips is somewhat similar to red spider and often takes more to eradicate. A solution of paris green and sugar can be applied if pressure fails to dislodge them. Mealy bug is the outcome of dirty houses. It is useless to syringe these off expecting them to stay off; a sufficient number are either left or find their way back again to establish another colony. After cleaning walls, benches, etc., dress the floor and underneath the heating pipes with boiling water or insecticide sufficiently strong enough to kill them. Mildew is caused through bad ventilating. Sulphur made into a paste and put on the heating pipes when hot, or blown onto the affected parts in a dry state will kill it. Be cautious when using it on the pipes as only an application of a few feet is required on the hottest pipe. Canker is more prevalent in some places than others. This is the reason for planting on the small mounds; it keeps the stems dry and they are less liable to contract the disease. There is no benefit to be derived from planting them on the mound. It is more liable to be a detriment, as it takes time and

patience to water them through. If at any time these lower roots should suffer from dryness the plant will lose in consequence. The finest thing we have found as a preventive is to remove the two lower whorls of leaves, exposing the stem to sun and air which will keep it hard and free from disease. On the first signs of a stem going wrong expose it to all the sunlight possible, and if this does not dry it up rub in newly slacked lime until it is dry. Stem-rot is similar to canker but may be found half way up the plant. Treat this in the same way, tying the foliage back instead of cutting it away. Other remedies have been exploited for canker and stem rot, but to us there are only two—the sun first, and fresh slacked lime as a last resort.

Disbudding Trellis Trees

Soon after the fruit is set on peach and nectarine trees growing on the trellis the growths will be pushing out. These must be reduced considerably and the right ones retained. It will be advisable to go over them three times before completion; at the same time the final reduction is made a few of the fruits can also be discarded. By leaving the growths on the top side of the wood pruning is simplified and no gaps should be made when taking a piece out of any size. The latter would be V-shaped if growths are left on both sides and be much harder to fill in. This is intended to apply as a general rule; occasionally a growth on the under side if necessary. First remove the "breast-wood" growths, i. e., those on the face of the wood which cannot be trained either way to look good, afterwards the underneath growths and the excessive ones on the top. This is when the shape of the tree is made and also next year's fruiting wood prepared.

The Tapping Stick

Here is where I lay myself open to be pounced upon as an advocate of old-fashioned ideas,—back numbers and so forth. Well go ahead. At the time I agreed to write to HORTICULTURE it was understood only that which is backed up with practical experience should be included, which has always been adhered to, and this is no exception. For potted fruit trees the tapping stick is invaluable through the winter and spring months. Trees require watering with care; extremes either way are not tolerated and it is impossible to always form a correct opinion of the condition of the roots at a glance. Quite often one errs on the wet side. The little extra time used is more than compensated for by the results obtained. Later on they may be done without if no top-dressing of manure is used. Where this method is practised the condition of the soil underneath can only be gauged by the sound of the pot.

Vegetables

Vegetable seeds being sown under glass from now on will consist chiefly of stuff being prepared for early planting in the garden or frames. Locality will determine if it is necessary to put in more to mature under glass. Do not be in too much haste with plants for outside or they will be starved in the pots before the weather is suitable for them to receive their transfer.

Out-door Fruit and Vegetables

Brussels Sprouts

For exhibition as well as for ordinary use these should be sown now. The reason of most failures with this fine vegetable is because of too late sowing; it requires a long season; needless to say it must be sown in a greenhouse or hotbed. Brussels sprouts has not acquired that degree of popularity among the American public that its fine qualities as a winter vegetable deserves, possibly because of a lack of knowledge of the best methods of cooking it. Next October or November as they are coming into season we shall give in these notes what we consider the best methods.

Care of Young Seedlings

Pot on the onions, leeks and globe artichokes just as soon as they are rooted through, or if you are growing them in flats and they have been pricked out rather close, transplant them into other flats giving more room just as soon as you observe the least cessation of growth. The temperature for these will still be about 55 degrees at night with 60 or 65 degrees in the day. Egg-plants, tomatoes and peppers will stand five degrees higher and the cabbage, cauliflower, lettuce and celery will be better for a night temperature of 50 degrees and plenty of air during the day. Green-fly is apt to attack most of the foregoing plants and should be carefully guarded against by spraying with some nicotine solution or by fumigation. Some parsley sown now and brought along slowly will be found very useful, as the out-door-sown stock is always late before being ready for use. Assuming that the hot-bed material has been properly prepared as recommended in these notes of two weeks ago it will be ready for use and no time should be lost in getting it made up. Be sure to tramp it thoroughly and see that it is in the right state of moisture—neither very wet nor very dry. Put on about six to nine inches of light soil and cover the whole with frame and sash, leaving it a few days to warm up before sowing anything.

Spraying the Orchard

After the pruning is done it will be very necessary to take advantage of the warm still days to spray either the orchard or any fruit trees planted in the garden or elsewhere. We take spraying for granted now. The day for questioning its manifold advantages belongs to the past and we must think of spraying as we think of digging or plowing the garden. The outfit is the first consideration and this is something which the grower will have to accommodate to his varying conditions. For very few trees the knapsack or ordinary hand sprayer may fill the bill; next comes the barrel with force pump attached which will do for any ordinary place. And last the various engine-operated, high pressure outfits which will satisfy the largest requirements. Now arises the question of what to use as material for spraying. We have used a soluble oil spray for years against both San Jose and oyster shell scale and have always found it satisfactory. However, I believe the weight of authority is in favor of the lime-sulphur spray which is made as follows, 16 pounds of unslaked lime, 16 pounds of flowers of sulphur and 50 gallons of water. The method of making this mixture I copy from Waugh's "American Apple Orchard" and is as follows: "An iron kettle holding fifty gallons is necessary, then begin slaking the lime in the kettle, using hot water. In fact the fire under the kettle should be started at this time. As the lime slakes add water slowly. When the slaking is well under way the sulphur should be added. Then the heat generated by the slaking lime will help to melt it. At

this stage the kettle should only contain ten to fifteen gallons of water. Vigorous and constant stirring of the mixture is necessary during this period, which will occupy about fifteen minutes. When the lime is thoroughly slaked and the sulphur dissolved the rest of the water (preferably hot) may be added. The whole is then brought to the boiling point and vigorously boiled for forty minutes to an hour."

After straining it is ready for use and the hotter it is used the better. A spraying material that the writer has used and thinks very highly of is the Caustic Alkali Solution which is made up as follows: One pound of caustic soda, and three quarters of a pound of crude carbonate of potash dissolved in about a gallon of water after which add enough water to make ten gallons; also add about ten ounces of dissolved soap. Stir thoroughly and it is ready for use. Of course to make larger quantities ingredients are proportionately increased. It is well to remember that this material is caustic; use rubber gloves in handling and also be sure to spray on a still day so as to avoid getting it blown on the face. I might add that I have used this wash for mealy bug on grape vines and cleaned the bug right out in one season, putting the wash on with a brush and being careful not to rub it in too hard on the buds. The eggs of red spider are killed by this same caustic alkali solution.

Edwin Jenkins

Lenox, Mass.

The Bleeding of Grape Vines

Your correspondent, Mr. Jenkins, is a gifted writer, and we look forward to his articles every week. They are instructive, although we may not always agree with him, because they set us thinking and reasoning. In his last effusion on the bleeding of grape vines he is entirely too radical in his views. It seems singular that in one breath he smashes and condemns all that has been written on this subject, cries over the wasted styptic and printer's ink, and then in the next breath as a balm to his conscience deplores the man who prefers actual experience to book learning.

Those conversant with the physiology of plants will entirely agree with him in his description of the movement of the sap in the plant, but his axiom is entirely too dangerous and broad to go without qualification.

If a vine be in good health, thoroughly ripened, pruned at the proper time, all the so-called bleeding that will occur will not be harmful, but should a vine be pruned too late and the loss of water be excessive than it will be injurious. An instance of this has come under my own observation. A late graper was pruned too late, the pruned shoots dripped copiously, the buds started and developed about two inches and then dried up, showing that they had used up all the stored-up material, and the water which should have passed into them was running in the line of least resistance; consequently the young shoots were starved.

I claim Mr. Jenkins' axiom for the week as absurd and misleading, especially to younger men who are seeking knowledge through such mediums as yours.

The axiom should be: *Excessive bleeding of grape vines is injurious and should be avoided.*

A reasonable proposition

The demand that practical landscape gardeners be given a place on all park boards and shade tree commissions, as voiced by the New Jersey Floricultural Society looks to us like a reasonable and very meritorious proposition. A thoroughly capable gardener would fill a place of great usefulness on such a body and in a manner such as no other individual, however clever, could fill it. Clubs and societies everywhere, should all get busy and make themselves heard in this matter.

"Pool" advertising

From the number of examples of Valentine's Day newspaper advertising which have been sent to us we get some conception of the rapidity with which the pool advertising idea is taking root among the retail flower dealers. In some of these the addresses of the firms represented are given—in others they are omitted. We have heard some objection to this sort of advertising by those who have been asked to contribute, on the

ground that whatever benefit accrues will be shared in to greater or less extent by those who contribute nothing and that they do not relish helping to carry a burden for other people. Fortunately everybody does not take so selfish a view. As the sun shines equally bright for the evil and the good, so also will it be ever impossible to prevent the unworthy from sharing in the results of any human progressive endeavor. All that can be done to distribute the cost among the actual beneficiaries in the present instance should be done but the impossibility of entirely eliminating the parasite should not be allowed to imperil a cause so worthy.

Working out a plan

Among the men who have gone heart and soul into this publicity campaign for the creation of a larger public demand for the products of the florist, Wallace R. Pierson is one of the most earnest. Mr. Pierson certainly is a "live wire" and, as representing the publicity committee of the New York Florists' Club has gone to work at the problem in a most practical and thorough manner. He has plans already outlined for action through the agency of a central association in which the leading daily newspapers in all parts of the country are substantially interested and if the florists' clubs and other trade organizations will only fall in line and help carry forward Mr. Pierson's well-matured scheme we believe a country-wide and decidedly effective publicity campaign can soon be inaugurated at a minimum cost and the very moderate expense will be well distributed and levied with reasonable fairness upon those who are to be directly helped. It is not unreasonable to expect that through the operation of some such plan the annual plant and flower sales in the co-operating communities can soon be doubled—perhaps trebled.

Commission house legislation

We have carefully read the bill now before the New York Legislature to regulate and control the sale of farm produce on commission. As to the general conditions attending the production, transportation, sale and accounting for farm produce and the necessity for the passage of this bill we are not sufficiently well acquainted to make comment other than that the frantic desire which some periodicals and some people manifest to protect the poor farmer from all kinds of gold-brick schemes and alleged robbers does not strike us as at all complimentary to the intelligence of the American farmer. From what we have seen of him that gentleman is "over seven" and is in no pressing need of a guardian to take hold of his hand when he crosses the street or a mammy to put him to bed. But in so far as this protective legislation may be applied to the flower commission business its provisions seem all out of proportion to the situation. The insinuation that the men who make their livelihood by selling flowers on commission are any less upright and honorable than those employed in any other field is intolerable. As to the mediums or methods which a man may choose to make use of to market his goods after he has produced them he has his choice and will presumably select that which, in his judgment will bring him the greatest financial advantage. The cut flower commission man has been a great factor in the development of the flower business and the future is open to him as to any other business man if he progresses with the times and keeps up with the growth and demands of the industry for which he acts as middle man. If he falls short of this the final outcome is self-evident. But there is no call for the placing on his shoulders of such an oppressive load as this legislation implies. It was not primarily intended for him and he should, in all justice, be exempted from its provisions.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Side Ventilators

With the days so nice and warm as they have been recently some growers were no doubt tempted to touch the side ventilators and by so doing help keep the temperature down where it ought to be. We would advise all to be a little careful in this respect. We seldom use these side ventilators, and then only in the summer time when there is but little danger of doing any harm. No doubt many do use these ventilators right along and with good results but we have always preferred to leave them absolutely alone.

Repotting

The early-propagated cuttings will no doubt be ready to be repotted by this time and a line or two on the subject may meet with approval by the majority. Use only finely screened soil well enriched with well decayed cow manure, and a little bonemeal. Be careful to do the work well and not leave any places in the new pots unfilled with earth. This will deprive the plants of just so much root space and where the plants have to make a certain amount of growth in the smaller pots this means plants of uneven growth, which means more work, more care, and the results will not be as good as if every little part was done properly.

Crocking Pots

Do not be afraid to use plenty of crock in the bottom of the pots, especially if your soil does not drain as good as it should. Where good old compost is used for soil little trouble will be experienced in this respect. As we have often advocated, charcoal makes ideal material, but as it is rather expensive, it must be used so as to give the very best of results. One grower near a railroad "buys" a large number of old ties and makes some of the finest charcoal obtainable. With a supply like that around it is not very difficult to use as much of it as is necessary.

Charcoal in the Soil

Where the soil is exceedingly heavy it is a good plan to mix a little charcoal right into the soil. This of

course should be very fine and no lumps should be allowed to mix in. Try to have all the grains about the size of rice. These will mix in very nicely and be of the greatest advantage to the soil and the plants themselves. Do not overdo this, however, as too much charcoal in the soil is none too good for the plants.

Syringing the Young Plants

Do not neglect to syringe the young plants, or you will have a chance to regret it. Make it a point to syringe these regularly, same as you would the old plants in the greenhouses. In syringing this young stock be careful, however, to use less pressure, so as not to disturb the plants any. If the old leaves of the cuttings were not set all one way then this will be more troublesome as the water should never go against the lay of these leaves. In setting the potted cuttings be sure to place all these leaves one way. It matters but little which. As with the old plants syringe so as to let most of the water fall into the walks, and not back on the plants. This you will find is very important, and should always be heeded when syringing. Another very important thing is to have the plants wet enough when syringing. Should they be dry, the foliage is likely to be scalded, and it will take considerable time for the plants to recover from this.

More Wood for Propagating

Instead of robbing the plants that are required to bloom, it is well to select the house into which the young plants are to go and then cut nearly all the wood out of that house. Where only a house or two of roses are grown this can be done with a bench or two, if the plants are to be housed in the same house. In selecting the bench to put these on pick out the best in the house, never minding the roses that have to be taken out. It will pay in the long run and that is what counts. Then when the old plants are syringed care must be taken not to throw any of the water from the plants on to the young plants, as this is bound to have spider in it.

AN ALPINE GARDEN.

One of the most attractive spots to be found anywhere in spring time is the Alpine garden and fern rockeries at the Goodwin estate on Asylum avenue, Hartford, Conn., laid out and planted by that accomplished gardener, J. F. Huss. The collection of Alpine gems is one of the best if not the best in this country and the display of English primroses is superb in flowering time. Our cover illustration shows one of the rock-bordered walks. We shall give some more details of this charming spot in future issues.

E. G. Hill of Richmond, Ind., has bought out the interest of his partner, Myer Heller of Newcastle, in the Hill-Heller Company. It is understood that the firm name will remain unchanged until April 1.

TO COMPLETE FLOWER SHOW GUARANTEE FUND.

The Guarantee Fund of the International Flower Show, to be held April 5 to 12, amounts to some \$8500. Our contract with the International Exposition Co. requires that we have a guarantee fund of \$10,000. By present indications we will not have to use any of it, but a contract is a contract and I would appreciate it very much if 15 active members of the S. A. F. & O. H., who have not yet contributed, will each guarantee \$100, or 30 florists will guarantee \$50 each.

I would very much like to get this matter settled before March 15 and take this method of doing so publicly to obviate the necessity of writing so many personal letters.

CHAS. H. TOTTY,
Chairman, I. F. S.

Madison, N. J.

WARNING!

Many subscribers are in the habit of sending currency through the mails in payment of their subscription. These remittances, as a rule, have reached us safely until recently when we have had several complaints of enclosures that have apparently gone astray. We would strongly advise checks or postal orders when payments are made by mail. Don't take chances.

Advertising in HORTICULTURE is a good investment. We have used all the so-called trade mediums and HORTICULTURE has given us good returns for our advertising. We sold all our canes through our advertisement in HORTICULTURE and although HORTICULTURE has only had a minor share of our adv. support; it has made good.

WM. ELLIOTT & SONS.

CLUBS AND SOCIETIES

LANCASTER COUNTY FLORISTS' CLUB.

The bi-monthly visiting tour was made February 20th to the florists of Lancaster, Pa.

Starting with The Wheatland Co., where carnations are grown for quality and price, and both obtained under the efficient culture of E. F. Law, secretary and treasurer of the company, we then went to his neighbor, T. F. Friese, who grows well a general line of plants for retailing purposes. The next stopping place was at the Keystone Nurseries, or better known as B. F. Barr's, who is also an exclusive retail man, growing roses, carnations and a general line of plants. From Barr's to A. M. Herr's exclusively wholesale place was the next and here the party found one house of carnations as near a failure as it is possible to get, and the finest house of coleus they ever saw and perhaps more geraniums than they ever saw in one establishment. From there to Rudolph Nagle's place was a short walk and here again was found geranium in quality and a big lot of chrysanthemum stock plants and cuttings. Mr. Nagle keeps his place immaculately clean. These places are all within easy walking distance of each other.

From Nagle's we went to Secretary Lemon Landis' at the East End, who grows roses, carnations and smilax in a neatly arranged set of houses. From there to Henry Rohrer's, and here the carnation men were at home in the best houses of carnations in or around the city. His sweet peas and lettuce were also near perfection, but the most attractive thing on the place was his new red carnation and its ideal habit and high-class blooms. Some of the out-of-town growers are quietly picking up this variety by the thousand and it is likely to make a sensation next winter outside of the city. From there we went to Goldbach's where the best thing was several houses of callas, and lastly to Seibold's, a recent addition to the geranium growers of Lancaster. He has a nice compact range of glass and grows geraniums for the wholesale trade, his strong specialty being Jeunesse Poitevine, an improvement on the old Poitevine in color and habit. Mrs. Siebold served a potting shed lunch that was more than appreciated and was accepted with a vote of thanks and many expressions of good will. At Frank Bachler's, a retailer who does an immense plant trade, the houses were inspected by electric light. From Bachler's to the meeting and from the meeting to the Wheatland bowling alleys finished up a very interesting and profitable day.

ALBERT M. HERR.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club held a very interesting meeting on Thursday afternoon, February 13th. The meeting was known as Publicity Meeting and brought out the members in full force. The report of the publicity committee was laid over until the end of the meeting for discussion. It was decided to hold our annual Carnation Show at

Smith's Wholesale House for the March meeting. The April meeting will be held at the Missouri Botanical Garden. John Steidel showed seedling carnations which the committee say are very promising. The publicity report took an hour of time and some interesting points were brought out. R. J. Windler, chairman of the committee, started it off. The talk was very interesting. S. S. Skidelsky of Philadelphia was present and also helped publicity along with a good talk. The question box discussion brought the meeting to a close.

COOK COUNTY FLORISTS' ASSOCIATION.

At the Cook County Florists' Association, Chicago meeting, February 20th, 50 members and several guests from out of the city were present. The election of officers resulted as follows: President, A. C. Kohlbrandt; vice-president, Allie Zech; secretary, A. T. Pyfer; treasurer, John Zech; Sergeant-at-arms, Michael Fink. Trustees, Walter Scott, E. C. Amling, A. Henderson, W. J. Keimel. The following were elected to membership: Otto Strobach, 736 Buckingham Place; E. W. Siebrecht, 4641 No. Lincoln street; John Swanson, 736 Buckingham Place; Fred J. Rose, 1322 Nelson street. The programs of the Illinois State Florists' Association to be held at Peoria, March 4 and 5, were distributed and a letter from Secretary Ammann inviting the club to attend the eighth annual meeting was read. A letter from Richard Vincent, Jr., acknowledging courtesies from the club, was listened to with pleasure. It was voted to make the New York Central R. R. the official route to the National Flower Show. The Chicago, Milwaukee & St. Paul R. R. was chosen as the official route to the S. A. F. at Minneapolis in August. The treasurer's report showed \$359.59 on hand.

The next regular meeting will be on March 27th, instead of the 20th, on account of Easter.

Messrs. Praefke of Milwaukee, Wis., King of Butte, Mont., and Skidelsky of Philadelphia were club visitors.

ILLINOIS STATE FLORISTS' ASSOCIATION.

The next annual convention of the Illinois State Florists' Association will be held at the Jefferson Hotel, Peoria, Ill., March 4, 5. The program includes an address of welcome by Mayor E. N. Woodruff of Peoria; response, by Vice-President C. W. Johnston, Morgan Park; President's address, Chas. Lovelidge, Peoria; report of secretary, J. F. Ammann, Edwardsville; report of treasurer, by F. L. Washburn, Bloomington; report of advisory committee of the Illinois Florists' Experiment Station, W. N. Rudd, Morgan Park; reports of work at the experiment station, by H. B. Dorner, F. W. Muncie and G. L. Peltier, Urbana; reports of auditing committee and judges; address on Landscape Gardening, Permanent planting of shrubs, etc., W. N. Rudd.

The annual banquet will take place at the Jefferson Hotel, Tuesday evening, March 4.

CONNECTICUT HORTICULTURAL SOCIETY.

February 14th was "Carnation Night," and evoked a superb display of blooms. The members' usual exhibition was augmented by fine collections from A. N. Pierson, of Cromwell; George W. Fraser, assistant horticulturalist of Storrs Agricultural College; Scott Brothers, of Elmsford, N. Y., and Cottage Gardens Company. Awards were as follows: Cottage Gardens Company, for Matchless, first-class certificate; Whiting Greenhouses (Carl Peterson, manager), first-class certificate; Scott Brothers, for British Triumph, William Eccles and Lady Northcliffe (82, 85 and 79 points, respectively), first-class and cultural certificates; A. N. Pierson, for Benora, etc., first-class certificate; Alfred Cebelius, certificate of merit; George W. Fraser, for seedlings, certificate of merit; J. Alfred Weber, cinerarias, certificate of merit.

James T. Scott, of Scott Brothers, was present and gave much pleasure by his many advices regarding the merits and the demerits of the leading varieties of market carnations. Mr. Fraser also addressed the society, as did R. T. Beers, of Cromwell, representing Mr. Pierson. Many valuable facts were elicited by the impromptu addresses, and by the discussions that ensued, chiefly concerning modern commercial carnation culture.

Our society is temporarily deploring the withholding of the annual state appropriation, through a new and apparently technical interpretation of the statute providing the fund. Several new bills have consequently been presented to the present Legislature, to cure the defect in the phraseology of the present statute. We hope for the enactment of the best one of these bills, retroactive in character, and hence covering our share of the state fund for last season.

GEORGE W. SMITH, Sec.

Melrose, Conn.

AMERICAN ROSE SOCIETY.

A letter received from Coubert, France, inquires concerning the prize for the new rose, as offered by Mrs. Frances Roche, the improvement upon the Marechal Niel.

There has been discussion regarding the prize offered by Moore, Hentz & Nash of a \$50 cup for six roses. Mr. Moore says some small grower may have just a few flowers, as fine as grown in the largest establishments, and it is just here that he has his chance against the big man. A small bunch spreads the offer far more widely and that is what we want to do, if it gets more exhibitors and gets a medley of varieties and sets people talking about such a valuable prize for "only six roses." No stem longer than 20 inches, not over two roses of any one variety, the roses of each variety to be judged on their own merits and not by comparison with the other varieties.

Illinois growers will be heard from at the show.

BENJAMIN HAMMOND.

CLUB AND SOCIETY NOTES.

The annual banquet of the Hampshire-Hampden Florists' & Gardeners' Club will be held on March 4th at Northampton, Mass.

A. H. Secker will read a paper on "The Growing of Indoor and Outdoor Sweet Peas" at the March meeting of the Rochester Florists' Association.

F. H. Weber will read a paper at this month's meeting of the Retail Florists' Association of St. Louis on "The Daily Routine Work in a Retail Florist Store."

The St. Louis Florist Club will hold its regular monthly meeting on March 13th. The annual carnation exhibition will be at Smith's wholesale store at the same time.

The Gardeners' & Florists' Club of Toronto, Ont., held its annual Ladies' Night on Tuesday evening, February 18th, and the occasion was enjoyed by a large number of the members and their friends.

At the next meeting of the Kentucky Society of Florists, to be held at the home of George Schultz, Jr., Kenilworth, Joseph Able, manager of C. B. Thompson's office force, will give a talk on "Bookkeeping."

On February 9th, the Syracuse (N. Y.) Florists' and Gardeners' Club was organized. Officers were elected as follows: President, M. T. Keenan; vice-president, W. E. Day; secretary, T. J. Godvine; treasurer, D. J. Murphy.

It has been rumored around that the members of the St. Louis Florist Club will extend an invitation to the American Carnation Society to hold its 1914 meeting in St. Louis. The Business Men's League is also behind this invitation.

A meeting of the Rochester Florists' Association was held recently and the following have been elected officers for the year 1913: President, John Dunbar; vice-president, George Arnold; secretary, H. B. Stringer; treasurer, W. L. Keller; trustees, W. H. Dildine, William Perle and A. H. Salter.

Fine displays of carnations were made before the Milwaukee (Wis.) Florists' Club at their meeting on February 6th. The Herald, shown by the Chicago Carnation Company was the leader. C. C. Pollworth Company exhibited some promising white seedlings. Nic Zweifel won first prize on three carnation classes.

The remaining Saturday lectures and dates in the series at Horticultural Hall, Boston, are as follows:

March 1—The Diseases of the Violet, by Dr. Donald Reddick, Ithaca, N. Y.

March 8—The Gladiolus and its Culture, by B. Hammond Tracy, Wenham, Mass.

March 15—No lecture on this date. Spring Flower Show.

March 22—Fertilizer Problems of the Orchard and Garden, by Dr. H. J. Wheeler, Boston.

March 29—The Making of a Country Estate, by Henry Wild, Greenwich, Conn.

At the February meeting of the Albany (N. Y.) Florist Club, the retiring president, F. A. Danker, was presented with a silver water service. The presentation speech was made by Fred Goldring. Louis H. Schaefer gave an

interesting account of his recent visit to the Buffalo Florists' Club. The question of trade publicity came up for discussion and many interesting points and possibilities were brought out.

The regular monthly meeting of the Tarrytown Horticultural Society was held in the Corporation Building, on Wednesday evening, February 19th. A splendid vase of carnations, "The Herald," staged by the Chicago Carnation Co., was awarded a certificate of merit. The dates for the fall show, which is to be held in the Music Hall, Tarrytown, were fixed for Tuesday, Wednesday and Thursday, 4th, 5th and 6th of November.

The Nassau County Horticultural Society held its monthly meeting at Glen Cove, L. I., on Feb. 12. The committee on V. Cleres' seedling carnation recommended certificate of merit. It was decided to hold the annual euchre and dance at Glen Cove

**We handle more case
goods than any other
importer in America.
You don't have to
take our word—ask
the U. S. customs of-
ficers.**

**H. BAYERSDORFER
& COMPANY**

on April 3rd. In the monthly competition V. Cleres was first with gardenias, J. MacDonald first with sweet peas. J. Robinson was awarded honorable mention for freesias.

The officers of the New England Nurserymen, who held their annual convention in Worcester on February 22nd and 26th, are: President, J. Woodward Manning, No. Wilmington, Mass.; vice-president, C. R. Burr, Manchester, Conn.; secretary, A. E. Robinson, Lexington, Mass.; treasurer, V. A. Vanicek, Newport, R. I. Executive committee: Chas. R. Fish, Worcester, Mass.; Stephen Hoyt, New Caanan, Conn.; Daniel A. Clarke, Fiskville, R. I.

The meeting of the Indiana State Florists' Association, which was held on February 4th at Lafayette, was well attended and after the regular routine of business an invitation to visit the establishment of F. Dorner & Sons Co. was taken advantage of. The carnation seedling benches were particularly interesting to the visitors and all who were in attendance were enthusiastic as to the prospect for some record-breaking varieties from among the beauties which they found there.

The Vert Assembly Bill was opposed as unjust, unworkable and unnecessary at the annual meeting of the National Association of Retail Nurserymen, held on February 13th in the Chamber of Commerce assembly room, Rochester, N. Y. Besides discussing the Vert Bill, the association reelected officers. They are: President, Edward S. Osborne; vice-president, J. H. Pitkin; secretary and treasurer, F. E. Grover. About 40 retail nurserymen attended the meeting, representing for the most part New York and other Eastern states.

Much interest is manifested in the open-air and tent exhibition to be held on the estate of Mrs. John Nicholas Brown by the Newport Garden Association, which is made up of the ladies of the summer colony, and the Newport Horticultural Society combined. The ladies are going to try to have something similar to the shows held in Paris and other European centres, but on a smaller scale. The first day will probably be "Society Day" when the admission will be \$1.00; the second day admission will be 25c. The dates are June 25 and 26.

At the convention of the New York State Fruit Growers' Association, held at Poughkeepsie, February 21st, it was voted to petition Governor Sulzer to appoint a commission of "broad-minded men, who shall promptly examine the whole question of grading, packing and selling products on commission and recommend legislation to the end that justice may be established." The association would have the commission consist of one grower, one commission merchant and a suitable number of others identified with the handling or sale of farm products.

Ten new members were added to the roster of the Rhode Island Horticultural Society at its meeting, February 19th. The session was of short duration, to allow the members to attend a hearing at the city hall in the interests of the establishment of a public market in Providence. Charles W. Thompson of Seekonk, Mass., gave a short address on the advantages of a public market. Richard M. Bowen of Warwick, Ashley M. Parmalee of Norwood and Frank M. Lawton of Auburn were named delegates to attend a meeting of the League of Improvement Societies, to be held in Boston some time next month. S. A. G.

An exceedingly interesting meeting of the Central New York Horticultural Society was held on Feb. 14, at New Hartford, N. Y., when Charles H. Totty addressed the organization on chrysanthemums. The platform was adorned by flowers, including a bouquet of Killarney roses which were presented to Mr. Totty by Peter Crowe. Mr. Totty discussed the methods of fertilizing chrysanthemums and the system of bud selection. There was a general discussion and Mr. Totty answered many questions. A vote of thanks was given to Mr. Totty and the band. The next meeting will take place Feb. 28, when flower show matters will be taken up.

At the annual meeting of the Connecticut Association of Nurserymen, held at the State Agricultural Ex-

periment Station in Hartford, February 12th, the following officers were elected: President, T. E. Boroughs, Deep River; vice-president, Stevens Hoytt, New Canaan; secretary, F. L. Thomas, Manchester; treasurer, W. W. Hunt, Hartford. A banquet followed the meeting at Oneco Hotel. The program included an address on "Fertilizers," by Prof. E. H. Jenkins of the Connecticut Agricultural College; "The Replacement of Nursery Stock and Its Evils," by C. R. Burr of Hartford, and an illustrated lecture on Japanese gardens, by C. F. Coe of New Haven.

The next meeting of the Florists' Club of Philadelphia, Tuesday evening, March 4th, will be one of the most important of the season and will equal if not surpass in interest the two splendid meetings we have already had in January and February. This March meeting will go down in history as "President's Night," and will be addressed by President Thilow, who will give one of his celebrated illustrated lectures enhanced by stereopticon views taken by the lecturer during a recent trip. Maybe there will be some refreshments on the side. Come one; come all. Show your appreciation of one of the best presiding officers we have ever had. This is "his night." Lower hall, instead of the club room.

The Premium List for the June Exhibition at Newport, R. I., has been received, together with a Supplementary List of special prizes offered by parties in the trade. Among the latter are Lord & Burnham Co., J. M. Thorburn & Co., A. N. Pierson, Joseph A. Manda, H. A. Dreer, C. H. Totty, Aphine Mfg. Co., Hitchings & Co., Weeber & Don, Jos. Breck & Sons and Bobbink & Atkins. The exhibition is to be a joint affair of the Newport Garden Association and the Newport Horticultural Society at Harbour Court, the estate of Mrs. John Nicholas Brown. The dates are Wednesday and Thursday, June 25 and 26. Copies of the complete schedule may be obtained from the secretary of the Newport Horticultural Society, D. J. Coughlin.

At the February meeting of the Cleveland (Ohio) Florists' Club, there was a superb display of flowers, carnations being especially prominent. Among the exhibitors were the J. M. Gasser Company, who made a splendid display of sweet peas and rare tulips; Scott Bros., Elmsford, N. Y., carnations Wm. Eccles, British Triumph and Lady Northcliffe; G. S. Ramsburg, Somersworth, N. H., silver-pink snapdragon; S. S. Skidelsky & Co., the sensational new carnation Philadelphia; Cleveland Cut Flower Company, carnations; Charles Bartels, freesias; G. A. Barber, Beloit, Ohio, carnations and sweet peas; J. D. Cockcroft, S. M. Merwarth & Bros., E. G. Hill Company and Dailledouze Bros., carnations.

The regular scheduled meeting of the Florists' Club of Washington has been postponed one week on account of Inauguration Day being next Tuesday. At this meeting will take place the election of officers. There are several nominees for each position and sides are being good-naturedly taken by the friends of each. It will prob-

AVALANCHE

ably take the votes of the entire organization to decide between Messrs. Bauer, Grilbortzer and Oehmler for president unless one of them drops out, which their adherents refuse to allow.

After the routine of business had been disposed of President Lee announced that the evening had been set apart for the entertainment of the ladies. A committee had arranged a musical program which was followed by dancing, at both of which great talent was displayed. Refreshments were served and everyone seemed to be enjoying themselves. There were 75 present. Great credit is due the committee of arrangements and all who took part, for it was a success from start to finish.

E. TRETHERWEY, Cor. Sec.

NEW YORK NOTES.

The store of Mignon, florist, 509 Madison avenue, which opened last October, is displaying a "To Rent" sign.

It is said that both the Wanamaker and Lord & Taylor stores are planning to open roof garden plant and flower departments.

A rearrangement of office, ice chests, etc., in the wholesale flower establishment on W. 28th street has been made, very much improving it.

The old proposition for using Union Square for an open air flower market has been revived and the daily papers generally make favorable comment on the project.

The New York Cut Flower Company has acquired the lease of another entire floor in the Coogan Building and many important changes as to tenants, etc., are now in order.

Wm. Trumpore, buyer for Small's New York store, who has been at the French Hospital in West 34th street for the past three weeks, is now convalescing nicely and has been cheered by visits of a large number of friends.

We are greatly pleased to be able to announce that J. Austin Shaw has passed safely through the critical stage of his sickness and is now rapidly recovering. He will soon be able to go home from the hospital.

Charles Millang's suit against the City of New York for \$25,000 for bodily injuries received one year ago when his automobile was overturned by reason of a defect in the highway, has resulted in a disagreement by the jury.

John Young, secretary of the S. A. F., has been suffering for a week with carbuncles, and on the day on which he was to start for the executive meeting in Minneapolis was ordered to the Roosevelt Hospital by his physician, where he underwent an operation Sunday noon.

The Greek ball, one of the most conspicuous events of the year in New York floral circles, was held at Terrace Gardens on Thursday night, February 20th. There was a tremendous crowd and the 28th street contingent, resplendent in dress suits, did full justice to the occasion.

As stated in advertisement on another page the wholesale florist firm of Siebrecht & Siebrecht has dissolved. The old business will be continued by George C. Siebrecht at 109 W. 28th street, while Walter R. Siebrecht has taken a part of the store at 129 W. 28th street with George Salford.

Harry A. Bunyard and Charles H. Totty left for Minneapolis at noon on Sunday, February 23rd, on the "Black Diamond" express of the Lehigh Valley R. R. Mr. Bunyard took along with him the papers and records of Secretary Young who was unable to attend the S. A. F. executive board meeting on account of sickness.

Visitors: John Dodds, Philadelphia; Wallace R. Pierson, Cromwell, Conn.; Harry Quint, Boston, Mass.

Mobile, Ala.—At a meeting of the Mobile Floral and Horticultural Society held in the rooms of the Chamber of Commerce it was decided to inaugurate the plan of growing plants in windows, the Mobile Electric Company's buildings to be the starting point for this scheme. The members of the society presented stated that they were desirous of showing the people of Mobile the possibilities of window decoration.

Star or Wonder Blackberry

A wonder indeed! in growth, in excellence, in productiveness. Berries large and luscious, bears in clusters like a grape for two months. A single plant has yielded over two bushels in a year. Headquarters for St. Regis Everbearing, the best red Raspberry, and Caco by far the choicest of all hardy Grapes. A full assortment of Strawberries, Raspberries, Blackberries, Grapes, Currants and Gooseberries; Garden Roots, Hardy Perennial Plants, Shrubs and Vines, Evergreen and Shade Trees, Roses, Hedge Plants, etc. Illustrated descriptive catalog replete with cultural instructions, free to everybody. Established 1878; 200 acres; quality unsurpassed; prices low.

During Recess.

The Westchester and Fairfield Horticultural Society.

The first annual supper of the Westchester and Fairfield Horticultural Society was held in Germania Hall, New Rochelle, N. Y., the evening of February 18th. As was expected, keen but friendly rivalry existed among those taking part in the bowling matches in the afternoon. Great excitement prevailed in the games, Trade versus Private" honors being about even at the finish. Competitive games were also arranged among the members, the "Championship" prize going to E. McKenzie. In the clash that took place for county supremacy Westchester came out on top.

About 7.30 P. M. 80 members and invited guests took their seats at the tables in the spacious hall to partake of the good things provided. A fine feature of this supper was the very artistic manner in which the table decorations were carried out, Cattleyas Trianae finely flowered being used extensively, these being kindly lent by the Geo. E. Baldwin Co., of Mamaroneck. Boutonieres of lily of the valley were provided by past pres. J. Stuart, and miniature "Stars and Stripes" for the lapels of the coat were kindly donated by Chas. McTaggart.

Among the invited guests from the ranks of those in the "trade" were H. A. Bunyard, W. E. Marshall, Thomas B. Collie, P. Hamilton Goodsell, W. E. Maynard, Andrew Wilson, A. Rickards, Chas. McTaggart, Andrew Kennedy all of New York; Robert Renison, Lewis F. Milliot of Yonkers, Wm. Scott of Elmsford, Edward Neubrand of Tarrytown, N. Y., M. C. Ebel, Madison, N. J., Thomas Wade, New Rochelle.

Pres. Robt. Williamson after extending a hearty welcome to members and guests introduced as toastmaster John M. Brown of Stamford, who handled the office with his usual ability and tact. Responding to the toastmaster's request, M. C. Ebel spoke for the National Flower Show, R. Renison for the Yonkers Horticultural Society, H. A. Bunyard for the National Sweet Pea Society. Speeches were also made by the following gentlemen: P. H. Goodsell, F. E. Conine, Chas. McTaggart, Joseph H. Sperry, Edward Neubrand, W. E. Maynard, A. Rickards, Geo. E. Baldwin, Pres. Robt. Williamson, Ex-Pres. J. Stuart, Sec. J. B. McArdle, Wm. Scott and W. E. Marshall.

Proceedings were enlivened considerably during the evening with songs by H. Wild, O. A. Hunwick, J. M. Brown and A. Rickards.

Before applying the closure to a most successful and pleasant event cheers were called for Pres. Robt. Williamson, ex-Pres. J. Stuart, Secy. J. B. McArdle, and Toastmaster J. M. Brown, and all joined hands in singing "Auld Lang Syne"

OWEN A. HUNWICK, Cor. Sec.

The nineteenth annual banquet of the Lenox (Mass.) Horticultural Society was held in Curtis Hotel, February 20th, and about 80 members and guests sat down at 8 o'clock at a table which for decorative effects was possibly more beautiful than any Berkshire company has seen this winter. A combination of pink tulips, narcissus and geranium blooms was used in the set-

ting for the tables, and potted flowering plants of many kinds heightened the effect as they were banked in the room. It was literally a dinner served in a conservatory. George H. Cooper of Pittsfield, was toastmaster.

One hundred and ten persons attended the fourth annual banquet of the Pacific Coast Horticultural Society, held at the Fairmont Hotel, San Francisco, February 15th. Following the banquet, there was a dance in the grand ball room of the hotel, especially decorated by the society, at which scores of additional guests besides the banqueters were present. President William Kentwell of the society acted as toastmaster at the banquet,

Boddington's Quality Cannas

Are true to name, have two to three good eyes, are well cured, sound and dormant, and give absolute satisfaction. Our sales last year were nearly 700,000, and not an overgrown kick. The Canna crop this year, however, is very short, and we advise placing orders early to secure stock. Delivery can be made at purchaser's option. Remember, you may deduct 5% if cash accompanies the order.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Seed Legislation.

Editor HORTICULTURE:

Dear Sir:—In one of your recent issues, Mr. Watson refers to the New York State seed law which he states requires that every packet of seeds must state the percentage of purity and germination.

I think there must be some mistake about this, for the Act of 1912 affects only agricultural seeds like the grasses, clovers, vetches, and rape, which are hardly put up in small packet form as suggested by the writer. The law only requires a label to be attached to the package containing said seeds when there is an excess of three per centum by count of foul or foreign seeds.

Your readers may be interested to hear of the Gronna seed bill introduced in the U. S. Senate recently (No. 8382), which is to regulate the interstate commerce in all seeds. The absurdity of the bill is marked by such requirements as that no seed under 90 per cent germination shall be sold or transported, and some of the finer grasses, as is well known, have a very low germination, 60 per cent being high for Kentucky Blue Grass. It is hardly to be expected that this bill will be enacted in the few days remaining of this Congress.

Yours truly,

CURTIS NYE SMITH.

Notes.

Jacksonville, Fla.—G. H. Evans is manager of the Florida Seed & Floral Co., a new establishment.

Fargo, N. D.—Prof. G. W. Randlett has been elected president of the North Dakota Improved Seed Association.

Des Moines, Ia.—Frank Howell, formerly with Iowa Seed Co., is preparing to start in the seed business on Gray street.

It is reported that, owing to recent crop failures in Michigan, Rogers Brothers, pea and bean growers of Alpena, Mich., have purchased 800 acres of land in Idaho and will remove there.

Chicago reports that spring bulbs, cannas, gladioli, caladums, tuberoses, etc., are all in earlier than usual this year, with a tendency to short supply of tuberoses. As usual, Augusta gladiolus is in great demand. The fact that European seeds came late is making the season different this year. Standard seeds as salvia, etc., are short in supply owing to unfavorable weather. American sweet peas are also comparatively short. Prices on onion sets advanced sharply the past week, especially on white, the warm winter having caused a larger percentage of loss than usual. Grass seed is so low that dealers can put up an extra fine mixture for a moderate price.

The above members are exchanging approximately \$300,000 worth of business annually. Are you receiving your part?
Is it not good business to be one of the firms who are exchanging approximately \$300,000 worth of business annually?
The cost of membership is small when the large amount of business exchanged, approximate \$300,000 annually, is considered.

NEWS NOTES.

Fall River, Mass.—Edward J. Reddy,
75 Laurel St., is reported as having
sold his business.

Washington, D. C.—Gude Bros. will
do the decorative work at the stand
in front of the Capitol where Mr.
Wilson will take his oath of office.
This stand which will seat over 10,000
people will necessitate the use of 500
yards of laurel roping, 300 wreaths, to
say nothing of the cut flowers. Ameri-
can Beauty roses will be used in large
vases at the improvised desk before
which Mr. Wilson will stand.

The decorating of the reproduction
of Monticello, the home of President
Jefferson in front of the White House,
from which the parade will be re-
viewed by Mr. Wilson, will be done
by J. H. Small & Sons. The spruce
trees forming the Court of Honor
were supplied by C. H. Merryman.

The store at 14th and I streets, N.
W., formerly occupied by George C.
Shafter, is being redecorated and re-
wired for occupancy by Robert Bowd-
ler. L. L. Bowdler, who now has
charge of one of the two Center Mar-
ket stands, will be the uptown "boss."

CHICAGO NOTES.

Something New for St. Patrick's Day.

The "something new" that will catch the buyers' attention is found this year in the sturdy little shamrock, growing in an aluminum thimble about one inch in diameter at the largest part and having a tiny opening for drainage. Ten thousand of these plants in their shining receptacles are developing at Frank Oechslein's and will be sold at one of the large department stores in Chicago, the order having been placed months ago. It seems more than possible that with right handling, St. Patrick's Day may soon become a special day for the retail florist. Some of the leaders here are recognizing the possibilities of the day and preparing for it. Five years ago only an occasional shamrock plant was seen in the windows, and no one took the matter seriously at first. But the department stores led the way with their special sales and last year one store sold 25,000 shamrock plants on March 17th, and immediately placed an order for more than double that amount for this year. It is predicted that the day will very soon mean a special demand for ferns, palms and other green plants.

Trade Notes.

Edgar Winterson, Jr., says his bowling team to play at Milwaukee has not developed yet.

Creditors of John Edwin Hauswirth, better known in Chicago as "Eddie," have been notified of a hearing to be held at Fort Wayne, Ind., before the bankruptcy court. Mr. Hauswirth was for many years engaged in the retail flower business on Michigan avenue, giving up his store about three years ago.

Personal.

Guy Reyburn of A. Henderson Co., is recovering from a serious difficulty with his eyes.

Mrs. Louis Winterson is spending a month in Pensacola, Jacksonville and other southern cities.

Mr. and Mrs. Phil Schupp have returned from a week at Louisville, Ky. Mr. Schupp also visited New Orleans, Fort Worth, Dallas and other southern cities.

The members of the executive board of the S. A. F. were calling upon

Bunyard, New York; Chas. H. Totty, Madison, N. J.

PHILADELPHIA NOTES.

No less than seven steamers, including the "Breslau," "Graf Waldersee," "Manitou," and others, have each been discharging cases of goods, by the hundred and two hundred, during the past week or ten days—for the Bayersdorfer Co. We are assured by the president of the company that no other similar firm in America is doing anything approaching this business, and we can well believe it. The books were opened to your correspondent, so it is no fairy tale.

The Florists' Retailers' Club of Philadelphia had a meeting on the 20th inst. in the Florists' Club Room at Horticultural Hall, to consider the question of publicity. After ten or fifteen had spoken the question seemed to simmer down to—put up some money to advertise. Wholesalers, growers, seedsmen, nurserymen and supply men were all asked to come up and subscribe. Looked to be like a good proposition—for the retailers. But why couldn't all this be done in better taste through the Florists' Club? What was their committee of twenty appointed for?

Visitors: C. B. Coe of D. M. Ferry & Co., Detroit, Mich.; Samuel McClements of Randolph & McClements,

Pittsburgh, Pa.; Henry Penn, Boston, Mass.; J. P. Klausner, New York City; Ray Dashbach, Pittsburgh, Pa.

NEWS NOTES.

Albuquerque, N. M.—Judge Raynolds of the District Court has appointed Roy S. Elwood receiver for the Albuquerque Floral Co., West Central avenue, upon petition of Arno Huning. It is understood that the company is not heavily involved.

The Minneapolis florists pooled their money and put a stunning advertisement for St. Valentine's Day flowers in the leading daily paper. It was a drawing representing several cupids bringing boxes and bunches of flowers to a group of overjoyed ladies, old as well as young. The inscription read: "For St. Valentine's Day—With Flowers Your Greetings Will be Best Conveyed." One forlorn-looking cupid stands in the corner with a box of bonbons, unnoticed.

**EVER READY
POT COVER**

The modern way of artistically decorating unsightly clay flower pots. Makes plants sell better as they are artistic and attractive. Inexpensive, durable and instantly applied. Made in four colors and many sizes. Sample will be sent on receipt of 10c.

WHOLESALE CUT FLOWERS

37 RANDOLPH STREET - - - CHICAGO, ILL.

Chicago Flower Growers' Association

Wholesale Growers of Cut Flowers and Plants

176 N. MICHIGAN AVE., BETWEEN RANDOLPH AND LAKE STREETS, CHICAGO

FIRES.

Providence, R. I.—The greenhouses of Stephen Toyer were badly burned on the evening of February 12th.

St. Paul, Minn.—A. G. Lempke suffered a loss of \$500 to his greenhouse plant recently. The boiler exploded, and his spring stock was completely ruined.

Long Branch, N. J.—Fire in one of the greenhouses on the W. Campbell Clark estate at Oakhurst, John Com-

ber, Supt., resulted in a loss of about \$2,000.

St. Louis, Mo.—A. W. May's residence was burned on Monday morning, February 24. Mr. May rescued his family in time, who took refuge in the greenhouse, the house and furniture being a complete loss. Fully insured.

Pawtucket, R. I.—John Wood has been appointed park commissioner for three years by the City Council.

Flower Market Reports

BOSTON This week shows up badly at the wholesale markets, much worse than last week which was none too good either. There is a heavy crop on, it would seem, of everything in the cut flower line and at the same time sales have fallen off locally and out-of-town, so that there is a big accumulation on hand which cannot be sold at any price. This applies to about everything, but particularly so to violets and sweet peas. For double violets there are absolutely no takers and, when it comes to sweet peas, the big special growers of this flower are producing it in such superlative quality that the market is practically ruined for the grower of the ordinary grade. Buyers have had their taste educated up and as there are enough of the fine flowers to supply all they need the balance goes a-begging.

Unseasonable weather **BUFFALO** has brought on the stock of cut flowers and plants too fast and the past 10 days the trade in general has made complaints of dullness. Roses, which a short time previous were on the scarce side, are now had in quantity, all grades, all colors, all prices. The same with carnations and everything along the line. Spring bulbous stock is coming on too fast and has not been active in sales. There is an oversupply of violets and the bargain sign was conspicuously displayed though an all-day rain set in on Saturday but with little or no effect.

A little ripple was **CHICAGO** caused in the market Monday by the orders that came from all over the country for flowers to be sent to the opening of Henry C. Lytton & Sons' clothing store, "The Hub," in their new State street building. Thousands of American Beauties and other roses were used including some very large vases of Killarney Queen. Many designs also helped to use up the shorter flowers. So many poor pips of lily of the valley seem to have been used this season, that that popular flower has hardly been up to normal in demand this winter. Those who have the first quality are getting the best of the trade. Beauties are neither plentiful nor good just now but sell because they are Beauties. Other roses are coming more freely but not enough to cause any drop in prices at this time. Violets are still lagging and sweet peas are reported as not selling as well as last year. Butterfly sweet peas have been in now two weeks but even they do not find enthusiastic buyers. Bulb stock is coming a little slower with prices firmer. Carnations vary frequently in price but good grades are selling well. Lent appears not to have affected the market to any marked degree.

Market condition are **CINCINNATI** not all they might be. The supply of stock of good quality is very large. The gross amount of sales at the end of a week's business reaches a fair average but prices are lower than they should be. Most all the stock of quality finds a market at some price but at times this is a sacrifice price. The rose supply has increased very consid-

GARDENIA SPECIAL

To specialize in any flower, purchases must be made at moderate prices and of good quality also. Cheapness does not always mean cheap flowers, but when offered as a special by a firm who runs specials and has a reputation for honest specials, then the public know they are getting unusual values and eagerly grasp these opportunities.

Our growers are cutting freely of **GARDENIAS**, all very good quality, and will be until the end of the season. We offer these as a **Special in lots of fifty or over**, as they run, some long, some medium stems, all good flowers, at **\$12.50 per 100**.

CARNATION SPECIAL NO. 1. In lots of 500 or over; our selection as to color; the very best quality, at \$3.00 per 100.

CARNATION SPECIAL NO. 2. In lots of 500 or over; our selection as to color; medium quality, at \$2.00 per 100.

ROSE SPECIAL NO. 1. Best long stemmed stock; all specials; our selection as to color; in lots of 200 or over, at \$8.00 per 100.

ROSE SPECIAL NO. 2. Good medium stock; our selection as to color; in lots of 200 or over, at \$3.00 per 100.

CATTLEYS. Special: \$6.00 per doz.; \$40.00 per 100. Extra: \$4.00 per doz.; \$25.00 per 100.

VALLEY. Special: \$4.00 per 100. Extra: \$3.00 per 100

PUSSEY WILLOW. 50c. per bunch; extra heavy, 75c. per bunch.

RIBBONS AND SUPPLIES. Many new patterns in exclusive Ribbons. Write us for prices on these and on Supplies.

GREEN CARNATION DYE FOR MARCH 17th, 50c. per package.

Small shipments can be made by Parcel Post at purchaser's risk.

Smilax.....	10.00 to 15.00	10.00 to 15.00	12.00 to 15.00	15.00 to 20.00
Asparagus Plumosus, Strings (100).. to 50.00	40.00 to 60.00	35.00 to 50.00	35.00 to 50.00
" " & Spreng. (100 Bchs.)..	25.00 to 35.00	25.00 to 35.00	8.00 to 15.00	35.00 to 50.00

erably until now the market on every variety is easy. Many very fine American Beauties are coming into the wholesale houses. The carnation cut has not decreased any as yet and the pink varieties are selling much better than the white ones. The quality of

the bulbous offerings has shown a tremendous increase in the last week or so. Now a very considerable part of the receipts are big, long-stemmed stock of real quality. The supply of Easter lilies and callas is very much

Flower Market Reports

(Continued from page 305)

larger than the market requires. Choice sweet peas sell well. The short ones have hardly no market at all. Single violets find a fair request while doubles are meeting with a small demand.

Another listless week
NEW YORK in the wholesale trade and by no means brisk in the retail stores. The supply of stock in nearly all lines, from candytuft to orchids, is tremendous and far beyond the capacity of the distributing retail trade, as at present developed, to digest it. Bulbous material, especially tulips, is very long-stemmed for the date and nearer to outdoor spring product than we are accustomed to see at this season. Roses are in ample supply with the exception of Beauties which still remain on the short side. Violets, freesia, sweet peas, etc., are bringing very low prices in quantity. Orchids lack spirit and sales lag badly, even at the low prices now prevailing. Some acacia is seen in the store windows. Gardenias are superb as to quality but, like everything else, they move slowly. Of carnations there is an unwieldy surplus, yet those growers producing high-class blooms, properly handled and packed are able to clean up nicely every day. Many inferior carnations are in evidence.

Market conditions here last week were not quite so good as the week previous. Not as brisk all through, although the windup was pretty good. On account of the longer days and brighter sunshine stocks are coming in more freely and that undoubtedly has some-

& Spreu (100 bunches).....	15.00 to 25.00	15.00 to 25.00

thing to do with conditions. In addition, it must not be forgotten that many out-of-town concerns who do a local business and have a bit of glass to grow in had to buy up to last week—now they have enough and to spare. American Beauty is still scarce.

There is plenty of good
ST. LOUIS stock and the big supply has brought about a large cut in prices. Roses are the only flowers that held up in price and these, too, are coming in much better than they have been for some time.

Carnations are very plentiful. Violets and sweet peas have been a glut all the week. In any of the bulb stocks the market has a full supply daily.

In writing to Advertisers kindly mention Horticulture

ILLINOIS STATE GREENHOUSES.

The illustrations here presented show the new greenhouses recently erected by the Foley Manufacturing Company at the Illinois State Experimental Station at Urbana. Photograph designated as "A" shows the agronomy greenhouse. The main building here is 42' by 120', this being a full iron flat-rafter greenhouse without any interior supports and is a very

A

experimental work being conducted out doors. The wire house will be practically the same as the end section of the greenhouses.

Photograph "C" shows in the distance, first the house which is described as being at the extreme east end of the range. Next to it follows up two more houses connected, forming the vegetable range. The smoke

B

fine piece of work considering the conditions, namely the fact that it had to be built on a brick foundation, which originally supported two old greenhouses.

The photograph marked "B" represents a type of greenhouse especially adapted for the Department of Plant Breeding. This house has large double doors on both ends, it being the inten-

stack in the distance shows the temporary heating plant. The heating for this long range when completed will come from a single plant already installed from a quarter to half mile away from the greenhouses. This photograph "C" was taken during the process of construction, this range being now almost finished. There is a large palmhouse on the foundation

C

tion of the College to lay rails on the ground to operate cars handling tubs or plant boxes with large plants, pushing same in and out of the greenhouse as necessary in their work. To the south of this plant breeding house there is being erected a large wire house for the purpose of keeping away birds which would interfere with the

NEWS NOTES.

Rutherford, N. J.—A new orchid house, recently finished by Julius Roehrs Co., now houses nearly 5000 plants of *Cattleya gigas*. A storage shed covering an area of an acre or

more has been added to the nursery department.

Fairfield, Conn.—The greenhouse of Henry Newhall has been purchased by C. P. Loder and is being moved to another location.

Flower Market Reports

(Continued from page 307)

WASHINGTON

Business continues very satisfactory. There

is plenty of stock in nearly all varieties. The present stock of single violets seems to be nearing an end and locally-grown American Beauty roses are very scarce. From present indications there will be a plentiful supply for the Easter trade. The supply of bulbous stock will be heavy and roses are being so timed as to be in full crop at the appointed time. Already are orders being placed for Easter lilies at \$12.50 per hundred. It is expected that good business will result from the inaugural festivities regardless of the fact that President-elect Wilson is opposed to dances, balls and receptions. Unless his attitude changes somewhat, the social life in the capital will be quiet during the next four years.

PERSONAL.

A. Zirkman, of M. Rice Co., has returned from an extended trip through the south, and is at home enjoying a well-earned rest.

W. H. Collins is now manager of the floral department of Howard & Smith, Los Angeles, Cal. He was formerly with Dieterich & Turner.

Mr. and Mrs. Luther Collamer of Rochester, N. Y., who have spent the winter in San Diego, Calif., are expected home early in March.

Des Moines, Ia.—Miss Perle B. Fulmer has received the government appointment as supervisor of music in Sherman Institute, Riverside, Cal.

Benjamin A. Snyder, salesman for H. M. Robinson & Co., Boston, and Miss C. Sigalman, a popular young lady of Everett, were married on February 25th.

Robert Shoch, traveling representative of M. Rice Co., and Miss Malyon Price Faulkner, were married on Saturday, February 22nd, at the home of the bride's parents, 4929 Warrington avenue, Philadelphia. After an extended wedding tour through the south, they will reside at 4925 Warrington avenue.

Boston visitors: Wm. Angus, Buzzard's Bay, Mass.; W. R. Cobb, of Lord & Burnham Co., New York City; Rudolph L. Roehrs, Rutherford, N. J.; W. A. Vanicek, Newport, R. I.

NEWS NOTES.

The Panama-Pacific Exposition management is to offer as a trophy a cup of the valuation of \$1000, to the originator of the finest new and unnamed rose exhibited at the Panama-Pacific International Exposition in 1915, the rose to receive its name from the committee appointed by the board of directors.

Auburn, R. I.—The J. A. Budlong & Sons Company, rose growers, are cutting ice to take care of their business next summer. The crop is not very desirable, being only six inches thick, but owing to the late season, the harvesting is being rushed to make the best of it.

Obituary.

A. Moltz.

A. Moltz, a familiar figure in the New York wholesale flower district, died suddenly on Thursday, February 20th. "Kaldy," as Moltz was generally known in and around the cut flower markets, had a varied career, sometimes on the crest of fortune and again at the very bottom of the ladder. He was a speculator by instinct and many a time rendered conspicuous service in seasons of glut by his cleverness in plunging and distribut-

A. MOLTZ

ing the surplus stock. His business ventures of late have not always been successful but notwithstanding this he was kindly regarded by the trade generally and will long be remembered as a unique and interesting character.

Mrs. Martha Saunders.

Mrs. Martha Saunders, widow of the late William Saunders, died at her home on 3rd street, Washington, D. C., at the age of 90 years. Her late husband, it will be remembered, was one of the leading horticulturists of this country. While in charge of gardens and grounds in the Agricultural Department he executed many notable pieces of landscape art including Philadelphia's Fairmount Park and the National Park at Gettysburg. He was a noted importer of plants, flowers and fruits and to him is accredited the introduction into the United States of the seedless orange.

Mathew Evert.

Mathew Evert, well-known in Chicago for many years, passed away at his home, 2059 Devon avenue, Chicago, February 19th, at the age of 81 years. He bought a farm half a century ago and this has since become a part of the city. As his family grew up the land was divided, three of the sons being vegetable growers like himself and growing a crop of chrysanthemums in their season. Mr. Evert was able to be about till three weeks ago. He leaves a wife, four sons and five daughters. The funeral was February 21st and interment at St. Henry's Cemetery.

LEMON OIL CO'S STANDARD INSECTICIDE

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

$\frac{1}{2}$ Pint - - 25c; Pint - - 40c; Quart - - 75c
 $\frac{1}{2}$ Gallon, \$1.25; Gallon, \$2.00; 5 Gallon Can, \$9
10 Gallon Can - - \$17.50

Dilute with water 30 to 50 parts

SLUG-SHOT

USED FROM OCEAN TO OCEAN FOR 29 YEARS!

Sold by Seed Dealers of America.

Saves Currants, Potatoes, Cabbage, Melons, Flowers, Trees and Shrubs from insects. Put up in popular packages at popular prices. Write for free pamphlet on Bugs and Blights, etc., to B. HAMMOND, Fishkill-on-Hudson, New York.

Cocoon Fibre Soil

Trees mulched with this article will grow larger fruit, better color, and ripen more uniformly than by any other means. We have proved it.

20th CENTURY PLANT FOOD CO.

27 & 29 OCEAN ST.,

BEVERLY, MASS.

Edwin E. Bourque.

"Eddie" Bourque, for the past 33 years an employee of Charles A. Dards' flower store in New York city, died of pneumonia on Thursday, February 20. Deceased was formerly buyer for Dards, but when his brother succeeded to that position some years ago, he became manager of the store. He was popular among the trade and his sudden death came as a great shock to a wide circle of friends. He leaves a widow and three children.

Jeremiah Carter.

Jeremiah Carter, a well known gardener of Newport, R. I., died on Feb. 13th, after a few days' illness, of pneumonia. He had been in Newport for forty-five years, and for many years was head gardener on the Henry G. Marquard estate and later for the new owner, Rev. Henry Roderick Terry, until his son Benjamin succeeded him. He is survived by two daughters and two sons.

Charles Siebrecht.

Charles Siebrecht, 54 years old, for 30 years a leading florist in Winona, Minn., was found hanging from a raft-

The Recognized Standard Insecticide.

Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water. It does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

er in a barn at the rear of his home on the afternoon of February 14th. He complained of illness at the noon meal and shortly after disappeared. When he failed to respond for supper search was instituted.

Charles H. Barrett.

Charles H. Barrett, who conducted a flower business at 28 Pleasant St., Concord, N. H., died Feb. 6th, after a long illness. He was 54 years of age. His wife and one son, Harry C. Barrett, survive him. There were a number of beautiful floral tributes from the trade.

Adolph G. Fleck.

Adolph G. Fleck, florist and seedsmen of Oakland, Cal., died of pneumonia on February 12th. He was a member of the Oakland Seed & Plant Company.

Arrangements have been made for the celebration of Farmers' Days, March 5, 6 and 7, at Dansville, N. Y. Sixteen speakers have been engaged, and a general discussion will follow each lecture period with a round table, a leading feature at the afternoon sessions.

Wm. McAlpine Believes That With the Right Houses American Beauties Can Be Grown Around Boston

Wm. McAlpine

FOR some time I have been possessed with a determination to successfully grow American Beauty Roses for the Boston market. It always seemed to me a reflection on us eastern growers that we had to send to New York and Philadelphia for Beauties. After studying the conditions very carefully, I became convinced of the fact that climate or soil were not the main factors in failure. I believed the houses were wrong. I was convinced that what the Beauty needed was lots of breathing space, and freedom from draughts; and greater uniformity of temperature than it is possible to maintain in the smaller house. So in 1911 Lord & Burnham built for me one of their Iron Frame, compression truss houses 60 feet wide by 400 feet long. We first tried the house out with Pink and White Killarneys, Richmonds and Wards, which were of the finest quality. This year my brother, George McAlpine, who looks

after the growing, having sort of "got the gait" of big house growing, tried some Beauties in the last big house. The results have been highly satisfactory in every way. It may be a bit early to make any sweeping statements yet, still we firmly believe that Lord & Burnham have gone a long way toward making Beauty growing a success here in the east. I believe their houses to be constructed on lines of most careful greenhouse engineering practice, and a thorough understanding of growing condition requirements. I am confident these houses of ours can withstand any of our strong eastern blows, and that they will last so that my grandchildren will be growing roses in them.

Geo. McAlpine

BY DISBUDDING LILY BULBS

in the fields in Japan about July 1st, when the buds are only half developed, much of the strength of the bulb is preserved. Horseshoe Brand Giganteum fields are all dis-budded at the proper time. This means quite some work, for it not a light job to dis-bud between two and three million lily plants. However, it is done because it makes the bulbs more solid and compact, much stronger, and better able to stand the Cold Storage strain, should it be required. This is likewise one of the reasons why Horseshoe Brand Giganteum have such a good flowering capacity, as compared with some other brands.

NEW CARNATION—"BENORA"

This variegated carnation, sent out by Mr. Peter Fisher last season, is the finest variegated variety, and one of the very best carnations of any color ever sent out.

It has immediately attained a commanding position among the very choicest sorts, and will add to Mr. Fisher's already enviable list of introductions. It is indispensable. It is a very early and free bloomer, matures quickly, making very perfect flowers of the largest size on long stems; does not split the calyx.

Strong rooted cuttings ready for immediate delivery, \$6 per 100; \$50 per 1000

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Acacias

Acacias intended for Easter will want very careful handling. If they are somewhat backward they should be moved into a temperature of from 50 to 54 degrees at night, but where they seem to be coming along all right a temperature of from 40 to 45 will be more to their liking. This class of plants always likes the roots kept in a moist cool state, so see that they never become thoroughly dry at the roots. Turn the plants around once in a while and see that they have plenty of room between. Give plenty of ventilation whenever the thermometer will allow. To hold the color of the flowers they should have some shade when they are fairly well out. Keep the plants picked clean of any faded flowers.

Callas

During the next couple of months we may expect our finest crop of flowers. They should now be generously fed, not only with liquid manure, but good top-dressings of a rich mulch on all those grown in benches. By this time the working roots will have used up the best part of the available food from the soil so an occasional top-dressing worked over the surface lightly will greatly benefit. For these mulches sheep manure and fine bone are ideal. In using sheep manure a good plan is to mix it with equal parts of screened loam before applying. Give plenty of water at the roots from this out and keep up a vigorous syringing every day to keep the plants clean of thrips and red spider. Give air on all favorable occasions and keep a temperature of from 58 to 60 degrees at night.

Easter Preparations

Have a good lot of made-up plants in pans, baskets, etc., to meet the Easter demand. Where you have a show house, the display should be re-arranged every day during the ten days preceding Easter Sunday. Every unsightly flower or plant should be removed; so with all faded flowers. Don't overlook picking the pollen from the lilies. When a plant is sold remove it to a cool shed, tag it, and put another in its place. Where any stock is a little backward a full week of forcing with clear skies overhead with proper attention as to watering and sprinkling will do much in opening buds and finishing up laggard stock in good season. It should be the aim

to have them far enough in advance to give them a course of gradual hardening off, if possible.

Orchids

Most orchids will now be starting into growth and root action, which will necessitate more attention in the way of watering. Each plant should have daily inspection. It is a well known fact that orchids thrive best where the atmosphere is kept in a pure state by proper ventilation. But take care to avoid east winds and chills through the house. For a cool house a night temperature of from 50 to 55 degrees and a day temperature of 65 to 70 degrees with sun will do. For the intermediate house a night temperature of from 58 to 64 degrees and a day temperature of from 70 to 75 degrees with sun. For the warm house a night temperature of from 65 to 70 degrees and a day temperature of from 80 to 85 degrees with sun. On cloudy days it is wise to let the temperature rise from 5 to 8 degrees above the night temperature.

Potting Soils

Keep the sheds well filled up with potting soil placed so that it will have time before being used to reach a warmth very nearly that of the houses. Good soil is the foundation of success. While partly decayed cut-down sod and manure will be fit for nearly all kinds of cut flower bench cultures and for the transplanting of large plants of most species, a somewhat more decomposed compost intermixed just before used with sand and leaf mold should be reserved and either broken up or sifted for the starting of seeds or the boxing or potting of rooted cuttings.

Ventilation

The one thing to be borne in mind is to ventilate on all possible occasions, but so as not to cause cold draughts to blow over the plants. Ventilation serves the double purpose of keeping down the temperature and supplying a circulation of fresh air. The thermometer is the grower's infallible guide and authority. When the proper temperature has been reached ventilation is in line to hold it there and keep the air pure and sweet. So give ventilation whenever possible.

JOHN J. M. FARRELL.

Primula Auricula

PRIMULA AURICULA

Few botanical names sound so beautiful and even-balanced as that of *Primula Auricula*, the handsome native of the southern slopes of the Alps. Before our vision emerge pictures of old box-lined British or German gardens void of color schemes but full of fragrance. We distinctly recall the auriculas among the many of our elders' sweetly-scented favorites—here in rows near the edge of borders; there planted together on little beds. The unobtrusive odor of some blossoms of *Primula Auricula* in a low vase perfumed the atmosphere of the flower-loving ladies' boudoir. Modest and charming then; old-fashioned and dear to our memory now. Reflections in this direction led your correspondent to order some seed of the latest improved large-flowering strain of auriculas offered by seed firms abroad. Sowed during January in shallow earthen seed pans filled with light sandy soil and placed on the shelf near the glass in a house of 60 degrees average temperature the tiny seedlings were ready to be pricked over into wooden flats in March. In June I planted them outdoors in a cold frame where they were cared for until late in October. By that time I had strong stocky plants which were carefully lifted with balls and set close together in shallow boxes to be wintered over in a light, airy and cool cellar. Auriculas can well stand light frost but they should be kept on the dry side while the growth stops. Removed outdoors again in April my auriculas began to bud and flower during the latter part of May. One soon notices the superiority of the improved strain over old varieties of 25 to 30 years ago, but I also realized from the very start their impracticability for use in any modern color-scheme planting. Comparatively easy is it, however, to find a fitting space in the rock-garden. Employed in such a situation my auriculas soon commenced to flower freely. Our illustration, showing one of the different plantings made, gives some idea of the effect gained. With yellow as ground-color the varying combinations of vivid tints of red, brown, purple and deep violet reveal charming floral beauty. Lacking the intensity necessary for distant effects the flowers of *Primula Auricula*, deep, rich and velvety in tone invite intimacy at close range. The present improved strain though apt to revive interest in this old-time favorite garden inmate will in my opinion hardly create sufficient demand to make growing in quantities profitable from the commercial point of view. The flowerers find ready admirers but in my experience orders for

plants were few. Still, wherever a garden is expected to produce variety beyond the conventional, auriculas will prove very desirable acquisitions. I especially commend them to gardeners who have rockeries in their care.

Riverton, N. J. *Richard Rothe*

A Little More About the Bleeding of Grape Vines

"To gild refined gold, to paint the lily,
To throw perfume upon the violet, . . .
Is wasteful and ridiculous excess."

—Shakespeare.

Mr. Waite in disagreeing with me about the bleeding of grape vines, says "*excessive* bleeding of grape vines is injurious and should be avoided." Mr. Waite is right. For is it not axiomatic that anything *excessive* is harmful? Eating and drinking are very good and necessary functions, but carried to excess they are very injurious. Does not the word *excessive* suggest something exorbitant, inordinate, extravagant and immoderate? Is Mr. Waite sure that the shoots which he refers to, dried up because of the vines having bled? Is it not possible that there was some other trouble? Because I have seen the end shoot on a vine dry up exactly as he describes when no bleeding had taken place. In such cases the next bud or shoot below takes the lead. Mr. Waite and most other grape growers has seen a similar result when two shoots have started from one spur; after a little while one takes the lead and the other becomes stunted, if it does not die outright. If ever grapes were to be injured by bleeding, they should have been in the instance cited in my article, for these bled all the winter. Mr. Waite says that these vines which were injured were pruned too late. When is the right time to prune vines? I have just pruned a house of young vines, but they do not bleed, nor should I worry if they did. Will Mr. Waite define *excessive* bleeding? Is it a pint or is it a quart, and how are we to know, and what shall we do to stop it when the last drop of styptic has been used, the potato bin is empty, and that last resort, the hot iron has cooled?

Because, in my salad days, I had worried for a long winter about the grapes bleeding, and about the probable subsequent failure, and about what the Boss would say to me when that failure came, and because that anguish of soul was useless and uncalled for—because of all these things I was moved to write that article, setting forth my honest convictions that the idea of injury following the bleeding of grape vines was a fallacy, in the hope that in the future some poor unfortunate mortal may be spared this unnecessary pain and worry, being fortified by the knowledge that if all his other cultural details are of the best, he might ignore the bleeding which in many cases he is helpless to prevent.

I sincerely hope that no one will interpret my words as advocating carelessness or slipshod methods either in pruning grape vines or any other detail of cultivation; far from it! I believe in care and painstaking thoroughness, first, last, and all the time.

Edwin Jenkins

Little Mass.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Peach Trees Stoning

The early peach and nectarine trees growing in pots will now be forming the stone in the fruit, a process usually referred to as "stoning." When trees are in good health there will be no trouble experienced at this stage. Frequently we see a tree drop a few fruits but these are not needed with an average good set. Lime is a great assistant to the trees while stoning and a little should be mixed into the water daily. Avoid excessive heat for a time; 55 to 58 ought not to be exceeded during the night. After stoning is completed the trees can be forced through the second swelling of the fruit without taking any chances. A fruit can be taken off occasionally to see how far the stone is advanced. Wait until the fruits begin to swell again before making a final thinning.

Pot Vines

After thinning is all through do not spare the feed; cramped in the comparatively small pots the roots will take all that is coming, providing it is given them in a proper manner. When the pot is thoroughly dried out water first with clear water, after which the manure can be applied. A quick eye must be kept on the pots from now on as they will dry out very rapidly—two and three times a day in good weather. Keep a sharp lookout for mildew in any districts that are liable to contract it. Close the house down early enough to give all inside a good sweating. Do not shut it down entirely in fine weather; a crack of air is beneficial until the outside temperature warrants closing down tight. Rub out all sub-lateral growths as they appear; four leaves beyond the bunch is sufficient.

Pests of the Vine

During the growing season of the vine one must be continually on the lookout for pests of various kinds. One or more seem to show up each year and a crop is easily ruined. Locating them soon after their arrival is a great thing. Often a thorough examination will reveal the fact that they have more than a mere footing. Whatever it is, act promptly after discovering their presence. The chief of these undesirables are: Green fly, red spider, thrips, mealy bug, mildew, the vine weevil and rose bugs. A vine is a tender growth to handle so when any of the enemies are met with in quantity the following resting season should be taken full advantage of. Do not be content with one or two washings of the rods, but go over them at regular intervals with a preparation likely to annihilate whatever pest was present.

Green Fly

Green fly will sometimes make its appearance during the early stages of growth. This is easily subdued by fumigating. Take care not to overdo it; rather fumigate lightly on two consecutive nights.

Red Spider and Thrips

Red spider is usually accounted for by lack of moisture in the house. When discovered give several good syringings using a force strong enough to dislodge them. Pot vines are grown very early, necessitating a quantity of fire heat, which makes them very susceptible to spider.

Should it be gaining ground as the berries commence to color and syringing has to cease, the foliage must be sponged by hand, at the same time keeping the house well damped down. It will be found a great advantage to all established vines to give them a thorough syringing with insecticide soon after the crop is cut and when the winter cleaning comes on continue to war against them. Thrips are found under similar conditions. Water is inimical to them also where it is possible to get at them.

Mealy Bug

Mealy bug is one of the hardest pests to exterminate when once established. The vine is no exception,—the loose bark, small crevices, and holes on the rods being ideal places for them to hide in. Insecticides sufficiently strong to kill this intruder without injuring the young growths or berries have yet to be tried out. Winter cleaning is the greatest assist, followed by a careful look-out on the first few bright days after starting the house in the spring. Should there be any left behind they will generally be found moving around then. Here is the advantage of taking off all the loose bark at cleaning time; their hiding places are reduced considerably.

Mildew

Mildew is usually caused by bad ventilation; some districts, however are more liable to it than others. Nothing likes air better than a vine, so whenever possible give them all you can but avoid cold draughts. The most critical time is immediately after the berries are set and thinning is in process. When mildew is once on a berry it will always leave a mark even though it dies in a few hours, which is particularly annoying on white grapes. Wherever there is steam heat on an establishment and mildew has to be fought on the grape vines it will pay to run a single steam pipe through the vineries for fumigating purposes. A little sulphur paste can then be put on once or twice a week as a preventive. Where the steam heat is not possible use a larger quantity on the hot water pipes or blow a little dry sulphur through the house, particularly in the affected parts.

The Vine Weevil

The vine weevil fortunately is not often met with, yet it is in the possibles. It is one of the many bugs that feed on the tender roots in their larval state and when come to maturity devour the tender foliage, the damaging work often being done through the night time. As day light approaches they make a speedy retreat to any seclusion that is offered. In this way they can be caught by laying loose pieces of cloth on the rods. They will be found to possess a hard, round, dark-colored wingless body with six legs.

Rose Bugs

This may be a new one to some readers as it was to me until some short time ago, but a crowd of these hungry insects will soon make a lasting impression on the vine as well as one's memory. It was assumed they were brought into the house with the soil used for top dressing. The plague lasted some three weeks and each day a few more germinated. We looked over the vines twice each day and picked them off,—rather a slow job but there was not sufficient to use any other means.

Amherst Revisited

During one of my annual peregrinations of a few weeks past I revisited this beautiful spot where nature seems to have done her best. Beautiful surroundings undoubtedly have an effect for good upon all men and the students as well as the faculty must be inspired to achieve great things by the sublime beauty of their environment. Readers of *HORTICULTURE* will hardly need to be informed that Amherst is the home of the Massachusetts Agricultural College and Experiment Station as well as that ancient seat of learning—Amherst College. The Agricultural College, familiarly known as the "Aggie," was the object of my visit. To see what was being done and how it was done and to talk with the men who are doing it. My first call was upon Professor G. E. Stone, the Botanist, who was kind enough to give me nearly two hours of his valuable time, wherein I was enabled "to drink deep of the Pierian spring." It is impossible for me to give my readers the whole of the valuable suggestions that Professor Stone threw out during our talk, but will in brief state a few of them.

The rationale of fumigating in the evening is that the stomata are then closed, and as the stomata are the breathing pores of plants the liability of injury is lessened. This suggested to the writer that in fumigating with hydrocyanic gas our practice of having the plants and air as dry as possible is along the same lines, for, given a certain degree of dryness the stomata will close during the day even, and consequently danger of absorption of the poisonous gas is lessened. From fumigating we jumped to sunlight, and Professor Stone gave it as his opinion that the value of eastern or morning light was greater to plants than western or afternoon light, and further that it is desirable to place rosehouses so that they face several degrees east of south, thus getting the morning sun earlier and enabling the grower to syringe his roses earlier, which is very important in winter when the time for drying after syringing is all too short.

Next we took up the prevention of the clogging of drain tiles by roots of trees, and the result of their experiments along these lines have shown that sawdust or excelsior thoroughly impregnated with creosote and caulked in the flanges of Akron pipe or bound tightly around the joints of ordinary land tile will prevent tree roots entering the drains for a number of years. Just how long is of course a matter for further investigation. Professor Stone here took me to his museum and showed me a single root of a pear tree 6 feet long but the hundreds of branch roots aggregated over two miles in length, and this same pear root had stopped a twelve-inch drain tile completely in five years, thus showing the immense growth roots make when they enter a drain, and the importance of devising means to keep them out if possible. The root above referred to was dug up at Belmont, Mass., in 1909. Testing seeds not only for germination but grading them so that every plant would be almost equal in strength and would mature at the

same time seems possible according to Professor Stone. Were this done we should gradually work up a stronger strain of plants of all kinds which are raised from seed, and the matter of getting seeds which would come to maturity at the same time would be very valuable to market gardeners who wish to market their crops in quantity, though this feature would be a detriment to the private gardener or amateur who would rather have a crop of, say radishes or lettuces, come gradually to maturity, thereby giving a longer period of use. Certainly the elimination of a larger percentage of the smaller inferior seeds from all the seed stocks would be a boon to all concerned.

We next took up the subject of burning of the leaves of Muscat of Alexandria and Madresfield Court grape vines. Professor Stone had had no direct experience with this trouble but from what I told him about it he was of the opinion that it was exactly the same as bronzing of maple trees which is a functional trouble which is caused by the inability of the plant to get sufficient water to those spots under conditions of profuse transpiration. Therefore the only remedy is a light shade, as syringing is out of the question when the fruit is ripening. Experiments in treating manures and soils with formaldehyde for the eradication of weed seeds and fungoid diseases were being conducted but were not finished. Another experiment was growing plants under varying degrees of shade and testing their susceptibility to injury by fumigation. Others were the stimulation of plant growth by electricity and by irrigation and studies in the development of the chestnut blight and the white pine disease, and still others too numerous to mention. Professor Stone has a complete collection of spraying nozzles and some very ingenious ones of his own make.

From Professor Stone's laboratory to the greenhouse is but a step and here we found Mr. Whiting in the rose house. Mr. Whiting learned rose growing under the great master at Waban Conservatories, Natick, and the roses do him credit; the carnations, violets, cucumbers and tomatoes all looked well. A certain amount of bedding plants are grown for decorating the college grounds but the main purpose is with these as well as the other plants mentioned to show the student how these plants are grown, propagated and marketed. Incidentally some few experiments are carried on here but not nearly enough. There should be at least one or two men engaged in pure research work at all times, but I believe this is up to the authorities in Boston and not in the power of the college management. The splendid new dairy building, the poultry building, the cattle barns, the bureau of entomology were all visited but to do justice to them would require another page at least. To all the citizens of Massachusetts who are interested in any branch of horticulture or agriculture I would say, visit the college; you can't help but learn something (unless you are determined not to) and by your interest you will help those who are trying to solve your many perplexing problems, and I can assure you that you will meet with unfailing kindness and courtesy at every turn.

Another question for the wise ones: Many of our horticulturists received their early training in Great Britain. Can any of them tell why gardeners there think it harmful to syringe plants in the greenhouse while the sun is shining on the plants?

Edwin Jenkins

Lenox, Mass.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Setting Re-potted Plants on the Benches

Now that a large number of the plants are being re-potted, remember our advice last year as to setting them. Keep all the taller plants to one side of the bench, giving preference to the north side, if the houses run east and west, so that the smaller plants are always to the front nearest the glass, where they have a better chance to get more light and dry out more than they would if set anywhere else. Should all the plants be set on the bench regardless of their size, low plants mixed in among the taller ones, then the smaller plants will be crowded by the taller and will have but little chance to develop into strong healthy stock, so necessary for planting later on. By setting all these small plants to the front of the bench, giving them the most light and air, they will dry out about as fast as their taller neighbors, which take more water because of their larger growth and more abundant foliage.

Pinching Buds on Young Beauty Stock

Beauties have a great habit of forming buds as soon as they start to grow after their first potting. These buds should never be allowed to become of any size, but should be pinched out as soon as they are large enough to be noticeable; this should be done when the little rascals are about the size of a grain of wheat. If removed at this time the plants will hardly feel the loss, and will continue to grow right on. Should these buds be allowed to develop to any size they will greatly prey on the vitality of the plants. Go over your plants every other day, and do all the disbudding. This can also be done when looking over the plants to see to the watering. On plants of larger size in larger pots, these buds should be taken out with one leaf. This will encourage stronger growth, and the plant will likely grow quite a little before another bud appears.

Scraping and Cleaning

At times even in spite of the fact that nice clean pots were used, a green scum forms over the top of the soil of the potted plants. This should be removed as soon as it forms. The best way of doing so is to have little iron scrapers that just fit the different size pots. When scraping pull out all the weeds that may have appeared and then remove the scum with a least bit of soil from the top. Then after dumping out the loose soil and scum, run the iron scraper around the pot so as to loosen a little of the soil, and leave the surface a little rough. This will help to keep the soil from getting green again for a much longer time than if the soil is left perfectly smooth.

Soil for the Final Potting

Right now is the time to think of the soil for the final potting unless it has been prepared last fall. We like to have plenty of well-decayed cow manure in this soil, which like all soil for potting should be screened very fine. A little bone meal and a little soot can be added, and this mixture makes ideal soil for the last potting. If you have any reason to think that the soil is inclined to be the least bit sour, then secure some blue litmus paper from the druggist and test it. Then if you find it necessary, add a little lime to the soil, which will sweeten it sufficiently. Do not, however, add the lime when you mix in the bone and soot. The lime should be added some time prior to using the soil for potting so that it has a chance to act before the bonemeal and soot are added. Should the lime be added at the same time as the soot and bone, the chemical action of the lime will free a large amount of the ammonia that the bone and soot contain; this is none too good for the plants and at times the roots are liable to be burned off, thus destroying the plants.

Greenfly

This pest, with us, is so scarce that we almost forget that there is such a pest as greenfly. However, we are always on the lookout for it, and never give it a chance to appear in anything like a large number. If one is found on a bud while cutting, or anywhere else around the plants a fumigation of gas or some of the various tobacco papers is given at the very earliest possible moment.

Liquid Manure

Now that the spring is almost here and the days are much longer, the plants will naturally begin to grow more freely than they have during the winter months. Also it stands to reason that the soil does not contain the nourishment that it did last fall and that the plants require to produce the new growth. It is well, therefore, to help the plants along as much as possible by applying a good dose of liquid manure every now and then; twice a week is none too often, if the plants are healthy and growing along nicely. Before applying, however, make sure that the plants are not too dry at the roots. This would do considerable damage to the roots if not to the plants themselves. The explanation for this is that the roots take up the feed too quickly, absorbing large quantities of the liquid, which burns the tender tissues of the roots. Water with clear water first, as we have advised again and again through these columns. We have always advised using good cow manure, for making the liquid, and we still stick to this. As far as we know there is no real good substitute for this manure.

"Many men
of many minds"

The discussions on several all-important topics which have been going on in our columns of late have created widespread interest throughout the country, for the participants are all men of extensive practical experience of acknowledged eminence in their profession. It has been well-said by one thoughtful reader of these articles that in questions of cultural work we have the least license of any profession to be positive in our assertions. That which seems to some to be a certainty is very easily refuted by others and so long as this is so there will be room for all to differ and to study and investigate over again at each change of location and environment. Thus it may be reasoned that it is not well for a gardener to stay too long in one place if he wants to be broad-minded and retain a reputation for infallibility, a course of reasoning which in itself also may be successfully attacked as being fallacious.

That free seed
business

Our readers may be interested to know of U. S. Senate Document 1104, being a letter from the Secretary of Agriculture giving the expense of free distribution of seeds from 1909 to 1913, showing a total expense of \$1,110,933 for this form of graft. Public sentiment has never been as strong as it is today in disapproval of the employment by public officials of such perquisites as this seed distribution admits of. The custom, as followed, has nothing to its credit but very much to its disrepute. Let us hope it is now nearing its end. It is worthy of note that several western legislatures have passed resolutions recently asking Congress to stop it. This fact together with the vote of disapproval in the U. S. Senate leads us to feel that this foolish expenditure will soon pass into history never to be resurrected. The cost, as given, enormous as it seems, does not include the expense of transportation of the seeds, which would probably total a quarter million dollars, for no credit is given the Post Office Department for carrying the packages under the Congressman's frank.

An absurd
seed bill

President Page of the American Seed Trade Association has called attention to a somewhat mischievous bill introduced into the Senate by Senator Gronna. Impossible standards are arbitrarily established by this bill. For instance, it forbids inter-state shipment of any field, garden or flower seeds containing over 5 per cent of foreign seed—any variety—3 per cent of weed seeds, and all seeds must show a germination of not less than 90 per cent. It is hardly necessary to point out the impossibility of complying under all circumstances with the provisions of this bill, and this fact will doubtless have an important bearing on the efforts that will be made to prevent its passage. Just why so many legislators,—both state and national,—are showing such remarkable zeal in the matter of restrictive legislation affecting the seed business is hard to explain. Doubtless the primary motive is to please the farmer, but under the terms of the bill referred to the farmer would be unable to sell

any seed grown by him that did not meet the well-nigh prohibitive conditions it contains. We believe it is not an exaggeration to say that there is no general demand for such a measure, and for men with no knowledge of the subject to undertake to legislate on the seed business, is as ridiculous as for the same men to lay down rules and regulations governing the conduct and methods of astronomers. It seems that eternal vigilance is the price of being able to transact business without interference of ill-considered and ignorant legislation.

Unfair to New England

Knowing the facts regarding New England nursery stock and the extreme care that has been exercised to keep it free from infestation by insect pests, and after reading certain recently published articles emanating from nursery centres that would gain a manifest business advantage from any general distrust of New England stock for interstate shipping, we cannot resist the conviction that these articles are not wholly unprejudiced. One, a communication by Barton W. Currie in *The Country Gentleman* for February 22nd was so clearly unjust in its suggestions and insinuations as to provoke a vigorous protest at the meeting of the New England Nurserymen's Association in Worcester last week, as stated in the account of that meeting on another page of this paper. After reading the article in question one might infer that Massachusetts was the original distributing station for all the pernicious insects that now harass the country. Indeed, we think it was in a previous issue of the same periodical that the assertion was made that the leopard moth made its first appearance in this country at Cambridge, Mass., whereas it is a matter of record that this pest was first found at Hoboken, N. J. New Jersey and Long Island share the honor (?) of first entertaining the San Jose scale and our first acquaintance with the elm leaf beetle began at Baltimore. Unless we are greatly misinformed, no destructive insect other than the gypsy and brown-tail moths are chargeable to New England and, even with these, it is known that both of them have been found in New York State on direct shipments from Europe, their discovery and eradication being unquestionably due to the wide publicity and warnings given out by Massachusetts authorities. Massachusetts has fully realized her responsibilities and has spent vast sums of money, both public and private, to exterminate these unwelcome visitors on her own territory and to prevent their spread beyond her borders. The result of this well-directed activity is, as was proven at the quarantine hearing in Washington, last fall, that New England nurseries are the cleanest in the country. We feel sure that the publishers of the journal above referred to would not knowingly admit anything to their columns inspired by a malicious purpose. Yet the statements as published are either that or they are born of inexcusable ignorance of the facts. Either way, a reputable industry with an investment of millions of dollars has been grievously abused and misrepresented.

A Menace to the Florist

The news from Cincinnati to the effect that one of the large Catholic parishes in Southern Ohio has announced that in the future "no funerals to which flowers are permitted to be sent will be permitted in the church" places an issue up to the florists' trade, which, if permitted to become generally effective will mean a decided curtailing of one of its principal sources of revenue.

It is only about a year ago that one of the leading Jewish charities of this country advocated that the money usually spent for flowers at funerals be contributed to charity to help the living. This, however, was merely a suggestion and no adverse effects have thus far been felt by the florists resultant therefrom; but this church order is reported to be mandatory and prohibitive, and the statement comes from one of the parish managers, that this is the beginning of a nation-wide movement to eliminate flowers from funerals.

This action should certainly arouse the progressive florists, including those directly and indirectly interested in floriculture in a commercial way, to the absolute urgency of a concentrated organization within the florist industry to counteract the adverse influence of such an order. It is not a condition that can be coped with by local publicity committees, for it would not be a local, but, as stated above, a nation-wide movement if it persisted.

Local publicity committees under a proper head, such as a national bureau to govern them, could be developed into strong forces for good in their respective communities, but no committee constituted of florists, seedsmen, suppliers, etc., could ever be found sufficiently capable to stem the effects that a church movement as the one referred to, would have on the public. It will require a man on the job who has had practical experience and who knows the publicity game from A to Z to instigate a country-wide public sentiment against abolishing the time-honored custom of burying our dead with flowers and thus making any attempt of church or charity to abolish it unpopular.

There is no necessity for the florist industry to experiment as to how it can best obtain this publicity essential to protect its interests and to further develop its business. There are established policies now employed by much larger industries which have been proven productive of great results. The florist industry can benefit by these successes, if it will but investigate and adopt these tried and tested methods. The time is most opportune and the publicity most needful. The subject is of such vast importance to the entire florist industry that a special session should be given up to it by the S. A. F. during the week of the International Flower Show with a view of formulating some definite plans for immediate action.

My interest in this is not inspired by any philanthropic motive. The market for my products is the florist's trade; an increase in that business means gain to me, and decrease means loss, so that the interest I manifest in publicity may even be regarded as mercenary. For the good I expect to derive from it, however, I am quite ready to come across with my share to make up an appropriation to set the wheels in motion at once and no doubt there are many more willing to do likewise if the opportunity is presented to contribute to a plan which will give promise of real achievement.

CLUBS AND SOCIETIES

NEW ENGLAND NURSERYMEN'S ASSOCIATION.

The first annual meeting of the New England Nurserymen's Association was held at Horticultural Hall, Worcester, Mass., Tuesday and Wednesday, February 25th and 26th, 1913.

Promptly at 1.30 o'clock, Tuesday afternoon, President Manning called the meeting to order and delivered his address, which was full of practical suggestions for the good of the organization. After the appointment of several committees the first subject on the program was then taken up, Dr. H. T. Fernald, State Nursery Inspector in Massachusetts, giving a vigorous and practical address on the Laws, Rules and Regulations governing Interstate Shipments and Importations of Nursery Stock as related to the New England States, and particularly as to what is known as the "quarantined district." He was followed by Dr. W. S. Regan, who is in charge of the inspection work in Massachusetts, who stated that eighteen new pests had been received on imported stock so far this season.

Dr. Fernald gave a very interesting account of the hearing which was held before the Federal Horticultural Board, at Washington. Messrs. Burr and Hoyt gave an account of the inspection work in Connecticut. Messrs. Clarke and Groaton spoke for Rhode Island and Mr. A. P. Horne for New Hampshire. In the discussion which followed, it was brought out that New England seemed to be unduly advertised as a section of the United States where all kinds of pests originate, and it was recommended that steps be taken to counteract this injustice. Dr. Fernald was asked to assist, and it was moved that the president appoint a publicity committee to take up the matter and endeavor to influence the agricultural press in our behalf. W. H. Wyman, North Abington, Mass., E. L. Coe, New Haven, Conn., and Daniel A. Clarke, Fiskeville, R. I., were appointed such committee.

At 4.00 o'clock, H. P. Kelsey of Salem, Mass., spoke on "New England Transportation Problems." He gave a good description of the way shipments are being handled by railroad and steamship lines, both in and outside New England and showed how the present system of moving and tracing freight shipments is gradually breaking down. A spirited and profitable discussion followed.

At 6.00 o'clock the annual dinner was served at Hotel Warren. At 8.00 o'clock, a goodly number assembled at Horticultural Hall to hear Ernest L. Coe, of New Haven, Conn., give his illustrated lecture on Japan, the public being invited.

On Wednesday morning the election of officers for the ensuing year resulted as follows: President, Harlan P. Kelsey, Salem, Mass.; vice-president, John R. Barnes, Yalesville, Conn.; secretary, Charles Adams,

Springfield, Mass.; treasurer, V. A. Vanicek, Newport, R. I.; executive committee, the officers above and W. W. Hunt, Hartford, Conn., C. H. Groaton, Providence, R. I., and A. P. Horne, Manchester, N. H.

Invitations to hold next meeting were received from Worcester, Mass., and Hartford, Conn. It was voted unanimously to hold the next annual meeting at Hartford, Conn., in February, 1914.

Daniel A. Clarke, Fiskeville, R. I., then gave his paper on "New Introductions and Plants Nurserymen Should Grow." Mr. Clarke gave a list and description of many new trees and shrubs which have been tested out at Arnold Arboretum, and of some recently introduced from China by Mr. Wilson. John R. Barnes, Yalesville, Conn., spoke on "Winter Storage Houses." At the afternoon session, Stephen Hoyt, New Canaan, Conn., presented the subject of "Moving Large Trees," with illustrations of his machines and appliances. V. A. Vanicek, Newport, R. I., took Mr. Stevens' place on the program, and spoke on the subject of "Propagation." Resolutions were passed thanking the Worcester Horticultural Society and Mr. Breed, its president, for courtesies extended; Mr. Coe, for his entertaining lecture, and the retiring officers for their services.

CARNATION NIGHT AT MADISON, N. J.

The Morris County Gardeners' and Florists' Society will hold their Annual Carnation Night on the evening of March 12th at their meeting rooms in Madison, N. J. This has been a big night with us for the past ten years, and we are trying to have this one better than ever. We expect some member to read an essay on Carnation Cultivation, and all the growers here are going to show the standard varieties. We would appeal through HORTICULTURE to the introducers of novelties to send us some. Let our gardeners and florists as well as the public see them just as they are; 1913 has a grand list of candidates. Let us have all of them we can, here. Send in care of C. H. Totty, Madison, N. J., and a dozen of us will get to work and put them up to the best advantage.

EDWARD REAGAN, Sec'y.

ELBERON HORTICULTURAL SOCIETY.

At the regular monthly meeting of this Society held on Monday, March 3rd, the exhibits were very fine and made quite a large display. A very interesting paper was read by William Turner of Oceanic, N. J., on "The Culture of Orchids," an interesting discussion following. Exhibits and awards were as follows:

Geo. Masson—tulip Pride of Haarlem, 90; Wm. R. Seymour—lily of valley, 87; Chas. O. Duncan—carnation White Enchantress, 75; Chas. Russell—stock Queen Alexandra, 80. Certificates of culture were awarded to D. C. Kelly for gardenias and Frank Eddington for Amaryllis; also a certificate of merit to Wm. R. Seymour for white seedling carnation.

WM. R. SEYMOUR,
Assistant Secretary.

FLORISTS' CLUB OF PHILADELPHIA.

The regular monthly meeting of the above club was held on the 4th inst., and was one of the most notable of the season. It was "president's night" and the president, J. Otto Thilow, made a stirring and inspiring address to the members, and also gave them one of his stereopticon lectures about one of his recent journeys. He also provided refreshments as a crowning compliment to the evening's entertainment. The attendance of the members, many of them accompanied by their women folks, was large and a deserved compliment to one of the best presiding officers the club has ever had—and they have had some very distinguished gentlemen in the chair during the past twenty-five years.

A committee was appointed to get up a party for "Pennsylvania Day" at the National Flower Show—Adolph Farenwald, Samuel S. Pennock, John Burton, Dennis T. Connor, John Westcott and Edward Reid. Committee on transportation for the Minneapolis convention was also ordered appointed at once; but the personnel of same has not yet been announced.

Among the interesting exhibits were a fine vase of Milady rose from A. N. Pierson, Cromwell, Conn.; one flower of Juliet rose, from S. Mortensen, Southampton; vase of Mrs. Russell rose from Alex. Montgomery—all of which were shown by the Pennock-Meehan Co. Vase of Scarlet Wonder Carnation from H. D. Rohrer, Lancaster, Pa. From Scott & Son came four fine exhibits: namely—Irish Fire Flame, Double Pink Killarney, Double White Killarney and Killarney Brilliant. Mignonette and Easter lilies were shown by Hoebl and Faust.

Our opinion of all of the foregoing has already been published in your columns with the exception of the Juliet rose from Mortensen, the Scarlet Wonder Carnation from Rohrer, and Killarney Brilliant from Scott. As to Juliet, it is a pink with darker center, rather flat in formation, very full, foliage remarkably distinctive; looks as if it had rugosa blood in it. Further than that—who can tell, from one flower!

Rohrer's Scarlet Wonder certainly shows up splendidly in artificial light. Well formed flower, pure in color, fairly stiff stem of good length, medium as to size. There seems nothing phenomenal about this—yet it may be a fine market variety—one of what they call the "bread and butter" sorts. There is need of something of the kind to help out Beacon which has become so lazy and unprofitable of late. Killarney Brilliant I have heard so many good words about that I think I had better not commit myself this time—until I have seen more of it. It will not be sent out until 1914 or 1915. You see how careful I am with those dollar-a-word opinions HORTICULTURE pays me for. London papers please copy.

G. C. W.

COOK COUNTY FLORISTS' ASSOCIATION.

At the meeting of the Cook County (Ill.) Florists' Association, February 20th, there was a fine exhibition of carnations. Among them were the following: William Eccles, from Scott Bros., although injured in transit made a favorable impression. Lady Northcliffe, from same exhibitor, was greatly admired and was given a club certificate. Seedlings, from James Aldous & Son, Iowa City, Ia., looked promising. Seedlings, from A. Anderson, Moline, Ill., one fine scarlet receiving a club certificate and the others being highly complimented. Seedlings, from Blackman Floral Co., Evansville, Ind., one being given a club certificate. Northport, from J. D. Cockcroft, awarded club certificate. Seedling, No. 246, from Chicago Carnation Co., Scott shade of pink 89 points and certificate of merit; *The Herald*, by this firm, showed up very fine. Spencer sweet peas, from A. F. Amling & Co., best ever shown before the club. Rose Mrs. Charles Russell, from Waban Rose Conservatories, Natick, Mass., and carnation Philadelphia, arrived one day too late but were shown at the store of the Chicago Carnation Company and created quite a sensation.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The club held a field day with W. W. Edgar Co., Waverley, on Saturday, March 8, 1913. Members and friends took train in Cambridge subway, leaving Park street at 2 P. M.

At the regular club meeting on March 18, Edwin Jenkins of Lenox will lecture on "Sweet Peas," and their culture outdoors. There will be fine exhibits of sweet peas on this occasion. Matters pertaining to the coming S. A. F. International Show in New York will come up, as well as other business of importance.

W. N. CRAIG, Secretary.

CLUB AND SOCIETY NOTES.

The Englemann Botanical Club will hold its regular monthly meeting on next Monday night, March 10, at the Missouri Botanical Garden, St. Louis.

The Retail Florists' Association of St. Louis will meet on Monday night, March 17th, when F. H. Weber will read a paper on "The Daily Routine Work of a Retail Flower Store."

The spring show of the Pennsylvania Horticultural Society will open March 18th, continuing during the 19th and 20th, at Horticultural Hall, Broad and Locust streets. Prize lists and other information may be obtained of David Rust, secretary.

The Florist Club of St. Louis will hold its monthly meeting on Thursday afternoon, March 13, at 2 o'clock. The Carnation Exhibition will be held the same day at 1316 Pine street and will be attended by the members after the meeting. Growers of new varieties would do well to send a few blooms.

The annual spring show of the Massachusetts Horticultural Society, to be held March 14-16, has up to date

received more entries than ever before and every promise is given that it will eclipse those of former years. The entries thus far include practically all the big private estates as well as the professional growers. The First Corps Cadet Orchestra will furnish the music.

An excellent paper on "The New Carnations," was read at the last meeting of Lancaster County (Pa.) Florists' Club by Elmer Weaver. C. Akehurst & Son, Cottage Gardens Co., E. G. Hill Co., and Henry Rohrer all exhibited seedlings. Among the visitors were Walter Mott, representing Benj. Hammond, Fishkill, N. Y.; C. U. Liggitt, representing S. S. Pennock-Meehan Co., Philadelphia, and L. I. Bolton, Holtwood, Pa.

The ninth annual convention of the Canadian Seed Growers' Association will be held at Ottawa, Ont., Thursday and Friday, March 6th and 7th. The programme includes papers on "Thickness of seeding in cereal grains," by Prof. C. A. Zavitz, O. A. C. Guelph, Ont.; "Statistics on the Production, Selection and Cleaning of Seed on Canadian Farms," by C. F. Nunnick, Agriculturist to Commission of Conservation, Ottawa; "Results of two years' work in testing Field Root Seeds of Commerce to prove genuineness of stock," by E. D. Eddy, Seed Branch, Ottawa; "Methods of improving Seed supply of Field Roots and Vegetable crops in Canada," by G. H. Clark, Seed Commissioner, Ottawa, and "The production of Garden Vegetable Seeds in Canada," by W. T. Macoun, C. E. Farm, Ottawa, Ont.

E. W. McLellan of Burlingame, Cal., was a guest at the meeting of the Horticultural Club of Boston at the Parker House on Wednesday evening, March 5. Peter Fisher read a carefully prepared paper on "The Carnation: Its History and Development," and James F. M. Farquhar gave an account of his recent trip abroad. Mr. McLellan entertained the membership with a pleasing and instructive talk. Mr. Fisher showed a superb vase of his great new carnation *Gorgeous*, also blooms of a pink novelty which will be the carnation sensation for next season. William Sim contributed a fine show of sweet peas. Mr. Farquhar showed a plant in bloom of a new hybrid azalea—*ledifolia* × *Kaempferi*. In the absence of the president of the club, J. K. M. L. Farquhar, Wm. J. Stewart acted as chairman.

A SIGN OF SPRING.

"Still lie the sheltering snows undimmed
and white,
And reigns cold February's silence still;
No sign of spring, save that the catkins
fill,
And willow stems grow daily red and
bright."

—H. H. Jackson.

BUT—

The annual opening at New York's plant auction rooms, 42 Vesey street, takes place this year on Tuesday, March 11. The plant buying contingent will be there in force and the veteran auctioneer, W. J. Elliott, will swing the hammer at the behest of the enterprising purchaser. Give him the wink.

During Recess.

International Flower Show Bowling Tournament.

A meeting of the bowling committee of the National Association of Gardeners in charge of the National Gardeners' and Florists' Bowling Tournament was held at the Murray Hill Hotel, New York City, on Tuesday afternoon, February 25th. The following members were present: John Dodds, Wyncote, Pa.; William Robertson, Jenkintown, Pa.; James Stuart, Mamaroneck, N. Y.; John Everitt, Glen Cove, N. Y.; A. Bauer, Deal, N. J.; President William H. Waite, Yonkers, N. Y., of the National Association of Gardeners, and Secretary M. C. Ebel, of Madison, N. J., were also present.

All arrangements were completed to hold the bowling tournament on Thumm's bowling alleys, Broadway and 31st street, New York, on Wednesday, April 9th. One entire floor, consisting of 12 alleys, has been engaged and additional alleys reserved on the next floor if they are required. The entire day will be given over to the tournament. As has already been reported, the bowling will be open to members of the Society of American Florists and members of the National Association of Gardeners. Teams of three men, members of any local florists' or gardeners' society or club, and members either of the N. A. G. or S. A. F. will be eligible in the team tournament. Some of the members of the committee reported that they have had advice from several southern and western cities that local club teams are practicing to enter and it is the hope of the association that every local society, or club, will be represented by a team.

President Waite, of the N. A. G., offers a piece of silver, value of \$50, as a sweepstake prize, to be competed for by the three members of the S. A. F. and three members of the N. A. G. making the highest scores of the tournament. Ex-President Logan offers a silver cup for the greatest number of strikes made in the tournament in three games, the sweepstake contest excluded. Secretary Ebel offers a silver cup for the highest score made in the tournament, the sweepstake contest excluded. Treasurer James Stuart offers three prizes of the value of \$30, for the winning team of three men, members from a local gardening or florists' club, and members of either the N. A. G. or S. A. F. A silver cup is offered for the highest number of spares in the tournament in three games, the sweepstake contest excluded. A long list of prizes is offered for the individual tournament to which the committee expects to add considerable before the event.

Everything indicates that the tournament, which will occur during the week of the International Flower Show in New York, will be an interesting affair. It will probably bring ers among the gardeners and florists than were ever before gathered together in a bowling tournament.

Further information, if desired, can be obtained by addressing M. C. Ebel, Secretary of the N. A. G., Madison, N. J.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Officers—President, J. K. M. L. Farquhar, Boston, Mass.; vice-president, Theodore Wirth, Minneapolis, Minn.; secretary, John Young, 54 W. 28th St., New York; treasurer, W. F. Kasting, Buffalo, N. Y. Next convention, Minneapolis, Minn., Aug. 19-22, 1913.

For Full Information, Schedules, Space for Trade Exhibition, etc., write to John Young, Secretary and Manager for Trade Exhibition, 54 West 28th Street, New York City.

NEWS FROM THE CONVENTION CITY.

The officers and board of directors of the S. A. F. and O. H. met in executive session at the Radisson Hotel, Feb. 25th and 26th. The meeting was called to order by President Farquhar promptly at 10 A. M. the first day, and by adhering strictly and faithfully to its work, the board was able to complete its duty by the evening of the second day. All members of the board were present with the exception of Secretary John Young, who was detained in New York through illness, Mr. Geo. Asmus of Chicago acting as secretary protem. Every member seemed to be well pleased with the facilities offered through the selected convention hall, grounds, hotel accommodations, other local conditions and advantages.

At 7 P. M. of the second day the Twin City florists tendered their welcome visitors a banquet at the Radisson Hotel, which was a very enjoyable affair; short remarks from every one present, which were full of useful suggestions, fine humor and good fellowship, kept all together until nearly midnight, when it became necessary for members of the board to leave to make midnight train connections for the East.

All participants felt the spirit displayed at the meeting from beginning to the end is a sure sign of a successful convention, and everybody is going to work to bring such results about. The following were present at the banquet:

Officers and directors of the S. A. F. and O. H.—President John K. M. L. Farquhar, Vice-President Theodore Wirth, Secretary (John Young), by Geo. Asmus, protem, Treasurer William Kasting. Directors—E. Allan Peirce, Harry A. Bunyard, C. H. Totty, John A. Evans, August Poehlmann, Thomas Roland, Richard Vincent, Jr.

Twin City Florists—Wm. N. Steel, H. Nicholson, C. N. Ruedlinger, C. A. Bosson, Louis Boeglin, S. D. Dysinger, O. J. Olson, E. P. Holm, L. L. May, Hugh Will, A. S. Rice, Henry Will, O. C. Swanson, G. A. Will, C. F. Rice, Mr. Fred Busch, A. Klinkenberry, J. A. Ridgway, T. Commandros, Louis Danckik, L. G. Boughner, L. F. Nordeen, Mack Martin, John Rovik, Thomas

S. A. F. EXECUTIVE OFFICERS AS THEY LOOK TO THE WESTERN EYE.

Hall, Walter Pier, Hans Rosacker, S. A. Jamieson, O. N. Carlson, W. D. Desmond, R. A. Latham, J. G. Taylor, A. Lauritzen, C. E. Schaffer, Max Kaiser, LeRoy Cady, A. F. Longren, Wm. N. Bofferding.

INTERNATIONAL FLOWER SHOW.

Grand Central Palace, New York, April 5-12.

With the opening of the International Flower Show only one month away, the management and the various committees are, naturally, most active in their work of preparation for the big event.

Wm. Duckham, Madison, N. J., has been appointed manager of the competitive section of the show, and his appointment meets with the hearty approval of the trade. He is a man of wide acquaintance in all branches of the florist industry, as well as in private circles, and as manager of this most important section of the exhibition he is very acceptable to both commercial and private interests. He has had considerable experience in staging exhibits, his work in this direction during the past 15 years at the shows of the Morris Co. (N. J.) Gardeners' and Florists' Society being particularly commendable.

Some changes have been made in the dates of staging exhibits in certain sections of the show. Exhibits in Division F, which covers retail florists' rose displays, will be staged on Saturday, April 5, instead of Monday, April 7. Division G, covering collections of roses and open to private gardeners and amateurs only, will also be staged on April 5, instead of April 7. Division B, covering cut roses, will be staged on April 7, instead of April 5. These divisions form part of the section allotted to the American Rose Society. A supplementary schedule has been published and sent out, in which these changes are noted, as well as many new prize offers.

The judging of the exhibits staged on the opening day will be completed prior to the formal opening of the show. Seventy judges will pass on the exhibits during the afternoon, the judg-

ing to commence promptly at 3 o'clock, and by 6 o'clock, when the doors open, cards will be found on all the exhibits. The corps of judges will include representative men from all sections of this country, and 12 or more from England and Holland.

An enormous attendance is expected on the opening night, and it can be relied upon that the exhibition will be entirely in order and in readiness for the public.

Those in the trade who intend making exhibits in the trade exhibition, a feature of the show, should lose no time in arranging for space. Secretary John Young can still provide some excellent locations and will be pleased to furnish any information regarding accommodation on application to him at 54 West 28th street, New York.

J. H. PEPPER,
Chairman Publicity Committee.

EASTER AT EDGAR'S.

One of the most attractive plant growing establishments in the Boston district is the W. W. Edgar Co. place at Waverley. Herman Bartsch, the shrewd manager, can point with pride to the display of Easter stock when the Gardeners and Florists' Club visits his domain on Saturday, 8th inst., in accordance with time-honored annual custom, for it never looked more promising for the big holiday. Formosa lilies have been blooming ever since Jan. 10, but the Easter crop is giants mainly and they are nice and healthy. A practice here is worth noting—that of placing the short-stemmed lilies in the back instead of the front of the bench, where they are induced to stretch up and lengthen their necks in order to look over the heads of their long-legged fellows. There are lots of roses here, Tausendschon leading in Ramblers and, among the bush classes, American Beauty makes an ideal 6-in. pot plant with lots of buds. Two thousand pot-grown hydrangeas for May sales are in cool quarters ready to take the place when vacated by the Easter lilies. Genistas in all small sizes—neat little plants in short pots—are high-liners this year.

LILIES FOR YOU

Notwithstanding the Early Date of Easter Our Lilies will be of The Same High Grade that we Have Been Furnishing in Years Past

We Pack in Boxes of Twenty-five Pots Each, Nicely Crated over the Top. Our Packing is Undoubtedly the BEST IN THE UNITED STATES. Average 5 Flowers to the Plant. One Extra Plant, gratis, in each Crate.

Prices in case lots, 12c. per Flower or Bud. ORDER EARLY so that we may be able to Ship Them Direct from the Greenhouses Without Rehandling.

THE IRIS.

This is a large family with 170 native varieties and these have been crossed and improved until the collection, taken together, are the most beautiful of any of the flower family. They have been overlooked but they are the coming flower. Why? First—Their fascinating and alluring loveliness. They are named from the Goddess Iris, the rainbow personified, who combined the beauty of heaven and earth in their matchless robes. It would seem as if she gathered the glory of the sunset, the beauty of the sun mantles, the tinting and coloring and the shading which plays on mountain and plain and wove them all in those opaline and iridescent robes with which she has adorned her children. The marvelous veining and tracery and the delicate intermingling of colors give them a charm no other flower possesses. Many of them have a delicious fragrance. Some have a charming reflex like the richest silks which gives them a resistless fascination. In fact when you take a mass of them of a hundred kinds and see them all on dress parade, each vying with the other to see which can put on the most radiant appearance they seem almost human in their efforts to dazzle and attract. But they have this advantage; no gathering of royalty, no efforts of the select four hundred, none of the elaborate trousseaus of Paris can compare with the skill and high art of the great florist as He has adorned the brilliant host to charm the eyes and feed the soul. All the rays and tints and colors of the rainbow are here. The concentrated beauty

of cloud and earth united and blended in a harmonious whole.

Second—They are the best drouth resisters we have. Last season was very hot and dry. Often the burning sirocco winds were blowing fiercely with the mercury soaring above a hundred, only six inches of rain from the first of May until the first of October, and yet we did not lose a plant in 150,000. In digging them in September the ground was as dry as an ash heap but the roots seemed to have gathered and stored the moisture. They were plump and full of life and when replanted grew with great vigor. Beside them the hardy peony drooped and many of the perennials succumbed entirely. This trait must make them the favorites of the semi-arid regions and even in California, the great thirst land where it rains one month and the other eleven months like thirsty beasts of prey pounce upon the fields and suck them dry. Though they repay the best of care they will bear neglect and survive where others would die. Too much water and too much manure are not good for them.

Third—They seem capable of enduring any degree of cold. The Pumila, the German and Siberian families are very hardy. The Japs, though of rare beauty if they can have their own way, are not a success in the West and Northwest. In California they sunburn and in Nebraska they must be kept under a lath screen when they richly reward you with their rare beauty. There are about thirty kinds of the Siberians. The flowers are somewhat smaller than the German but many of them are of winsome beauty. The blue type has blooms of

deep intense blue, borne on strong slender stems like ramrods. Pick them just as they begin to open, and they can be shipped quite a distance. The very deep color blends harmoniously with other tints so they are great favorites with the florists. Snow Queen belongs to this family. It has a beautiful flower of snowy white with golden reflex in the center; it is quite late.

Fourth—The peony is a slow multiplier, and there is no process by which it can be hurried up. If you have a new syringa or spirea or most any kind of expensive ornamental shrub you can multiply it by cuttings, by budding or root divisions; so from one you can soon have a hundred. But you can't hurry the peony; so when a new and rare one is produced of very high price you must wait. No use in trying to push it. It is bound to take its time. Some will double every year, some will take two or three years and the fame of their beauty is growing much faster than they do; so the price mounts higher. We have one that cost \$10, some \$5 and there is not much prospect of their being lower, for their fame seems to grow faster than they do. But it is not so with the Iris. In the first place they are not as expensive. A fine collection can be had at about 25c. each or less. The costliest are about \$1. But, remember, on the average they increase from one plant to ten in two years. I have divided thirty from one in that time. But that is above the average. From this rapid increase from ten you soon have one hundred and so on. How stingy people are when it comes to home adornment. Some expect

two or three little flowers to cheer up a 160-acre farm. They can't do it. A man builds a fine house and furnishes it with costly furniture and carpets. But the moment he goes out of doors he must have the cheapest of trees and shrubs and a dinky little bed of flowers. The home should be a picture set in a worthy frame, with all the embellishments which art and skill can give it.

Fifth—The Iris is divided into four great divisions:

The Rhizomatous.—These have rhizomes spreading out from the center, something like potatoes. These are separated and planted singly. Some wish to plant large clumps. This is not a good plan for the roots prey on each other and soon exhaust the soil. This group is the German and those closely related.

The Tufted are the Siberian and the Japanese. The roots grow in tufted masses. If you look closely you will find that there are individual plants all tied together. You pull these apart for planting or selling.

The Bulbous are like tulips. These are the Spanish, the English and the Juno varieties. With us they are not satisfactory. We cannot depend on them.

Then there are the Fingered Iris. These include the Hermodactylus, the Acorus or Jacob's sword and the Gigantea, also the Longipetala. These are later than the other sorts but are of a hardy tribe and are good multipliers.

Sixth—Time of blooming. First come the hardy little Pumilas and the dainty Verna which blooms with the tulips. Then the Pumila hybrids. Then

the Germans which vary much in their time of blooming. Then come the Acorus and the Gigantea and lastly the Japanese, so you have flowers for about three months.

Seventh—The Iris as cut flowers. Cut your Iris with the dew on them. Be careful not to bruise them. If you wait until they are in full bloom they are so delicate they do not ship well. Cut them just as they are opening and they are all right. Put them in water and they will open with more delicate bloom than if left out of doors. They are usually on hand for Decoration Day. As in the northern states the peony is a little tardy at that time you have a splendid flower to take its place. Though the individual flower may last but a few days nature has arranged for a succession of bloom. One fades and another is ready to take its place. I have thrown them on the packing house floor and watched them. The top one blooms and fades, and the one below takes its place. That goes, to be followed by another. Vitality seems to be stored in the stem to keep pushing them. Of course when placed in water the process will continue longer.

York, Neb.

C. S. HARRISON.

THE IRIS NEXT TO THE ORCHID.

Rev. C. S. Harrison of York, Nebr., has received the following interesting letter from Dr. Bessey of the University of Nebraska:

My dear Mr. Harrison:—

What an admirable little book you have made on the Iris! I have been looking it over as I have had a little time now and then, and am wondering at the amount of instructive matter you have brought together in it. I am going to commend it

very highly to my friends who like flowers; and of all the flowers that are grown, it seems to me that the Iris is one that should stand next to the Orchid. In fact the Iris is the flower that is *trying to be an Orchid*.

Perhaps you do not realize as well as a botanist does how near to the Orchids the Irises have come. Of course an Iris is not an Orchid, but it is well on its way up the line of development which eventually culminates in the Orchid. Again congratulating you upon the publication of this admirable booklet, I remain,

Very truly yours,

CHARLES E. BESSEY.

This is a very strong commendation for the Iris and for Mr. Harrison's book, from Dr. Bessey, who, since the death of Botanist Gray, has been called the leading botanist of the United States. Dr. Bessey is now making a study of the Iris.

PUBLICATIONS RECEIVED.

The Final Premium List of the Horticultural Society of Chicago, for the Spring Flower Show of 1913, has been issued and copies may be obtained from R. J. Haight, secretary, 440 So. Dearborn St., Chicago. This is the 21st annual exhibition and it is scheduled to take place April 1 to 5.

Henderson's Garden Guide, published by Peter Henderson & Co., New York City. This is a 70-page booklet of convenient pocket form, in which are given reliable cultural directions regarding the most generally planted vegetables and flowers. A very complete index makes the book especially useful and handy. Blank pages for making various pertinent notes are inserted in diary form for each day in each month and there are several valuable tables that will be much appreciated especially by the amateur planter.

SMALL FRUIT CULTURE.

At the meeting of the North Shore Horticultural Society Friday, Feb. 21, Wilfrid Wheeler of Concord, Mass., spoke on "Small Fruits," with stereopticon illustrations. Mr. Wheeler described the tools, preparation of the land and setting of strawberry plants by different methods. The hill system as described was recommended for the production of first class fruit and by setting in check rows to wheel hoe two ways the labor is reduced to a minimum. Mr. Wheeler showed slides of different varieties of strawberries and described their characteristics. At Concord the large coarse growing va-

rieties as Marshall, Brandywine and Golden Gate are found to be of best flavor. The smaller symmetrical berries are not as good quality. The speaker gave Marshall first place as an all-round home garden berry and for forcing. The Skinner irrigating system was described and recommended as the easiest and most economical for lawns and gardens.

Raspberries, blackberries, gooseberries and currants were also discussed. The red raspberries should be pruned to four feet, as the best fruit is on the low laterals. Stable manure is best for small fruits supplemented with bone meal or ashes. For San Jose scale, spray in fall with soluble oil and in

spring with lime-sulphur. The oil goes beneath the surface and gets the scale that may be covered in cultivating. Paris green is preferable to arsenate of lead as arsenate of lead sticks to currants and gooseberries too long. Hellebore is also good.

Refreshments were served after the meeting.

Obituary.

E. L. Remier.

E. L. Remier, one of the pioneer residents of California and believed to be the oldest florist in the state, died in San Francisco, Cal., on Feb. 13, following an operation several days previous. He is survived by his second wife and two daughters.

J. A. Bolgiano.

Joseph Ault Bolgiano, for many years head of the seed firm of J. Bolgiano & Son, of Baltimore, Md., died on March 1, at the home of his son-in-law, Dr. J. Burch Joyce, in the 77th year of his age. Mr. Bolgiano had been in failing health for a long time, due to a complication of diseases.

A native of Baltimore and interested in a number of financial, religious and philanthropic institutions, Mr. Bolgiano was widely known. He was the second president of the Young Men's Christian Association, organizer of the Greenmount Avenue Methodist Episcopal Church, a director in the Free Summer Excursion Society, active in Sunday School work, and a director in several financial institutions. About fifteen years ago he retired from the seed business, which has been in the Bolgiano family for 95 years. It was established by Mr. Bolgiano's grandfather. His father became the head of the firm, and he succeeded his father. The business is now conducted by two of his sons. Mr. Bolgiano spent 50 years in the business. He was vice-president of the American Seed Trade Association at its second and third conventions.

The funeral took place on Tuesday, March 4, and burial was at Greenmount Cemetery.

PERSONAL.

C. A. Kuehn of St. Louis has been on the sick list all of the past week.

Frank X. Gorly and wife of St. Louis are spending this week at Hot Springs, Ark.

Arthur Senn, who has been tree warden and forester in the employ of the Board of Park Commissioners, Milwaukee, Wis., resigned March 1st to go into business for himself.

Arlo Hubbard, with the W. W. Barnard Co., Chicago underwent a successful operation for appendicitis a week ago. He is the son of Mr. and Mrs. C. E. Hubbard of Topeka, Kan., and Mrs. Hubbard is with him.

Dr. George T. Moore, general director of Shaw's Garden, announces that the Board of Trustees has appointed Dr. Jesse Moore Greenman as curator of the herbarium. Dr. Greenman is a graduate of the University of Pennsylvania and Harvard and holds a Ph. D. degree from the University of Berlin. He also has published several books on botany.

New York visitor—P. Welch, Boston, Mass.

Boston visitors—Wm. Plumb, Bound Brook Nurseries, Bound Brook, N. J.; J. R. Fotheringham, representing F. R. Pierson Co., Tarrytown, N. Y.; A. E. Thatcher, Bar Harbor, Me.; G. R. Hampton, representing Niedinger,

BODDINGTON'S QUALITY GLOXINIAS

GLOXINIA ERECTA GRANDIFLORA

This popular flowering plant is coming into greater vogue than ever, not only as a pot plant for house decoration, but also for cut flower purposes. Our strains of Gloxinias are the true erect-flowering type, grown by a specialist in Europe.

GLOXINIA ERECTA SUPERBISSIMA

Having during the past season been requested to secure some specially fine Gloxinias for exhibition purposes, we have made arrangements with a noted Gloxinia specialist in England to reserve for us some of the most distinct types. The bulbs are not so large as the Named Varieties, but this is a characteristic of most Erecta superbissima varieties.

BODDINGTON'S IDEAL PRIZE GIANT MIXED. Great variety of superb colors.

CYCLOPS. Velvety cormine, shading to a broad white border, throat dotted with dark red.

DUCHESS OF YORK. Flowers of a rich dark blue, each petal being edged with a broad band of white. A most striking and lovely variety.

SPOTTED HYBRIDS. Whenever exhibited, they create intense interest. The delicate markings, in an infinite variety of forms, add a special charm to the flowers.

SUTTON'S WHITE. A giant white flowered variety.

DUKE OF YORK. Large scarlet Gloxinia with deep white edge to each petal. A magnificent flower.

HER MAJESTY. This exquisite Gloxinia is still unsurpassed by any other white variety. The flowers are as pure as newly fallen snow, and are borne on short stems, just clear of the elegantly recurved foliage.

READING SCARLET. In color this is the most brilliant Gloxinia in existence, being an intense glowing scarlet variety of the true Crassifolia habit. An admirable companion to Her Majesty.

GOLIATH. Violet and white, fine variety.
Per doz. \$1.50, per 100 \$10.00

Boddington's Quality Tuberous-Rooted BEGONIAS

Single-Flowering Tuberous-Rooted

For planting in beds and where color effect is desired. Our stock of these bulbs will be found true to color and free from mixture.

Crimson	Rose White, Pure	Salmon	Scarlet Yellow	Pink, Light Copper	Orange
Large bulbs measuring 1 1/4 inches and upward, separate colors or all colors mixed, 35 cts. per doz., \$2.25 per 100, \$20.00 per 1000; extra large bulbs, 1 1/2 inches and up, same colors as above, 40 cts. per doz., \$2.75 per 100, \$25.00 per 1000.					

Double-Flowering Tuberous-Rooted

These can be depended upon producing 100 per cent. double flowers and contain very large and choice varieties.

Crimson	White, Pure	Yellow
Scarlet	Copper Bronze	Orange
Rose	Salmon	Light Pink

Large bulbs measuring 1 1/4 inches and upward, separate colors or all colors mixed, 50 cts. per doz., \$3.50 per 100, \$30.00 per 1000; extra large bulbs, 1 1/2 inches and up, same colors as above, 65 cts. per doz., \$4.00 per 100, \$35.00 per 1000.

Single Crested Begonias

This strain of Begonias ranges in all colors--salmon, pink, white, yellow, copper and scarlet; petals carry on the upper side a crested-formed cockscomb. Separate colors, 80 cts. per doz., \$6.00 per 100; mixed, 75 cts. per doz., \$5.50 per 100.

Single Frilled Begonias

These are of the finest types of the single Begonia, the petals being heavily frilled on the edges. To color, 10 cts each, 65 cts. per doz., \$5.00 per 100; all colors mixed, 60 cts per doz., \$4.50 per 100, \$42.50 per 1000.

Single Begonia Bertini

A beautiful bedding Begonia, brilliant vermillion flowers of rare beauty. As a bedder it stands unrivaled. 80 cts. per doz., \$6.00 per 100.

Double Begonias

	Doz.	100
Duke Zeppelin. Intense pure vermillion-scarlet.	\$1.00	\$7.50
Lafayette. Rich, brilliant crimson scarlet.	1.25	10.00

ARTHUR T. BODDINGTON

SFEDSMAN

342 West 14th St., NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Reluctant Contracting.

Attention has several times been called to the reluctance of the seed trade to place contracts for their future requirements in seeds. It is all the more noticeable because it is in such marked contrast to the nervous anxiety and haste of a year ago. While probably this applies more especially to peas, yet as far as we can ascertain, it is quite general. We, of course, have nothing but an academic interest in the matter, and simply comment on it as an interesting contrast to a year ago. For a number of years the trade has been looking for a bumper crop of peas as well as other seeds, but they have been as unvaryingly disappointed as those who are looking for the Messiah. No doubt both will come,—but when? There is one point in favor of the waiting game at the present time; that is, the very high contracting prices which are ruling on nearly all lines of seeds, and it looks like a much better gamble to bet on buying Gradus peas after harvest at a less price than the contracting figure when that figure is \$6 or more per bushel. If the price was down \$1 per bushel the short end would not look so attractive. We mention Gradus simply because they represent more nearly perhaps than any other variety the trend of prices on the entire line.

"Free Seeds" Doomed?

One of the best and most comforting bits of news which the trade has read in many moons was the brief paragraph in the daily papers announcing that there would be no more free seeds. We have no details excepting that the Senate struck out the appropriation for the free distribution of garden seeds, and if it will only stand pat this long time imposition on the seed trade of the country will be abolished. All efforts of individuals connected with the Department of Agriculture to prove that the free-seed distribution has been a boon to the seedsmen of the country have been lame and futile. It was only recently that someone, on behalf of the Department of Agriculture, attempted to prove that by buying up surplus stocks and removing them from the market values were left to take a more legitimate course. We believe we showed how utterly absurd this argument was by citing convincing evidence of the fact that so-called surpluses were deliberately arranged for in anticipation of this government order, and if the iniquitous free-seed distribution has received its quietus, there will be a general chorus of amens from the seedsmen of the country. It is earnestly to be hoped that the next Secretary of Agriculture will not, like the present one, foster this outrage, for as a matter of fact during the incumbency of Mr. Wilson the free-seed distribution has grown from

CHESTER, NEW JERSEY

about 11,000,000 to 65,000,000 packages per year, and let it be understood that this was not over Mr. Wilson's protest but with his fostering care and that of his subordinates.

Next Cannery Convention.

The presidents of the three associations,—that of the National Cannery, Machinery and Supplies and the National Brokers, and the secretaries of the three associations, are to meet in New York the second or third week in March and discuss, and so far as possible decide on the city where will be held the next National Convention. There are several bidders. Ultimately, of course, the choice will center on one after which there will be considerable work in drawing up contracts covering the concessions and privileges demanded by the allied associations. When these have been granted and everything put in writing, signed and delivered, the place selected will be made public. We shall endeavor to furnish such information as may be of interest to the seed trade along these lines.

SANTA ANA, CALIFORNIA.

One of the most asinine of the many absurd seed measures introduced of late is a bill before the Tennessee Legislature making it obligatory to state on all package labels the time when germinating qualities of the contents would cease! Unfortunately finite humanity has not yet reached that stage of development when the tenure of life of man, beast, plant or seed can be safely predicted. What is the next stunt?

CHICAGO NOTES.

Henry Wittbold had a large share of the decorations at the Clay Products Exposition at the Coliseum this week.

Fred Manzing has purchased the business of the North Edgewater Floral Company and will continue the business under the old name.

Some of the regular stock of lily of the valley now being cut by J. A. Budlong was noted today and it was fully 16 inches in length with heavy finely colored foliage and large bells. Mr. Budlong is an advocate of the use of only the choicest grade of pips and the results bear witness to the correctness of his judgment.

Visitors: J. D. Slack of Peters & Reed Pottery Co., Zanesville, O.; Miss Kate Harris, Memphis, Tenn.; J. L. Pillsbury, Galesburg, Ill.; Thomas Knight of Knight & Struck Co., New York; Mrs. C. E. Hubbard, Topeka, Kansas; Wm. Griesinger, Ghent, Belgium; Mr. Heacock, Jr., Wyncote, Pa.; E. M. McLellan, Burlingame, Cal.; Chas. Young, St. Louis, Mo.

UTILIZING RUBBISH.

Wake up Mr. Retailer! Lent is well on and this is your opportunity to turn what your clerks call rubbish, into money; this can be done with very little expense; correctly speaking, more time and attention than the actual outlay of cash.

Nearly every retail florist has a cellar or storeroom, where a stock of baskets are kept, and from time to time you are buying new creations which catch the customer's eye. What becomes of the stock remaining from your purchases of last year and two years ago? Are they resting quietly in the cellar never to be disturbed again?

Now here's the point. Let one of your men who is acquainted with the stock get them out and select first those best adapted for the use of Easter plants. There may be a few with broken handles; in this case, if the handles cannot be repaired cut them off, and an application of bronze or an attractive shade of green paint will put the finishing touches to them. Now see the difference between a broken basket and one put in condition. By doing this you have turned dead stock into money.

The old stock of baskets having been put in shape the next thing is to move them. As your stock arrives from the greenhouses you will see, maybe, a poorly shaped genista being uncovered; put it into that gold basket, add a touch of blue ribbon, and see the results. The same with the lilies, azaleas, ramblers, etc., matching the colors so as to get the best color harmony between plant and basket, using a touch of ribbon if the decorator sees fit.

Now comes the small basket. Give this the same attention as the plant basket, and they will move by being arranged with a bunch of violets, lily of the valley or yellow daisies, and by the time your season is nearly over you will be looking forward to the supply house for a new stock, feeling that you have been well paid for cleaning up this so-called rubbish, and promising yourself another profitable trip to the rubbish pile before next Christmas.

MR. STOREMAN.

ROCHESTER (N. Y.) NOTES.

An expenditure of \$12,000 for park driveways was authorized and work will be commenced on as soon as the weather is suitable.

Whilst we are still in the middle of Lent the local wholesalers and retailers have been kept quite busy. Stock is coming very nicely and will be in good shape for the Easter trade.

Invitations have been received by the Rochester Florists' Association to be the guests of the Buffalo Florists' Club, when the representatives of the organization from this city will meet the Buffalonians in a return bowling match.

There is a brilliant display of flowers in the Lamberton Conservatories at Highland Park. A large number of Indian azaleas are now in full bloom. Some tall standard specimen acacias are most attractive. Amongst other plants in bloom are streptosolens, heaths and cinerarias.

Flower Market Reports

Trade is decidedly dull BOSTON again this week. Supplies are coming in heavily and wholesale markets are clogged up with flowers in all lines, American Beauty roses alone excepted. Of these latter there are no good or even passable flowers to be had here. Short stemmed and discolored deformed buds are all that are to be seen. Carnations are perhaps in better running than they were last week, white selling a little higher than the colors. The stock of roses is large and the quality has fallen off noticeably. White Killarney is the best seller at present. Bulb stock, of course, is an unwieldy surplus and sales in job lots are made at figures far below quotations, although at best the latter are unprecedentedly low for so early in the season. Double violets are practically dead stock; nobody cares to handle them and even the singles sell not any too well. Altogether prices are very irregular with no standard of value that can be maintained on anything.

Trade has not been very **BUFFALO** brisk the past week; in fact, another genuine

Lenten week in which there has been too much stock to feel comfortable. The receipts have been heavy on all lines and no scarcity exists. Prices are reasonable and on some things very low which does not encourage the speculators to load up. Carnations have been in good supply and have not sold any too well. There are plenty of fine tulips, daffodils and other bulbous stock.

All kinds of weather, **CHICAGO** except the kind that brings out the buyers, made the last week of February a poor one for sales in general and a record-breaker in the history of violets. Sales of violets have been rather below normal all the season and the demand almost ceased with the coming of the snow, sleet and cold and the stock piled up to unmovable proportions towards the end of the week. Very great concessions were made to move the accumulation but a large proportion went to waste. Sweet peas were tending toward the same end, only the number was much less. Carnations are now including a great many splits and weak-stemmed ones which move off at a big reduction, but the good ones sell well and prices hold firm on them. American Beauties are very scarce in

" " & Spren. (100 Bchs.).....	25.00 to 35.00	25.00 to 50.00	8.00 to 15.00	35.00 to 50.00

anything like a good grade and there is a steady demand for more than the market can supply. All kinds of roses are in good demand for shipping trade and there has been no special weakening in price. Bulbous stock is not quite so plentiful. Snapdragons are coming in and there is a good one of a Killarney pink shade that brings the top price. Stocks also are seen. The usual herald of spring, pussy willows, afford attractive window display for the retailers. All kinds of green are to be had in quantity.

The past week the **ST. LOUIS** market was in a satisfactory condition, so far as buyers of stock were concerned, for anything in season one wanted was to be had in quantities and at prices very much lower than they have been for the past month. Sweet peas are a glut and so are violets and the wholesaler has to dispose of them at very low prices. Roses are becoming

more plentiful each day and the price has dropped. The local shippers say they will be in full crop for Easter. Carnations, too, are away too many for the demand. Bulb stock is now in full crop and of fine quality.

Flower Market Reports

(Continued from page 315)

Things are pretty well demoralized here as to market values. It is not possible to maintain a standard and the wholesale dealers are too glad to see a good buyer disposed to invest, to be at all fussy about the rate they charge him. Quality seems to have retrograded on many items. Roses, carnations, lilies, lily of the valley, etc., are all seen in varying grades of course, but on the average lower quality goods are in evidence than was the case two weeks ago. Beauty roses have petered out all around. Of other roses there is a surfeit, as also of carnations, violets and bulbous material. Orchids, too, are hanging fire although they are freely offered at what would ordinarily be considered very low prices. Some very fine acacia is seen here and there and this is about the only thing that holds up to record figure.

Trade fair to PHILADELPHIA middling. Best sellers probably carnations. These have been more plentiful and average very high in quality. Another good seller was American Beauty rose. This item is still very scarce, contrary to general expectation for so late in the season. Other varieties of roses are quite plentiful especially in the lower grades. There is no great influx in the way of fancies and specials. The best of all just now is the Double-Pink Killarney. Sweet peas are running extra fine and very plentiful. The Spencer forms are now to be seen in limited quantity, which is an additional attraction. Cattleyas are reasonably plentiful but the quality is rather below standard as a rule. Many complaints are being received from buyers who look for the very choicest all the time. Gardenias continue in good supply of excellent quality. Greenhouse-grown daffodils are holding their own as a spring favorite. This happy state of affairs will be short-lived, however, as several small shipments of southern flowers are already to be seen around and it won't be long before these will be in such quantity as to knock the bottom out of the market. Reports all around say violets are selling very poorly.

PUBLICATIONS CONSOLIDATED.

After running for a fifth of a century as an independent publication, the Fern Bulletin has now been merged with The American Botanist. A copy of the new magazine which takes its place has come to us from the publishers, Willard N. Clute & Co., Joliet, Ill. The fact that the Fern Bulletin was the third oldest botanical publication devoted to ferns for most of its existence, has led us to experience a bit of lonesomeness for we confess to a life-long affection for the ferns. But a scrutiny of the new magazine convinces us that the special field which the Fern Bulletin covered so well will not be neglected and so we extend a welcome and cordial good wishes to the old friend in a new dress.

Toronto, Ont., Can.—Grobba & Wandrey have dissolved partnership. Carl Grobba will carry on the business.

Four New Roses Every Grower WILL WANT THIS YEAR

IRISH FIRE FLAME

The dainty new single Rose, trimmest and sweetest little bud ever seen, and well named as to its lovely color. A Dickson seedling of strong, vigorous growth, very free, particularly during the winter; color fiery crimson, shading to a rich orange salmon at the base; foliage a dark green, reverse side of leaf deep bronze; a new departure in Roses, a distinct novelty; beautiful and charming; a favorite wherever shown; nothing to compare with it. March and April delivery.

OWN ROOT, Doz., \$6.00; 25, \$10.00; 50, \$17.50; 100, \$30.00; 250, \$70.00; 1000, \$250.00.
GRAFTED, Doz., \$7.50; 25, \$12.50; 50, \$20.00; 100, \$35.00; 250, \$82.50; 1000, \$300.00.

Mrs. Chas. Russell

A new American pedigree seedling. Of American Beauty size and fragrance; color a lighter cerise that does not fade to blue, but to a lighter rose as the flowers age; a strong, vigorous grower; good, heavy stems; flowers carried erect; no weak necks; no blind wood like Beauty; very prolific, remarkably so considering its size. As tested

in the various shows over the country this Fall, it has proven a wonderful keeper and established itself at once as a Rose of unusual merit, creating a sensation wherever shown and attracting not only the commercial man, but the public as well. Delivery after March 15th.

	Doz.	25	50	100	250	1000
Grafted Stock Only.....	\$7.50	\$12.50	\$20.00	\$35.00	\$82.50	\$300.00

MILADY A strong, sturdy grower, excellent foliage; flowers large and double; opens perfectly at all seasons; similar to Richmond in color, although richer in color in bud form; shape of flower resembles Gen. Jacqueminot; very prolific; good keeper; the coming Red Rose. Grafted or Own Roots, \$30.00 per 100; \$250.00 per 1000.

MRS. GEO. SHAWYER A free-flowering pink Rose; very highly recommended by some of our best Rose growers; has been selling exceptionally well in the New York market this season. Grafted or Own Root, \$30.00 per 100; \$250.00 per 1000.

We guarantee not only the quality of our stock but its safe delivery by express.

Ribbons and Supplies Write us for prices on these and on Supplies. Many new patterns in exclusive Ribbons.

GREEN CARNATION DYE; for March 15th, 50c. per package.

Small shipments can be sent by Parcel Post at purchaser's risk.
